ON THE AIR: K4O CELEBRATES PUERTO RICO FLAG BEARING IN THE LONDON OLYMPICS

On Sunday July 1st 2012, the Puerto Rico Olympic Committee will be celebrating the Flag Bearing of the Puerto Rico Delegation to the Summer Olympic Games in London. To commemorate the event, the Puerto Rico Amateur Radio League will be operating special event station K-4-Oh from the Puerto Rico Olympic Committee headquarters. Actual hours of operation will be 9:00 a.m to 5:00 p.m. on June 30th and 9 a.m to 2 p.m. on July 1st. Both are local Puerto Rico time. More information on this operation is on-line at www.prarl.org. (PRARL)

**

DX

In DX, K6ZRH will be on the air portable DU1 from Palawan Island through June 30th. His operation will be on 40, 20 and 15 meters using SSB. QSL this one also direct only to his home call.

K9EL was on the air as FS/K9EL from St. Martin until June 24th. His operation was holiday style on 80 through 6 meters using CW, SSB and RTTY. If you worked him, QSL to his call book address.

PE1GU will be active as PA6FUN from Ameland Island between July 30th and August 15th. His operation will be on 6 meters only. Modes have not been announced. QSL via PE1GUR, either direct or via the bureau.

ON4QX, will be operational portable P4 from Aruba through July 2nd. Activity will probably be on all High Frequency bands mostly using RTTY. QSL via ON4QX.

An international team of operators plan to visit five islands belonging to Papua New Guinea between October 19th and November 4th. Some of the islands to host their operations include Emirau, Simberi, and Lihir. As we go to air no bands, frequencies or a QSL Manager has been announced.

Lastly, in celebration of the 30th anniversary of the first operation from the Sovereign Military Order of Malta, a group of hams will take to the air using the call sign 1A0C from Santa Maria del Priorato. Their operation will be from July 1st to the 4th on all of the High Frequency bands plus 6 meters. QSLs for contacts with 1A0C can be requested via 1A0Z.

**

THAT FINAL ITEM: THE 12TH USA ARDF CHAMPIONSHIP RESULTS

And finally this week, a hidden transmitter hunt in California has drawn radio direction finding fans from around the country. Newsline's Joe Moell (MELL) K-zero-O-V, who is also the ARRL's ARDF Coordinator, tells us all about it.

--

Fans of on-foot transmitter hunting gathered in the little village of Mt. Laguna, California early this month for the twelfth annual USA championships of Amateur Radio Direction Finding, or ARDF. They came from nine states plus British Columbia, Canada to see who would win the medals and who would be selected to go to the World Championships in Serbia this September. One quarter of them had never been to a national championship foxhunt before.

The big event was sponsored by the Los Angeles Orienteering Club and was organized and hosted by Marvin Johnston KE6HTS. With lots of volunteer help, Marvin set out two challenging championship courses in the forested mountains at 6000 feet elevation, one on two meters and the other on 80 meters, on the weekend of June 1 and 2. In accordance with standard rules of the International Amateur Radio Union, the participants were divided into eleven age and gender categories, so the ones in their 70's didn't have to compete against prime-agers for the gold.

The championship courses were over six kilometers from start to each of the five transmitters and then to the finish. In addition, there was a sprint event to see who could find ten lower-powered transmitters fastest. There was also a foxoring event. That's a new sport that combines orienteering and direction-finding. Competitors were given a map marked with ten circles. When they got inside the area represented by each circle, they could hear a QRP 80-meter transmitter and track it down with RDF. The first to get all ten would win. Before these events, there was a two-day training camp on Wednesday and Thursday, with full-size courses on two meters and 80-meters.

When it was all over, 13 OMs and 6 YLs had received medals to take home with them. For the complete results and photos of these championships, point your Web browser to homingin.com. That's homingin -- as one word --homingin.com. That's also a good place to learn more about bringing on-foot foxhunting to your locality.

For Amateur Radio Newsline, this is Joe Moell K0OV.

--

If you have never been out on a hidden transmitter hunt you are missing one of the most fun aspects of the hobby. If a local club or other group you know of holds these fun events, you might consider joining in and giving it a try. (K0OV)

WIANEWS WEEK COMMENCING JUNE 24 2012.

VK7RRR - Tasmania's D-Star Repeater is On the Air!

VK Winter VHF-UHF Field Day June 23-24

DJ6SI VS. GREECE - THE COURT DECISION

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JUNE 24 2012.

High Power Trial - New LTE Exclusion Area in the Perth Area

As part of on-going discussions with the ACMA by WIA, advice has been
received that a new Long Term Evolution (LTE) trial commenced in Perth
on 1 June in the 700 MHz spectrum segment.

LTE trials are authorised by the ACMA by way of a Scientific Licence to cover
the trial period. The ACMA has advised that no applications from Advanced
licensees for variations to their station licences to operate high power
within a 40 km radius of Midland, Perth would be approved.

Meanwhile, the LTE in the Bendigo region has ended, however the Scientific
Licence that authorises this trial does not expire until September 2012.

(WIA.ORG.AU)

One of the world's most powerful supercomputers is planned for Perth to process vast amounts of data being collected by radio telescopes in Western Australia's Murchison region.

WAToday said the supercomputer is to be housed in the Pawsey Centre being built in the southern Perth suburb of Kensington, near Curtin University.

The machines will initially process data from existing radio telescopes based at the Murchison Radio-astronomy Observatory (MRO) but is free to expand for use in the international Square Kilometre Array (SKA) project.

It was decided in May that Australia would share the $2 billion SKA project with South Africa.

3000 dishes and a discovery potential 10,000 times greater than the best contemporary instruments, the SKA will observe such things as what happened after the big bang and how galaxies evolved, and will attempt to uncover more about the "dark matter" that fills the majority of the universe.

watoday.com.au/technology/sci-tech/perth-gears-up-supercomputer-for-ska-20120619-20kx2.html#ixzz1yCfCZu7Z

The ACMA's Spectrum Conference this year saw the ongoing work associated with the Review of 400 MHz spectrum that also includes our 70cm meter allocation.

Currently, the amateur service has a secondary allocation between 420 and 450 MHz. In its last report from the ACMA on the review issued April 2010, they advised that the allocation for the amateur service between 430-450 MHz would not be affected from any rearrangement. They cited, however, a possible need for some temporary use by other services in the segment 440-450 MHz during the transition period.

In the Amateur secondary segment 420-430 MHz, some geographic areas around Australia amateur use has already been withdrawn. At the conference, the ACMA has flagged that they will be seeking consultation with the WIA on withdrawal of the amateur service in this segment across the rest of Australia. The major use of this segment by amateurs is fixed links and the like where the ACMA database lists around 126 assignments across 35 licensees.

It is expected these can be relocated to the 430 - 450 MHz region.

(WIA.ORG.AU)

AUSTRALIA'S MOST WANTED

Request for Information!

Do you know anything about the Althorpe Island Light House wireless communications operations.?

Lighthouses of Australia a volunteer group whose aim is the preservation of Australian Lighthouses is looking for information on this famous Australian lighthouse.

A reliable means of communication with the lighthouse was the driving force behind the establishment of a wireless telegraphy system in the late 1890s. It appears this means of communications was all too hard to set up and a cable was finally laid in about July 1911.

This created its own problems of not being able to send messages after 6 o'clock because the telegraph operator on the mainland had gone home.

It seems that during the Second World War the lighthouse was equipped with a pedal wireless set that enabled them to communicate with Cape Borda Lighthouse and from there, messages were relayed to the mainland -- this was in use into the 1950s.

If anyone can elaborate on what has already been researched or know what type of radio systems were employed, please send it to Ross VK2VVV.

vk2vvv@wia.org.au

JUL 7- 8 VK3 GippsTech 2012, Monash University Gippsland Campus Churchill. It is NOT too late to register for this long running Australian event. Peter Freeman VK3PF says registration closes June 30.

Radio and Electronics Association of Southern Tasmania Inc.

http://reast.asn.au/

July Presentation - Pulsars, Black Holes and Atomic Clocks with Jim Palfreyman.

Jim's background is computer science and mathematics and he has just finished his thesis for a Masters in astrophysics. Studying pulsars using the radio telescope at Richmond.

Jim has a passion for accurate time and he assists in looking after the University's hydrogen maser atomic clocks. Jim also owns the old Hobart "Speaking Clock" and keeps it running - and accurate.

This should be a fascinating presentation.

Queen's Domain Clubrooms, July 4 at 7:30pm.

(73, Justin - VK7TW, Secretary)

VK7RRR - Tasmania's D-Star Repeater is On the Air!

VK7RRR is the Southernmost D-Star repeater in the World, and the first (and only) public D-Star repeater in Tasmania. Prior to VK7RRR, Tasmania was the only Australian State or Territory that didn't have at least one D-Star repeater.

VK7RRR uses a DV-RPTR DSP GMSK modem in combination with the DV-RPTR Repeater Controller and ircDDB Gateway software, thus allowing linking with D-Plus/REF, DExtra/XRF and x-Net/DCS reflectors worldwide.

VK7RRR operates on the 70cm band
438.125 MHz TX (50W) / 432.725 MHz RX

VK7RRR is connected to Australian D-Star reflector REF003C.
If a user links VK7RRR to a different repeater or reflector then it will re-link to REF003C after 10 minutes of inactivity.

More information, including how to send commands to the repeater to link worldwide, can be found here:
vk7rrr.info

Hello, this is Philip VK3JNI.

Over the weekend that this broadcast goes to air, I will be assisting with a Foundation Amateur Radio course.

In preparing for the course, I am quite excited, as this is the largest number of applicants that we have had for some time. Many of these people are under 18 years old. Undoubtedly, these young people have been encouraged by previous Scout JOTA activities and the active support of one or two parents and their leaders.

I wonder how many other young people would be interested in amateur radio if we could encourage their leaders, teachers or parents to consider the idea?

The idea of year 11 and 12 physics students studying waves and propagation via amateur radio does appeal to me. I can foresee the schools being approached by a small delegation from the local club, maybe with a donation of the foundation manual for the school library in hand. Would the school be interested in hosting a Foundation Course after hours or over the weekend?

To paraphrase someone else's slogan, we may never never know if we never never go, and try.

DISCUSSION POINT

(Past editions of What use is an f-call can be found online at harg.org.au under F-troop.)

Some days you chew off more than you bargain for. Today I wanted to know a little more about propagation, the radio kind, not the plant variety. Four hours later I'm still reading. Everyone has an opinion, everyone's an expert and some people can even put together a coherent story on their web-site.

What did I learn so-far?

I didn't know that the Bureau of Meteorology has a Space Weather Branch, it's called IPS or the Ionospheric Prediction Service and their website is full of goodies. Then there's an article by Ian Poole, which appeared in the September 2002 edition of QST magazine, explaining how the Solar Flux, the K index and the A index affect your ability to talk to the other side of the world with your HF set.

So, it seems that the numbers are related to things that affect each other. A high Solar Flux is good, but it's adversely affected by a high K index which in turn is represented as an average as an A index.

Confused yet?

So, the K index, runs between 0 and 9, 9 being a very major storm, 0 being Quiet. Quiet is good, storm is bad. The higher the Solar Flux, the better it is for higher HF frequencies. The Solar Flux needs to build up, takes a few days, so, you need Quiet and high Solar Flux for a few days and magic happens.

I'm not confident enough with all this to tell you what to look for, but it seems that a Solar Flux of 150 or more for a few days with a K index below 2 will give you a good chance of getting some DX contact.

Now I realise that this might just be gobbledygook for you, in fact, four hours ago, it was for me too, but now when someone talks about the Solar Flux being high, at least I have an idea of what on earth they're talking about.

Next stop, figuring out how to read propagation maps.

I'm Onno, VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

NZART 5 MHz Working Party

WRC 15 will consider a possible new allocation to the amateur service on a secondary basis within the band 5 250-5 450 kHz and invited the ITU-R's to study spectrum requirements, to carry out sharing studies on the impact to other services currently allocated in the band referred to in invites ITU-R 1 and in the adjacent bands;

Not letting the grass grow under their feet (Well if they did those pesky ZL sheep would be in like flyn), well Don Wallace ZL2TLL is putting together an NZART working party to look at what New Zealand can gather to support an international allocation in the 5 MHz area.

Does the radiation of your mobile phone cause health issues or other electronic interference?

In the USA this topic has not been visited for more than 15 years, so the FCC is ready again to study the effects, if any.
The chairman of the FCC, will be asking his fellow commissioners to approve a notice that will permit the agency to open a formal inquiry on the matter.

London Bound?

Ofcom has announced that a small block of the amateur radio 144 MHz band is to be used for the London 2012 Summer Olympic Games and the RSGB say to minimise the impact on amateurs, a small block of 12.5kHz channels, ranging from 144.0125MHz to 144.1375MHz, for the period 27 July to 28 August 2012 only will be "out of band".

125 CANDIDATES PASSED THE RAE IN MAY

A total number of 144 candidates wrote the amateur radio examination class A in May this year in South Africa. The pass rate was 81% with 116 candidates passing the examination.

10 candidates wrote the class B examination, of which 9 candidates passed.

The youngest candidate to sit the examination was 11 years old.

90 YEAR OLD UK HAM GETS MASTERS DEGREE

Bert Gladwin G3FVO, a former MI 6 electronics engineer, has become the United Kingdom's oldest new graduate at the age of 90.

During World War II he served with the Royal Air Force and developed an interest in radio communications. After the war he worked for the Marconi company and obtained his amateur radio license.

Gladwin then worked for the Foreign Office setting up communications systems for British embassies around the world. He embarked on his degree in Intelligence History and Bletchley Park Studies at the age of 89.

Bert Gladwin's advice to anyone considering a degree is to go for it at any age. He says that it's never too late to learn.

More is on-line at tinyurl.com/grad-at-90

HELLO SAILOR

A Finnish cruise line with Radio Arcala, OH8X are in the process of testing whether a permanent amateur radio station will suit the maritime environment and serve DXers in their leisure time, whether cruising in the Mediterranean, off West Africa or just doing island-hopping in the Caribbean.

The objective for the first run is to look at potential interference issues both ways - from the amateur radio station to the ship's navigation system and from the ship's advanced PC networks to the reception of amateur radio transmissions.

==========

NEWS FROM ARNEWSLINE USA

DJ6SI VS. GREECE - THE COURT DECISION

A court decision in the case of DXer Baldur Drobnica, DJ6SI, who stood trial last week in Greece on three charges involving his operation of an amateur radio station on the vacation island of Kos. The three crimes he was eventually charged with were conducting radio traffic without permission from the Greek Government. Operating a transceiver that covered more spectrum than just the ham radio bands permitted by Greece and his refusal to surrender his equipment to the officer who investigated the incident.

According to a note posted to the Internet by his attorney, Drobnica was acquitted on counts 1 and 2 after the court ruled that he was a properly licensed radio amateur. However he was convicted

on the third count of refusing to surrender his equipment to the arresting officer.

No word of what penalties if any were imposed on the single count conviction. However his lawyer is reported to already have filed an appeal on count three and the court is expected to hold a separate trial on this issue at a later date.

Please keep in mind that this report is based on multiple language translations beginning in Greek with some of it electronic. As you all know, the latter have been known to leave you wondering if the translation is completely accurate.

One report in translated English is on-line at tinyurl.com/dj6si-verdict

TRACKING MANTA RAYS BY SATELLITE

An international team of researchers have used radio beacon transmitters and satellite technology to track the movements of giant Manta Rays.

According to a Times news report, a team headed by Rachel Graham of the Wildlife Conservation Society in Punta Gorda, Belize, attached transmitters to six Rays off the coast of Mexico's Yucatan peninsula. They reported in the journal PLoS One that they monitored the rays for periods ranging from 27 to 64 days. Their preliminary findings for the Atlantic mantas showed that they travelled as far as 680 miles over a one to two month period searching for food most of the time staying close to the coastline. They also found that Rays spent considerable time in shipping lanes, which rendered them vulnerable to being hit by freighters.

The full in-depth text of this very interesting use of radio tracking can be found on-line at tinyurl.com/manta-ray-tracking

BRUNEI GOING AFTER UNLICENSED MOBILE OPERATORS

The Brunei government says that it is cracking down on anyone found operating amateur radio gear without government authorization. Members of that nation's citizenry who are convicted of illegal use of amateur radio equipment without a license from the Authority for Info-communications Technology Industry of Brunei Darussalam or AITI will face a maximum fine of 10,000 Brunei dollars, up to three years imprisonment, or both.

This new anti-pirate operating campaign appears
aimed primarily at those unlicensed individuals
who use mobile gear on the VHF and UHF amateur bands.
It was announced by the AITI during a briefing on
the first of several joint operations with the Berakas
Police to crack down on illegal use of radio equipment.
The operations involved a dedicated corps of sixteen
police personnel and seven AITI officials.

PHONESATS SHOWN AT MAY MAKER FAIRE

Turning to ham radio in space related news, some
new amateur radio satellites based on cellphones
were recently shown to the public at the 2012 Bay
Area Maker Faire in San Mateo, California.
Amateur Radio Newsline's Skeeter Nash, N5ASH, reports:

--

Among the displays was one for the PhoneSat
amateur radio satellites. These are a pair of
ham radio satellites both of which run the
Android operating system and will be enclosed in
a standard 1U CubeSat structure.

PhoneSat 1.0 cost about $3500 and is built around
the Nexus One smartphone. It will operate on
battery power only with a mission lifetime of
approx 1 week. Its big brother called PhoneSat
2.0 used a Nexus S smartphone and has solar
panels on each face for a mission lifetime that
should last at least two weeks when it will likely de-orbit.

The IARU has coordinated a frequency of 437.425
MHz for the AX.25 AFSK downlink.

The first launch is scheduled for the third
quarter of 2012 on the Antares-110 launch
vehicle. It will carry two PhoneSat 1.0
satellites and one PhoneSat 2.0. A second
PhoneSat launch is expected to occur sometime in 2013.

--
The 2012 Bay Area Maker Faire took place May 19th
to the 20th. Several news reports estimate that
65,000 to 70,000 attended this ever growing West
Coast event that was held the same weekend as the
Dayton Hamvention.

==========

RSGB

New award commemorates Tony Sale

The life of Tony Sale, who was best known for his work in re- creating the Colossus computer at Bletchley Park, is to be commemorated by the creation of an award for the best computer restoration project.

According to Computer Conservation Society chairman David Hartley, the award, which will be overseen by the CCS and backed by Google, will seek out those projects carried out in the same spirit that Tony Sale brought to his work.

An article in the publication Computer Weekly notes that Tony Sale, who passed away in August 2011, was principal science officer at the Security Service MI5 and says he was also a radio ham, although it is not clear if he actually held a licence.

==========

WEIRD AND WONDERFUL

And quickly in today's Weird and Wonderful may we suggest you check your junk box.

Why?

Well a RARE surviving first model of the Apple computer, a stripped down, clunky device that bears no resemblance to today's sleek pads has sold for $374,000 at auction in New York.

The price was more than double the pre-sale estimate, reflecting a two-way bidding war eventually won by an anonymous telephone bidder, Sotheby's said.

The Apple I computer was created by Apple co-founders Steve Wozniak and Steve Jobs and sold in 1976 at the birth of Jobs's career as the world's computer design guru.

The model auctioned in New York is believed to be one of six of the less than 50 surviving that still works.

Repeater News - A Broadcast Trial

The Ben Lomond repeater VK7RBH antenna is possibly the highest in Tasmania, and the club have been pondering the actual extent of that repeater's coverage.

While it enjoys a lofty perch on the mountain, they have long known that the site is less than ideal for repeater purposes. The plateau like nature of the summit effectively shields much of the area surrounding the mountain's base.

In addition to the usual service via VK7RAA at Mt Barrow, a few broadcasts are likely also being relayed through VK7RBH by Peter VK7PD.

Peter will also conduct call-backs after the broadcast via VK7RBH.

If you can, please take a listen on 438.050 MHz and if you managed to copy the broadcast via this service, please call back to let Peter know and also provide him with your listening location.

Ian Wade G3NRW has released a Kenwood TS-590S Slow Scan TV QuickStart Guide.

The TS-590S USB port is extremely user friendly when running digital modes. No interface unit is necessary, just connect the PC to the radio with a standard off-the-shelf USB cable and you're in business.

Exactly the same applies when using the USB port for analogue audio.

G3NRW's HOWTO explains how to configure MMSSTV (one of the world's most popular analogue SSTV packages) to work with the TS-590S.

To download the HOWTO, go to the TS-590S Resources Page

http://homepage.ntlworld.com/wadei/ts-590s.htm

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

ARISS DIGIPETER MOVES TO 437.550 MHZ

The Amateur Radio on the International Space Station or ARISS digipeater has changed frequency from 145.825 MHz to 437.550 MHz.

Packet operations were moved to the Columbus Module UHF radio when the Kenwood D700 radio was recently powered off due to needing an additional air purifier to support the recently arrived Automated Transfer Vehicle. As a result the purifier is now using the power outlet that the Kenwood normally uses.

The Russian team has agreed to briefly power the purifier off for the scheduled ARISS school events but then will re-activate the purifier right afterwards.

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News. Each item will only
be broadcast once, if you want a couple of mentions, please submit different
slants to keep your event 'fresh'.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

RAC Bulletin 2012-035E - Ham Operators needed to support Coast to
Coast Against Cancer Foundation
2012-06-21

Volunteers are needed to provide communications in support of this
worthwhile event. It takes place along the Cabot Trail in Nova Scotia
August 3-5, 2012 and involves cycling road routes with more than 100
cyclists participating and more than 50 volunteers.

ARES is involved with this organization in Alberta and Ontario, and
they have put out a call to us for support for the first time in the
Atlantic Region. If you are able to help, please drop me a note at
dougvo1dtm@gmail.com or contact Atlantic Director Ev Price at
vo1dk@rac.ca or Deputy Director Len Morgan ve9my@rac.ca.

Thanks for your interest.

ARRL UHF/Microwave Band Plan Committee Seeks Comments on 23 cm Band Plan:

Posted: 22 Jun 2012 01:49 AM PDT
http://www.eham.net/articles/28522

Last
winter, the ARRL UHF/Microwave Band Plan Committee asked the Amateur Radio community about current, planned and projected uses of the Amateur bands between 902 MHz and 3.5 GHz. The excellent level of response provided us with the basis to complete drafts of the 9 cm, 13

cm and 33 cm revised band plans for ARRL Board approval. The Committee has now prepared for your consideration a draft band plan for 23 cm (1240-1300 MHz), the final band on its assigned list. Please look over the accompanying draft and let us know if you have any major concerns.

Voyager 1 Leaving Solar System

Posted: 22 Jun 2012 10:46 PM PDT
http://forums.qrz.com/showthread.php?351187-Voyager-1-Leaving-Solar-System&goto=newpost

Voyager 1 has reached the edge of the solar system. From what I recall in the 90's when the internet was fresh is that some of us hams before the launch inserted our names on the data disk travelling along on the flights. I see no mention of names flying along on the golden disk on the Voyager commercial website.

Reuters News Story

http://in.reuters.com/article/2012/0...85E0VU20120615

Voyager Website

This is the golden record page for those remembering putting their names on the furthest flying craft out of the solar system. Does anyone recall if it included our call signs?

http://voyager.jpl.nasa.gov/spacecraft/goldenrec.html

Of course all of our ham chatter is light years ahead of the crafts.

Best of DX to everyone. Stand by for alien QSL cards. Hopefully LOTW is OK for them.

Field day 10 meter beacon balloon 28.224 mhz

Posted: 22 Jun 2012 04:24 AM PDT
http://forums.qrz.com/showthread.php?351108-Field-day-10-meter-beacon-balloon-28-224-mhz&goto=newpost

For those who are interested in balloon transmitters,We will be launching a 10 meter beacon balloon this Saturday morning from Caneadea,NY Grid FN02WJ approx 10:00 - 11:00 UTC.Frequency will be 28.224 mhz.

Will post details and photos when we return from the remote site in hopes to see reports.

We hope the balloon travels as far as possible rather than bursting and falling back to the ground too soon.

Batteries should last a week or more.An operator will be on 28.327 mhz phone.

Here is a place to post reports if any.

http://www.freewebs.com/jimmzz91164/...le/1812799936/

We wish everyone a great field day 73.

Puerto Rico with record 10 activations for Field Day 2012

Posted: 21 Jun 2012 04:35 PM PDT
http://forums.qrz.com/showthread.php?351073-Puerto-Rico-with-record-10-activations-for-Field-Day-2012&goto=newpost

With a record of ten radio clubs active for Field Day 2012 in the island of Puerto Rico, all four cardinal points of the island are covered for this

event. The following clubs are:

1- The Puerto Rico Field Day Groupo (PRFDG) with the Movimiento Radioaficionados de Puerto Rico (MRPR), in the Sport Complex Luis Osvaldo Reyes in Cataño. KP4FD

2- The Puerto ico Amateur Radio League (PRARL) in the Luis Muñoz Rivera Park in Old San Juan. KP4ES

3- The Cuerpo Radio Aficionados Voluntarios (CRPR) in the Los Tubos Recreative Beach in Manatí. WP4OGK

4- The Puerto Rico Amateur Radio Operators (PRARO) in the Edgar Martinez Sport Complex in Dorado. NP3PR

5- The Western Amateur Radio Club (WARD) in the CB REACT Team installations in the Llavat Urbanization, Brazil Street in Mayagúez. NP3M

6- The Federación de Radio Aficionados de PR (FRAPR) in Surfing Beach, on the Bohios area of Barrio Pozuelo in Guayama. KP4FRA

7- The Caribbean Amateur Radio Group (CARG) from the Bohios in the Recreative Pasive Park of Barrio Capaez in Hatillo. WP4CRG

8-The Fajardo DX Club in the First Baptist Church in Fajardo. KP4DXC

9- The Radio Operadores Del Este (RODE) from the Ceiba EOC in the Roosvelt Roads Base in Ceiba. KP3RE

10- The Bayman Radio Club in the Municipal EOC in Toa Alta. KP4NM

So as you can see, local clubs have taken this exercise seriously as a way to dempstrate what can Amateur Radio do for the community during an emergency, there is no excuse so to say if someone wants to learn about what is Amateur Radio and how to obtain a license to be a Ham. If you are visiting the island or are planning to go to a Field Day operation you can go to www.arrl.org/field-day-locator map to check on the one near you.

There will aslo be an activation from our friends in Saint Croix, USVI as NP2VI and even a station in Columbia will be activated as 5K3W.

6:00 pm Dinner for the HAMS

This dinner is for radio operators, club members, and their guests / children. It is a pot luck for the all the side dishes and desserts but HARC will be providing the main meat.

HARC will be ordering Chicken from Wal-Mart both trays of planks and the fried chicken legs and breasts pieces. We will need all of the side dishes provided by those of you attending. Please provide a side dish or dessert if you are attending this dinner. N3VRN is willing to coordinate this if people want to let her know what you are bringing (evenesky@chsd1.org) You are also welcome to provide other main courses if you like.

HARC will also provide sodas, Ice tea, water & bags of ice. Also need everyone to bring cookies and snacks.

7:00 pm TENTATIVE Wan-RS Core Member Meeting held in the main building.This will be a private WAN-RS Core Member Meeting taking advantage of the group all being in one place.

Radio Operations and Coffee through the night

9:30 pm ☐ 10:00 pm Fireworks Begin and this event is open to the public. We will need a few volunteers to secure shoot area during setup, through cool-down /20 minutes after shoot ends. Also need all to help in large debris cleanup and pickup trucks to take to burn spent shells in campfire. Mike N3SSD is Lead Shooter for this event provided by Pyrotechnic Artists, Inc. c/o Howard Fry President and CRC Club Member http://www.pyroartists.com/About.aspx

10:30 pm Possible Camp Fire by N3JCV (Any one staying bring your smore ingredients and mountain pie makers and fixins)

Radio operations through the night

11:30 pm General public to depart (Site Secure For Attending Hams Only)

Sunday June 24

NOTE: Church Services at 7:00 am and 9:00 am across street, 8:00 am and 10:00 am at Summerhill down the road 5-6 miles all are welcome.

5:00 am Radio Operations

8:00 am Breakfast for Operators by KA3VXR and N3VRN and others.
Eggs-Sausage- Cheese Mix up/ pancakes/ fruit/toast/ OJ/ Donuts

12:00Lunch Leftovers from Saturday as done in the past.

5:00 pm Event Closed 73 Everyone Please clean up as you leave

ADDITIONAL NOTES:

HARC/ N3VRN has picked up plates, silverware, cups(cold and hot), napkins and three cases of water so far and will be getting soda and iced teas later in the week. They have an Orange (construction style) jug that we will keep filled with lemonade and such throughout the weekend.

PS: We will have custom multi-club field day shirts and a very low cost, free QSL Cards, and small personal event cards available.

PSS: A special thank you to the field day team that is making all of this possible. You are the best and the reason we are going to have a very fun event. Thank you!!! Tom - K3WS

SARL NEWS - SUNDAY 24 JUNE 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on "Amateur Radio Today" and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 MHz FM from Pretoria with relays on 7 066 and 3 695 kHz SSB. (Other news readers change to suit).

SILENT KEYS

It is with regret that we have to report that the keys of two radio amateurs became silent recently.

On Thursday night, Abe Grov&#65533;, ZS6BMX, became silent key after long illness. He was 77 years old.

Richard L. (Dick) Baldwin, W1RU, IARU President Emeritus, passed away on Thursday morning, 21 June. He was 92 years old. As American radio Relay League (ARRL) Assistant General Manager, Dick was primarily responsible for initiating preparations for the 1979 World Administrative Radio Conference. He was one of the key players in formulating the objective of obtaining new amateur HF bands at 10, 18 and 24 MHz. As ARRL General Manager from 1975 to 1982 he played an essential role in turning that objective into reality.

Following his retirement from the ARRL staff, Dick was elected President of the International Amateur Radio Union (IARU), which he had served as Secretary from 1976 to 1982. He served as President for 17 years, managing the transition to a new Constitution that made the IARU a more representative body. Upon his retirement from that volunteer position in 1999, he was named President Emeritus by the IARU Administrative Council. Dick Baldwin was a great friend of South Africa and visited this country several times during his tenure as IARU President.

We extend our sincere condolences to the families and friends of the deceased.

(PAUSE)

IN THE NEWS TODAY:

CLUBS TO GET FREE AFFILIATION TO THE SARL

RTA IN DURBAN

IARU HF CHAMPIONSHIP ON JULY 14 - 15

You are listening to ZS6SRL. Stay tuned for more details on these items and other important and interesting items.

CLUBS TO GET FREE AFFILIATION TO THE SARL

The council of the SARL has agreed to offer free affiliation to radio clubs in South Africa whose activity supports the SARL's vision and objectives for amateur radio. To apply for affiliation, clubs must complete the standard membership application vorm. They must include a copy of their constitution, a list and contact details of committee members and a brief report of the club's amateur radio related activity. This could be a chairman report or copies of newsletters. Clubs who have already paid for the 2012/2013 year will be refunded

RTA IN DURBAN

The first Radio Technology in Action (RTA) of 2012 will be held in Durban on 21 July at the University of KwaZulu-Natal. The programme is very different to those of previous years and includes several innovations.

The keynote entitled "Tuning into Nature" will be delivered by Tony Voorveld, ZS6CCD. This is a presentation on various electromagnetic phenomena that appear in nature. Tony will explain by discussion and demonstration how phenomena such as Solar Flares, Cosmic Rays and Lightning may be detected by amateur radio and amateur scientific equipment. He will also be discussing radio astronomy for the amateur. If you have seen Tony in action before, you know that you do not want to miss it and if you haven't, make sure you do attend this year.

The opening address will be given by SARL President, Rassie Erasmus, ZS1YT. Rassie will talk about how radio amateurs can contribute to the development of a knowledge economy for South Africa.

Then we come to the practical aspect of the symposium. Frik Wolff, ZS6FZ, will demonstrate the building and operation of a software defined radio for 40 metres. A kit of components will be on sale at the RTA and will cost under R100,00.

Riaan Greeff, ZS4PR, will talk about and demonstrate how to interface Hamradio Deluxe with radio equipment and antenna rotators. He will concentrate on the practical aspects and will use various models to demonstrate the operation.

There will also be a demonstration on how to install and use a logging programme.

All persons attending the RTA will receive a CD that will contain the various programmes demonstrated. When you get home after the event, you can start having more fun.

The full programme will be available on www.sarl.org.za early next week. In the meantime if you live in KwaZulu-Natal, take note of the date Saturday 21 July. If you live a little distance from Durban, why not make arrangements with your club members to travel together.

SKA INTECNET WAS POPULAR CHOICE

The Intecnet held last Sunday evening with Prof Justin Jonas, talking and answering question about the Square Kilometer Area (SKA), was very popular, both by the audience and the guest speaker. Prof Jonas said he enjoyed the questions from the listeners. He said it was refreshing talking with people who had a good grasp of technology. He added: "I wrote down the questions, as they make an excellent resource for future talks I have to deliver".

The SARL has had many requests for the audio file to be made available for download. An edited version will be available on www.sarl.org.za from today.

For the next intecnet the SARL hopes to have Adrian Tiplady of the SKA project as guest speaker. He will be talking about radio interference mitigation on the SKA site and how services like radio and TV will be delivered to local residents. Watch future editions of SARL-NEWS for details.

IARU HF CHAMPIONSHIP ON JULY 14 - 15

The International Amateur Radio Union sponsors the High Frequency World Championship 2012. It will take place on Saturday July 14th beginning at 12:00 UTC and ending at 12:00 UTC on Sunday July 15th. The objective of this contest is to contact as many amateurs around the world as possible, especially IARU member society Headquarters stations. The 160, 80, 40, 20, 15 and 10 metre bands will be used. The rules for this year are available on line at tinyurl.com/iaru-hf-championship.

The SARL would like to put its station on the air at the NARC and is looking for volunteers to man the station for the full period. This would be a great opportunity for experienced contesters to show newcomers how much fun contesting is. If you are interested, drop a line to contest@sarl.org.za this week and you will be contacted.

YASME FOUNDATION ANNOUNCEMENTS:

Awards and an expanded list of eligible call signs.

The Yasme Foundation currently offers two awards. The Yasme Award, in the form of a handsome plaque, is offered to those radio amateurs who submit proof of 30 QSO's with Yasme officials and DX-peditions that have at least one Yasme official as a participant.

The Yasme Supreme Award is in the form of a representation of the YASME boat used by Danny Weil in his around-the-world DX-pedition. It is available to those who submit proof of 60 QSO's with YASME officials and DX-peditions with a Yasme official as a participant. These awards are available to qualifying applicants at no cost. After a year-long evaluation of the rules, the Yasme Board of Directors has revised the rules for those call signs that may be used to qualify for the two awards, with many new ones added to the list. The Yasme Foundation is a non-profit corporation organized to conduct scientific and educational projects related to Amateur Radio, including DXing and the introduction and promotion of Amateur Radio in underdeveloped countries. Get details from www.yasme.org.

Danny Weil was a pioneer of what is now known as the 'DX-pedition'. While not the first to DX-pedition, Danny was one of the first to travel to more than one location to operate, and to travel from place to place - often solo in a sailboat and lugging hundreds of kilograms of radio equipment - specifically to provide DXers with a 'new one'.

Lloyd and Iris Colvin perfected the DX-pedition and took it into the modern age in the 1970's and 1980's, with operations from more than 100 countries, using modern transport methods and state-of-the-art radio equipment. Lloyd and Iris Colvin have operated several times, as guests of the SARL, from the Johannesburg Amateur Radio Centre, which was then situated in Louis Botha Avenue in Johannesburg.

YASME was both the name of Danny Weil's boat, and the name of the non-profit foundation that was created in 1959 to provide financial and logistical support for the travels of Weil, the Colvins, and others.

HF PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the week's expected Solar activity will be at low levels. Major Sunspot 1 504 is rotating out of view and only a few minor sunspots are now visible.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 47.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. 10 m openings will be much less frequent due to the lower solar activity and then mostly on east-west paths.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

14/15 July - The IARU HF Championship on all the bands. Rules are available at tinyurl.com/iaru-hf-championship. 21 July. - The first Radio Technology in Action (RTA) of 2012 in Durban at the University of KwaZulu-Natal. The full programme will be available on www.sarl.org.za early next week.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by Dick, ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Flip Britz, ZS4GE/6, and edited by George Honiball, ZS6NE.

Thank you for listening. 73.

/EX

Sending Strong Signals:

Posted: 22 Jun 2012 05:00 PM PDT
http://www.eham.net/articles/28531

Gary Esler listens intently as the radio crackles to life. He jots down information as his partner's operating radio equipment connects with someone from Hawaii. A Navy veteran who was once stationed in Hawaii, Esler asks for the controls. "Aloha! Where are you located," Esler, a member of the Cottage Grove-based South East Metro Amateur Radio Club (SEMARC), asks the other ham radio operator. The two exchange information before signing off. Connections like these excite the Hastings resident. "I guarantee you we'll work all of the United States today," he says. The communication took place June 2 at Fleming Field in South St. Paul, where SEMARC members gathered for an event in honor of the air field's namesake. The event commemorated the 70 th anniversary of the Battle of the Midway, which was considered the turning point in the Allies' war in the Pacific. The Battle of the Midway was also where Capt. Richard Fleming, a St. Paul native, died in battle. The Navy pilot died during an attack and was posthumously awarded the military's highest recognition: the Medal of Honor.

//
Ham Radio Operators To Demonstrate True Wireless Communication:

Posted: 22 Jun 2012 05:00 PM PDT
http://www.eham.net/articles/28530

HILLSBOROUGH - In times of crisis - tornadoes, fires, hurricanes - our interconnected communication and power systems often shut down. But when all else fails amateur radio operators provide a vital service to emergency crews - the ability to communicate. Local amateur radio operators - often know as "hams" - are holding a ham radio demonstration to show the public why they are so critical in an emergency. The event is called "Field Day." It's the climax of national "Amateur Radio Week" sponsored by ARRL, the national association for Amateur Radio. Durham area ARRL public information officer Ed Best says there's a reason people turn to amateur radio in a crisis. "Everything is portable," he says. "Generators, batteries, there is no commercial power that they can run." Ham volunteers work with local and national emergency response agencies and non-emergency services to provide communication in a crisis\&all for free. Their slogan: "When all else fails, ham radio works."

//
Tens of Thousands of 'Hams' go On Air this Weekend:

Posted: 22 Jun 2012 05:00 PM PDT
http://www.eham.net/articles/28529

Tens of thousands of Amateur Radio operators will be firing up portable radio stations from unexpected locations this weekend. These radio operators aid in emergency communications support during major emergencies. Called "hams," they are often among the first to provide rescuers with critical information because they can send messages from isolated and remote locations without phones or Internet. On June 23-24, the public can meet these radio operators and, in some cases, get a chance to get on the air under the supervision of a ham. Over 35,000 operators will operate from parks, malls, schools and yards around the country. They'll send and receive messages to other operators in the U.S. and around the world. Using everything from digital and satellite communications to Morse code, "Field Day" is the climax of the week long "Amateur Radio Week" sponsored by ARRL, the national association for Amateur Radio. It's likely that there's a Field Day location near you, to find one go to www.ARRL.org/field-day-locator. Over the past year, the news has been full of reports of Amateur Radio operators providing communications during unexpected emergencies in towns across America including wildfires, winter storms, tornadoes and other events world-wide. "The fastest way to turn a crisis into a total disaster is to lose communications," said Allen Pitts of the ARRL. "From the tsunami in Japan to tornadoes in Missouri, ham radio provided reliable communication networks in the first critical hours of the events. Because ham radios are not dependent on complex systems, they work when nothing else is available. We need nothing between us but air." Their slogan, "Ham Radio Works" is more than just words to the hams as they prove they can send messages in many forms without any other infrastructure that can be compromised in a crisis. They invite the public to come and see ham radio's new capabilities and learn how to get their own FCC radio license before the next disaster strikes.

//
Return of the Vacuum Tube:

Posted: 22 Jun 2012 05:00 PM PDT
http://www.eham.net/articles/28528

Peer inside an antique radio and you'll find what look like small light bulbs. They're actually vacuum tubes -- the predecessors of the silicon transistor. Vacuum tubes went the way of the dinosaurs in the 1960s, but researchers have now brought them back to life, creating a nano-sized version that's faster and hardier than the transistor. It's even able to survive the harsh radiation of outer space.

//
Propagation Forecast Bulletin #25 de K7RA:

Posted: 22 Jun 2012 01:21 PM PDT
http://www.eham.net/articles/28527

Sunspot numbers seemed to be in a free-fall this week. Average daily sunspot numbers declined over 29 points to 87. Average daily solar flux fell 6.2 points to 126.2. (We erred in last week's bulletin when we said the average daily solar flux for the week of June 7-13 was 115.9. It was really 132.4).

Until the end of the year, the OV Spreewald is working with the
special callsign DA0LSW in all modes on all bands on the occasion of
the Brandenburg Day 2012 (Sep 1/2). The station counts as a wildcard
for the Spree Forest award and also as a point for the F60 award.
QSL via bureau or direct to DM3ZF, LoTW. See also: http://www.y28.de

EA8, CANARY ISLANDS, AF-004
The radio amateurs celebrate the "Fiesta de San Juan" by activating the
special event station EH8FSJ until June 24. QSL via EA8RKL.

G, ENGLAND, EU-005
The Chelmsford Amateur Radio Society (CARS) will be on the air again
as GB100MWT from the Sandford Mill Museum on Jun 23 on the occasion of
the 100th anniversary of the opening of Marconi's factory in New Street
the first purpose-built factory for wireless applications.
QSL via RSGB bureau or direct to G0MWT. See: http://www.g0mwt.org.uk
---
The Kent Weald Radio Club is active from the Headcorn airfield in
Kent (EU-005, WLOTA 1841, Loc JO01hd) using the fieldday station GB1HA
on all bands until Jun 24.
QSL via bureau or direct to G4IMP QTHR (the address in the callsign
list and the International Callbook is correct).

GM, SCOTLAND, EU-005
Paul,2E1EUB, will be active on 160m, 80m and via satellites (mostly
AO-7 B/A mode) and in SSB on 2m from the grid squares IO76, IO77, IO87
and IO86 for fourteen days starting on Jun 26. See also QRZ.com.

HH, HAITI, NA-096
Chris,HH4/W3CMP, is very active on HF from Haiti (NA-096) during his
evening hours until Jun 29. He will also try to work on 6m and 2m
(50.106, 50.117, 144.200 MHz). QSL via homecall.

JD1/OG, OGASAWARA ISLAND, AS-031
JA2MET is working as JD1BMG/JD1 from Ogasawara (AS-031) until Jun 24.
QSL via JA2MET.

ON, BELGIUM
Bart,ON3FMB, has founded the "Royal Air Force Memorial On The Air"
(RAF-MOTA) to remember the Allied pilots who were killed in action
in Belgium during World War II. ON3FMB, ON4VLM, ON5WAL, ON3EE, ON7KEI
and ON3EA will use the special callsign ON1RAFMOTA in SSB on 40m/20m,
in FM on 2m and in SSTV on 14230 kHz on Jun 23. QSL via ON4VLM.
See also: http://www.on-raf-mota.be

P4, ARUBA, SA-036
Herman,P4/ON4QX, is active July 2. QSL via homecall.

PY, BRAZIL
The special event station ZZ190GOB marks the 190th anniversary of the
Masonic Lodge "Grande Oriente do Brasil" and can be found on the bands
until Jun 30. QSL via PT2OP.

T30, WESTERN KIRIBATI, OC-017
Benaia,T32BN, works for the police of the Kiritimati government and
thus could also be active sporadically as T30BN during job transfers
to Tarawa (OC-017). His manager Bill,VK4FW, helps putting up antennas.
QSLs via VK4FW.

TT, CHAD
Phil,F4EGS, returned to N'Djamena and will show up as TT8PK on HF from
this rare DXCC country until Aug 6. QSL via F4EGS.

UR, UKRAINE
Alexandr,UT4UP, meldet sich bis zum 23.Juni als UT4UP/p von der Festung
Kara-Tobe (WCA UR-00049, UCFA KR-009) in Saki. Eine Teilnahme am
World Castles Weekend ist vorgesehen. Der Funkbetrieb erfolgt auf
allen Baendern. QSL via homecall.

VE, CANADA
On the occasion of the 200th anniversary of the War in 1812 Craig,VE3OP
may use the special call VX3X in all modes on all bands from June 25
until July 25. QSL via homecall, LoTW.

VP9, BERMUDA ISLANDS, NA-005
George,WB3IGR/VP9, and Katherine,WB3LTH/VP9, ara available to the DXers
in SSB and digital modes on 160m-6m mainly during the mornings and
evenings until Jun 21. QSLs via homecalls.

W, USA
The Montgomery County Amateur Radio Club (MARC) in Maryland plans to
join the upcoming ARRL Fieldday (Jun 23/24) with the special call W3M
from Davis Airport (Loc FM19kf). Unfortunately QSL only direct to NH7C.

XV, VIETNAM
Andy,P29CS, is currently working in Vietnam and will show up on the
bands in his spare time during the next few weeks signing XV3C with

IC706, Spiderbeam for 10m, G5RV and a 500 watts amp. QSL via M0URX.

NEW AWARD FOR DXPEDITIONS
The "Cass Award" encourages DXpeditions to maximize the number of worked DXers. A prize of US$ 1.000 is awarded every year to this one-man DXpedition, which logs the most different callsigns within a period of four weeks. The award honors the wisdom and the spirit of Cass, WA6AUD (sk). His column "DX IS" in the West Coast DX Bulletin (WCDXB) was informative for a generation of DXers. The winner of this years "Cass Award" will be announced in March 2013. An "unlimited" category with a higher price will be introduced in 2013.
See also: http://www.CassAward.com

W9DXCC CONVENTION
The "Northern Illinois DX Association" invites everybody to join the 60th annual "W9DXCC DX Convention" at the Holiday Inn in Elk Grove Village, Illinois, on Sep 14/15. See also: http://www.w9dxcc.com

TEST CRUISE ON THE BALTIC SEA
Kristina Cruises Ltd. in collaboration with Radio Arcala (OH8X) is testing, whether a permanent amateur radio station can be set up for licensed passengers aboard the 138m long M/S Kristina Katarina. The test cruise takes place on Jun 20-24 via Estonia (ES), Gotland, Sweden (SM1) Aland Islands (OH0) back to Finland (OH). They want to ensure that there are no interferences with the electronics of the ship and to celebrate the installation of the station they want to work the WAC from onboard the ship. Their QRG is 14267 kHz.
QSL for OH10X/mm via OH2BH.
See also: http://www.qrz.com/db/OH10X and
http://www.kristinacruises.com/en/cruises/ms-kristina-katarina/introduction

eQSL: The users of the eQSL online database have loaded the 250 millionth record into the system by the end of May. eQSL includes QSO data from 322 countries now and they are expecting the 200.000th user in August. The three countries with the most users are the US, Great Britain and Germany. By connecting the German DARC Contest Logbook (DCL) with the eQSL service there are significant advantages in awards applications.

SILENT KEYS: Jean-Luc,F6BIV, has died. He was a wellknown DXpeditioner and DXer. As an active member of the "Clipperton DX Club" he was awarded the "Medal of Merit" for his services.
Sayed,SU1SA, President of the Egyptian Radio Amateurs Society (ERASD), passed away on June 13.
Our condolences and sympathy are with their families and friends.
We do not want to be sad that we lost them, but grateful that we could get to know them as a radio friend. We will always keep them in memory.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jun 23/24 King of Spain Contest
Jun 23/24 Ukrainian DX DIGI Contest

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AS-008, JA1, North Izu Islands: JA2MET/1 will plans to hit the airwaves from Mikura-jima (Loc PM39tu) between Jun 26 and Jul 1. This island belongs to the Fuji-Hakone-Izu National Park (WFF JAFF-009). He will work in SSB and a little CW on all HF bands with focus on 6m. QSL via JA2MET.

EU-046, LA, Troms Couty group: Wolfgang,LA/DM2AUJ, will show up from Senja Island from Jun 24-28. Wolfgang announced to work mainly on the usual IOTA QRGs on HF. QSL via homecall (bureau/direct).

EU-114, GU/MU, Guernsey group: Members of the Telford and District Amateur Society plan to visit Guernsey (WLOTA 0013, WAB WV27, Loc IN89qk) from Jun 22-27. Activities are planned as GP3ZME/p on HF/VHF/UHF/SHF. The locator IN89qk belongs to their campground, but this may change also when they look for better locations. During the weekends they will join several contests (e.g. 1,3 GHz and 50 MHz Contest UKug). Since they are travelling at the peak of the ES season they will focus their activities on 50 MHz. QSL via G3ZME (bureau) or M0PNN (direct).
For more information see: http://www.qrz.com/db/GP3ZME
http://www.tdars.org.uk and http://twitter.com/#!/@2W0ZJA

EU-157, F, Bretagne (Cotes-D'Armor East/Ille-Et-Vilaine) Region group: Gil,F4FET, Vincent,F4BKV, Eric,F4FJH, and Diego,F4HAU, will be active as TM0CEZ from three different islands of the IOTA group "Bretagne Region Group" between Jun 24 and Jul 7. They plan to visit the islands Cezembre (DIFM MA008), Agot (DIFM MA009) and Harbour (DIFM MA025, ARLHS FRA-020, WLOTA 1687) only during the days, without overnight stay on the islands. The exact dates depend on the weather and sea conditions. More information about the islands and their equipment can be found at: http://tm0cez.webs.com
QSL via F5CWU (bureau/direct).

NA-023, VP2V, British Virgin Islands: Dave,W9DR, is signing VP2V/W9DR in CW and SSB on 6m (50115.6 kHz CW and 50115 kHz SSB) from the British Virgin Islands (NA-023, Loc FK78tr) between Jun 21 and Jul 2. Dave is using a SDR-1500 with a HB Solid State aplifier and a 6-ele-yagi.
QSL see QRZ.com.

NA-092, W5, Texas State West: Brian,K0MCM/5, will join the ARRL Fieldday from Mustang Island (USi TX011S). On Jun 23 (starting around 1600 UTC) he will hand out a few IOTA points on 14340 kHz two hours before the contest. A special QSL will be sent for each QSO automatically.

NA-185, VY0, Nunavut (Keewatin Region) group: Dick,VY0/AH6EZ, and Harry,VY0/K9DXA, are going to visit Marble Island (CIsA NT-new!) for a few hours some time between Jun 25 and Jun 29. Otherwise they will be

QRV from a research station in Rankin Inlet (Kudlulik peninsula,
Kivalliq Region, Nunavut) from Jun 21 until Jul 2. They will also join
the Radio Canada Day Contest on Jul 1 signing VY0RAC (QSL via QRZ.com).
QSLs only direct only via their homecalls.
For more information see: http://ah6ez.yolasite.com

NA-213, W4, Alabama State group: Allan,KV4T/p, Steve,KI4GGJ/p, John,AJ4T/p,
Nicholas,KJ4AVG/p, and Gaston,W4CCF/p, will be active from Dauphin
Island (USi AL002S) from Jun 22-25. KV4T/p will hand out IOTA points
on 17m (CW) and AJ4T/p on 20m (SSB). The other OPs will be active
on other bands depending on the conds.
QSLs via the homecalls of the OPs (bureau/direct).

Lighthouse activities

JD1BMG/JD1 LH 2282 Jun 21-24
GB100MWT LH 1841 Jun 23

WFF activities

YOFF: YP2WFF is working from the Mures Floodplain Nature Park (YOFF-019)
on Jun 23. QSL via YO2MAB (bureau/direct).

YUFF: Milan,YU5CW, Milorad,YU1GW, Miro,YT1UM, and Mirko,YU3MMM, will show up
on the HF bands from the Nature Reserve "Obedska bara" (YUFF-039) on
Jun 23/24. QSLs via homecalls (bureau/direct).

New amateur radio band in DL

The Federal Network Agency has given the permission to use the medium wave
for amateur radio service. Amateur radio operation is now allowed in the
frequency range 472-479 kHz (for holders of licence class A). This frequency
range was allocated to amateur radio on a secondary basis at the recent
World Radiocommunication Conference WRC-12 in Geneva. The power is limited
to 1 watt ERP and the maximum occupied bandwidth allowed is 800 Hz.

HAM RADIO fair in Friedrichshafen n Lake Constance

Tony, F8ATS/6W, will be at the booth of the "Clipperton DX Club/UFT" on
Saturday, Jun 23 from 13:00-14:00. If you bring your QSL along you can get
on from F8ATS/6W.

DXers and IOTA friends should make a note of the IOTA Forum and the joint
DX Forum of GDXF and DARC Committee for DX and HF Contesting:

Saturday, 10:00, Hall 2, Room 2

IOTA Forum of the RSGB
- IOTA Report by Roger, G3KMA
- IOTA Contest • New rules explained by Don, G3XTT
- DM50IOTA • Activation of all DL IOTAs by Ric, DL2VFR
- Presentation from Pitcairn (OC-044) and TX6T/p, Mangareva (OC-063) by
Nigel, G3TXF, and Jacques, F6BEE
- Presentation of 7O6T, Socotra (AF-028) by Harry, RA3AUU and Andy, UA3AB

Saturday, 15:00, Hall 2, Room 2

Joint DX Forum of the GDXF and des DARC Committee for DX and HF Contesting
- Awarding of the QSL TUeV and DARC DXCC Toplist
- Awarding of the GDXF DXpedition of the Year
- Presentation E51M by Jan, DJ8NK
- Presentation VP8ORK by Don, N1DG
- Presentation T32C by Neville, G3NUG
- Presentation HK0NA by Franz, DJ9ZB

Many thanks for contributing to this issue of the DXNL are going to:
Carl Smith (QRZ DX), 425DXNews, OPDX Bulletin, DF6EX (WIN-QSL), DH5NBK,
DJ5AV, DJ9ZB, DL1SBF, DL2VFR, DL7MAE, DM3ZF, F6AJA & Les Nouvelles DX, NG3K,
VA3RJ and others.

Special Call 5P12EU ends at 30. june 2012

Posted: 24 Jun 2012 05:59 AM PDT
http://forums.qrz.com/showthread.php?351329-Special-Call-5P12EU-ends-at-30-june-2012&goto=newpost

June 30th at 22:00 UTC is the end of special call 5P12EU (Danish Presidency of European Union 2012)

The operators will be very active the last two days (June 29. ☐ 30.) to give the opportunity to have QSOs on as many bands as possible, since an award is obtainable for QSO on 3 bands (Bronze), 5 bands (Silver) and 7 bands (Gold). The pdf-version of the award is free of charge.

Especially we will draw the attention to 160M, where until now not many operators have been QRV so far.

Modes: CW and SSB ☐ and hopefully RTTY and PSK

Kind regards es good luck

IOTA DXPedition to Kaliage Besar Island OC 177 - YEM

Posted: 23 Jun 2012 06:59 PM PDT
http://forums.qrz.com/showthread.php?351282-IOTA-DXPedition-to-Kaliage-Besar-Island-OC-177-YEM&goto=newpost

Dear IOTA chasers & DXers,

After a successful DXpedition to IOTA OC-221, once again this year, ORARI DXpedition & Contest Team will travel to Kaliage Besar, Seribu Islands IOTA OC-177. This time we will operate YEØM from July 6 ☐ 9, 2012.

This DXpedition is in conjunctions to the ORARI 44th Anniversary (July 9, 2012) and IGK Manila, YBØAA 70th birthday (July 8, 2012).

Kaliage Besar is a 6.46 hectares island in the Seribu Islands. This beautiful island is a non populated recreation resort located at Latitude 05:39.380 & Latitude 106:34.120 or Grid Locator OI34GI.

During the DXpedition YE0M will operate 4 x 24 hours, all mode, all band (2 ☐ 160 meter band), SSB, CW & RTTY. The operators are almost the same with our previous ☐Ohoi Ew, Kei Islands IOTA OC-221 ORARI DXpedition☐. QSL Via YB1GJS Only.

For futher information please see on a website : www.ye0m.com

See you in pile ups...!

YEØM Team

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 24th June 2012

Short Wave Listeners

Short Wave Listener members will have seen the item on Page 4 of the current issue of Echo Ireland about call book entries. SWLs who want to be included in published listings are asked to email Joe Ryan EI7GY, the Membership Records Officer, at memrecords /at/ irts.ie

---

HF News Readers Needed

Additional HF newsreaders are required to cover the 40 & 80M news broadcasts over the summer months due to holidays etc. Any members that wish to join the panel and are available to read the HF news would be most welcome. Please send an email to info /at/ irts.e

---

Change in 40 Metre News Frequency

The present 40 metre radio news frequency has become increasingly busier on Sunday mornings. This has lead on occasions to some difficulty in the reception of both the bulletins and the reports on the transmissions. It has been decided, therefore, to move the transmission of the 40 metre news to a new frequency of 7123 kHz on and from Sunday the 1st of July. This frequency was selected after monitoring a range of frequencies over a period of time by amateurs who use this particular transmission of the radio news bulletin.

South Eastern Amateur Radio Group

On Sunday last, 17th of June. SEARG participated in the IRTS counties contest form Tankardstown on the Copper Coast Geopark in Co. Waterford. This is the same location the club uses for it's annual participation in the Geopark Communications Weekend. SEARG would like to thank Paula McCarthy of the Copper Coast Geopark management for once again allowing us to use this great site.

Today, Sunday 24 June, South Eastern Amateur Radio Group will be active as EI2WRC/p from the Butlerstown & District Vintage Society's 4th Annual Field Day at Orchardstown, Co. Waterford in aid of the Irish Red

Cross (Portlaw) and Tramore Coast Guard.

The field day will include vintage cars, bikes and tractors as well as stationary engines, mini farm, amusements, bouncy castles, a hurling tournament and refreshments. SEARG will operate a portable station at the rally and will have an SDR radio on display for the public.

Theory classes continue every Wednesday night at 7 p.m. in the Roanmore Social & Sports club, Cleaboy Road, Waterford.

For laters information about the club, visit www.searg.com

2012 IARU HF World Championship

The 2012 IARU HF World Championships will take place during the second full weekend of July, beginning at 12:00 UTC on Saturday 14 July and ending at 12:00 UTC on Sunday 15 July 2012.

The objective of this contest is to contact as many other amateurs, especially IARU Member Society HQ stations, around the world as possible using the 160, 80, 40, 20, 15 and 10 metre bands using phone and/or CW.

All IARU Region 1 Member Societies are invited to actively participate with their official stations and to encourage their members to also participate.

The rules for the 2012 contest are available on http://bit.ly/9droX1

EI0IRTS

Affiliated clubs and individuals are invited to help put EI80IRTS on the air in this our 80th Anniversary year. If you or your club wish to use EI80IRTS please contact Ger McNamara EI4GXB at ei4gxb /at/ gmail.com or Thos Caffrey EI2JD at thoscaffrey /at/ hotmail.com. Reports from SWL's are particularly welcome and a very attractive award is available for working the station.

North Cork Radio Group

The North Cork Radio Group is happy to announce that their next event is on Sunday 8-July. The NCRG will activate Seefin Mountain.

This will be the 6th event and field day of the North Cork Radio Group this year; meeting at 10AM in the morning, to jointly go to the summit to activate. The rendezvous point will be at the entrance to Millstreet Country Park. More details on exact location to be found on our Facebook Page.

As usual NCRG events are free for members and non-members to participate and attend. We do appreciate that you will let us know if you are planning of attending. The normal coffee/tea/biscuits will be

available for all to enjoy. Non-Members are very welcome; licensed or not. If you are licensed and want to work our stations and absorb the atmosphere of our club and activations, or if you are not-licensed and would like to know more about Amateur Radio and the NCRG and their many activations; let us know, and come along!

Using the EI1NC/P call-sign; we hope to either see or work many of you!

Let's go up a mountain, have a field day with lots of radio fun! If you are planning of attending; let us know!

DX News

Yuri N3QQ and Richard N7RO will be in Pago Pago, American Samoa from 27 June until 3 July. They will operate as KH8/KL7RRC or possibly KH8RRC during their spare time with emphasis on 40 - 10m. QSLs go via UA9OBA.

The ARRL added the DXCC entity of the Sovereign Military Order of Malta to the DXCC list some 30 years ago. There have been occasional activities over the years from SMOM which is based in Rome. The next such activity is announced for 1 - 4 July. The callsign to be used is 1A0C (One A Zero C) . SMOM is considered one of the rarest European DXCC entities. The preferred QSL route is via the Online QSL Request System.

Dave W9DR is QRV from the British Virgin Islands from now until 2 July. He is operating on 6m and the callsign to look out for is VP2V/W9DR. QSLs go via his home call.

In June 2007 a group of amateurs operated as AN8TID from the Teide Volcano on Tenerife in the Canary Islands. Now 5 years on a further activity will take place from 30 June until 2 July. This time the callsign will be EH8TID and will be at a height of 3555m above sea level. This is 163m from the top of the volcano. They will be active on 80 - 6m using CW, SSB, RTTY and PSK31.

Olympic 2012 Operating Restrictions

To support the operation of the 2012 Olympic games, restrictions on the use of the 2m, 70cm, 2.3GHz and 3.4GHz bands will be in place between 28 June and 23 September 2012. These restrictions apply to both UK amateurs and amateurs visiting the UK. Details on the restrictions can be found on the RSGB website at http://bit.ly/9droX1

2012 Leap Second

The last minute of June 30th 2012 UTC will be 61 seconds long, the extra second being a "leap second". Leap seconds are introduced to maintain synchronisation between atomic clocks and more traditional

time scales such as Greenwich Mean Time. These leap seconds are introduced approximately every 18 months, at the end of June or December, usually to give the Earth's rotation a chance to catch up on our clocks. In Ireland the leap will take place close to 1am Irish Summer Time.

This leap second represents a chance to record the leap second by DXing an international time signal (e.g. Rugby on 60kHz, Moscow on 4.996 MHz). As the future of leap seconds is under discussion at the ITU, this could be the last chance to have a QSO with a leap second!

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 17th-June, through Sunday, 24th-June there were 204 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E3, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J3, J6, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OZ, P2, P4, PA, PJ2, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SV, SV5, SV9, T32, T5, T7, T8, TA, TF, TG, TI, TK, TT, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP8/h, VP9, VR, VU, XE, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5H, TANZANIA. Ro, DL4ME, will once again be active as 5H3ME between August 14th and September 3rd. Activity will be holiday style on the HF bands from 80-6 meters using CW and the Digital modes. QSL via his home callsign.

9H, MALTA. Zoltan, HA5PP, will once again be active as 9H3PP during the CQWW DX SSB Contest (October 27-28th) and CQWW DX CW Contest (November 24-25th) as a Single-Op/Single-Band (possibly 15 or 10m) entry. Activity outside of the contest will take place a few days before the contest and will be on 17 and 12 meters. QSL via HA5PP.

D6, COMOROS (Update/Dates). A team of Europeon operators will be active as D64K from Ngazidja (Grande Comore), Comoros Islands (IOTA AF-007), between August 8-20th. The current list of operators mentioned are Salvador C31CT/EA3QS, Sigi/DL7DF, Josep/EA3AKY, Fabrizio/IW3SQY, Paolo/ IV3DSH, Franco/IZ8GCE and Les/SP3DOI. The team has already obtained all permissions, and the license has been sent to the DXCC Desk. Pilot station is Stan/KH6CG. Their license covers from 160 to 6 meters, so the guys will be active on all bands and modes, and they are even considering the possi- bility of working on 60m and 6m. The QSL Manager will be Paolo, IV3DSH. More details will be forthcoming. Watch the following for updates:
http://www.d64k.com
https://twitter.com/#!/D64K

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
TL9ES &#65533; Central African Republic; 2011 Operation
TT8ES &#65533; Chad; 2012 Operation

DXPEDITION VIDEOS OF THE WEEK (New Feature). With more and more DXpeditions putting their videos on YouTube and other Web services, we decided to list them (possibly) each week. For this week's listings, we thought to list and prepare you for the upcoming NH8S Swains Island DXpedition:
* Swains Island Aerial Assessment (an unlisted video):
http://www.youtube.com/watch?v&#65533;tO7LX-EAY
* A team from National Marine Sanctuaries visit Swains Island:
http://www.youtube.com/watch?v&#65533;piF9O-1OI&
* 2006 KH8SI Swains Island DXpedition:
http://www.youtube.com/watch?v&#65533;-YBZT0W1s
* Interesting documentary of Olohega or Swains Island. The island was annexed to the United States. Its former inhabitants were evicted almost sixty years ago from their island and long to return. They claim it belongs to the Tokelau Islands.
Videos Part 1, 2 and 3:
http://www.youtube.com/watch?v&#65533;t81PZHyU0
http://www.youtube.com/watch?v&#65533;eIQJ8PI0o
http://www.youtube.com/watch?v&#65533;mraGZfc4c

E5, SOUTH COOK ISLANDS. Operators Wayne/N6NB and Carrie/W6TAI will be active as E51YNB and E51TAI, respectively, from Rarotonga Island (OC-013) for the IARU HF World Championship (July 14-15th). Activity is expected to start a few days before and after the contest. Operations will be on 40-15 meters SSB only. Wayne tells OPDX, " If all goes well we'll have an IC-7000 and a THP HL-550FX amp (500 watts), with a TH2 (Hy-Gain 2-element tribander) plus a dipole for 40. We may pass on 80 because the noise level there was extremely high when we were in Rarotonga for the ARRL Phone DX Contest." QSL both callsigns via N6NB. Read about their

first operation at: http://commfaculty.fullerton.edu/woverbeck/e51ynb.htm

FP, ST. PIERRE & MIQUELON. Mike, VE2XB, will once again be active as FP/VE2XB from St. Pierre & Miquelon Islands (NA-032, DIFO FP-002, WLOTA 1417) between August 10-20th. Activity will have a special focus on 6 meters, but he will also be active on all bands from 80-6 meters. He states that he will be bring his THP amp for 500w, so his signals should be good with the Hexbeam. QSL via VE2XB (see QRZ.com).

IOTA NEWS.....
AS-120. Members of the Nicosia Amateur Radio Club were expected to activate the "Agios Georgios" islet off the coast of Akamas, Cyprus, as C4MG this past weekend. QSL via 5B4KH.

EU-016. Brani, OM2FY, will be active as 9A/OM2FY from Brac Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/ DXpedition/CW-Mode/24H entry. QSL via OM2FY.

EU-031. Gian, IC8WIC, will be active from Capri Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op entry. QSL via his home callsign or by the Bureau.

EU-038. Operators Paul/PA3FUN, Jerry/PH9HB, Jan/PD1AIQ and Bram/PE1OPK will be active as PA6NH from Texel Island during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/Mixed-Mode/Low-Power entry. QSL via PA6NH (see QRZ.com).

EU-046. Wolfgang, DM2AUJ, will be active as LA/DM2AUJ from Senja Island between June 24-28th. Activity will be on the HF bands on or around the usual island and IOTA frequencies. QSL via his home callsign, by the Bureau or direct.

EU-076. Wolfgang, DM2AUJ, will be active as LA/DM2AUJ from Lofoten Island between June 30th and July 10th. Activity will be on the HF bands on or around the usual island and IOTA frequencies. QSL via his home callsign, by the Bureau or direct.

EU-112. (Cancelled!) Members of the GMDX Group (Scotland's DX Association) planned to activate GB5SI from Shiant Isles [House Island) between June 15-22nd. Reason for it being cancelled was not provided.

EU-124. Members of the Strumble Head DX and Contest Group (SHDXCG) will once again be activating Ramsey Island between July 12-16th. Activity will be on all bands from 40-6 meters using 2 Hexbeams and a Windom. This year they are hoping to have a station dedicated to the Digital modes, mostly RTTY, using a TS480 at 200w and one of the Hexbeams. They have also analyzed their logs and seen that there is a shortage of contacts with North and South America, and also the countries around the Caribbean. They have looked at the terrain and the location of the antennas with a view to getting one Hexbeam a little higher to clear a small ridge that blocks the westernly

direction allowing these contacts to be made. As usual, QSL via the manager Tim, M0URX, (see www.m0urx.com) using his OQRS system for a speedy turn around. Logs will be uploaded to LoTW and Clublog as soon as they get back to the mainland. All details and (hopefully) a daily blog will be available on their Web site at: http://www.mc0shl.com
The team has also advised that they will operate from their farm HQ if they are unable to make the crossing to the island due to bad weather but will announce on air if this is the case.

EU-178. Operators Dominik/SQ7OXU, Constantin/RD1AR, Sergey/UA1ANA and Jack/SP7DPJ will be active as ES0W from Ruhnu Island between July 26-30th. Activity will include the RSGB IOTA Contest (July 28-29th) as a Multi-Op/Mixed-Mode/Dxpediton/Low-Power entry. Antennas will be a Hexbeam and Inverted Vs. QSL via SP7DPJ, direct or by the Bureau.

NA-029. Operator Ken, K6LA, will operate from Prince Edward Island in eastern Canada using the VY2TT superstation (Grid Square FN76vs, CISA PE-001) during the RSGB IOTA Contest (July 28-29th) as a Single-Op/All-Band/Mixed/24H entry. QSL via K6LA.

NA-129. John, VE8EV, will be active as VE8EV/p from Banks Island (Grid CQ71) during the RSGB IOTA Contest (July 28-29th) as a Single-Op/Mixed-Mode entry. QSL via his home callsign, direct, by the Bureau or LoTW. Watch for possible updates on his Blog page at: http://ve8ev.blogspot.com

NA-136. Adam, W1ASB, will be active as W1ASB/P from Ram Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/Low-Power/ Unassisted/ 12HR entry. QSL via the info on QRZ.com.

OC-135. (Update to OPDX.1066) Han, SM6CVX, plans to be active as P29VCX from Bougainville Island (not Buka Island) between November 6-9th. QSL via his home callsign.

K2, UNITED STATES (Special Event). Next weekend starts the 4th annual "Original 13 Colonies - Independence Week - Special Event", which begins 12:01 AM Eastern (0401Z), on July 1st, (That's one minute after midnight, early Sunday morning, July 1st) to 11:59 PM Eastern (0359Z July 6th) ending on July 5th (One minute to midnight, late Thursday night, July 5th). Recognizing that "Independence Day" (July 4th) comes in the middle of the week (Wednesday) and that some operators will be going to their work on the 2nd, 3rd and 5th, they have added a BONUS DAY on Saturday, June 30th, 2012!! Stations will operate from 09:00 AM Eastern (1300Z) right through until the 5th. Keep in mind that there may be fewer operators available on the work days, so PLEASE BE PATIENT! There will be at least two S.E. stations per colony state. Also included will be Super contest stations, multi-operator Club stations, and OM & XYL teams. Activity will be on 160-2 meters, except 60/30/17/12m, and using all modes (Satellites, CW, SSB and the Digital modes - but it is up to the individual colony

state station). The Colony state stations to look for are: K2A (New York), K2B (Virginia), K2C (Rhode Island), K2D (Connecticut), K2E (Delaware), K2F (Maryland), K2G (Georgia), K2H (Massachusetts), K2I (New Jersey), K2J (North Carolina), K2K (New Hampshire), K2L (South Carolina) and K2M (Pennsylvania). "ALL" Colony stations will issue a special event QSL card this year! Also, a special certificate is available. For complete details, visit their Web page at: http://www.13colonies.info

LJ2, NORWAY (Special Event). Look for special event station LJ2T to be active from "The Signals Museum of the Norwegian Armed Forces" near Lillehammer, Norway (locator JP51ED), between June 28th and July 1st. Activity will be on many bands and modes, most likely from 80 meters to 4 meters (70 MHz). QSL via LA5EAA. More info available at: http://www.qrz.com/db/lj2t

LY200/LY54, LITHUANIA (Special Events).....
LY200NB - Will be on the air last ten days of June to celebrate the 200th anniversary of Napoleon Army crossing river Nemunas in Kaunas, Lithuania. For more details, see QRZ.com. Also, see: http://en.wikipedia.org/wiki/Napoleonic_Wars

LY54SOP - Will be on the air during July 1-31st, to celebrate the 54th anniversary of SOP (Sea of Peace), Baltic Sea. Every year in July the radio amateurs of Mecklenburg-Vorpommern district accomplish special activities supporting the application of the SOP. The SOP is awarded for contacts with different countries/areas bordering the Baltic Sea and Norway each year during the month of July. For more details, see: http://www.amateurfunk-mvp.de/inhalte/sopdipl.htm

QSL both callsigns via LY5W (see QRZ.com). Working these stations, you have a good chance to work a new prefix for the LY WPX Trophy, LY WPX Trophy Honor Roll and the Baltic States WPX Trophy.

OH, ALAND ISLANDS. Czech senior operators Bob/OK2BOB, Franta/OK1HH and Jindra/OK1AMM will be active as OH0/homecall between June 24th and June

30th. Activity will be mainly CW and SSB on 160-6 meters. The WW LOC will be KP00AC on Aland Islands (EU-002). QSL via the OK Bureau or direct.

TY, BENIN. Pat, LA0HF, will be active as TY2BP from Fidjross&#65533;, Cotonou, beginning June 26th, for a minimum of 30 days, up to 45 days. Activity will be on 20/15/10 meters. QSL via IK2IQD.

VK0H, HEARD ISLAND (Update). On June 15th, the 2014 Cordell Expedition to Heard Island announced the initial team for the DXpedition. At this time this list is incomplete; it will be augmented in the coming months. The partial list of operators are Bob/KK6EK (Team Leader/Organizer), Peter/ON6TT (Co-Organizer), Christian/DL1MGB (Co-Organizer), Mike/N6MZ (Co-Organizer), Bill/AA7XT, Alan/AD6E, Gerd/DJ5IW, Franz/DJ9ZB, George/ N4GRN, Paul/N6PSE, Dr. Carlos/NP4IW (Logistics), Wes/W3WL and Dr. Glenn/ W0GJ (Physician). Non-operators from USA Dr. Jeffrey Bozanic (Co-Organ- izer, Environmental Science, Antarctic Diving) and Joan Boothe (Doc- umentation, Explorers Club). The support team (partial list) includes Rich/KY6R (Pilot/Software), Dean/N7XG (Software) and Peter/W6OP (Software). The next round of team members will be announced on August 15th. This project follows the very successful expedition to Heard Island carried out by this group in 1997. Details of that operation can be seen at: http://www.cordell.org/HI
The Web site for the 2014 DXpedition is at: http://www.cordell.org/HD

YN, NICARAGUA. Mike, AJ9C, will be active as YN2CC from Granada, Nicaragua, between November 20-28th. Activity will be on 160-6 meters using CW, SSB and RTTY. Also, Mike will be in the CQWW DXCW Contest (November 24-25th) as a Sinlge-Op/Low-Power entry. QSL via LoTW or direct to his home callsign.

VY0, CANADA (Nunavut Territory). Rob, KC0VEU, will once again be active as homecall/VY0 from Eureka, Ellesmere Island, Nunavut (NA-008, Grid Loc. EQ79ax) until July 5th. He is there on official business. Sometime during his stay, and weather permitting, he will attempt to operate from the PEARL facility 15km away which is located at 80°N - 86°25'W, and therefore in the rare ER grid (ER60) for those who chase the CQ Grid Fields award and the rare ITU Zone 75. PEARL (the Polar Environment Atmospheric Research Laboratory) is also a separate base for the Arctic Challenge <www.french-polar-team.fr>. This is Rob's fifth time on Ellesmere. PLEASE NOTE: KC0VEU recently passed his Extra class exam and is expecting a new callsign in the "AD0" prefix block, but will still sign / VY0. QSL direct or by the Bureau to his home callsign.

Ham Radio Still Thriving:

Posted: 24 Jun 2012 02:38 AM PDT
http://www.eham.net/articles/28532

Think ham radio has gone the way of the dodo? Think again, because amateur (also known as ham) radio is not only thriving, but it's also essential in assisting during an emergency. Don't let the name fool you. Amateur radio isn't something that anyone with a walkie-talkie can do. The federal government requires all amateur radio operators to take a test and be licensed in order to use the radio channels for amateur radios, as well as have call signs. For Charlie Ristorcelli of Poway (call sign NN3V), it's more than just an occasional fun hobby. Raised overseas where there was little infrastructure, he grew up with amateur radio being used to radio between towns for needed supplies and listening to shortwave radio for news. After receiving his amateur radio license in 1976, Ristorcelli began collecting amateur radio equipment -- everything from hand-built kits to more modern, advanced equipment. He also used his amateur radio knowledge in the military, where in the Gulf War he was involved in setting up one of the first computer-to-computer amateur radio systems, used to communicate ship-to-shore with packet radio. "It was the dawn of packet radio tech, which was like email," said Ristorcelli. Ristorcelli uses his vast array of amateur radio equipment to help in emergencies as well. Amateur radio is a huge benefit in emergencies, especially when cellphone and telephone systems become overloaded and inoperable. Hams (as amateur radio operators are known as) can use high frequency (HF) antennas to reach across the city, state, country or even the globe, depending on the size and strength of the antenna.

GB2RS NEWS

Sunday 24th June 2012

The news headlines:

* RadCom magazine suffers distribution delays

* Invitation to consult on 2m data channel reassignment

* AMSAT-Oscar 7 celebrates 10-year new lease of life

Gremlins have hit the July RadCom mailing. Investigations are continuing to determine the source and scope of the problem, but the RSGB is aware that many Members have yet to receive their copy. An electronic version of the July edition has been made available on the RSGB website at www.rsgb.org/radcom. Click on the words View free sample RadCom, located on the right of the page.

The RSGB is conducting a consultation on proposals put forward for the re-assignment of the 2m band data channels. This comes from pressure for assigning new digital internet gateways. The proposal leaves a significant number of channels for packet radio and other interests. All interested amateurs, whether RSGB Members or not, are invited to join the Litmus Test by following the `We need your Views' link on the RSGB home page, www.rsgb.org.

Amateur satellite AMSAT-Oscar 7 was launched in November 1974. It worked for around 8 years, until its batteries short- circuited in mid-1981. 20 years on, the batteries mysteriously went open circuit and the satellite came back to life, operating purely from its solar cells. On 21 June 2002, the satellite was heard again, and last Thursday marked 10 years of AO-7 operating in this second lease of life. The full story is at www.uk.amsat.org/8524.

Following the recent decision at the World Radiocommunication Conference 2012, the Malta Communications Authority granted Maltese amateurs access to 472-479kHz from 31 May. The country's National Frequency Plan identifies this as a Secondary allocation, with a maximum power of 1 watt EIRP.

The planned Radio for Young People ARDF day at Bracknell on 24 June has been cancelled, due to the small number of applicants.

The ARISS digipeater on the International Space Station has changed frequency from 145.825MHz to 437.550MHz. Packet operations were moved to the Columbus Module UHF radio when the Kenwood D700 radio was

recently powered down. This was because its power outlet was required for an additional air purifier to support the recently-arrived automated transfer vehicle. The Russian team has agreed to briefly reconnect the radio for scheduled ARISS school contacts but then will re-activate the purifier. This situation seems likely to continue until the automated transfer vehicle departs in September.

Barry Amateur Radio Society club would like to thank Kenwood Electronics UK Ltd for the loan of equipment for their Olympic flagship station 2 Oscar 1 2 W. The radios have already been on the air for a range of events, including covering progress of the Olympic Torch through South Wales. Look out for 2012W and the Barry Club on the air, not just over the Olympic period but throughout 2012. You can see the latest operating news on the club's website at www.bars.btik.com.

Copyright © RSGB 2012. Not for public release before Monday 25 June 2012 except as a GB2RS broadcast. In celebration of the new Bomber Command memorial to be unveiled in London on 28 June, GW3OQK plans to put his vintage T1154 and R1154 on the air. He invites other amateurs to join him on 40 and 80m, CW and AM, saying he would love to hear the chirp of some other old gear amongst the rock-steady modern transmissions.

Next Sunday, 1 July, is Alexanderson Day, which means that the World Heritage-listed SAQ transmitter will be on the air. This unique Swedish transmitter uses an Alexanderson Alternator to generate its 17.2kHz signals. It will be run up at 08:30 UTC and a message sent at 09:00. The machine will be started again at 11:30 UTC and a second message sent at 12:00. Special event station SK6SAQ will be operating on the same day on 3.755kHz from 07:00 UTC, plus 14.035MHz CW and 14.215MHz SSB between, and just after, the two SAQ transmissions. Full information is online at www.alexander.n.se.

And now for the details of rallies and events for the coming week

Hull & District Amateur Radio Society will be holding an open event today at the HADARS Club House, Walton Street Leisure Centre, Goathland Close, Walton Street, Hull HU3 6JB. Doors open for viewing at 10.30am. There will be a Bring and Buy, followed by an auction at 1pm. A BBQ and refreshments will be available. Further details from Julian on 07901 230 012.

Also today, the West Of England Radio Rally takes place at the Cheese & Grain, Bridge Street, Frome, Somerset BA11 1BE. There will be car parking, catering, disabled facilities, trade stands and an RSGB book stall. Contact Shaun, G8VPG, on 01225 873 098.

Sunday 1 July sees the Barford Norfolk Radio Rally at Barford Village Hall & Green, Barford, Norwich NR9 4AB. The location is 9 miles southwest of Norwich, close to the A11 and A47. There is talk-in on S22, car parking, and the gates open at 9am. Admission is £1.50, with children free. There will be a car boot sale, Bring & Buy, trade

stands, prize draw, refreshments available, plus disabled facilities. Contact radio@dcpmicro.com for more information.

Also on Sunday 1 July is the East Suffolk Wireless Revival, also known as the Ipswich Radio Rally. It takes place at The Orwell Crossing Lorry Park, A14 Eastbound, Nacton, Ipswich, IP10 0DD. There is talk-in on S22, car parking, and the gates open at 9.30am. Admission is £1, and you'll find a car boot sale, Bring & Buy, special interest groups, an RSGB book stall, trade stands and more. Contact Steve, M1ACB, on 07711 329 624.

The final event for Sunday 1 July is the 16th Red Rose QRP Festival at Formby Hall, Alder Street, Atherton, Manchester M46 9EY. There's free car parking, disabled facilities, trade stands, special interest groups, a Bring & But, catering and a licensed bar. Admission is £2, with under-14s free. Details from Les Jackson, G4HZJ, on 01942 870 634.

Now for the news of special events

GB10SOTA, celebrating 10 years of Summits on the Air, continues from the summit of Mount Snowdon, GW/NW-001. Using HF, VHF and UHF, operation will continue until 15 July from the summit of the highest mountain in England and Wales. Details are on QRZ.com.

GB2SAM will be operated jointly by Southdown Amateur Radio Society and St Andrews School in Meads, Eastbourne. Operation will be from the school on the morning of Wednesday 27 June. Then, on the afternoon of Friday 29 June, pupils will join club members at the Redoubt Fortress & Military Museum, Eastbourne, from where GB2RFM will be on the air. Operation will be on HF, VHF and UHF, plus Echolink and D-Star.

Copyright © RSGB 2012. Not for public release before Monday 25 June 2012 except as a GB2RS broadcast. Hinckley Amateur Radio Electronics Society is running GB6AFD for Armed Forces Day on Saturday 30 June at Gamecock Barracks, Bramcote, Nuneaton CV11 6QN. Contact Vinny, M0TAV, on 07947 330 700.

Marking the 91st anniversary of the Royal British Legion, GB2SBL will be active on Sunday 1 July from the shack at Eureka Primary School, Midway. Assisted by members of South Derbyshire and Ashby Woulds Amateur Radio Group, the station will be active on HF, VHF and UHF from 10am to 5pm.

And now the DX news compiled from 425 DX News and other sources

Tynemouth Amateur Radio Club is running its first ever mini DXpedition to the west coast of Scotland. They will be based in the Lochgilphead area between 30 June and 7 July. It is intended to operate on all HF bands in a variety of modes, plus terrestrial and satellite VHF. They also hope to activate JURA, EU-008, and some nearby SOTA summits. Details are on the club website, www.g0nwm.com.

The Turkish Special Wireless Activity Team and GITRAD will be activating some new lighthouses for the Western Blacksea Lighthouses on the Air award. On 30 June and 1 July, TC6BLH will be on the air at Sinop Boztepe Lighthouse. Details are at www.tcswat.org.

Celebrating the 30 years of DXCC Entity 1A, 1A0C will be on the air from 1 to 4 July at Santa Maria del Priorato, home of the Sovereign Military Order of Malta. The operator list includes 1A0X, 1A0Z, EA2RY, EA5RM, EA7AJR, EA7KW, F5CWU, IN3ZNR, IT9YVO, IZ8IYX, PB2T, SP3DOI and KH6CG as a pilot for North America and Pacific. They will be active on HF and 6m. QSL via Francesco Cozzi, 1A0Z, whose details are correct on qrz.com.

Now the contest news

The 50MHz CW Contest is a new event to the calendar. It runs from 0900 to 1200UTC this morning. The exchange is signal report, serial number and locator.

This afternoon, the 4th 70MHz Cumulative takes place from 1400 to 1600UTC. The exchange is also signal report, serial number and locator.

The UK Microwave Group Cumulative Contest also takes place today. Activity will be on 5.7, 10 and 24GHz from 1000 to 1600UTC. Using all modes, the exchange is signal report, serial number and locator.

Two contests take place simultaneously from 1900-2230UTC on Thursday 26 June. The 50MHz UKAC is on 6m, whilst the SHF UKAC is on 2.3 to 10GHz. The exchange for both is signal report, serial number and locator.

Finally, the Worked All Britain 144MHz Low Power Phone contest takes place on Sunday 1 July from 1000 to 1400 UTC. The exchange is signal report, serial number and WAB square. The maximum permitted power is 10 watts. Full details of the rules and logsheets may be obtained from the WAB website, www.worked-all-Britain.co.uk or from the Contest Manager, G3XKT, email aebbooks@ntlworld.com.

Copyright © RSGB 2012. Not for public release before Monday 25 June 2012 except as a GB2RS broadcast. And now the solar factual data for the period from Friday the 15th to the 21st of June, compiled by Neil Clarke, G0CAS on Friday 22nd of June.

We start this week with the latest smoothed monthly sunspot numbers, which are for September, October and November 2011 and are 59.5, 59.9 and 61.1 respectively.

st One large sunspot group dominated the solar disc until the 21 , when it rotated out of view. Even though the group remained large, it magnetically simplified day after day, with the consequence of failing to produce any M class solar flares. Numerous C class solar flares took place, some from the smaller groups that were also visible. Solar flux levels declined from 145 units on the 15th to 98 by the 21st. The average was 119 units. The 90 day solar flux average on the 21st was 119 units, that's one unit up on last week. X-ray flux levels declined

from B5.5 units on the 15th to B2.1 by the 21st. The average was B3.7 units. Geomagnetic activity started at quiet levels, with an Ap index of only 3 units but, during the 16th, at least a couple of coronal mass ejections arrived, increasing activity to major storm levels. The Ap index on the 17th was 55 units. Activity then declined back to quiet levels by the 19th. The average was Ap 15 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 300 kilometres per second on the 16th to 550 during the 17th and the 18th. Particle densities increased to 40 particles per cubic centimetre on the 16th and 31 particles per cubic centimetre on the 17th. Bz varied between minus 4 and plus 1 nanoTeslas on the quietest days, and between minus 20 and plus 30 nanoTeslas during the height of the storm. The Bz remained negative for several hours during the morning of the 17th.

And finally the solar forecast. This week the quiet side of the Sun is expected to be looking our way. Solar activity is expected to be low, with only a small chance that activity would increase any higher. Solar flux levels should be about at their lowest now, and a slight increase is expected throughout the week to around 110 units. Geomagnetic activity is expected to be quiet every day, but a coronal hole disturbance is expected to arrive right at the end of the period. MUFs during daylight hours at equal latitudes should be about 24MHz for the south and 21MHz for the north. Darkness hour lows should be around 14MHz. Paths this week to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of about 20MHz. The optimum working frequency with a 90 per cent success rate will be around 15MHz. The best time to try this path will be between 1500 and 2100 hours. Sporadic-E is expected to take place up to 70MHz most days with openings on 144MHz only on the occasional day.

And that's all for this week from the propagation team.

Copyright © RSGB 2012. Not for public release before Monday 25 June 2012 except as a GB2RS broadcast.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. Wythall Radio Club Curry Night is having a curry night on Monday, for which members must book in advance. On Tuesday, Practical Wireless VHF columnist Tim Kirby, G4VXE will be speaking about his world of VHF. On Sunday 1 July there's a club net on 145.225MHz. Details from Chris, G0EYO, on 07710 412 819.

On Monday 25 June South Birmingham Radio Society is loading trailer for Field Day on Monday, then doing Shack and aerial work on Friday. Contact Don, on 01214 581 603.

Lincoln Short-Wave Club is taking part in the 50MHz UK AC from the shack on Tuesday from 20.00. On Wednesday there will be a talk at the BSA Club from 20.15. Thursday sees the club operating the WAB Olympic Torch Special Event Station all day, plus the simplex net on 145.375MHz from 20.00. Finally, on the 30th, it's Saturday in the Shack. For more information contact Pam Rose, G4STO, on 01427 788 356.

Friskney and East Lincolnshire Communications Club a club net on Monday from 7pm, on 144.165 USB, vertical polarisation. On Wednesday there is a M3+M6 club net on GB3FR from 7.30pm, and on Friday there is a club net on GB3FR from 8pm. For more information contact the FELCC Information Line on 07554 362 020. Contact the FELCC Information Line on 07554 362 020.

Now we return to the traditional listing in date order. On Monday 25 June Gloucester Amateur Radio & Electronics Society is having an informal meeting. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 25 June Stratford Upon Avon District Radio Society is holding a 2m fox hunt, starting from the Home Guard Club. Contact G0CHO, on 01608 664 488.

On Tuesday 26 June Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 26 June Loughborough & District Amateur Radio Club is holding a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 26 June Worcester Radio Amateurs Association is having a construction evening. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Wednesday 27 June Midland Amateur Radio Society is holding training classes plus an equipment and aerial review. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 27 June South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday 27 June Telford & District Amateur Radio Society is holding its 2nd 2m DF hunt, starting at 1930, with 2E0TRO as the fox. Contact Mike, G3JKX, on 01952 299 677.

Copyright © RSGB 2012. Not for public release before Monday 25 June 2012 except as a GB2RS broadcast. On Friday 29 June Bromsgrove & District Amateur Radio Club is preparing for its special event station. Contact Chris, M0BQE on 01905 776 869.

On Friday 29 June Coventry Amateur Radio Society is having a radio workshop evening and holding its portable competition. Contact John,

G8SEQ, on 07958 777 363.

On Saturday 30 June Hinckley Amateur Radio Society is operating GB6AFD for Armed Forces Day at Gamecock Barracks, Bramcote, Nuneaton CV11 6QN. Any club or individual is welcome to attend and operate, where applicable, and any help with setting up or running the event would be gratefully received. Contact Vinny, M0TAV, on 07947 330 700.

NEWS FOR THE NORTH OF ENGLAND We start with clubs that have several events this week. Denby Dale Radio Club is operating GX4WAB for the WAB Follow The Torch event on Monday. Wednesday they are having a night on the air from 19.30 on 145.575MHz. Details from Richard, M0RBG, on 07976 220 126.

South Manchester Radio and Computer Club is holding its monthly technical forum on Monday, then on Thursday it's part 2 of the Wonders of China talk by Dave, G4UGM. Details from Ron, G3SVW, on 01619 693 999.

Otley Amateur Radio Society is holding a Morse class with G0WNT and taking part in the 50MHz UKAC Contest on Tuesday. Then on Saturday they are operating GB200REC to celebrate the 200th anniversary of the Royal Engineers, Chatham. Contact Paul, 2E0PAK, on 07768 996 370.

Wakefield & District Radio Society is having a quiz with Dave, G4CLI on Thursday. Saturday sees the Intermediate and Advanced Licence courses continue from 13:30. Contact Ken, G8FSO, on 07900 563 117.

Now we return to the traditional listing in date order. On Sunday 24 June Hull & District Amateur Radio Society opens its doors at 10.30 for viewing its Bring & Buy, followed by an auction at 1pm. The event is at Walton Street Leisure Centre, Walton Street, HULL, HU3 6JB. A barbecue and refreshments will be available. Details from Julian Randall, on 07901 230 012.

On Monday 25 June Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 25 June Bolton Wireless Club is planning for VHF National Field Day and holding an EGM. For details, send an email to boltonwireless@gmail.com.

On Tuesday 26th June Sheffield Amateur Radio Club is operating as GX4WAB all day in support of the Olympic Torch relay. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Tuesday 26 June Halifax & District ARS is having a club night. Contact Martin, M0GQB, on 01422 341 317.

On Tuesday 26 June Morecambe Bay Amateur Radio Society is holding a members' night. Contact Sheila, on 07867 516 836.

On Wednesday 27 June Hornsea Amateur Radio Club is holding a fox hunt. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Thursday 28 June Ripon & District Amateur Radio Society has its poundshop antenna challenge. Details from Rob Hall, M0RBY, on 07876 085 631.

On Friday 29 June East Cleveland Amateur Radio Club is having a radio magazines evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 29 June Tynemouth Amateur Radio Club is having Morse tuition and putting G0NWM on the air. Contact Bob, M6KLO, by email to mail@g0nwm.com.

Copyright © RSGB 2012. Not for public release before Monday 25 June 2012 except as a GB2RS broadcast.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday 26 June Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Thursday 28 June Aberdeen Amateur Radio Society is holding Morse classes and is on the air. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Friday 29 June Cockenzie & Port Seton Amateur Radio Club is having a normal club night, but please note the change of night. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week. Today, South Essex Amateur Radio Society is taking part in

th Museums on the Air, operating GB2BM at Bay Museum. On Saturday the 30 , they are taking part in Armed Forces Day at The Paddocks, Canvey Island. Contact Dave, G4UVJ, on 01268 697 978.

Farnborough & District Radio Society is running a 80m CW net 3.570MHz from 1pm on Monday, followed by a 2m net on 144.675MHz at 8pm. On Wednesday there's a talk on microwaves by Colin, G8BCO, then on Friday it's the Top Band net on 1.995MHz from 8pm. Contact Neville, G3SPD, on 01252 404 816.

On Wednesday 27 June Norfolk Amateur Radio Club is having a talk and demo on 3D television from 1950s to 2012 by Mike Cox. Please bring your polarised cinema or LG TV 3D glasses to this talk. On Sunday 1 July it's the Barford Radio Rally at Barford Village Hall. Details from Chris Danby, G0DWV, on 01603 898 678.

Worthing & District Amateur Radio Club is having a surplus equipment sale on Wednesday, then on Sunday 1 July it's the monthly breakfast meeting at The Goring Caf© from 9am. Contact John, G8FMJ, on 01273 593 232.

Shefford & District Amateur Radio Society is planning for VHF NFD on Thursday. Saturday sees a visit & guided tour of Bletchley Park. Details from John Burnett, M6JBU, on 07860 804 793.

Now we return to the traditional listing in date order. On Sunday 24 June East Kent Radio Society is having its meeting and picnic at Stelling Minnis. Details from Karl Davies, M1DFM, on 01227 710 120.

On Sunday 24 June Loughton & Epping Forest Amateur Radio Society is operating GB2AVF at Abridge Village Fete. Contact Marc Litchman, G0TOC, on 02085 021 645.

On Sunday 24 June Waterlooville Amateur Radio Club is holding a fundraising night. Details from Rich, G4IBW, on 0772 225 002.

On Monday 25 June Surrey Radio Contact Club is having a talk on the history of sound recording by Alvin, G6DTW. Contact John, G3MCX, on 02086 883 322.

On Tuesday 26 June Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

Copyright © RSGB 2012. Not for public release before Monday 25 June 2012 except as a GB2RS broadcast. On Tuesday 26 June Chelmsford Amateur Radio Society is having a club net night from 8.30pm. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 26 June Dorking & District Radio Society is having a talk on the Victorian internet by Ken Tythacott, M3CFC. Contact Garth, G3NPC, on 01737 359 472.

On Tuesday 26 June Harwell Amateur Radio Society is having a shack activity night. Details from Malcolm, G8NRP, on 01235 524 844.

On Tuesday 26 June Radio Society of Harrow is having an informal evening at Rayners Lane. More information from Linda, G7RJL, on 02083 868 586.

On Wednesday 27 June Chesham & District Amateur Radio Society is holding a pedestrian DF hunt around Chesham using 2m FM. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 27 June Darenth Valley Radio Society is preparing for VHF field day. Contact Bob, M0RAW, on 01322 663 804.

On Wednesday 27 June Hastings Electronics and Radio Club is having an all day BBQ and /P operation at Hastings Country Park. Details from Gordon, on 01424 431 909.

On Wednesday 27 June Newbury & District Amateur Radio Society is having a presentation on the Rampisham shortwave transmitter station by Tony, G0OVA. Contact Rob, G4LMW, on 01635 862 737.

On Thursday 28 June Bittern DX Group is holding its AGM at Pinewood Park Leisure Club. Details from Linda, G0AJJ, on 01692 404 154.

On Thursday 28 June Edgware & District Radio Society invites members t bring in their old and dusty radio books to show everyone.. More information from Mike, G4RNW, on 02089 500 658.

On Thursday 28 June Hilderstone Radio and Electronics Club is having a talk on the history of the tugboat Cervia by Mike Howland, G4MIX. Contact Chrissie Turner, by email to hilderstoneclub@gmail.com.

On Thursday 28 June Horsham Amateur Radio Club is having a social evening at the Queens Head, Barns Green, RH13 0PS. Details are on the web at www.harc.org.uk.

On Thursday 28 June Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564 242.

On Thursday 28 June Reading & District Amateur Radio Club is having a talk by Tom Grady, G6IGA, on the history of Pye, Philips and Simoco equipment and its conversion to amateur use. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 28 June Vange ARS is holding a natter night. Details from Steve, G0KVZ, on 01268 552 606.

On Friday 29 June Fort Purbrook Amateur Radio Club is having a presentation on EasyPAL by Mike, G4PRG and Gerry, G3COO. Contact Mick Ponsford, M0GWD, on 02392 366 699.

On Friday 29 June Mid-Sussex Amateur Radio Society is having an equipment familiarisation evening in advance of NFD. Details from Rob, 2E0RJA, on 01444 232 129.

On Friday 29 June Wimbledon & District Amateur Radio Society is holding a pre-camp meeting. Contact Andrew Maish, G4ADM, on 02083 353 434.

Copyright © RSGB 2012. Not for public release before Monday 25 June 2012 except as a GB2RS broadcast.

NEWS FOR THE SOUTH WEST We start with clubs that have several events this week. Today, South Bristol Amateur Radio Club is running the West of England Radio Rally. On Thursday they are holding open house and having an on the air night. Details from Andrew Jenner, G7KNA, on 07838 695 471.

Exeter Amateur Radio Society is considering ham radio test equipment at the Moose Centre from 19:00 on Monday. The 2m club net is on Tuesday at 19.45 and the 4m net on Thursday at 19.00. Contact Nick, 2E0NRJ, on 01363 775 756.

Now we return to the traditional listing in date order. On Sunday 24 June Appledore & District Amateur Radio Club is at Abbotsham Fete. Contact Brian Jewell, M0BRB, on 01237 473 251 for more information.

On Sunday 24 June Trowbridge & District Amateur Radio Club is having a club table at the West Rally at the Cheese and Grain, Frome. Details

from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Monday 25 June Bristol RSGB Group is holding its summer Christmas party. Details from Robin, G3TKF, on 01225 420 442.

On Monday 25 June Weston Super Mare Radio Society is holding Morse classes & a natter night. Details from Paul, G3SDH, on 01761 221 206.

On Tuesday 26 June Mid Somerset Amateur Radio Club is having a social night at the King's Arms, also known as the Dusthole, Shepton Mallet. Contact Nick, 2E0FGQ, on 01749 346 320.

On Wednesday 27 June Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417 048.

On Wednesday 27 June Torbay Amateur Radio Society is having a presentation by Steve White, G3ZVW, on how the RSGB Yearbook is edited. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

On Thursday 28 June Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317 750.

NEWS FOR WALES No news items have been received for Wales this week.

Copyright © RSGB 2012. Not for public release before Monday 25 June 2012 except as a GB2RS broadcast.

1091. Weekly Highlights of Solar and Geomagnetic Activity, 18 - 24 June 2012

Newsgroup: rec.radio.amateur.misc
Date: 2012-06-25 15:30:06 UTC
From: SWPC.Webmaster@noaa.gov
Message-ID: <20120625153001.F139233C91@panix2.panix.com>

```
:Product: Weekly Highlights and Forecasts
:Issued: 2012 Jun 25 1246 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
18 - 24 June 2012

Solar activity ranged from very low to low during the period. The
largest x-ray event was a C3 flare, produced by Region 1504 (S17,
L=087, class/area Ekc/750 on 16 June) at 20/1628 UTC. Two new active
regions were numbered during the period, Region 1510 (S16, L=019,
class/area Cro/10 on 19 June) and Region 1511 (N15, L=357,
class/area Cro/30 on 23 June). Neither of these new regions produced
a flare event. No Earth directed CMEs were observed during the
period.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
high levels throughout the period.

Geomagnetic field activity ranged from quiet to minor storm levels
during the period. Early on 18 June, minor storm levels were
observed as the result of residual effects from the 13 and 14 June
CMEs. Conditions recovered to quiet levels later on the 18th and
remained so for the rest of the period.

Forecast of Solar and Geomagnetic Activity
25 June - 21 July 2012

Solar activity is expected to begin the period at very low to low
levels and remain so until around 03 July. Beginning on 04 July, a
chance for M-class flares will exist when old Region 1504 (S17,
L=087) is expected to return.

No proton events are expected at geosynchronous orbit, though a
slight chance may exist when Region 1504 returns.

The greater than 2 MeV electron flux at geosynchronous orbit is
expected to begin the period at normal to moderate levels, and
remain so through 02 July. Flux values are expected to increase to
high levels on 3-8 July due to recurrent coronal hole high speed
```

stream effects. Normal to moderate levels are expected to return from 9 July through the remainder of the period.

Geomagnetic field activity is expected to begin the period at mostly quiet levels and remain so through 28 June. On 29 June, a possible Co-rotating Interaction Region is forecast to produce mostly unsettled levels with a chance for active conditions prior to the onset of a coronal hole (CH) high speed stream. CH effects are expected to produce unsettled to active levels with a chance for minor storm periods on 30 June through 03 July. On 04-05 July, quiet to unsettled levels are expected as the CH effects wane. Mostly quiet conditions with isolated unsettled periods are forecast from 06 July through the end of the period.

100 memory buttons and more for Flex PowerSDR

Posted: 25 Jun 2012 03:15 AM PDT
http://forums.qrz.com/showthread.php?351472-100-memory-buttons-and-more-for-Flex-PowerSDR&goto=newpost

100 memory buttons and more for Flex PowerSDR

I am pleased to announce the release of FlexButtons, donationware software that adds memory buttons for PowerSDR (Flex SDR Radios) and an integrated CAT interface to MixW digi-mode software.

I created FlexButtons for two reasons. Firstly I was frustrated with the memory function in PowerSDR (TM). I wanted a quick and easy way to store the current frequency and other parameters and recall them by pressing a button rather than delving into a menu based system. FlexButtons works a little like the buttons on your car radio, simply press ☐Save☐ and then the button position that you want to use.

Secondly I wanted to use my Flex radio with digimode software, in my case MixW(TM). The problem was that with only one monitor, the Digimode screen sits on top of PowerSDR(TM) and it disappears when you go to change a filter setting or any other function on the Flex radio.

With FlexButtons you can run PowerSDR(TM) minimised but still control the features I wanted, such as; mode, mute, VAC, and the filter width.

If you save your favourite digimode frequencies to memory buttons you can easily swap between bands and band segments.

Now I have two monitors and normally run PowerSDR(TM) on one with MixW on the main monitor with FlexButtons as a kind of tool bar at the bottom of the screen.

FlexButtons has full help and installs without making changes to Windows registry.

FlexButtons v1.0 Beta is availabe free from the author, my email is under ZL3DW on QRZ.com

Andrew Barron ZL3DW

Ham Operators needed to support Coast to Coast Against Cancer Foundation

Posted: 25 Jun 2012 03:12 AM PDT
http://forums.qrz.com/showthread.php?351470-Ham-Operators-needed-to-support-Coast-to-Coast-Against-Cancer-Foundation&goto=newpost

Ham Operators needed to support Coast to Coast Against Cancer Foundation

Volunteers are needed to provide communications in support of this worthwhile event. It takes place along the Cabot Trail in Nova Scotia August 3-5, 2012 and involves cycling road routes with more than 100 cyclists participating and more than 50 volunteers.

ARES is involved with this organization in Alberta and Ontario, and they have put out a call to us for support for the first time in the Atlantic Region.

If you are able to help, please drop me a note at dougvo1dtm@gmail.com or contact Atlantic Director Ev Price at vo1dk@rac.ca or Deputy Director Len Morgan ve9my@rac.ca.

Thanks for your interest.

73,

Doug Mercer VO1DTM/VO1DM CEC

Chief Field Services Officer

ANS-176 AMSAT News Service Weekly Bulletins

Posted: 24 Jun 2012 08:03 AM PDT
http://forums.qrz.com/showthread.php?351344-ANS-176-AMSAT-News-Service-Weekly-Bulletins&goto=newpost

AMSAT NEWS SERVICE

ANS-176

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor@amsat.org

In this edition:

* Reminder to Submit Your AMSAT Field Day Satellite Summary Sheet

* Video Posted From ARISS Contact with 8N3KN in Japan

* Celebrating 10th Anniversary of OSCAR 7's Return To Life

* AO-7 DX Opportunities

* ARISS Contact Planned as NASA Hosts Future Female Explorers

* Winner of HORYU-2 Receiving Competition

* ARISS Status - 21 May 2012

SB SAT @ AMSAT $ANS-176.01

ANS-176 AMSAT News Service Weekly Bulletins

AMSAT News Service Bulletin 176.01

From AMSAT HQ SILVER SPRING, MD.

June 24, 2012

To All RADIO AMATEURS

BID: $ANS-176.01

Reminder to Submit Your AMSAT Field Day Satellite Summary Sheet

By the time you are reading this bulletin the 2012 Field Day may be already complete for you. The AMSAT Field Day Rules document (available in PDF and MS-Word format) are linked on the AMSAT front page.

The Field Day Rules document contains the Satellite Summary Sheet for submitting your entry. This sheet should be used for submission of the AMSAT Field Day competition and be received by AMSAT Director of Awards, Bruce Paige, KK5DO (email or postal mail) by 11:59 P.M. CDT, Monday, July 09, 2012. The preferred method for submitting your log is via e-mail to kk5do@amsat.org or kk5do@arrl.net.

You may also use the postal service but give plenty of time for your results to arrive by the submission date. Add photographs or other interesting information that can be used in an article for the Journal.

You will receive an email back (within one or two days) from Bruce when he receives your email submission. If you do not receive a confirmation message, then he has not received your submission. Try sending it again or send it to the other email address.

If mailing your submission, the address is:

Bruce Paige, KK5DO

Director of Awards and Contests

PO Box 310

Alief, TX 77411-0310.

Certificates will be awarded to the first-place emergency power/portable station at the AMSAT General Meeting and Space Symposium in the fall of 2012. Certificates will also be awarded to the second and third place portable/emergency operation in addition to the first-place home station running on emergency power. A station submitting high, award-winning scores will be requested to send in dupe sheets for analog contacts and message listings for digital downloads.

[ANS thanks Bruce Paige, KK5DO for the above information]

Video Posted From ARISS Contact with 8N3KN in Japan

On Wednesday, June 6, students attending Kawachinagano Eastside Junior High school, Osaka prefecture, Japantook part in an Amateur Radio on the International Space Station (ARISS) contact with André Kuipers, PI9ISS on ISS.

At the beginning of the contact the school was experiencing a power blackout, but recovered in time so that all children were able to ask their questions. The event supplemented lessons about space and the ISS.

Video of this contact is now available on YouTube.

[ANS thanks ARISS for the above information]

Celebrating 10th Anniversary of OSCAR 7's Return To Life

An article posted on the AMSAT-UK web this week reminds us of the 10th anniversary of the auspicious discovery by Pat Gowen, G3IOR on June 21, 2002 when he first noticed a beacon sending slow 8-10 wpm CW on 145.973.8 MHz. It sounded like old OSCAR satellite telemetry, it had the familiar HI HI followed by a string of numbers in groups of three. After monitoring by many radio amateurs it turned out to be OSCAR-7, and it seemed to have come back from the dead.

Pat posted a message on the amsat-bb bulletin board, "I have just come across something most remarkable this Friday 21st June evening ... It

sounded VERY familiar ... Could any veteran keen observers (who might look for it) ..." Pat's original message announcing his discovery can still be read in the amsat-bb archives.

It is believed that in 1981 the batteries failed short-circuit, however, in 2002 they became open-circuit enabling the satellite to run again from the solar panels. Since that day OSCAR 7 has been operational when in sunlight and provided radio amateurs with many long distance (DX) SSB/CW contacts.

Remember when working OSCAR 7 use the least uplink power possible to minimize your downlink power usage, and maximize the number of simultaneous contacts supported in the passband.

A BBC News report Radio ham finds lost satellite about the reception of OSCAR 7 by Dave Rowan G4CUO has been posted.

A collection of photos by Dick Daniels W4PUJ taken during the construction, test and launch of the AMSAT-OSCAR 7 spacecraft in 1973 and 1974 can be viewed in N4HY's album.

Be sure to view the full AMSAT-UK article containing photos and additional links.

The satellite alternates between Mode A and B with random changes between modes when AO-7 powers up re-entering the sunlit portion of its orbit. Monitor the Live OSCAR Satellite Status Page for postings of latest operating mode.

Uplink: 145.850 to 145.950 MHz CW/USB Mode A

432.125 to 432.175 MHz CW/LSB Mode B

Downlink: 29.400 to 29.500 MHz CW/USB Mode A (1W PEP)

145.975 to 145.925 MHz CW/USB Mode B (8W PEP)

145.975 to 145.925 MHz CW/USB Mode C (2W PEP)

Beacons: 29.502 MHz CW

145.972 MHz CW

435.100 MHz CW

2304.100 MHz CW

Official Webpage:

http://www.amsat.org/amsat-new/satel...ummary/ao7.php

[ANS thanks AMSAT-UK and AMSAT-NA for the above information]

AO-7 DX Opportunities

Paul Robinson, 2E1EUB will be operating mobile 2M1EUB as he tours around Scotland between June 26 through approximately July 9. He plans operations

from grid squares IO77, IO87, and IO86 with additional coverage if time permits. He will be active from any spots along the road that he can access the satellites. Activity will be on 160 and 80 meters, 2 meters SSB and on satellites including AO-7. Check out QRZ.com under 2M1EUB for more info.

Bill Dzurilla, NZ5N is now active as OM3BD from Slovakia, grid locator JN88mf this summer and is active on AO-7. Any North American stations in range are invited to email Bill for skeds: billdz.geo@yahoo.com

Bill wrote, "It seems that the orbits have somehow shifted and my windows to North America are a bit longer this year, and from my hill I can hear the bird to -2 degrees."

[ANS thanks Paul Robinson 2E1EUB/2M1EUB and Bill Dzurilla, NZ5N/OM3BD for the above information]

ARISS Contact Planned as NASA Hosts Future Female Explorers

A press release from NASA Headquarters, Washington, DC notes that this week eighty-four female high school students from 29 states will plan a simulated mission to Mars and experience life as an engineer or scientist when NASA's Johnson Space Center in Houston hosts two events focused on science, technology, engineering and mathematics (STEM) in June and July.

The Women in STEM High School Aerospace Scholars project, or WISH, is sponsoring two six-day summer camps for rising high school seniors. The young women will work in teams with female NASA mentors to develop mission plans for launching to Mars, living and working there, and integrating the many components necessary for a successful planetary mission. They will work within the confines of a fictitious budget and build several small mockups of vehicles to demonstrate a successful launch and landing of the Mars spacecraft.

"WISH gives some of our brightest future innovators a chance to experience some of the exciting challenges that NASA engineers and scientists face on a daily basis," said Johnson Deputy Director and four-time space shuttle astronaut Ellen Ochoa. "It shows the young women that there are a variety of opportunities for them in technical fields."

Young women participating June 24-29 will hear a first-hand account of life in space from NASA astronaut Shannon Walker. Participants July 8-13 will have a chance to speak with a current space station astronaut via ham radio as part of the Amateur Radio on the International Space Station program, a NASA educational initiative that facilitates direct links between students and astronauts.

The young women were selected based on completion of interactive, online lessons focused on space exploration and mapped to national education standards, academic merits and geographic diversity. The WISH program encourages young women to pursue science, technology, engineering and mathematics degrees and exposes them to the real-world applications of STEM careers at NASA. This program is in its second year. It began as a NASA accompaniment to the White House Council on Women and Girls.

The NASA Press release can be viewed on-line at:

http://www.nasa.gov/home/hqnews/2012...-209_WISH.html

[ANS thanks NASA for the above information]

Winner of HORYU-2 Receiving Competition

Built by students at the Kyushu Institute of Technology (KIT) the amateur radio satellite HORYU-2 was launched on May 17 at 1639 UT.

Radio amateurs from around the world sent in telemetry and the winner with the most points has been announced as Yo####omo Iji JA6PL.

The top three places were:

1st place: JA6PL (91 points)2nd place: ZL2BX (36 points)3rd place: JF1EUY (35 points)

The satellite□s callsign is JG6YBW and the CW telemetry beacon frequency is 437.375 MHz (+/- Doppler shift).

Free KIT HORYU-2 telemetry software can be downloadedKIT HORYU Blog in Google EnglishJapanese HORYU website in Google EnglishEnglish language version of HORYU websiteAMSAT-UK posting on HORYU-2.HORYU-2 online WebSDR receiverKIT HORYU-2 Facebook GroupHORYU-2 CW Telemetry Decoder by DK3WN

[ANS thanks the HORYU-2 Team and AMSAT-UK for the above information]

ARISS Status - 18 June 2012

1. Successful ARISS Contacts Held

ESA-ESTEC arranged for an ARISS contact that was held on Tuesday, June 12 at the Ruimtevaart Museum in Lelystad, the Netherlands with students that had taken part in André Kuipers' Mission: Spaceship Earth competition. Through this program, Kuipers gave assignments to Dutch school children and the winners of the competition were

invited to the event. Kuipers chatted with students and answered their questions about space. ARISS delegate Bertus Hüsken, PE1KEH attended the event and presented ARISS activities to the audience. Telebridge station W6SRJ in California handled the radio connection. Video of the event was posted.

Students from St. Anne's Primary School in Strathfield South, NSW, Australia spoke with Joe Acaba, KE5DAR on the ISS through an Amateur Radio on the International Space Station (ARISS) contact on Wednesday, June 13 via telebridge station LU8YY in Argentina. Approximately 150 people attended the event. The contact was integrated into the space curriculum across all grades and was held along with the school's science fair.

2. Astronaut Training Status

Barry Wilmore took part in an ARISS introductory class on Monday, June 11.Wilmore is slated to fly with Expedition 41 in September 2014.

[ANS thanks Carol, KB3LKI, for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information.

Exciting new logging program released

Posted: 24 Jun 2012 12:53 AM PDT
http://forums.qrz.com/showthread.php?351307-Exciting-new-logging-program-released&goto=newpost

In recent weeks Daniele Pistollato IW3HWH has released an exciting new and free logging program called LOG4OM

Although the software is still under development it already provides most of the features that are to be expected from top quality Ham software plus some intriguing new facilities with more to come in the future.

LOG4OM already includes ....

1. SQLite and MySQL database options

2. Worked before warnings

3. On line call lookup from QRZ and HamQTH

4. QSL control including QSL card and label printing within the program.

4. Full upload/download feature for eQSL, LOTW, HRDLog and Clublog

5. HD Grey line map with Long/Short path heading and distance plotting.

6. Full DX Cluster support with 'Wanted' colour coded entries - Cluster commands and filters - Cluster scanner and a Super Cluster?

7. Integration with DM780 for data modes.

8. IOTA, Countries and LOTW databases built in and automatically updatable.

9. Statistic analysis including award status

10.CAT connection for most transceivers and receivers

11. ADIF import and export plus Excel .CSV and PDF export of log.

12. Cluster integrated with propagation information from HRDLog.net

Plus much, much more with exciting new features to come.....

The program is available in the English and Italian languages but at this time the user guide is only available in Italian, however the software is very intuitive without an English user guide, which will be available very soon.

LOG4OM can be downloaded FREE from http://www.pisto.it/wordpress/

LOG4OM Yahoo Group is located at
http://uk.groups.yahoo.com/group/Log4om_g4pop/

LOG4OM Eham reviews are here http://www.eham.net/reviews/detail/10506

Ham Operators Bask In The Timelessness Of Their Technology:

Posted: 24 Jun 2012 05:00 PM PDT
http://www.eham.net/articles/28534

Bob Lightner's house is really no different from any other house on his street -- a large, one-story home that is well-kept and inviting. Look more closely, however, and you'll see the tower with multiple antennas protruding from behind the home and extending far above the roof. Each antenna allows Lightner to access different bands, or sets of frequencies, that the FCC has designated for amateur -- or HAM -- radio use. Using Lightner's home as their base, members of Gainesville's HAM community, who call themselves the Brotherhood of Every Amateur North of Orlando, or BEANOs, participated Saturday in the American Radio Relay League's Field Day -- in which over 35,000 amateur radio operators nationwide set up their equipment in various locales. The event continues until 2 p.m. Sunday.

Illinois Governor has Ham Radio Antenna bill on his desk

Posted: 26 Jun 2012 07:51 AM PDT
http://forums.qrz.com/showthread.php?351641-Illinois-Governor-has-Ham-Radio-Antenna-bill-on-his-desk&goto=newpost

Gov. Quinn has HB1390 on his desk awaiting his signature. Apparently,
there are municipal officials who are objecting to this bill being signed
because they would have to accomodate ham radio operators who wish to put
up antennas/towers.

To voice your support, call 1-217-782-0244 (Gov. Office) Tell whoever
answers that you wish to register your support for HB1390 and to put a tick
in favor of the Governor signing the bill.

Spread the word, Illinois hams!

Lorain County Wireless Operators

Posted: 25 Jun 2012 10:05 AM PDT
http://forums.qrz.com/showthread.php?351528-Lorain-County-Wireless-Operators&goto=newpost

Press Release

For Immediate Release, 25 June 2012

Lorain County Wireless Operators

LORAIN COUNTY OHIO - We are very pleased to announce another amateur radio
initiative from Ohio and a few of the guys that brought you the Northern
Ohio Digital Interconnect Group, Reflectors 38 & 39 and the Ohio Wide

D-STAR Net. The Lorain County Wireless Operators, LCWO.

Lorain County Wireless Operators was formed in an effort to advance amateur radio in the Great Lakes and surrounding areas. LCWO□s four core operators simply want grow amateur radio by showcasing all that Ham Radio has to offer. This group will be complimented by Guest Operators who have experience in specialized areas of operation. The operators will focus their on the air time in unique areas bringing the public□s attention to amateur radio by operating special events stations and also contesting as well as supporting area clubs & public service groups. Our call, NW8S, will support LOTW, eQSL and direct QSL during all events. LCWO has a D-STAR repeater on the air in the downtown Lorain Ohio area that is complimented with a reflector. Although typically linked to REF038A it will be used for experimental D-STAR operations. We will utilize all segments of the spectrum; HF, VHF, UHF, SHF, along with existing and experimental modes during our events.

Look for an announcement regarding our first event in the very near future. The final details of which are being worked through as we speak.

We hope that our efforts to further amateur communications will inspire others to become licensed or more active in a hobby that can be very rewarding and satisfying. Regardless if its talking across town on a local repeater, traffic handling, severe weather, providing relief communications after a disaster or making a new friend in a far away country using Morse Code or a cutting edge mode yet invented there is something for everyone.

Please visit our website and □Like□ us on Facebook.

Changing Category during Field Day

Posted: 25 Jun 2012 07:38 PM PDT
http://forums.qrz.com/showthread.php?351598-Changing-Category-during-Field-Day&goto=newpost

I did not see anything in the Field Day rules to cover this, and it isn't that important since I only participated casually, but I am curious about how this might be handled.

Saturday evening I made 7 QSOs from the home QTH with the K2 on battery at 5 watts, operating category 1E.

Sunday I went portable in a local park and made 23 QSOs operating category 1B Battery in the two hours I had.

My inclination was to submit just the 23 portable QSOs as 1B, but then if I leave off the other 7 from the supporting documentation, somebody might not get a QSO with me validated.

Is there a formal way this would be handled?

Thanks,

Chip

Ham Radio Operators Keep In Touch:

Posted: 25 Jun 2012 05:00 PM PDT
http://www.eham.net/articles/28540

Backup communication network used in times of disaster: SOUTHAMPTON -- Despite the Internet, cellphones, email and other modern communications, every year whole regions find themselves in the dark. Tornadoes, fires, storms, ice and even the occasional cutting of fiber optic cables leave people without the means to communicate. In these cases, the one consistent service that has never failed has been amateur radio. These radio operators, often called "hams," provide backup communications for everything from the American Red Cross to FEMA and even for the International Space Station.

//
Amateur Radio Operators Often Help In A Crisis:

Posted: 25 Jun 2012 05:00 PM PDT
http://www.eham.net/articles/28539

Jack McCarty is an avid amateur radio operator, but it's more than just a hobby, it's sending a signal that can save lives. "That's what keeps amateurs in the business. If it wasn't for the fact that we supply emergency communications in a time of need there probably wouldn't be ham bands availible to us. " The National Field Day communications weekend is more than just a friendly exercise, it keeps them sharp if an emergency like the April 27th tornadoes of 2011 arises again. "Amateur Radio did play a key part in that. The cell phone service was overloaded and the commercial power went out and the only way we were able to maintain contact was through amateur radio," says Derek Wooley, President of the Cleveland Amateur Radio Club. "That night it was quite chaotic. What our task was that night was trying to keep people informed of what was going on as far as the families entrapped and they were all right We were there and we did what we could," adds McCarty. Amateur radio operators can often be the first line in opening communications during a crisis. "We evaluate our readiness for emergencies. We have four or five stations operating totally on generator power so we can be able to serve the community should power outages occur and be able to maintain contact with each of our amatuer operators throughout the county," says Wooley.

//
'When All Else Fails,' There's Amateur Radio:

Posted: 25 Jun 2012 05:00 PM PDT
http://www.eham.net/articles/28538

Amateur radio remains part of the emergency communications system, but another appeal for the users is being able to do a lot of things with different gadgets. "Throw a piece of wire up a tree and you can talk to Japan," said Tom Mandera of Helena, a member of the Capital City Amateur Radio Club as he tried to aim a handheld at a low-orbit satellite Saturday. Mandera and other ham radio operators are spending much of the weekend as part of a nationwide "field day" held to showcase and practice radio operation. During the 24-hour period, from noon Saturday to noon today, the hams are trying to make contact with as many other operators as possible from their temporary setup behind the old red schoolhouse on Sierra Road, just east of Interstate 15. The hams operate under the credo, "When all else fails," to note that their technology can provide emergency communication even others fail. That could happen in an earthquake or other event that disrupts such fundamental tools as police radios and mobile phone networks. "There's been a number of examples of these high-tech systems going out and they've fallen back on ham radio," said Bob Solomon, emergency systems coordinator for the group. All the ham radios need is enough electricity to power themselves, with no network except the airwaves.

//
Amateur Radio Still Proving Useful in an Emergency:

Posted: 25 Jun 2012 05:00 PM PDT
http://www.eham.net/articles/28537

APALACHIN, N.Y. -- Operating an amateur radio is something that is not taken lightly. "A Ham radio operator is licensed by the FCC, the Federal Communications Commission. Every ham who is licensed has to pass a test," said amateur radio operator, Dick Farman. But what makes a ham radio operator unique is that they work completely as a volunteer and can send and receive messages at the most inopportune times. "It doesn't matter whether NYSEG goes down or cell phones go down or all that, we can still communicate," Farman said. So 40 years ago when the flood water of Hurricane Agnes ripped through the Twin Tiers, or even last September when Tropical Storm Lee brought similar devastation, ham radio operators were there to lend a hand. "I was providing local communications. I was at my home, but I was using battery powered radio to talk to, we had another ham set up at the Red Cross, they had a temporary set up at the Washington-Gladden school, I believe is where they were," said amateur radio operator, Mike Gruszka.

//
Kuwait Ham Operator Contacted During SPARK's Annual Field Day:

Posted: 25 Jun 2012 05:00 PM PDT
http://www.eham.net/articles/28536

FACTORYVILLE - For the past few years, Zach Zelna has watched his father, Al, communicate with others via his home radio, eagerly waiting for his chance to step in and do the same. On Sunday, the 8-year-old got his chance. Zach joined the dozens of others gathered at the Scranton-Pocono Amateur Radio Klub at Seaman's Airport in Factoryville, where he learned the ins and outs of amateur radio, and contacted radio operators from different countries.

Puerto Rican Hams Support Their 2012 Olympic Team

Posted: 27 Jun 2012 04:18 AM PDT
http://forums.qrz.com/showthread.php?351749-Puerto-Rican-Hams-Support-Their-2012-Olympic-Team&goto=newpost

k4ologo.JPG

On Sunday July 1st 2012, the Puerto Rico Olympic Committee will be celebrating the Flag Bearing of the Puerto Rico Delegation to the Summer Olympic Games in London. This event marks the beginning of the transatlantic journey to represent Puerto Rico in this international event. The delegation will depart the Olympic Committee and will walk to the Governor□s Mansion to receive the flag that will be used in the opening ceremony and remain hoisted in the Olympic Village throughout the Games in London.

In celebration of such an important event, The Puerto Rico Amateur Radio League will be joining the Olympic Committee in this celebration by setting up a special event station from the Puerto Rico Olympic Committee headquarters in San Juan. We will be using the special callsign □K4O□ for this event.

We would like to use our radiowaves to let the world know that the Puerto Rican delegation is ready for the games in London. Operation will be on June 30 (9:00am-5:00pm) and July 1 (9:00am-2:00pm) from the headquartes of the Puerto Rico Opympic Comitte in San Juan.

New Amateur Radio Podcast

Posted: 26 Jun 2012 12:56 PM PDT
http://forums.qrz.com/showthread.php?351681-New-Amateur-Radio-Podcast&goto=newpost

Hello everyone! I would like to introduce the Youth in Amateur Radio Podcast, the podcast from and for the youth of amateur radio. This podcast is made up of many different young hams, and some elmers to help us keep going. Our team includes Anthony, K2RCN, Sterling, N0SSC, Jacob, KD0NVX, Joe, KD0LOS along with the help of Matt, NR0Q and Jerry, KD0BIK. Episode 1 of the podcast has been released. You can find the podcast at http://yarphams.com.

FlexButtons Adds 100 Memory Buttons to Flex PowerSDR

Posted: 25 Jun 2012 03:15 AM PDT
http://forums.qrz.com/showthread.php?351472-FlexButtons-Adds-100-Memory-Buttons-to-Flex-PowerSDR&goto=newpost

100 memory buttons and more for Flex PowerSDR

I am pleased to announce the release of FlexButtons, donationware software that adds memory buttons for PowerSDR (Flex SDR Radios) and an integrated CAT interface to MixW digi-mode software.

I created FlexButtons for two reasons. Firstly I was frustrated with the memory function in PowerSDR (TM). I wanted a quick and easy way to store the current frequency and other parameters and recall them by pressing a button rather than delving into a menu based system. FlexButtons works a little like the buttons on your car radio, simply press □Save□ and then the button position that you want to use.

Secondly I wanted to use my Flex radio with digimode software, in my case MixW(TM). The problem was that with only one monitor, the Digimode screen sits on top of PowerSDR(TM) and it disappears when you go to change a filter setting or any other function on the Flex radio.

With FlexButtons you can run PowerSDR(TM) minimised but still control the features I wanted, such as; mode, mute, VAC, and the filter width.

If you save your favourite digimode frequencies to memory buttons you can easily swap between bands and band segments.

Now I have two monitors and normally run PowerSDR(TM) on one with MixW on the main monitor with FlexButtons as a kind of tool bar at the bottom of the screen.

FlexButtons has full help and installs without making changes to Windows registry.

FlexButtons v1.0 Beta is availabe free from the author, my email is under ZL3DW on QRZ.com

Andrew Barron ZL3DW

Hams Needed to Support Coast to Coast Against Cancer Event

Posted: 25 Jun 2012 03:12 AM PDT
http://forums.qrz.com/showthread.php?351470-Hams-Needed-to-Support-Coast-to-Coast-Against-Cancer-Event&goto=newpost

Ham Operators needed to support Coast to Coast Against Cancer Foundation

Volunteers are needed to provide communications in support of this worthwhile event. It takes place along the Cabot Trail in Nova Scotia August 3-5, 2012 and involves cycling road routes with more than 100 cyclists participating and more than 50 volunteers.

ARES is involved with this organization in Alberta and Ontario, and they have put out a call to us for support for the first time in the Atlantic Region.

If you are able to help, please drop me a note at dougvo1dtm@gmail.com or contact Atlantic Director Ev Price at vo1dk@rac.ca or Deputy Director Len Morgan ve9my@rac.ca.

Thanks for your interest.

73,

Doug Mercer VO1DTM/VO1DM CEC

Chief Field Services Officer

Radio Amateurs of Canada

//
Exciting New Logging Program LOG4OM

Posted: 24 Jun 2012 12:53 AM PDT
http://forums.qrz.com/showthread.php?351307-Exciting-New-Logging-Program-LOG4OM&goto=newpost

In recent weeks Daniele Pistollato IW3HWH has released an exciting new and free logging program called LOG4OM

Although the software is still under development it already provides most of the features that are to be expected from top quality Ham software plus some intriguing new facilities with more to come in the future.

LOG4OM already includes ....

1. SQLite and MySQL database options

2. Worked before warnings

3. On line call lookup from QRZ and HamQTH

4. QSL control including QSL card and label printing within the program.

4. Full upload/download feature for eQSL, LOTW, HRDLog and Clublog

5. HD Grey line map with Long/Short path heading and distance plotting.

6. Full DX Cluster support with 'Wanted' colour coded entries - Cluster commands and filters - Cluster scanner and a Super Cluster?

7. Integration with DM780 for data modes.

8. IOTA, Countries and LOTW databases built in and automatically updatable.

9. Statistic analysis including award status

10.CAT connection for most transceivers and receivers

11. ADIF import and export plus Excel .CSV and PDF export of log.

12. Cluster integrated with propagation information from HRDLog.net

Plus much, much more with exciting new features to come.....

The program is available in the English and Italian languages but at this time the user guide is only available in Italian, however the software is very intuitive without an English user guide, which will be available very soon.

LOG4OM can be downloaded FREE from http://www.pisto.it/wordpress/

LOG4OM Yahoo Group is located at
http://uk.groups.yahoo.com/group/Log4om_g4pop/

LOG4OM Eham reviews are here http://www.eham.net/reviews/detail/10506

Prefixo especial 5P12EU

Posted: 26 Jun 2012 10:06 AM PDT
http://forums.qrz.com/showthread.php?351658-Prefixo-especial-5P12EU&goto=newpost

Dia 30 de Junho a 22:00 horas UTC, (19:00 horas em Brasilia), entre em QRT o prefixo 5P12EU (Dinamarca na Presidencia da Comunidade Europeia).

Os operadores estarao bem ativos durante os ultimos 2 dias (29 e 30 de Junho) para dar a oportunidade de conseguir um QSO na maioria das bandas e modos possivel, ja que um Diploma é disponivel em 3 bandas (Bronze), 5 bandas (Prata) e 7 bandas (Ouro). A versao-PDF do Diploma é gratuito.

Na QRZ.com voces encontram um Link para uma pagina que mostra - em tempo real - quais operadores, bandas, modos e horarios estao ativos num dado momento.

Chamamos especialmente a atencao para os 160 metros, onde ate agora so poucos operadores estiveram QRV.

Modos: CW e SSB - e, - esperamos, - RTTY e PSK

Cordiais abracos a todos,

73'

DXNL 1786 - Jun 27, 2012
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

1A, SOVEREIGN MILITARY ORDER OF MALTA
An international team of 13 operators will be active as 1A0C on HF
and 6m from July 1-4. Special attention will be paid to non-European
stations. With this campaign they intend to collect donations for the
aid programs of the "Order of Malta's Italian Relief Corps" (CISOM).
QSL via OQRS, LoTW. See also: http://www.1a0c.com

5B4, CYPRUS, AS-004
Some members of the Paphos branch of the "Cyprus Amateur Radio Society"
plan to show up as P3EU to mark the first Cypriot presidency of the
European Union from July 1 until Dec 31. QSL via 5B4AHO.

CT, PORTUGAL, EU-150
Several members of the "Portuguese DX Group" (GPDX) will be active as
CT7/homecalls from Insua Island (EU-150, DIP MI-001, PIP NT-001,
DCFP F-006, DCP CVC-046 and CVC-047, DMHP VC-017 and VC-061, DFP FM-101
DMP 1602, DDFP CMN-12) during the month of July. The team with German,
Portuguese and Swiss OPs will be active in all modes on all bands.
They will join the RSGB IOTA Contest (Jul 28/29) signing CR6W in the
multi op/low power category. Some OPs will stay a little longer on the
island and plan to activate the lighthouse ARLHS POR-028, WLOTA 2869.
QSLs for CR6W via CS5DX. All other QSLs via the op's homecalls.
See also: http://gpdx.netpower.pt and http://www.to-mk.com/neu

E5, SOUTH COOK ISLANDS
Andy,AB7FS, will be QRV again in holiday style signing E51AND from
Rarotonga (OC-013) between Jul 2 and Aug 25. He is a member of the
"Straight Key Century Club" (SKCC # 7723) and hopes to meet other SKCC
members in CW on 14050 kHz. He has been spotted also in the ANZA net,
daily at 0515 UTC on 14183 kHz. QSL via homecall.

Murray,ZL1MGA, is working as E51MGA in SSB on 20m. His length of stay

is unknown. QSL via homecall.

ES, ESTONIA
Eddie,ES2TT, will use the special callsign ES2012ABCS on the occasion of the "American Beauty Car Show" from July 1-8. Activities will take place in SSB/CW/PSK on 40m-6m from his home QTH Keila (Loc KO29eh) and also from the the exhibition in Haapsalu. QSL via ES2TT.

F, FRANCE
From Jul 2-8 the "Association des Radio Amateurs de la Cote d'Emeraude" (F4KIR) will activate the special event station TM0TSR from Saint-Malo on the occasion of the annual Tall Ships Races. QSL via F4FJH.
See also: http://www.tm0tsr.fr

G, ENGLAND, EU-005
On the occasion of the "Armed Forces Day" the special event station GB0AFD announced to be active on July 1. They would be very pleased to make contacts with other members of RNARS, RAFARS or the "Royal Signals Association". QSL via G4KLF.

Members of the "Milton Keynes ARS" will be active on the bands with their club callsign GB2BP from Jun 30 until Jul 1. QSL via bureau.
See also: http://www.mkars.org.uk

GJ, JERSEY, EU-013
Ralph,MJ/DL9MWG, and his brother MJ/DL3VJG will be QRV from the island of Jersey (EU-013) between Jun 27 and Jul 4. Since their holiday QTH has much space they will use several wire antennas on 160m-6m working in CW and SSB. QSLs via homecalls.

GM, SCOTLAND, EU-005
Paul,2E1EUB, is active as 2M1EUB on 160m-80m, in SSB on 2m and via AO-7 until Jul 9. QSL via 2E1EUB.

KH8, AMERICAN SAMOA, OC-045
Yuri,N3QQ, and Dick,N7RO, will stay in Pago Pago from Jun 27 till Jul 3 for talks with the US Fish & Wildlife Service (FWS) about a future DXpedition to the Rose Atoll (OC-190). They want to work as KH8PPG or KH8RRC during their spare time. QSL via N7RO or UA9OBA.

KP4, PUERTO RICO, NA-099
The "Puerto Rico Amateur Radio League" will activate the special event station K4O from the headquarters of the National Olympic Committee in San Juan between Jun 30 and July 1 to mark the journey of the Olympic flag over the Atlantic Ocean. QSL via NP3O.

LA, NORWAY
The special callsign LJ2T will be activated from the Telecommunications Museum of the Norwegian armed forces (Loc JP51ed) from June 28 until July 1. QSL via LA5EAA.

LY, LITHUANIA
The special event station LY200NB is QRV until June 30 and remembers

the crossing of the river Nemunas by Napoleon 200 years ago.
QSL via LY5W, LoTW.

The 54th anniversary of "Sea of Peace" is celebrated in July and some
HAMs are using the special callsign LY54SOP. QSL via LY5W, LoTW.
See also: http://www.amateurfunk-mvp.de/inhalte/sopdipl.htm

OE, AUSTRIA
The special event club stations OE2XXM and OE5XXM (special ADL: 553)
will be QRV from the "XXVIII International Amateur Radio meeting in
Gosau at Dachstein" on 2m/70cm/80m/40m (sometimes also on other bands)
from Jul 1-31. QSL via bureau.
They will be QRV again on the occasion of the "XXVI International Fall
Fielddays in Gosau" from Sep 1-30.

OZ, DENMARK
The Danish EU presidency ends on June 30. For this reason the OPs of
the special event station 5P12EU will start their final sprint on
Jun 29/30 and want to give everyone the opportunity to work missing
band points in CW/SSB, maybe also RTTY/PSK and even on 160m.
QSL requests via OQRS, LoTW, eQSL, direct QSL via OZ0J, own QSL not
necessary. Logsearch and awards program at: http://www.5p12eu.dk

SM, SWEDEN
Grimeton Radio (SAQ) sends in CW on 17,2 kHz at 0900 UTC and 1200 UTC
on Jul 1. SK6SAQ will be QRV on 14035 kHz (CW) and 14215 kHz (SSB) from
0915-1130 UTC and 1215-1300 UTC and in SSB on 3755 kHz at 0700 UTC.
Reports can be sent via e-mail to info@alexander.n.se or with a QSL via
bureau to SK6DK. Direct mail should be sent to: Alexander Grimeton
Veteranradios Vaenner, Grimeton 72, SE-432 98 Grimeton, Sweden.
See also: http://www.alexander.n.se

SP, POLAND
The scout station SN0HAL will be on the air from July 1 until Aug 31.
QSL via SP5ZIP.

TA, TURKEY
The "TC Special Wireless Activity Team" and the "Giresun Radio Amateurs
and Nature Sports Club" are going to visit some lighthouses of the
western Black Sea:
Jun 30-Jul 1 TC6BLH: Boztepe Lighthouse, Sinop
Jul 27-29 TC2KLH: Kefken Ada Lighthouse, Kocaeli
Aug 18-20 TC2ELH: Karadeniz Eregli Oeluece Lighthouse
Aug 30-Sep 2 TC6ILH: Inebolu Lighthouse, Kastamonu
Sep 1-2 TC2AL: Amasra Lighthouse
Sep 15-16 TC6GLH: Gerze Lighthouse, Sinop
Sep 29-30 TC2ZLH: Zonguldak Lighthouse
QSLs via TA1HZ. See also: http://www.tcswat.org/awards/WEBLOTA

TY, BENIN
Pat,LA0HF, will be QRV as TY2BP from Fidjrosse/Cotonou on 20m/15m/10m
for up to 45 days starting on June 26. QSL via IK2IQD (direct).

VE, CANADA
On the occasion of the 200th anniversary of peace between Canada and
the USA in July Dave,VE3FOI, will activate the special event station
CG3B from Niagara-on-the-Lake in Ontario. He also plans to join the
RAC Canada Day Contest from Fort George in Niagara-on-the-Lake on Jul 1
This special callsign should be reminiscent of General Isaac Brock.
QSL via VE3FOI. See also: http://www.nparc.on.ca/content/home

W, USA
The following special event stations are active during the
"Original 13 Colonies Special Event" from July 1-5:
Call QTH Manager
K2A New York KU2US
K2B Virginia KI4TYK, KJ4DHF
K2C Rhode Island KE1JF
K2D Connecticut K1PL
K2E Delaware NY3C
K2F Maryland KB3IFH
K2G Georgia K4PHE
K2H Massachusetts K2H
K2I New Jersey N2RO
K2J North Carolina KI4VBA
K2K New Hampshire W1STT
K2L South Carolina KG4RUL (d)
K2M Pennsylvania via OP homecall (d)
See also: http://www.13colonies.info

Apollo Memorial Program: ARI Tortona (IQ1TW) remembers the Apollo Program
(1961-1972) in July. A special award has been launched as well.
See also: http://aritortona.xoom.it

Hawaii IOTA Club: The Hawaii IOTA Club (KH6RRC) was founded by David,AH6HY,
Merle,K5MT, Yuri,N3QQ, Dick,N7RO, and Lanny,W5BOS. Their targets are
the exploration and activation of new IOTAs in the Hawaii archipelago.
Interested people are welcome to join.

IOTA QRGs: Klaus,DL7UXG, has published an overview of IOTA frequencies at:
http://www.mydarc.de/dl7uxg/dt/seite17.html

Webinar: A webinar focuses on the comparison of average stations with
Big Guns on June 30, 1900 UTC. Registration is required at:
https://www2.gotomeeting.com/register/179521850

YASME: The new rules of the YASME award program have recently been published
http://www.yasme.org
http://www.yasme.org/news_release/2012-01-02.pdf

DXCC: TL8ES (2011) and TT8ES (2012) were approved for DXCC credit.

DXCC QRP: Since 2002 the ARRL publishes a non-endorsable QRP DXCC. Output
power is limited to 5 watts and QSLs do not have to be submitted.
See also: http://www.arrl.org/qrp-dxcc

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jul 1 RAC Canada Day Contest

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AF-004, EA8, Canary Islands: Members of the "Grupo DX Teide" will activate
the Teide volcano "La Rambleta" from Jun 30 till Jul 2. This expedition
will take place on the occasion of the 5th anniversary of its initial
activation. With a height of 3555m this is the highest mountain in
Spain and situated in the Teide National Park (EAFF-075). The station
will be set up 163m away from the top (DIE S-012, WLOTA 1276, DME 38026
Loc IL18qg). Jose Antonio,EA8ARG, Luis,EA8AY, Miguel Angel,EA8BRW,
Francisco,EA8CW, and Angel,EA8BFH, will be active in CW/SSB/RTTY/PSK31
on 6m-80m signing EH8TID with 100 watts, verticals and wire antennas.
QSL cards will be sent automatically for each QSO in the log.
Otherwise QSL via EA8NQ (bureau/direct).
See also: http://www.eh8tid.tk and http://ea8arg.ure.es

AS-004, 5B4/ZC4, Cyprus Island: Cyprus has the EU presidency for the first
time from July 1 until Dec 31, 2012. The special event station P3EU
(WLOTA 0051) will be active on the bands for this reason.
QSL via 5B4AHO (bureau/direct).

AS-047, JA6, Daito Islands: Kan,JE1SCF/6, and Yoshi,JG4IQC/6, may show up
from Daito Islands (WLOTA 0928, Okinawa prefecture, Nansei archipelago,
Kyushu region) between June 27 and July 2. They will use an HB9CV and
long wires in CW/SSB on 40m-10m. QSLs via homecalls (bureau/direct).

EU-014, TK, Corsica: Peter,TK/ON8VP, spends his holidays on Corsica (DIFM
TK-001, MIA MCO-001, WLOTA 1390) from July 1-6. He wants to transmit
from the vicinity of Porto Vecchio mainly in SSB/CW on 40m and 20m
running 100 watts into a wire vertical. QSL via homecall.

EU-015, SV9, Crete: The special event station SX9S will be active from Jul 1
until Dec 31 marking the 50th anniversary of the national park "Samaria
Gorge" (SVFF-011). QSL via SV9AUE (bureau/direct).

EU-024, IS0, Sardinia Island: Claudio,IS0/IZ0KRC, is staying on Sardinia
(IIA SD-001, MIA MIS-035, WLOTA 1608, Loc JN40tg) until Jul 15. He
works holiday style in SSB/CW/digital modes on the HF bands and 6m.
QSL via homecall (Buero/direkt).
See also: http://iz0krc.jimdo.com/new-2012-sardinia-is

EU-076, LA, Lofoten Islands: The second leg of his journey leads
Wolfgang,DM2AUJ, to the Lofoten Islands. He will be active on the
HF bands signing LA/DM2AUJ from Jun 30 until Jul 10. QSL via homecall.

NA-008, VY0, Nunavut (Ellesmere Island) group: Rob,KC0VEU/VY0, is active on HF from Ellesmere Island (Loc EQ79AX) until July 5. Depending on the weather, he may also activate the PEARL laboratory (Polar Environment Atmospheric Research Laboratory) from the rare locator ER60 and ITU Zone 75. QSL via homecall (bureau/direct).

NA-103, VP2M, Montserrat: Gordon,G3USR, will show up from Montserrat signing VP2MSR from Jun 30 until Jul 9. He will be QRV on all HF bands but his main focus is on 12m and 10m. If the 6m band opens to Europe he will be QRV there also. Graham,M0AEP is also active as VP2MDD at the same time. QSL for VP2MSR via G0USR and VP2MDD via M0AET.

EU-112, GM/MM, Shiant Islands: The DXpedition to the Shiant Islands (EU-112) announced in DXNL 1784 did not become active for unknown reasons.

IOTA Forum at the HAMRADIO fair in Friedrichshafen: The altered rules for the IOTA Contest 2012 were announed again at the IOTA Forum as well. The current rules can be found at:
http://www.rsgbcc.org/hf/rules/2012/riota.shtml

Further information was given about the design of the website, especially about the download of ADIF files.

Enrico,DL2VFR, reported about the activities of DM50IOTA within the IOTA marathon.

There were two interesting lectures by Nigel,G3TXF, and Jacques,F6BEE, about the VP6T (OC-044) and TX6T/p (OC-063) DXpeditions and also by Harry,RA3AUU, about the activation of Socotra (AF-028) as 7O6T and how difficult it was to obtain a license (over 2 years of preparation).

Following the ARRL decision to delete Malyy Vysotskiy Island (MVI) from the current DXCC list as of Feb 17, 2012, the IOTA Committee has considered action to be taken with regard to the future of EU-117. The presence of MVI in the IOTA list as a separate group was originally justified by its separate DXCC Entity status, so the island's deletion now called for action from IOTA. Faced with the prospect of a straight deletion of EU-117 and incorporation of the island into the EU-133 list the Committee formulated an alternative course of action involving the transfer of a section of the EU-133 'box' to EU-117, so avoiding deletion. It put the alternatives to an enlarged IOTA management group involving the 22 checkpoints for the first time. The consultation produced a clear majority in favour of splitting EU-133 to form two groups within the Gulf of Finland, North and South. The dividing line has been set at 60 degrees, 15 minutes north. The islands now constituting the two groups can be seen via the Search facility on this page. This change, which has an effective date backdated to Feb 17, 2012, means that past credits for MVI will continue to stand and new opportunities are created for contacting EU-117. Record-holders need take no action regarding existing credits as they will not be deleted as a consequence of this change, nor in the case of EU-133 credits need they be transferred unless requested. The Committee believes this to be an

imaginative solution in the best interests of the programme.

Russian IOTA/Arctic stations/RFF areas(preliminary information):
Victor,RW0BG (RRC #869), and Igor Petlin plan a trip along the river
Yenisei to the north from the beginning of July. They want to visit a
few islands of the Russian Robinson Program: Kazan Island (RR-06-32),
Mininskie Island (RR-06-33), Nikandrovskie Island (RR-06-34),
Deryabinskie Island (RR-06-35) and Island of Golchikha (RR-06-36).
They also plan to visit the Arctic station Sopochnaya. The second part
of their trip leads them to the Kara Sea to activate following islands:
Deer Island (RR-06-06) and Shokalski (RR-06-05, IOTA AS-083, RFF-030).
If possible, they want to join the IOTA contest as well. In the third
part, an activation of the IOTA group AS-109 is planned. Last not least
they plan to stay in the Tsentralnosibirsky (RFF-096) biosphere reserve
More detailed information will follow hopefully.

Lighthouse activities

GB0AFD LH 1841 Jul 1
K4O LH 2802 Jun 30-Jul 1
KH8PPG LH 4385 Jun 27-Jul 3
KH8RCC LH 4385 Jun 27-Jul 3

WFF activities

The collection of logs for the online query shall be simplified. In the
future, the logs will be collected nationally and then sent to Igor (EW4DX)
two or three times a month. This makes his work much easier.

SPFF Award Program: Information about the SP9YFF award can be found at:
http://www.sp9yff.pl/dyplom/ff.php?

YOFF: YO3FVR is working from the areas YOFF-149 and YOFF-381 from Jun 27-29.
He works with 5 watts. QSL via homecall (bureau/direct).

** DXCC: D6: Comoros; start 2012-08-01 **

Hi all

Itï¿½s just 6 weeks before the expedition and I promised to keep you informed.
These are our last news: We will arrive to Comoros on August 8^th and we will
be qrv on 6 meters from the following day, August 9^th until the 20^th .
We will run a dedicated station with K3 + pr6 preamp, ACOM1000, and a 6m8gj antenna.
QRV cw, ssb, digi modes (jt65a, iscat and jt6m) and EME . We will run a breakable beacon
on cw or jt65a. We hope to have internet access and will be on on4kst chats.
QTH will be LH18PJ just at sea side. By now we have got the license for
HF and 6 meters and flight tickets are already booked.

Schedule is as follows:
8/8 arrive to qth
9/8 install 6m station
First windows:
9/8 MR at 21.10Z
9/8 MS at 09.00Z
Last windows:
19/8 MS at 16:40Z
20/8 MR at 05:05Z
20/8 pack 6m station and return home
MR will be looking to mountains in the island about 200 meters high at 2 Km, will see how
it works.
MS will be looking to the sea, expecting good ground gain and low noise.
We donï¿½t have any particular frequency, usually I will TX first on 193.
We will have elevation when moon is higher than 20 degrees. We expect to run about three
hours before/after MS/MR, and use the rest of diurnal time for terrestrial modes. Of
course, if F2/TEP opens it will have priority, sorry, I think you will understand us.

Hope to work all you from D64K

73 Josep
EA3AKY

http://ea3aky.blogspot.com/__

HF and 6m Activity planed as D64K (LH81PJ)

We will have a station dedicated to 6m with a K3, ACOM1000 and long yagi.

Dates to be confirmed.

Operators are: C31CT/EA3QS, IW3SQY, IZ4AKS, IZ8GCE, SP3DOI, IV3DSH, EA3AKY

Expedition website: www.d64k.com

SOURCE: Josep EA3AKY direct to MMMonVHF

** DXCC: VU: India; square ????; start 2012-05-23 **

Until July 8th, Taj, VU2DJ, Sabu, VU2ELJ, Sree, VU2OB, Prabin,
VU2POL, Peeter, VU2PJP, Murali, VU2FWW, Thomas, VU2VJT, Sunil,
VU2ATB, Ashraf, VU3MTY, Mujeeb, VU3WII and Sanal, VU3SIO, will
activate the special call sign 8T1M from 160 - 2 Meter in CW, SSB,

PSK, RTTY, FM and D-STAR. QSL via VU2MLQ.
http://www.malabarradiohams.org/

** DEADLINE for your NEWS input to MMMonVHF**

... for your News (pse use: http://www.mmmonvhf.de/newsuser.php)
to the next MMMonVHF Newsletter will be next wednesday 22.00 UTC ...

Just Find Me On the Radio:

Posted: 26 Jun 2012 05:02 PM PDT
http://www.eham.net/articles/28542

Almost 100 years ago, in 1914, The American Radio Relay League, ARRL, was founded. They now claim more than 156,000 members, also known as Ham Radio enthusiasts. This past weekend the ARRL hosted their annual Field Day event. The nationwide event is conducted for a 24 hour period. According to the ARRL website the object is to "To work as many stations as possible on any and all amateur bands (excluding the 60, 30, 17, and 12- meter bands) and in doing so to learn to operate in abnormal situations in less than optimal conditions." "It's really just to prepare us for emergency conditions." explained Whipple Walker, who holds a Amateur Radio Technician license and is part of the Marshall county Rescue Squad. "For instance, during the ice storm cell phone towers were down and you couldn't reach anyone who was outside the town you were in. We had to set up and communicate with Frankfort, share information and tell them our needs."

//
Former ARRL General Manager and IARU President Richard Baldwin, W1RU (SK):

Posted: 26 Jun 2012 04:46 PM PDT
http://www.eham.net/articles/28541

Richard "Dick" Baldwin, W1RU, of Damariscotta, Maine, passed away on Thursday, June 21, after a long struggle with Parkinson's Disease. He was 92. An ARRL Charter Life Member, Baldwin capped a long career on the ARRL staff with service as General Manager from 1975 until his retirement in 1982. He served as Secretary of the International Amateur Radio Union (IARU) from 1976-1982. After retirement, he continued his involvement as a volunteer, serving as IARU President from 1982-1999 and as ARRL International Affairs Vice President from 1982-1986.

WIANEWS WEEK COMMENCING JULY 1 2012.

ILLEGAL REPEATERS. -

2012 Leap Second. -

IARU HF World Championship. -

SOTA activity in VK. -

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JULY 01 2012.

Repeating the facts mobile telephone repeaters are illegal

Despite what you may hear, read or be told by someone who wants to sell you
one, mobile telephone repeaters cannot be used in Australia, unless you're
the holder of an applicable spectrum or apparatus licence (in practice,
usually a mobile telecommunications carrier), or the licensee has personally
given you direct permission.

What is a mobile telephone repeater?

A repeater is a fixed active device that may be used in mobile networks. It
is designed to regenerate or replicate a mobile signal. Mobile carriers

regularly use repeaters as part of their ordinary network management. However, when used without a carrier's permission, repeaters have the capacity to cause substantial interference to the cellular network and may have an impact on mobile services, including access to emergency call services.

Why are we telling you this?

The ACMA is aware that certain overseas-based internet traders (often appearing to be located in Australia) have been informing the Australian market that anyone in Australia can use repeaters 'legally'. This is not correct.

Simply put, the unlicensed operation of a repeater is illegal, and subject to the offence provisions in sections 46 and 47 of the Radiocommunications Act 1992.

Penalties for the use of repeaters are significant, including up to two years imprisonment or fines totalling $165,000.

(acma)

Television viewers in Melbourne will be the last city dwellers to see analogue TV in Australia.

Communications Minister Stephen Conroy has announced the final timetable for the switchover from analogue to digital TV signals in the remaining cities and regions.

Melbourne, along with remote and central Australia, will have its analogue signal switched off on December 10, 2013.

Other cities and areas from Adelaide, Tasmania, Perth, Brisbane, Darwin and Sydney will have their analogue signals turned off progressively from April 2, 2013.

The government has been progressively switching off the analogue television signal since 2010, with northern NSW the next area to become digital only on November 27.

Senator Conroy also has welcomed the passage of legislation to improve captioning on free-to-air and subscription television for deaf people.

The changes would include measures to make the captions more readable and accurate, while ensuring better access to televised emergency warnings for the hearing impaired. More than five million Australians were expected to have hearing loss by 2020.

(acma)

Central Highlands ARC AGM Weekend

The famous and popular Central Highlands Amateur Radio Club AGM weekend at Camp Fairbairn south of Emerald, will be on 4pm Friday 28th to Midday Sunday 30th September.

Caravaners please book into Lake Maraboon Holiday Village, as soon as possible. CHARC Secretary Gordon VK4KAL needs to know from you if you are attending, so he and Dot can plan catering for the acclaimed Saturday Night Gastronomic Feed Up, arrange the troops to get enough chairs and treasure together for the coveted AGM Monster Auction, divvy up the available beds in the dorm and ensure there is enough grub for the Sunday Recovery Breakfast.

Find out more by contacting gordon.l23@skymesh.com.au

REAST Training, Education & Assessment

Their recent successful Foundation licensees have received their callsigns. So, if you hear the following then why not give them a call and make them feel at home on the bands.

Lee VK7FAAI, James VK7FAAL, Tony VK7FTNY and Andrew VK7FAAJ.

If you are interested in amateur radio training and assessments and live in the South of VK7 please contact learning organiser Reg VK7KK on 0417 391 607, or via email on regemm@ozemail.com.au

(73, Reg VK7KK, REAST Education Officer and Assessor)

DISCUSSION POINT

What use is an f-call?

(Past editions of What use is an f-call can be found online at harg.org.au under F-troop.)

A recurring theme appears to be "What radio do I buy?" I asked another HAM and their breakdown went like this:

Basically it's like Macintosh vs. Windows,
or vi vs. emacs, or Holden vs. Ford, or Petrol vs. Diesel, or Gin vs. Tonic.

Every person you ask will give you a different response.

Instead of asking "What radio do I buy?" ask yourself another question:
"What do I want to do with my radio?"

In answering that question, you'll come
across some suitable candidates. With your short-list in hand, do some research, ask other Amateurs and see what your supplier has access to. You'll get a much better outcome and end up with a radio you can use.

Soooo, "What do I want to do with my radio?"

The obvious response is
"Everything!" Well, yes, but if you have a Foundation License, you cannot talk everywhere, you cannot use all modes and you can only use 10 Watts. You might live on a hill with nothing but farmland around, or you might live in an apartment with neighbours in all directions. You might have $100 to spend, or $5000, you may want to do contests or have your radio as a safety device, it might want to live in your car, or you might need to take public transport. You might want to talk to a local repeater, or you may want to work DX on HF.

Each of those different answers requires a different radio. The more you can articulate what you want to do, and talking to other Amateurs is an excellent way to find out what there is to do, will give you a completely different answer.

I purchased my radio because I wanted it to be all-bands, small and portable, but that's not necessarily you. So, think about what you want to do with your radio so you can decide what radio to get.

As a final note.

Each use scenario might call for a different radio, so don't be surprised if you end up with more than one - I know I'm beginning to see a trend - Hi Hi.

I'm Onno VK6FLAB

SILENT KEY

Richard "Dick" Baldwin, W1RU passed away on Thursday, June 21.

He was 92.

An ARRL Charter Life Member, Baldwin capped a long career on the ARRL staff with service as General Manager from 1975 until his retirement in 1982. He served as Secretary of the International Amateur Radio Union (IARU) from 1976-1982. After retirement, he continued his involvement as a volunteer, serving as IARU President from 1982-1999 and as ARRL International Affairs Vice President from 1982-1986.

In 1991, Baldwin received the Hall of Fame Award from the Quarter Century Wireless Association (QCWA). In 1992, he was named the Dayton Hamvention Amateur of the Year. In 2003, he was inducted into the CQ Amateur Radio Hall of Fame.

A memorial service is planned for 11 AM Friday, June 29 in Maine USA

(wia frontpage news)

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

NEW Zealand technology company Tait Electronics says more than 9000 of its digital radios are being used by fire-fighters in Victoria.

The contract is one of the largest of its kind for the company founded by Sir Angus Tait, who died aged 88 in 2007.

CFA project director Doug Booth said the radios would also allow CFA to communicate with other state emergency-response agencies as new digital networks became available, improving co-ordination of resources during large-scale incidents and disasters.

Zimbabwe's first licensed commercial radio station has gone live, ending a 32-year monopoly by the state-controlled broadcaster and meeting some demands to free up the nation's airwaves ahead of proposed elections.

Star FM radio claimed that it is the first independent broadcaster since President Robert Mugabe led the nation to independence in 1980.

Japan is demonstrating a new cell phone that uses vibrations in its screen to transmit sound to the ear, in place of the traditional receiver speaker.

The phone went on sale Thursday in Japan.

This is the world's first to use "tissue conduction" technology in this way. The vibrations produced by the phone are picked by the ear physically, meaning there is less interference from background noise.

==========

NEWS FROM ARNEWSLINE USA

UAE GOVERNMENT REGULATOR MEETS WITH NATIONAL HAM RADIO SOCIETY

The Emirates Amateur Radio Society has met with the United Arab Emirates Telecommunications Regulatory Authority or TRA. This to discuss amateur radio issues.

According to news reports, the meeting shed light on Emirates Amateur Radio Society perspectives related to regulations for radio communications amateurs issued by the TRA. This included amateur radio authorizations, frequencies used by UAE hams, the mechanism of authorizing visitors and residents to operate in that nation, and cooperation and coordination between the two groups during various activities. The two sides also discussed ways to utilize ham radio to support governmental entities while performing public service activities and at international competitions throughout the year.

At that gathering, the TRA stated that the United Arab Emirates is a country concerned with

providing various types of communications to users including radio communications. It said that meeting with a specialized entity such as the society is highly important in order to promote radio communications in the country. It added that this meeting garners further significance especially when it takes into consideration that the United Arab Emirates is a country that hosts numerous desert sports activities and competitions. This it says makes radio communications a key issue particularly with regard to cases of accidents, disasters, or being lost in the desert.

The meeting took place at the TRA headquarters in Abu Dhabi and brought to light a number of issues related to radio communications.

The full report of the meeting can be read at tinyurl.com/uae-hams

PHASE MODULATION TESTS ON WWVB

The National Institute of Standards and Technology or NIST is currently testing phase modulation in addition to the existing amplitude modulation on time standard station WWVB. The AM signal continues while the phase modulation is tested, so there should not be any interruption in service to existing AM devices. However, the NIST warns that phase-locked loop devices AM devices may lose signal lock at times during the tests. The experiment will end prior to the June 30th leap second correction at 10am AEST.

HAMS IN BROADCASTING VOIP GROUP

Hams in Broadcasting is a new on-line VoIP group that connects those in the broadcasting industry with one another world-wide. The system interconnects IRLP conference bridge 9615, EchoLink conference 96150 and Allstar Node 27405 for 24 hour a day communication and chatting between hams who are in the broadcast field. For more information on the "Hams in Broadcast" conference bridge, take a look at tinyurl.com/ar-conference-bridge

Also of note are two nets that meet on the bridge. Every Sunday night at 8:00 PM Eastern there is a general "Hams in Broadcast Net." It is usually hosted by Bruce Schiller, WA2ZST, who

works for the CBS network in New York City.

There also is a twice a month "SBE Hams on the
Air" net. More information on that gathering is
at tinyurl.com/broadcasters-VoIP

RSGB

Oscar 7 celebrates 10 years of second life

Amateur satellite AMSAT-Oscar 7 was launched in November 1974 and worked for around 8 years, until its batteries short-circuited in mid-1981.

20 years on, the batteries mysteriously went open circuit and the satellite came back to life, operating purely from its solar cells. On 21st June 2002, the satellite was heard again, and last Thursday marked 10 years of AO-7 operating in this second lease of life.

The full story is at www.uk.amsat.org/8524

==========

WEIRD AND WONDERFUL

2012 Leap Second

The last minute of June 30th 2012 UTC will be 61 seconds long, the extra second being a "leap second". Leap seconds are introduced to maintain synchronisation between atomic clocks and more traditional time scales such as Greenwich Mean Time.

These leap seconds are introduced approximately every 18 months, at the end of June or December, usually to give the Earth's rotation a chance to catch up on our clocks.

In Eastern VK the leap will take place close to 10am.

This leap second represents a chance to record the leap second by DXing an international time signal (e.g. Moscow on 4.996 MHz). As the future of leap seconds is under discussion at the ITU, this could be the last chance to have a QSO with a leap second!

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2012

2012 IARU HF World Championship

Second full weekend of July, beginning at 12:00 UTC on Saturday 14 July
and ending at 12:00 UTC on Sunday 15 July.

The objective of this contest is to contact as many other amateurs,
especially IARU Member Society HQ stations, around the world as possible
using the 160, 80, 40, 20, 15 and 10 metre bands using phone and/or CW.

All IARU Region 1 Member Societies are invited to actively participate with
their official stations and to encourage their members to also participate.

The rules for the 2012 contest are available on http://bit.ly/9droX1

WIA news has not been informed if a HQ station from this society is planned.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

C K 6 S - Special Event Station for the 100th Anniversary of the Calgary
Stampede July 5 to 15. A special QSL card will be available through
the QSL bureau or direct. Planned frequencies are in the general
portion of the US phone bands around 3.825, 7.180, 14.250, 21.320
& 28.475

The team who were so "bad" at Cape Liptrap last August have decided to be bad
again! VK3BAD that is. At the end of August a 20 strong team will travel
into the Otway Ranges. The Station will operate on most HF frequencies 160 - 10mtrs
and on 6 and 2 metres and 70cm with contact to the Melbourne Area via the
Geelong 2 mtr repeater.

So please listen out for VK3BAD on 31st August through until September 3rd.

Further details on QRZ.com under VK3BAD

Thirty years have passed since 1A made its way onto the DXCC list.

An activation by an International team looks to celebrate from the 1st to
the 4th July,as 1A0C from Santa Maria del Priorato, home of the Sovereign
Military Order of Malta.

GB 0 TLR Railways on the Air

Southgate Amateur Radio Club will be operating a Special Event station for
the Railways on the Air event on 22nd and 23rd of September.

This is being run in conjunction with the North London Model Engineering
Society at the Tyttenhanger Light Railway site near London Colney,
Hertfordshire using call sign GB0TLR, the same callsign as used last year
and operating on 20, 40 and 80 metres.

Members of the Jersey Contest Group will be active as GJ 2 A from the
Isle of Jersey during the Radio Society of Great Britain's'
Islands on the Air Contest.

This event taking place July 28 and 29.

QSL direct to GJ 3 DVC.

2012 ATV QSO Party

Peter VK3BFG the custodian of the VK3RTV Digital ATV Repeater let's all know that he is planning the 2012 ATV QSO Party.

It is planned for the weekend of the 24 -25 and perhaps 26th August.
At this stage, participants from VK2, VK3, VK4, VK5 and VK7.

It is hoped to link to the Gosford ATV Repeater in VK2 and also have a QSO via linked stations on various frequencies from VK5. Again a link to the W 6 ATN network in Southern California thanks to Don, KE6BXT who has agreed to be the US anchor.

Peter is asking ATV stations and others who wish to participate to keep these dates in mind. At this stage a VK hook-up probably Friday night, with a VK/US hook-up on the Saturday morning/afternoon.

Peter is also trying to include stations from ZL and G.

WW SPECIAL INTEREST GROUPS --- RADIO AMATEUR OLD-TIMERS
http://www.raotc.org.au

Yes, it's that time of the month once again!

Hallo everyone, this is Clive VK6CSW with a reminder that tomorrow Monday July 2nd the Radio Amateurs Old Timers Club of Australia's monthly News and Information Bulletin will be broadcast on a number of HF and VHF frequencies.

The principal HF transmissions will be on 20 metres on 14.150 MHz USB at 0100 UTC beamed north from Melbourne for the eastern states, and at 0200 UTC beamed westward for Western Australia.

During tomorrow, numerous local relays will take place on both VHF and lower HF frequencies. To find the times and frequencies for your area please visit the RAOTC website at www.raotc.org.au

Once again, that's www.raotc.org.au

Everyone, RAOTC Members and non-members alike, is invited to listen to this interesting half hour of Old Timer news, information and anecdotes and to participate in the call backs afterwards.

Once again, the RAOTC monthly bulletin is scheduled for tomorrow, Monday July 2nd.

If there are any problems, please let me know.

73 from Clive VK6CSW.

CALLING FREQUENCIES
Please QSY off the calling frequency after establishing communication.

Australian voice calling frequencies:
3.650, 7.090, 14.190, 21.190, 28.590, 52.160

World CW calling frequencies:
3.570, 7.030, 14.060, 18.080, 21.140, 24.910, 28.180, 50.160

World voice calling frequencies:
3.690 & 3.940 MHz, 7.090 & 7.190, 14.290, 18.140, 21.360,
24.960, 28.390, 50.160

Calling frequencies for Slow Scan TV (SSTV):
3.630, 7.033, 14.227

Calling Frequencies for PSK31
14.070

This weekend an international team of scouts was present at HAM RADIO in
Friedrichshafen Germany. The team had members from Germany, Switzerland,
Austria and Netherlands.

At the stand more than 500 visitors were registered from which many wanted
more information and liked JOTA-JOTI a lot.

They participated in the Ham Rally for youngsters with two typical scout
communication games. In this more than 60 children participated.

The presence of Scouting, the biggest youth organisation at the fair, was
well recognised and welcomed.

The photos of the JOTA stand have been uploaded and you can see them at the
following link.

Sri Lanka's amateur radio operators have renewed their call to be included
in communication work during national disasters, after the defence
authorities relaxed rules on clearing equipment.

The report in Lanka Business says:

Popularly known as "ham radio" enthusiasts, amateur radio operators use a designated radio frequency spectrum to communicate non-commercial messages, private recreation, wireless experiments and emergency communication.

"We would like to join-up with the National Disaster Management Centre in some small way, to help them with emergency communication work," Radio Society of Sri Lanka official, Victor Goonetilleke 4S7VK said during the public lecture on Disaster Risk Reduction, organised by LIRNEasia, a regional ICT think-tank.

With some 200 members under its umbrella, the Radio Society of Sri Lanka is not new to disaster communications in the island.

The society played a crucial role during the 2004 Asian tsunami that claimed over 30,000 lives when giant tidal waves struck the island's shores displacing about one million people.

SPECIAL INTEREST GROUPS --- SUMMITS ON THE AIR
www.sotawatch.org
www.sota.org.uk

SOTA activity in VK drawing in more activators and chasers

In just 5 short months, there have been 41 summits that have seen at least one SOTA activation, with some summits seeing up to 4 activations. The Queen's Birthday weekend stood out, giving VK SOTA Activators and Chasers a buzz with several stations activating and a good number of summit to summit QSOs. Prior to June there had only been one VK s2s. First VK SOTA pileups starting to form.

The bonus season in VK3 has started and so far there have been two activations, at Mt Richie VK3/VC-003 and MT Donna Buang VK3/VC-002, both activated by Wayne VK3WAM. The Donna Buang activation will go down in history with the first ever SOTA s2s VK/DX contact with G0PEB/p on G/SE-008. June also saw a second VK3 operator, Allen VK3HRA achieve a DX contact with ND0C.

Ian VK5CZ made a trip to Melbourne to spend time looking at summits for a future VK5 association. So far around 300 summits have been identified, with a comprehensive survey around all of the state. There are some summits around Adelaide, many in the Flinders Ranges, some in the Eyre Peninsula and a large number in the north west of the state. Some of these areas are very remote, but could make for memorable trips in the best traditions of a DXpedition. Something to look forward to. Some VK5'ers are actively chasing VK3 activators, and SOTA look forward to VK5 joining the SOTA family in the not too distant future.

Also welcome a new activator, VK3AFW, and chasers VK3AFW again, VK5PAS (worked 2E0YYY in May on Shining Tor G/SP-004), VK3YY, VK2UH, VK3AZZ,

VK3TPH.

Wayne VK3WAM will be presenting on SOTA from a VHF and up perspective at GippsTech on July 7.

REWIND

GB100MWT from Sandford Mill Museum

Saturday, June 23, the Chelmsford Amateur Radio Society operated GB 100 MWT to celebrate the 100th anniversary of the opening of the world's first purpose built radio factory.

Work on the Marconi factory in New Street, Chelmsford started in February 1912 and on June 22 a special train brought International Radiotelegraphic Conference delegates from London to Chelmsford for the formal opening.

To celebrate the 100th anniversary members of C.A.R.S. operated from the Sandford Mill Museum in Chelmsford where there is an extensive collection of radio equipment from 1912 to the present time.

A Marconi T 1154 transmitter and R 1155 receiver station was operated from the Marconi Hut inside the museum on 80m AM. Some 80,000 of these sets were produced during WWII but very few are in operational use today. The equipment was restored by G3SUY and used an 80 Metre doublet antenna. A separate station was operated on CW.

New Release: Ham Radio Deluxe v5.23

Posted: 27 Jun 2012 07:26 PM PDT
http://forums.qrz.com/showthread.php?351847-New-Release-Ham-Radio-Deluxe-v5-23&goto=newpost

Tampa FL, St. Paul MN, Pittsburgh PA ☐ June 27, 2012

HRD Software, LLC announces the release of Ham Radio Deluxe 5.23.

HRD developers have been working to dramatically improve the callsign lookup function and address some maintenance items. HRD 5.23 and the preliminary manual are on the web site ready for download.

Mike Carper, WA9PIE, said, ☐The feedback from our beta-testers indicates that this release is the best version ever of the Ham Radio Deluxe Suite.☐ This version of Ham Radio Deluxe features powerful new options for callsign lookup. Users can set the priority of lookup sources like QRZ.com, their logbook entries, CD databases, and Logbook☐s country index. ☐Our users provided us valuable insight about how they☐re more confident in the data in their logbook than the CD and online data sources. It only made sense to allow them to choose the priority,☐ Mike added. Users are also prompted when lookup sources don☐t agree about the country location of stations they are adding to their log. This enables the user to make a choice about which country should be logged. The company invites hams to visit the company☐s YouTube channel for a demonstration of these new features.

Rick Ruhl, W4PC, said, ☐Erik Gawtry, KC0WWC, really showed his stuff in this release. I feel Erik is one of the best programmers in the country and I think the hams will be amazed at the magic he has done for this release. Hams also have been key players with both their input and support of our new company. Every hamfest that we attend we meet so many new friends and supporters.☐

This concludes development of the v5.x product roadmap. The company has also continued development of v6.0 and intends to release it by the end of summer 2012.

Version 6.x will have many new features which will include FSK support, a new QSL and awards tracking interface, improved cluster filters, label printing, and the Super Sweeper in Digital Master. Super Sweeper will allow multiple signals to be decoded in a single window.

A discounted pre-buy of version 6.0 is being offered for $59.95. This includes technical support for v5.2. Those that have purchased or will purchase the 5.X support will still get one year of support from the date of the 6.0 release.

You can purchase and download the product at http://www.ham-radio-deluxe.com.

When All Else Fails: Hams prepare for emergencies during Field Day 2012

Posted: 27 Jun 2012 06:35 PM PDT
http://forums.qrz.com/showthread.php?351842-When-All-Else-Fails-Hams-prepare-for-emergencies-during-Field-Day-2012&goto=newpost

ham_radio_5a_thumb.jpg

Times-Mirror Staff Photo/Michelle Stevens

Gene May of the Loudoun Amateur Radio Group writes down the call sign of another amateur ☐ham☐ radio operator for a 24-hour contest called Ham Radio Field Day in Lovettsville June 24.

Tue., Jun. 26 by Alicia Constant

Voices and static mingled on the airwaves as amateur radio operators baked in the heat Saturday. ☐QR-Zed.☐ ☐Kilo Echo Four, Oscar Kilo Yankee.☐ ☐Oscar Kilo Yankee?☐ With contact established, the Lovettsville radio operator repeats the full call sign to the voice that originates from a Canadian boat.

The operator made contact as part of Field Day, a 24-hour contest where thousands of amateur radio operators, called ☐hams,☐ practice communicating off the grid with other hams in the United States and Canada. Around 60 hams in Loudoun County participated in two Field Day events, one at Park View High School in Sterling and the other in Lovettsville.

On Field Day, each amateur radio club attempts to earn points by making contacts and logging ☐call signs☐ ☐ the unique letter and number code the Federal Communications Commission (FCC) licenses to each ham radio operator.

The Loudoun Amateur Radio Group (LARG) in Lovettsville made nearly 4,500 contacts, and the Sterling Park Amateur Radio Club made around 2,000 contacts as radio operators worked in shifts through Saturday night into Sunday afternoon. The groups☐ more unusual contacts included a 737 pilot over Utah and a ham in Puerto Rico.

Using ham radio satellites, a signal from Loudoun County can reach a radius of more than 1,000 miles. The hallmark achievement: making contact with the

International Space Station, where many of the astronauts are also ham radio operators.

In an era of Facebook, cell phones and Skype, ham radio is a little-known form of communication. Yet hams pride themselves on being the first to contact the outside world after a large-scale natural disaster that knocks out the Internet and cell phone towers. Field Day allows hams to practice setting up their stations on solar, generator, and battery power. The National Association for Amateur Radio proudly asserts that amateur radio gets the message through □when all else fails.□

Ham radio attracts a fiercely loyal following, with around 700,000 operators across the country and 3 million around the world.

□Everyone□s experience getting into ham radio is different,□ said Chris P., a ham who participated in the LARG Field Day event. (He requested his last name be withheld because he works for the federal government.)

Chris is proud to carry his great-grandfather□s call sign, though he says interest in ham radio □skipped two generations□ in his family. He first became a ham in high school, when he got his license through the Boy Scouts.

When he was deployed overseas during the 1990s, he would travel to a Military Auxiliary Radio Service (MARS) station to call home. The MARS operator would radio a ham in his hometown and ask him to connect Chris to his family via telephone: □This was before the days of video chat, and you□d call up for about five minutes and say, □Hey, Mom, guess where I am?□□

Several years ago, he decided to get re-certified as a ham operator, and he□s been involved ever since.

Through the course of a year, hams participate in a variety of events, from launching and chasing weather balloons to volunteering as trained weather spotters for the National Weather Service□s Skywarn.

Hams provide vital information to Skywarn because they□re able to communicate directly from the ground, said LARG Field Day Chairman Gary Quinn: □When a ham operator can look out the window and call the weather service and say, □Yes that□s a tornado,□ it validates their data.□

When a disaster strikes, Quinn said, □We know before the general public. We□re the ones pushing out the information.□

Ohio/Penn DX Special Bulletin No. 1067.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1067.1
BID: $OPDX.1067.1
June 28, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and 1A0C for the following DX information.

1A, S.M.O.M. (Press Release - Thoughts about the magic band. Last press release before the kick off). Posted on June 28th, by the 1A0C team [edited]: "Roma is not precisely a remote place with scarce ham population! So we don't see the need of a beacon. Even more, we don't want to upset the local ham community with another broadcasting signal in the band, there is a nice beacon already (I0JX) and it will be more than enough. We will, of course, keep watching the early warning sites such as the 6m ON4KST prop pages and DXCluster.
As it was intended from the beginning this operation is primarily focused on working North America and Asia. Our plan for 6m is to steer the beam to JA in the morning. All eastern EU will be covered in 1 hop as well. And turn the beam to NA past midday, giving a chance for the eagers in West EU. Last operations by 1A0KM has provided Sovereign Military Order of Malta to most of the EU 6m population, however there are very few dxpeditions planned for this season, therefore pileups from the old Europe can be large as people are idle looking for any prey to hunt.
The 6m propagation, specially on Es skip, is unpredictable, but our experience of the last 20 years points that during the last week of June/1st of July conditions are best for Xatlantic contacts and long haul openings to the N. East. We need to be very observant for any possible multihop event, managing meanwhile the EU pileup smartly whilst looking for possible links across the Pond or Siberia. This is not easy, but we have done it successfully and recently from Algeria, Egypt, Morroco, Palestine, Andorra, etc.
At the end, we are in Europe, hence, when working EU the so called "DX-windows" must be avoided, that is 50.100-50.130. We are thinking to stay fixed on one frq for all CW operation below it, between 50084-95, in order to not to disturb upwards the band to leak the pileup into the DX windows and choose a phone frq up in the band, away from the DX zone, e.g. 50180. We really hope the local operators, and even the European 6m

fans, will appreciate this decision of the team.

BAND PLANS

BAND	CW	SSB	RTTY
6M	50.084	50.180	--
10M	28.024	28.495	28.080
12M	24.894	24.945	24.921
15M	21.024	21.295	21.080
17M	18.074	18.145	18.100
20M	14.024	14.145	14.080
30M	10.104	---	10.140
40M	7.004	7.065/7.160	7.035
80M	3.524	3.780	--

50 MHz information and operating tips

• The 6 meter band will be included in this operation. We'll focus for long haul openings, as most of the Europe regions have been widely covered in the recent years.
• We plan to use the following frequencies: 50.084 for CW and 50.180 for SSB. Although they may be changed, depending on local noise/birdies. Split operation will be deployed when needed.
• The main mode will be CW. If band conditions permit, SSB will be used to gain a higher QSO rate. Please do not ask for mode changing.
• Please avoid QSO duplication, give others a chance. Logs will be uploaded twice a day to our website. If it will work, we will provide the live log online (new are not sure 100% now).
• We don't find necessary to set a beacon station this time.
• Our Grid Locator is JN61FV. Please, DO NOT send your locator, it is not needed and we won't log it anyway, it wastes precious time."

==> + SILENT KEY: FORMER ARRL GENERAL MANAGER AND IARU PRESIDENT
RICHARD BALDWIN, W1RU (SK)

Richard "Dick" Baldwin, W1RU, of Damariscotta, Maine, passed away on
Thursday, June 21, after a long struggle with Parkinson's Disease. He
was 92. An ARRL Charter Life Member, Baldwin capped a long career on
the ARRL staff with service as General Manager from 1975 until his
retirement in 1982. He served as Secretary of the International Amateur
Radio Union (IARU) from 1976-1982. After retirement, he continued his
involvement as a volunteer, serving as IARU President from 1982-1999
and as ARRL International Affairs Vice President from 1982-1986.

Baldwin began his career at ARRL Headquarters in 1948 as an Assistant Secretary. After a brief hiatus to work in the private sector in the early 1950s, he returned in 1956 as Managing Editor of QST, where he was responsible for production of the monthly member journal and all ARRL publications. In 1963, Baldwin became Assistant General Manager and almost immediately got involved with international matters. He organized the Intruder Watch one year later, and served as the ARRL Liaison between the amateurs who monitored the bands and the FCC. Baldwin was named by the ARRL Board to succeed John Huntoon, W1RW, on Huntoon's retirement as General Manager, the position now titled Chief Executive Officer, in 1975. In total, Baldwin wrote 234 articles and columns for QST.

ARRL Chief Executive Officer David Sumner, K1ZZ, who succeeded Baldwin as General Manager in 1982, observed that Baldwin is responsible for much of Amateur Radio's success in retaining and expanding its international frequency allocations: "Beginning in 1964, strengthening our position at the International Telecommunication Union in preparation for what ultimately became the 1979 World Administrative Radio Conference, was a major preoccupation in Dick's life. He played a key role in developing and implementing the strategy that led to success. Sitting at Dick's elbow in the years leading up to WARC-79 was an extraordinary learning experience for which I will always be grateful."

As IARU President, Baldwin led the development and adoption of a new IARU Constitution and oversaw the continued strengthening of the IARU as the spokesman for Amateur Radio at the ITU and in regional telecommunications organizations. In 1999, he was named IARU President Emeritus for his service to the IARU and the Amateur Radio Service. Read more here <http://www.arrl.org/news/former-arrl-general-manager-and-iaru-president-richard-baldwin-w1ru-sk>.

==> + PUBLIC SERVICE: ARRL OFFERS ONLINE PUBLIC SERVICE TRAINING

The former Amateur Radio Emergency Communications (AREC) series of three levels of emergency communications courses has been reconfigured into two new courses: An introductory course for radio amateurs who want to volunteer to provide services for public service and emergency communications, and a course for leaders and managers who are responsible for training and coordinating response efforts. The course descriptions for both of these courses that make up the ARRL's ARES® training program can be found in the ARRL Online Course Catalog. Links to register for each course are included in the course descriptions. Read more here <http://www.arrl.org/news/arrl-offers-online-public-service-training>.

==> + NOTES FROM THE ARRL VEC DESK

The ARRL Volunteer Examiner Coordinator (VEC) is one of 14 VECs in the US that coordinate the efforts of Volunteer Examiners (VEs) who administer Amateur Radio operator license examinations. More than

11,000 active ARRL VEs throughout the country give back to Amateur Radio by administering approximately 40,000 Technician, General and Amateur Extra exam elements each year. Read more here <http://www.arrl.org/news/notes-from-the-arrl-vec-desk>.

==> NEW VOLUNTEER EXAMINER APPAREL AND SUPPLY ITEMS NOW AVAILABLE

If you're an ARRL Volunteer Examiner, take note: The ARRL has recently introduced new apparel and supply items <http://www.arrl.org/shop/Volunteer-Examiner-VE/> just for you. Choose between a new black polo-style shirt <http://www.arrl.org/shop/Volunteer-Examiner-Polo-Shirt/> (sizes S-4XL) or a white long-sleeved button down shirt <http://www.arrl.org/shop/Volunteer-Examiner-Oxford-Shirt/> (sizes S-3XL), each embroidered with the ARRL diamond logo and "Volunteer Examiner" on left chest. Wear your VE badge on the new ARRL VE lanyard <http://www.arrl.org/shop/Volunteer-Examiner-ID-Badge-Lanyard/>. This stylish white lanyard is imprinted with "ARRL Volunteer Examiner" and "Amateur Radio" in black. It includes a bulldog clip for your call sign badges or your ARRL VEC credentials. Carry your VE exam supplies in style with the ARRL VE Portfolio <http://www.arrl.org/shop/Volunteer-Examiner-Zippered-Portfolio/>. This black portfolio features a zipper closure and is imprinted with the ARRL diamond logo and words "ARRL VEC Exams." There's lots more available in the ARRL VEC Online Store <http://www.arrl.org/shop/Volunteer-Examiner-VE/>, including the ARRL VEC Volunteer Examiner Manual <http://www.arrl.org/shop/ARRL-VEC-Volunteer-Examiner-VE-Manual/>, ARRL VE patches <http://www.arrl.org/shop/Volunteer-Examiner-VE/>, challenge coins <http://www.arrl.org/shop/VEC-Challenge-Coin/> and pins <http://www.arrl.org/shop/VEC-Pin/>.

==> + INTERNATIONAL NEWS: ARRL ATTENDS HAM RADIO 2012 IN GERMANY

HAM RADIO 2012 in Friedrichshafen, Germany -- held June 22-24 -- is billed as Europe's biggest Amateur Radio exhibition. Held annually in the Lake Constance region, this is the 37th international Amateur Radio exhibition and the 63nd Lake Constance Convention of Radio Amateurs, sponsored by the German Amateur Radio Club (DARC), which gave rise to the fair. Each year, a contingent from ARRL attends HAM RADIO. In 2012, this group included ARRL President Kay Craigie, N3KN, along with ARRL Chief Executive Officer David Sumner, K1ZZ, ARRL Chief Operating Officer Harold Kramer, WJ1B, ARRL Marketing Manager Bob Inderbitzen, NQ1R, and ARRL Field Correspondent Chuck Skolaut, K0BOG. Read more here <http://www.arrl.org/news/arrl-attends-ham-radio-2012-in-germany>.

==> ON THE AIR: ARRL UHF/MICROWAVE BAND PLAN COMMITTEE SEEKS COMMENTS ON PROPOSED 23 CM BAND PLAN

Last winter, the ARRL UHF/Microwave Band Plan Committee asked the Amateur Radio community about current, planned and projected uses of the amateur bands between 902 MHz and 3.5 GHz. The excellent level of

response provided us with the basis to complete drafts of the 9 cm, 13 cm and 33 cm revised band plans for ARRL Board approval. The Committee has now prepared for your consideration a draft band plan for 23 cm (1240-1300 MHz), the final band on its assigned list. Please look over the accompanying draft and let us know if you have any major concerns. Read more here <http://www.arrl.org/news/arrl-uhf-microwave-band-plan-committee-seeks-comments-on-proposed-23-cm-band-plan>.

==> SOLAR UPDATE

Tad "The Sun came up this morning like a burning red balloon <http://www.youtube.com/watch?v=QHJccFvSPgQ>" Cook, K7RA, reports: Sunspot activity continued to drop until early this week: The average daily sunspot numbers were 26.3, down more than 58 points from last week's numbers, while the average daily solar flux declined to 92.8, down over 33 points from last week's average. The weekly sunspot number average has declined since the May 31-June 6 period, when it was 130.4, followed by 116.1 the next week, 84.6 the next and 26.3 this week. In last week's ARRL Letter <http://www.arrl.org/arrlletter?issue=2012-06-21#toc09>, we reported the average daily sunspot number as 87, but it was really 84.6. This is because we reported what may have been a preliminary sunspot number of 46 for June 20, but the sunspot number for that date was 29. Geomagnetic conditions over the past week were quiet. The average planetary A index was 5.7, down from 12.6 last week, 9 the week before and 13.4 the week before that. The quiet planetary A index for this week was exactly as it was on the week of May 24-30 -- 5.7 -- which also happened to be the mid-latitude A index for that period. The latest prediction from USAF/NOAA shows geomagnetic activity peaking on June 29-July 4, probably from a coronal hole spewing solar wind. The predicted planetary A index for June 28-30 is 7, 10 and 18, followed by 15 on July 1-3, 10 and 8 on July 4-5, 5 on July 6-7, 8 on July 8-9, 5 on July 10-25, and then 10, 18, 15, 15, 15 and 8 on July 26-31. This is an echo of the activity this week, based on the 27.5 day rotation of our Sun, relative to Earth. The predicted solar flux is 110, 115 and 115 on June 28-30, 120 and 125 on July 1-2, 130 on July 3-5, 135 and 140 on July 6-7, 135 on July 8-9, 130 on July 10-11, 125 on July 12-13, then 120, 115, 110 and 105 on July 14-17. Solar flux may dip below 100 around July 19-28. Look for more on the ARRL website on Friday, June 29. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Eurythmics' You Hurt Me <http://en.wikipedia.org/wiki/Eurythmics>.

==> + DXCC DESK APPROVES SEVEN OPERATIONS FOR CREDIT

In June, the DXCC approved seven operations for DXCC credit. On June 21, the 2012 TT8ES (Chad) operation, the XX9E (Macao) operation and the 2011 TL9EL (Central African Republic) were approved. On June 25, the

2012 XW4XR (Laos) operation was approved. On June 26, the 2010 J28RO (Djibouti) operation, the 2011 J25DXA (Djibouti) operation and the 2012 5X1RO (Uganda) operation have been approved. "If you had cards that were recently rejected for these operations, please send an e-mail <dxcc@arrl.org> to the ARRL DXCC Desk," Moore said. "Please note that due to extremely heavy e-mail, DXCC staff may not respond to your message. Once your record is updated, results will appear in Logbook of The World (LoTW <https://p1k.arrl.org/lotwuser/default>) accounts or in the live, daily DXCC Standings <http://www.arrl.org/dxcc/>. Due to a backup on DXCC e-mail, DXCC staff will make the corrections to accounts, but may not respond directly to messages about this." Moore noted that the J28RO and 5X1RO logs have been uploaded to LoTW.

==> THIS WEEK IN RADIOSPORT

This week:

- July 1 -- RAC Canada Day Contest; WAB 144 MHz Low Power Contest (Phone)
- July 2-8 -- 10-10 International Spirit of '76 QSO Party
- July 3 -- ARS Spartan Sprint
- July 4-5 -- Michigan QRP July 4th CW Sprint

Next week:

- July 6 -- NCCC Sprint
- July 7-8 -- Venezuelan Independence Day Contest; DL-DX RTTY Contest; Original QRP Contest; PODXS 070 Club 40 Meter Firecracker Sprint (local time)
- July 8 -- SKCC Weekend Sprintathon; DARC 10 Meter Digital Contest; QRP ARCI Summer Homebrew Sprint
- July 9 -- NAQCC-EU Monthly Sprint
- July 11-12 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- June 30 -- ARRL Eastern Pennsylvania Section Convention <http://www.arrl.org/hamfests/eastern-pennsylvania-section-convention-electronics-expo-firecracker-hamfest>,
Harrisburg, Pennsylvania
- July 20-22 -- ARRL Montana State Convention <http://www.arrl.org/hamfests/montana-state-convention-78th-glacier-waterton-international-hamfest>,

NZART Headquarters Infoline Issue 254

29 June 2012

NZART Website: www.nzart.org.nz

In this issue:

· Silent Key Richard Baldwin W1RU – Life member of
NZART

· From the desk of HQ

· Infoline Distribution

· FMTAG Notes

· OTC Club NZ

· NZART Officer Vacancy

· 2012 NZART Memorial Contest

· Results of 80m Trans-Tasman Phone Contest

· From the VHF-UHF-SHF-EHF Contest Committee

· IARU HF World Championship Contest

******

Richard L. Baldwin W1RU, NZART Life Member, Silent Key It is with regret to report that Dick Baldwin W1RU, past IARU President and NZART Life Member, died on 21 June. He was 92. As ARRL Assistant General Manager Dick was the ARRL staff member who was primarily responsible for initiating preparations for the 1979 World Administrative Radio Conference and was one of the key players in formulating the objective to obtain new amateur HF bands at 10, 18 and 24 MHz. As ARRL General Manager from 1975 to 1982 he played an essential role in turning that objective into reality. Following his retirement from the ARRL staff Dick was elected President of the IARU. He had served as IARU Secretary from 1976 to 1982. He served as IARU President for 17 years, which included managing the transition to a new IARU Constitution that made the IARU a more representative body. Upon his retirement from that volunteer position in 1999 he was named President Emeritus by the IARU Administrative Council. Dick initiated and led Amateur Radio Administration Courses to appraise the administrators of amateur radio in many countries of the benefits and advantages for developing a

viable, healthy and active, amateur radio service in their countries. Dick’s thorough preparatory work and leadership set the basis for the very successful review of the Amateur Service at the World Radio Conference 2003. A great friend and supporter of amateurs and amateur radio societies the world over, Dick was made a Life Member of NZART in 1992 to recognise his service and achievements for the world Amateur Radio fraternity. ****From the Desk at HQDebby says…not too much news from me this issue. There is quite a bit in here, so I suggest you tick the dates of the contests that you are interested in and mark them on your calendar. Talk soon…Debby ZL2DL****Infoline distribution

HQ Infoline is distributed through email under three different lists.

The main list sends the Infoline text within the body of an email. The second list sends Infoline as an attachment, in PDF format, the third list sends Infoline as an attachment in Word format. The third list was primarily targeted at Branch newsletter editors, allowing easy insertion into other publications.

We have decided to simplify the distribution by dropping the word attached format, as it is a trivial task to copy and paste text from the body of an email into a newsletter, so sending out word documents seems unnecessary. There are also version problems with Word, which complicate general distribution.

>From the next issue of Infoline, those receiving word attachments will change to receiving Infoline in the body text. If you are on the Word list, and would prefer to receive a PDF attachment, please send an email to infoline-owner@lists.nzart.org.nz, with your name and callsign, and details of the change you want. You are welcome to change from PDF to Infoline in the body also, with an email as above.

If you would prefer to be removed from the list, or have your email address changed, you can also send an email to the address above. Please include your name, and callsign, and try to ensure the email address you are sending from is the one on the list, or mention it in the text.

The appropriate links are provided on our web page at:

http://www.nzart.org.nz/join/e-mail-lists/join-infoline-list/

If you are looking or past issues of Infoline, every issue is stored and available on the web page at:

http://www.nzart.org.nz/h-quarter/infoline/

FMTAG Notes

Call Book 2012/2013 Beacon, Link and Repeater Listings.

At the beginning of June, FMTAG sent an email to all Branches (and NZART-affiliated groups), requesting that they check their Beacon, Link, Repeater (and their Trustees) listings for the 2012/2013 Call Book.

Please contact FMTAG if the Branch has not received the email: fmtag@nzart.org.nz

As at the time of writing (Thursday the 28th of June) FMTAG has not received information from the following Branches:

03 Western Suburbs 12 Hamilton
13 Hawkes Bay

20 Manawatu 22 Marlborough
23 Marton

27 New Plymouth 30 Otago
33 Rotorua

34 South Canterbury 37 Southland
38 Taumarunui

48 Wanganui 49 Westland
51 Eastern BOP

55 Waitomo 56 Christchurch West
60 Taupo

66 Auckland VHF 78 Far North
84 Bay of Islands

85 Mercury Bay 86 Musick Point
87 South Taranaki

88 Tauranga Emergency

The close-off for returns is the 31st of July. Please help ensure that this Call Book is the most accurate ever.

Proposals

Branch 18 Hutt Valley has applied for a power increase of its 700 repeater at Fitzherbert, located at TOPO50 BQ32 643.78 350.86. An engineering investigation, in accordance with MED PIB38, confirms that there will be no interference to other stations, and that the repeater transmit frequency can remain on 147.000 MHz and its receive frequency on 146.400 MHz.

Final Recommendations for NZART Council

NZART Council has approved the following applications:

Branch 24 Motueka has applied for a 7 dB power increase of its 670 repeater at Mount Campbell, located at TOPO50 BP24 876.19 474.92. The repeater transmit frequency is 146.700 MHz and its receive frequency is

146.100 MHz.

Branch 74 Wellington VHF has applied for an APRS Digipeater at Kaiwharawhara Hill, located at TOPO50 BQ31 494.93 316.03. The transmit and receive frequency will be 144.575 MHz in accordance with the band plan. An engineering investigation, in accordance with MED PIB38, confirms that there will be no interference to other stations.

Comments and Applications

Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART website:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

The current status of Applications can be viewed on the NZART website:

http://www.nzart.org.nz/nzart/fmtag/fmtag-apps-being-processed/

****

Old Timers' Club-OTC (ZL)

a.. To recognise service to Amateur Radio;
b.. To revive and maintain interests and good fellowship among the older members in the common cause;
c.. To offer advice and encouragement to newer Amateurs;
d.. The Club is affiliated to the New Zealand Association of Radio Transmitters (Inc.)

OTC update: As per the last HQIF bulletin we now have sufficient copy, plus one photograph, for the next OTC scribe in Break-In. A printed page of Break-In usually contains about 1300 words (with no picture) and we are normally limited to around one page, two at maximum.

My ideal would be to fill at least one page for each edition in the OTC column ahead. Input is asked for and below is some guidelines.

The OTC column in Break-In is a forum for members to publish a letter, or an article. OTC readers, along with association members, will all enjoy reading and hearing about other radio amateurs experiences, both past and current.

Contributions can be technical, an account of first involvement with early amateur radio, nostalgia, along with vintage radio which all provides an invaluable source of information on the history of their hobby.

The “Old Timers Club” was essentially a social
organisation, and that is still current today.

Articles relating to all aspects of OTC, for Break-In are most welcome, and to be addressed to: Stephen ZL1TPH; Postal address, 68 Kath Hopper Drive, Orewa, 0931 or via email to zl1tph@nzart.org.nz

We also accept large picture files sent via email and will transcribe hand written letters into text.

73, Stephen ZL1TPH

****

NZART Officer Vacancy

NZART Council is calling for expressions of interest from NZART members for the following Officer Vacancy - Position: NZART VHF/UHF/SHF Records Coordinator

The VHF/UHF Records Coordinator is responsible to NZART Council for the coordination, maintenance and promotion of the New Zealand VHF/UHF/SHF records.

Description of the position

a.. NZART is a body that promotes Amateur Radio within New Zealand.
b.. The NZART VHF/UHF/SHF Records Coordinator is appointed by NZART Council to coordinate and to promote, the keeping of accurate records pertaining to performance of VHF/UHF/SHF activities and operating by NZ amateurs.
c.. The NZART VHF/UHF/SHF Records Coordinator reports to NZART Council through an appointed Liaison Councillor.
d.. Although referred to by VHF/UHF/SHF, the task may extend to other bands.

Duties of the position

To maintain, review and update when necessary, the established:

a.. VHF/UHF/SHF Records Lists,
b.. the VHF/UHF/SHF Record Claim Rules, and
c.. the Record Claim Form.
To receive completed Record Claim Forms submitted by radio amateurs, appropriately process to verify by making whatever enquiries may be necessary, and make the concluding decision to accept or to reject the claim.

a.. To amend the Records lists as appropriate.
b.. To promote active operating for records achievement among New Zealand amateurs.
c.. To arrange for presentation trophies and certificates relating to Records.
d.. To appoint assistants as necessary.
e.. To provide advice and guidance on Records issues.

f.. To liaise with overseas radio amateurs and other amateur societies on Records matters.
g.. To write occasional entries for Break-In about Records.
h.. At time of dispute, to refer incidents involving Records Claims and the Rules to NZART Council.

Work Experience

The NZART VHF/UHF/SHF Records Coordinator will be expected to demonstrate competent performance in:

a.. Maintaining accurate and detailed records.
b.. Good written language skills for communication with members, overseas societies, and articles for publication.
c.. The accurate measurement of distances and global positions, recognise and understand the errors possible in GPS reports, in the selection of map series and in grid references.
d.. A good working knowledge of all the measurement and technical terms listed on the Claim Form.

Personal Skills

The NZART VHF/UHF/SHF Records Coordinator will require:

a.. Good person skills.
b.. An understanding of the requirements and issues involved in Amateur Radio hill-top activity including possible interference to other radio services.
c.. A good knowledge of Amateur Radio and the aims of IARU and NZART.
d.. Competency in spread sheet and word processor applications and with any specialised software appropriate to the position.
Applicants for this role can be located anywhere in New Zealand. The ideal person for this role would have experience in the area of VHF/UHF/SHF operating and/or contesting.

Officer Positions are voluntary; however operating expenses will be refunded as per the NZART Policy on Officers Expenses.

Applications for this position will be accepted from interested persons in writing with supporting documentation through the General Secretary, NZART, PO Box 40525, Upper Hutt 5140.

This advertisement is authorised by NZART Council.

2012 NZART Memorial Contest (2012 will be the 66th year of this Contest)

To commemorate those from our ranks who lost their lives in World War 2.

When: Saturday July 7th & Sunday 8th July

A total of six operating periods, three each evening of one hour each from 0800 - 1100 UTC

(8.00 pm to 11.00 pm Saturday NZT and 8.00 pm to 11.00 pm Sunday NZT).

For Memorial Contest Rules See "Rules Memorial" in the right hand Page Links menu

and including Manual Log Sheets etc.

http://www.nzart.org.nz/activities/contest-rules/

****

Results for the Trans-Tasman 80m phone contest held in May.
Congratulations to Ron, ZL4RMF, operating as ZL4R, for achieving First ZL. Bill, ZL2AYZ, operating QRP as ZL3VZ, achieved second ZL, and Alastair and Quentin operating as ZL3YOK, achieved third ZL.

Congratulations also to Ash Clark, VK3SSB, from Horsham Victoria, who took out the overall First place.
The full results have now been published on the WIA website. Follow the link from the NZART web site "Rules" page. The next Trans-Tasman contest will be held on Saturday, the 21st of July, from 8pm.

This is the new Multi-Mode contest which includes separate categories for 160m phone, as well as CW and Digital modes on both 80m, and 160m. There's also an overall "multi-mode" category for any combination of these modes or bands. The "multi-mode" category is well suited to multiple operators, clubs, and anyone wanting more activity than any one mode can offer.

Rules can be found on the WIA web site, or follow the link on the "Rules" page of the NZART web site.

The 80m phone contest has been a great success under the new rules, and the upcoming new Multi-mode contest should be a lot of fun too!

This is the first year that this contest has been fully managed in ZL, and the contest manager, Rob, ZL3AKM, wishes to thank everyone who participated.

****

>From The VHF-UHF-SHF-EHF Contest Committee

Results of The Hibernation Contest 9th & 10th June 2012

Congratulations to Dick, ZL2TGQ, and Gavin, ZL2TVM, for both winning the Hibernation Contest, in a dead heat.

THE Next Contests

The next contest is the Brass Monkey Contest, all bands 50 MHz and up, on Saturday the 4th and Sunday the 5th of August 2012. The operating times are: Saturday 1700 to 2300 NZST and Sunday 0700 to 1300 NZST.

The contest after that is the Microwave Contest, 921 MHz and up, on Saturday the 6th and Sunday the 7th of October 2011. The operating times are: Saturday 1700 to 2300 NZST and Sunday 0700 to 1300 NZST.

The Contest Rules are available at:
www.vhf.org.nz/VHF-UHF-SHF-ContestRules

All contest logs should be sent, to arrive within two weeks, to:
zl2wa@clear.net.nz

with Contest Log in the subject line, or by post to:

Contest Manager

http://forums.qrz.com/showthread.php?351889-DXCC-East&goto=newpost

Just curious as to who is planning to go to the NCDXA's DXCC East event in August.

I'm on the fence about it;

On the one hand, I'm only about 4 hours drive away.

On the other hand, I'm not entirely sure what I'll get out of it... outside of a chance to shmooze a little, but that's never been a strong point of mine.

On the OTHER hand... how the heck did I suddenly get three hands?... it's also 90 minutes away from the kids. Which means, if I go, the wife comes along, and while I spend the day at the event, she'll be down at the kids spending quality time with our grandson.

Decisions, decisions...

1117. Amateur Radio Newsline(tm) Report 1820 - June 29 2012

Newsgroup: rec.radio.amateur.misc
Date: 2012-06-29 09:00:13 UTC

Amateur Radio Newsline(tm) Report 1820 - June 29 2012

Amateur Radio Newsline report number 1820 with a release date of June 29, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio continues its aid in response to wildfires in Colorado; hams in Sri Lanka say they want to be included in ham radio emergency communications; big changes coming to 70 centimeters down under; a day change for Ham Nation and a new method of data transfer could reach 2 point 5 terabytes per second. Find out the details are on Amateur Radio Newsline(tm) report number 1820 coming your way right now.

(Billboard Cart Here)

RESCUE RADIO: COLORADO AND NEW MEXICO FIRE UPDATE

We begin this week with an update on ham radio assisting those fighting the wildfires burning in Colorado and New Mexico. Don Carlson, KQ6FM, has what's known so far:

--

According to a report in the Denver Post, ham radio operators have become an integral part of the fire fighting effort. A story talks about the contributions of Amateur Radio Emergency Service operators. It describes in detail the work of Randy Long, K7AVV, who the paper says is a ham radio operator asked by firefighters to find more volunteers to aid communication in the High Park fire zone.

Since then Long has been managing a team of ham radio operators staffing eight hour shifts around the clock. They are described as setting up portable repeaters and relaying messages between the fire lines and command posts. About 40 operators have so far volunteered. Long is an Amateur Radio Emergency Service coordinator for Larimer and Weld counties who was forced to evacuate from his home southeast of Buckhorn Mountain.

Also involved in the Colorado fire communications effort is Colorado Section Emergency Coordinator Robert Wareham, N0ESQ, Long, Wareham and the other ARES volunteers were reported to be at the National Guard Armory in Fort Collins. They became an integral part of the communications effort as the High Park fire encircled Buckhorn and Horsetooth mountains. That's where critical hubs of Larimer County

public safety communications towers stand.

The Post story notes that as a part of their hobby amateur radio operators have set up about 50 mountaintop repeaters around northern Colorado. If the public service communication systems were damaged or forced off line, the hams could provide alternate communications through one of their repeaters or set up a portable repeater to fill in any gap.

Agencies being served by ARES volunteers include the Larimer County Sheriff, American Red Cross, US Forest Service, Colorado State Patrol, and the High Park Fire Incident Management team of the Poudre Park Fire Department.

Yet another massive wildfire broke out near the city of Colorado Springs on Saturday, June 23rd. Called the Waldo Canyon Fire this blaze suddenly grew to a level of fierce on Tuesday, June 26th. So far it has forced 32,000 people from their homes and has prompted evacuations from the near-by United States Air Force Academy. The fire is reported to literally be swallowing numerous houses at the edge of Colorado Springs. As we go to air there is no word of any direct involvement by ARES or RACES teams but its likely that some amateur radio communications lines are already on-scene.

Meanwhile in New Mexico, ham radio operations have stood down following the Little Bear Fire in and around the city of Riudoso. Michael Scales, K5SCA, is the New Mexico Section Emergency Coordinator. In a note released on June 17th and relayed to Newsline by Jay Miller, W5WHN, all personnel have been released at this point. However they should be aware that the new threat is flash flooding. With that in mind they should remain somewhat vigilant and have their "go kits" ready for deployment.

The Little Bear Fire destroyed 224 homes and had burned 59 square miles before it was 60 percent contained. As reported here two weeks ago, several New Mexico ARES units responded to that blaze.

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, in Reno.

--

More on this situation as information is made available to us. (W5WHN, Denver Post, others)

**

RESCUE RADIO: SRI LANKA HAMS OFFER TO ASSIST IN EMCOMM WORK

Sri Lanka's amateur radio operators have renewed their call to be included in communication work during national disasters. This after the nation's defense authorities have relaxed rules on clearing ham radio equipment into that nation.

The report in Lanka Business quotes Radio Society of Sri Lanka official, Victor Goonetilleke, 4S7VK, as saying that Sri Lankan hams would like to join-up with the National Disaster Management Centre in some way. This, to help them with emergency communication work.

4S7VK spoke during a recent public lecture on Disaster Risk Reduction, organized by LIRNEasia, which is a regional think-tank. At the gathering it was noted that with some 200 members the Radio Society of Sri Lanka is not new to disaster communications in the island. It was noted that the society played a crucial role during the 2004 Asian tsunami that claimed over 30,000 lives and displacing about one million people. More is on-line at tinyurl.com/srilanka-emcomm and in this case srilanka is spelled as one word. (Radio Society of Sri Lanka)

**

RESTRUCTURING: PROPOSED REFARMING OF 70CM IN AUSTRALIA

Big changes are coming to the amateur 70 centimeter band down under. We have more in this report:

--

The Australian Communications and Media Authority's Spectrum Conference this year saw the ongoing work associated on the review of 400 MHz spectrum. This is a band of frequencies that also includes the 70 centimeter ham radio allocation.

Currently, the Australian amateur service has a secondary status between 420 and 450 MHz. In the last report from the Australian Communications and Media Authority on its review issued April 2010, it advised that the allocation for the amateur service between 430 and 450 MHz would not be affected from any rearrangement. However, they cited, a possible need for some temporary use by other services in the segment 440 to 450 MHz during the transition period.

In the Amateur secondary segment 420 to 430 MHz, in some geographic areas around Australia, amateur use of that spectrum has already been withdrawn. At the conference, the Australian Communications and Media Authority indicated that they will be seeking to consult with the Wireless Institute of Australia on withdrawal of the amateur service in this segment across the rest of that nation.

Currently, the major use of this band segment by amateurs is fixed links and the like. The Australian Communications and Media Authority database lists around 126 assignments to some 35 licensees. It is expected these can be relocated to the 430 to 450 MHz portion of the band.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

You can follow this story on-line on the Wireless Institute of Australia news-pages at www.wia.org.au (WIA News)

**

RESTRUCTURING: NEW LOW FREQUENCY ALLOCATION IN MALTA

Hams in Malta now have access to a new low frequency band. The as the Malta Communications Authority grants amateurs access to 472 to 479 kHz. The country's National Frequency Plan identifies this as a secondary allocation, with a maximum power of 1 watt Effective Radiated Power. (GB2RS)

ENFORCEMENT: FCC ISSUES A $15000 NAL TO ANOTHER FLORIDA UNLICENSED BROADCASTER

The FCC has issued a $15,000 Notice of Apparent Liability also known as a proposed fine to Pierre Nixon Jean. This, for operating an unauthorized station on 92.5 MHz in West Palm Beach, Florida. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

This past February, FCC agents from the Miami office traced the source of unauthorized signal on 92.5 MHz to an antenna mounted on the roof of an apartment building in West Palm Beach. Agents heard the station identify itself on the air as "Exitfm.com."

Doing a bit of on-line sleuthing, the agents found an Internet site for the station that showed a photo of Pierre Nixon Jean as a D-J and identified him as the station owner. The agents also learned from the building owner that Jean rented an apartment in the building from sometime in 2010 through March of this year. He also identified Jean from a photograph as being the renter.

The building owner told the agents he had seen what he believed what might have been transmitting equipment inside the unit and told Jean to remove the gear after speaking to the FCC. The Enforcement Bureau confirmed the antenna was removed in May.

Now, in its penalty decision, the FCC says that Jean had no license for the station and was operating the facility illegally. The FCC also noted that Jean had been found to have been transmitting unlawfully on the same frequency from another location in 2010. It said that such

continued illegal operation demonstrates a deliberate disregard for the commission's rules. Because of this the agency increased the level of the fine from the $10,000 base figure to $15,000.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale Arizona.

--

As is usual in these cases, Pierre Nixon Jean has 30 days to pay the fine or file an appeal. (FCC)

**

ENFORCEMENT: FCC AFFIRMS $22000 FINE AGAINST TENNESSEE UNLICENSED BROADCASTER

The FCC has affirmed a $22,000 monetary forfeiture previously issued to Arthur Lee Young Cosby, Tennessee. This for his alleged operation of an unlicensed radio station on 87.9 MHz and refusal to allow an inspection of his radio station.

This past March 27th the FCC Enforcement Bureau's Atlanta Office (issued a Notice of Apparent Liability for Forfeiture to Young for the alleged violations. According to the regulatory agency, Young has not filed a response to the NAL. So, based on the information before it, the FCC affirmed the fine on June 8th. Young was given the customary 30 days from issuance of the fine to pay it or to file an appeal. (FCC)

**

HAM HAPPENINGS: HAM NATION CHANGING NIGHTS TO WEDNESDAY ON TWIT.TV

Beginning on July 11th, the TWIT.tv program Ham Nation will be moving to Wednesday evenings. This as network owner Leo Laporte, W6TWT, announces a new programming schedule. Bob Heil, K9EID, who hosts Ham Nation says that the move is really good news for his program due to the strong lead in shows that Leo Laporte has chosen to precede it:

--

K9EID: "They're going to change the day of Ham Nation and we are going to move it to Wednesday. The reason is that he is going to put up a like-up of some of his top shows on Wednesday.

"It starts off with the Security Now with Steve Gibson which is an incredible show, by the way. (It covers) all kinds of security (including) your home, your computer. Whatever needs security, Steve is the master.

"And then, they are going to have the TWIG show - This Week in Google, Android and all that.

"Then, the big show Triangulation. That show will precede Ham Nation.

"So you're going to have four of their top shows on Wednesday."

--

The day change does not affect the shows hour of air-time schedule. The netcast will still take place live at 9 P.M. Eastern, 6 P.M. Pacific with video and audio podcasts available for download at twit.tv/hn about 24 hours later.

Again the new day for the TWIT.TV amateur radio program Ham Nation will be on Wednesday starting on July 11th. K9EID and the gang hope you will join them there. (Ham Nation)

**

HAM BUSINESS: ETHERKIT RELEASES QRSS BEACON KIT

Etherkit which is a new amateur radio kit company devoted to open source hardware, has released its first product. Called OpenBeacon, it is described as an open source crystal-controlled QRP beacon transmitter kit which can output a variety of slow-speed modes. These include QRSS, DFCW, and Sequential Multi-tone Hellschreiber. More information is on-line at www.etherkit.com (Southgate)

**

HAM HAPPENINGS: CK6S FOR CALGARY STAMPEDED JULY 5 TO 15

The Calgary Amateur Radio Association will be operating special event station CK6S from July 5 to 15th. This to celebrate the 100th Anniversary of the Calgary Stampede.

The Calgary Stampede is an annual rodeo, exhibition and festival held every July in Calgary, Alberta, Canada. The event's roots are traced to 1886 when the Calgary and District Agricultural Society held its first fair.

In 1912, American promoter Guy Weadick organized his first rodeo and festival, known as the Stampede. He returned to Calgary in 1919 to organize the Victory Stampede in honor of soldiers returning from World War I. Weadick's festival became an annual event in 1923 when it merged with the Calgary Industrial Exhibition to create the Calgary Exhibition and Stampede.

The ham radio special event station CK6S plans to use frequencies in the general portion of the United States phone bands. These will be around 3.825, 7.180, 14.250, 21.320 and 28.475 MHz. A special QSL card will be available through the QSL bureau or direct by following the CK6S/VE6AO QSL instructions on QRZ.com. (VE6TC, Wikipedia)

**

HAM HAPPENINGS: W1A CELEBRATES TELSTAR AT 50

A celebration of the world's first telecommunications satellite will take place on July 7th. This when the Radio Adventurers of Maine

activate the callsign W1A to commemorate the first messages through the Telstar bird. They will be operating on site at the Andover, Maine satellite facility, the original earth station which broadcast the first messages via Telstar was uplinked on July 10th, 1962. The clubs commemorative operation will begin at 1300 UTC on both 40 and 20 meter phone. Other bands will be added as propagation allows. QSL as directed on the air. (Radio Adventurers of Maine)

**

NAMES IN THE NEWS: JAMIE GAVIN, KF7WIS NAMED QRZ.COM GENERAL MANAGER

Some names in the news. First up is Jaime Gavin, KF7WIS, who has been named as the first General Manager of the QRZ.com ham radio website. According to site owner Fred Lloyd, AA7BQ, Gavin will be overseeing all aspects of QRZ's daily business and interaction with the public.

Jaime Gavin holds a Master's degree from Arizona State University and Lloyd describes her as being extremely enthusiastic and capable. She will be handling the business aspects of QRZ LLC, and will oversee its day-to-day activities including advertising sales, database administration, and user and customer support.

According to AA7BQ, with the addition of KF7WIS, his role at QRZ now transitions to the one that he loves the most. That being the sites systems designer, programmer, and ambassador for QRZ.com. (QRZ)

**

NAMES IN THE NEWS: FORMER FCC COMMISSIONER RICHARD WILEY HONORED

The Catholic University of America Columbus School of Law has honored communications law expert Richard Wiley for a lifetime of achievement, including a career at the Federal Communications Commission that spanned three presidential terms.

Wiley is the only person to act as general counsel, commissioner and chairman of the FCC. He started under President Richard Nixon, served under President Gerald Ford and then resigned after helping transition into the administration of President Jimmy Carter for a year. His pivotal role in the development of HDTV earned him the nickname, the "Godfather of Digital Television," and earned him an Emmy from the Academy of Television Arts and Sciences.

Richard Wiley, who is now age 77, is only the third person to receive the Milestone Award from the university's Institute for Communications Law Studies. (RW)

**

NAMES IN THE NEWS: KJ4UFG SAYS HE NEEDS FIELD DAY COVER PHOTO FOR SERA JOURNAL

John Ghormley, KJ4UFG, who is the editor of the South East Repeater Association publication known as the SERA Repeater Journal is looking for a cover photo that depicts an ARRL Field Day activity.

Specifically, KJ4UFG requires a high resolution photograph taken at a Field Day site in Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia. These are the states serviced by the organization.

A suitable cover photo should be in vertical portrait orientation. The file size should be such that it can be turned into a super sharp image of at least 300 dots per inch or greater when rendered at 8.5"x11" page size. If there are people prominently depicted in the photo, he will need full names, and call signs for the hams in the photo.

If you have a photo you want to submit, email it as an attachment, to editor (at) sera (dot) org. (KJ4UFG)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: FORMER ARRL GENERAL MANAGER AND IARU PRESIDENT RICHARD, BALDWIN, W1RU - SK

It's yet another changing of the guard in amateur radio. This as we learn the sad news of the passing of former ARRL General Manager Richard Baldwin, W1RU, of Damariscotta, Maine,

An ARRL Charter Life Member, Richard Baldwin capped a long career on the ARRL staff with service as General Manager from 1975 until his retirement in 1982. He served as Secretary of the International Amateur Radio Union (IARU) from 1976 to 1982. After retirement, he continued his involvement as a volunteer, serving as IARU President from 1982 to 1999 and as ARRL International Affairs Vice President from 1982 to 1986.

According to his daughter Judy, Baldwin's life revolved around telecommunications. He first became licensed in 1934 as W1IKE. An Amateur Extra class licensee, he earned DXCC, WAS and WAC, as well as membership in the ARRL's A-1 Operator Club.

Baldwin began his career at ARRL Headquarters in 1948 as an Assistant Secretary. After a brief hiatus to work in the private sector in the early 1950s, he returned in 1956 as Managing Editor of QST. In that position he was responsible for production of the monthly member

journal and all ARRL publications.

In 1963, Baldwin became Assistant General Manager and almost immediately got involved with international matters. He organized the Intruder Watch program and served as the ARRL Liaison between the amateurs who monitored the bands and the FCC. In 1975 he was named by the ARRL Board to succeed John Huntoon, W1RW, as General Manager on Huntoon's retirement, That's the position now titled Chief Executive Officer. In total, Baldwin wrote 234 articles and columns for QST.

A graduate of Bates College in Maine, Baldwin earned an MS in Physics from Boston University in 1948. He spent five years in the US Navy during World War II. In March 1943, while serving as Communications Officer aboard the USS Coghlan, he participated in the longest American naval daylight firefight of the war. That being the Battle of the Komandorski Islands. After the war he served in the US Naval Reserve, achieving the rank of Commander.

Richard Baldwin, W1RU, was age 92 when passed away on Thursday, June 21, after a long struggle with Parkinson's Disease. He is survived by his wife Phyllis, daughter Judy and son Glenn. A memorial service was planned for Friday, June 29 at Second Congregational Church in Newcastle, Maine. (ARRL)

**

EMERGING TECHNOLOGY: NEW DATA TRANSFER METHOD PROMISES UP TO 2.5 TB PER SECOND

American and Israeli scientists have developed a new technology of wirelessly transmitting data using twisted beams of light that could produce a theoretical throughput of 2.5 terabits per second. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, has the story of the science making this possible:

--
The new method of high speed data transfer reportedly uses orbital angular momentum or O-A-M to increase the amount of information that can be carried by a single stream. To accomplish this feat, the researchers twisted together eight 300 Gigabytes per second visible light data streams using O-A-M technology over a space of one meter to achieve speeds of 2.5 terabits per second. The development comes just one month after it was finally proved that orbital angular momentum is actually possible.

Using this new orbital angular momentum technology an infinite number of conventional transmission protocols such as WiFi and LTE, can be twisted together for faster speeds without the need for more spectrum. For perspective, that's more than 8,000 times faster than the fastest home Internet connection at 300 Megabytes per second.

The development team says that it will be working increasing the transmission distance which currently at only 1 meter. The theoretical

distance limit for this new method is likely to be less than one kilometer. At least in the foreseeable future.

For the Amateur Radio Newsline, I'm Heater Butera-Howell, KB3TZD, in Berwick, Pennsylvania

--

You can read more on-line at tinyurl.com/super-speed-data. (slashgear.com, N6ZXJ)

**

HAM RADIO IN SPACE: SCOTLAND MOBILE ON THE BIRDS

2E1EUB is currently mobile on the various amateur radio satellites from Scotland. He began his operation on June 24th and can be heard stroke P through July 6th or 7th. Grid squares he will be activating include IO-76 IO-77 IO-87 and others if he has the time. QSL to 2M1EUB via his address on QRZ.com. (Southgate)

**

WORLDBEAT: CANADIAN HAMS NEEDED FOR COMMUNICATIONS FOR CYCLING EVENT

This note to our friends up north. Radio Amateurs of Canada says that volunteers are needed to provide communications in support of that nations Coast to Coast Against Cancer Foundation cycling event. The ride takes place August 3d to the 5th along Nova Scotia's Cabot Trail. The route involves at least 100 riders and more than 50 volunteers.

If you are able to help, please drop a note to Doug Mercer, V-Oh-1-T-D-M at dougvo1dtm (at) gmail (dot) com. You can also get in touch with Radio Amateurs of Canada's Atlantic Director Ev Price at vo1dk (at) rac (dot) ca or Deputy Director Len Morgan ve9my (at) rac (dot) ca. Any assistance will be sincerely appreciated. (RAC)

**

ON THE AIR: CELEBRATING THE TOUR DE FRANCE CYCLING RACE 2012

Meantime, keep an ear open for special event station GB4TDF. G1JYB, G1LAT and the Sands Contest Group are hosting the operation from Oysterber Farm in the UK to coincide with for the 2012 Tour our de France bicycle race.

The special event station began operation on June 26th and will terminate on July 23rd. Operations will be on HF, VHF and UHF as time and band conditions permit. A special commemorative QSL card will be available. More is on QRZ.com under GB4TDF.

The actual Tour de France cycling event starts on the June 30th June and ends on July 22nd. (E-Mail)

**

DX

In DX, Bill Moore, NC1L, the ARRL Awards Branch Manager, tells Newsline that the 2011 TL8ES Central African Republic and the 2012 TT8ES expedition to Chad have both been approved for DXCC credit. Also approved has been the 2012 XW4XR operation from Laos. Card submissions for all of these operations are now welcome.

DL4ME will be active as 5H3ME from Tanzania between August 14th and September 3rd. His operation will be holiday style on the H-F bands from 80 through 6 meters using CW and the Digital modes. QSL via his home callsign.

AJ9C will be active as YN2CC from Granada, Nicaragua, between November 20th and the 28th. Operations will be on 160 through 6 meters using CW, SSB and RTTY. QSL electronically via Logbook of the World or direct to his home callsign.

LA0HF will be on the air as TY2BP from Benin for a minimum of 30 days and could be there for as long as 45. Activity will be on 20/15/10 meters. QSL via IK2IQD.

Lastly, VE2XB will be operational stroke FP from St. Pierre and Miquelon Islands from August 10th to the 20th. His activity will have a special focus on 6 meters, but he will also be active on all bands from 80 through 10 meters as well. QSL via VE2XB.

(Above from various DX news sources)
**

THAT FINAL ITEM: DEEP SPACE SUPER COMPUTER TO BE BUILT DOWN UNDER

And finally this week, a new super high speed data processing facility to look at signals received from deep space is slated to be built down-under. WIA newsman Graham Kemp, VK4BB, has the details:

--

One of the world's most powerful supercomputers is planned for Perth to process vast amounts of data being collected by radio telescopes in Western Australia's Murchison region.

WA Today said the supercomputer is to be housed in the Pawsey Centre being built in the southern Perth suburb of Kensington, near Curtin University.

The machines will initially process data from existing radio telescopes based at the Murchison Radio-astronomy Observatory but is free to expand for use in the international Square Kilometre Array project.

It was decided in May that Australia would share the $2 billion Square Kilometre Array project with South Africa.

3000 dishes and a discovery potential 10,000 times greater than the best contemporary instruments, the SKA will observe such things as what happened after the big bang and how galaxies evolved, and will attempt

to uncover more about the "dark matter" that fills the majority of the universe.

For the Amateur Radio Newsline I'm Graham Kemp, VK4BB, of the WIA News in Australia.

--

More on this project is on-line at tinyurl.com/vk-super-computer. (VK1WIA)

India activates ARES for fire

Posted: 28 Jun 2012 01:01 PM PDT
http://forums.qrz.com/showthread.php?351923-India-activates-ARES-for-fire&goto=newpost

India activates ARES for fire

Members of ARES were activated by the Thane Disaster Management Authority for communications at a fire at Mantralaya, India, in which two people died.

The blaze broke out on the fourth floor of the Mantralaya building which houses the state secretariat in south Mumbai on 22 June, also injuring 16 people.

The drama began with a call to Milind Korde VU2IZO requesting team members to assemble at Thane Emergency Operations Center (EOC).

Emergency communications were established between EOC and the fire by Milind Korde VU2IZO and Parin Gangar VU2PIC.

The following team members confirmed they were available at their home qth on standby with radio support were Jaiprakash VU2JPN, Satheesh Menon VU2WSM, Prahlad Bodke VU2TBV.

Rohit Purohit VU2TOO and Nitin Ainapure VU2CAN attended the Thane EOC and activated the Emergency Station on Mumbai and Matheran Repeaters.

The station was shut down after 10 hours when the fire was nearly extinguished.

Jim Linton VK3PC,

Chairman IARU Region 3 Disaster Communications Committee,

and

Jayant Bhide VU2JAU,

National Co-ordinator for Disaster Communications in India.

//
Radio Transmission Lives On:

Posted: 29 Jun 2012 03:48 AM PDT
http://www.eham.net/articles/28555

High-frequency radios were common in the 20th century, a primary communication device during the world wars as well as the Vietnam and Gulf wars. But cell phones and wireless Internet connections replaced them, and amateur radio enthusiasts began to believe their hobby was outdated -- until September 11, 2001. "The New York City Fire Department had a very elaborate communications system -- it covered the New York City area and then some," said Timothy Cregan, district emergency coordinator of the Nassau County Amateur Radio Emergency Service. "The problem is, the antenna was on top of [the World Trade Center's] Tower One, so when that came down, they lost everything." In the midst of a catastrophe, licensed amateur radio operators came to the rescue, and in the process discovered that their hobby would always be useful in times of emergency.

Ham Radio Operators Demo Emergency Communications:

Posted: 28 Jun 2012 02:09 PM PDT
http://www.eham.net/articles/28543

Anyone who has ever wanted to see what ham radio is all about has a chance June 23 and 24 when the Island County Amateur Radio Club pitches its tents

at South Whidbey Community Park to participate in a national emergency communications event. Ham radio buffs from throughout Whidbey Island will be among thousands nationwide operating shortwave radios at remote locations to practice their emergency communications capabilities during the annual field radio test. According to club President Alan Whitman, of Langley, an additional radio station will be set up to demonstrate to the public how shortwave radio communications work. They will also offer anyone interested the opportunity to talk across the nation on the radio. "We want to offer a hearty invitation to the public to come and see for themselves what this fascinating hobby offers to people and communities," Whitman said in a press release. "The communications networks that ham radio people can quickly create have saved many lives after natural disasters in the past several months when other systems failed or were overloaded," he added.

SARL NEWS - SUNDAY 01 JULY 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on "Amateur Radio Today" and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 MHz FM from Pretoria with relays on 7 066 and 3 695 kHz SSB. (Other news readers change to suit).

(PAUSE)

IN THE NEWS TODAY:

FIRST WORKED ALL SOUTH AFRICAN GRID SQUARES AWARD FOR 160 m AWARDED

AMATEURS ASSIST STRICKEN VESSEL

LEARN HOW DO YOUR OWN HF PREDICTIONS

You are listening to ZS6SRL. Stay tuned for more details on these items and other important and interesting items.

FIRST WORKED ALL SOUTH AFRICAN GRID SQUARES AWARD FOR 160 m AWARDED

The Sandton Amateur Radio Club is pleased to announce that the first certificate for contacts with 25 grid squares on 160 m has been awarded to Lukas Holtzhausen ZS6LH. Pierre ZS6BB (now ZS6A) still holds the record as the only person to achieve all 83 grids in South Africa, and no one has yet achieved this for a specific band. The aim of this award is to involve any licensed radio amateur in a fun activity to collect at least one contact from each of the four-character Maidenhead grid squares. South Africa is covered by 83 grid squares, and some of these can be worked from adjacent territories. The rules for the Worked All South African Grid Squares award can be found on the Sandton amateur radio club website at www.zs6stn.org.za.

AMATEURS ASSIST STRICKEN VESSEL

If all else fails there's always amateur radio. David Ogg, M0OGY, was in QSO with Ian, VK3MO, in Melbourne in Australia using the long path

at nearly 24 000 km. Later into the QSO he heard a Break station that turned out to be AI4FH, Maritime Mobile off the coast of Spain, who had lost his mast and sails in a massive storm. He asked for their assistance via amateur radio. David filmed the whole episode for YouTube and has posted the video. He says, 'It just goes to show in these modern times, when all else fails there is amateur radio'. You can find the audio on www.sarl.org.za, click on the Amateur Radio Today link.

LEARN HOW DO YOUR OWN HF PREDICTIONS

At the SARL Radio in Action symposiums you will learn how to do your own HF propagation predictions. Hannes Coetzee, ZS6BPZ, will talk about the In's and Out's of Ionospheric Propagation and demonstrate the VOACOP frequency prediction software and show delegates how to set it up on their home computers from the disk that will be supplied to all delegates at the RTA. The first RTA will be held in Durban at the University of Natal on Saturday 21 July. The event starts at 09:00 with registration from 08:30. The full programme is on the SARL web at www.sarl.org.za, select RTA. The RTA will come to Gauteng on 18 August. Port Elizabeth on 1 September and Cape Town on 29 September.

DXCC DESK APPROVES SEVEN OPERATIONS FOR CREDIT

In June, the DXCC approved seven operations for DXCC credit. On June 21, the 2012 TT8ES (Chad) operation, the XX9E (Macao) operation and the 2011 TL9EL (Central African Republic) were approved. On June 25, the 2012 XW4XR (Laos) operation was approved. On June 26, the 2010 J28RO (Djibouti) operation, the 2011 J25DXA (Djibouti) operation and the 2012 5X1RO (Uganda) operation have been approved. "If you had cards that were recently rejected for these operations, please send an e-mail to the ARRL DXCC Desk, "Moore said. "Please note that due to extremely heavy e-mail, DXCC staff may not respond to your message. Once your record is updated, results will appear in Logbook of The World (LoTW) accounts or in the live, daily DXCC Standings. Due to a backup on DXCC e-mail, DXCC staff will make the corrections to accounts, but may not respond directly to messages about this." Moore noted that the J28RO and 5X1RO logs have been uploaded to LoTW.

OPERATE IN THE IARU HF CHAMPIONSHIP FROM THE NARC

The International Amateur Radio Union sponsored High Frequency World Championship 2012 will take place beginning 12:00 UTC on Saturday July 14th and ending 12:00 UTC on Sunday July 15th. The objective of this contest is to contact as many other amateurs, especially IARU member society Headquarters stations, around the world as possible. This, using the 160, 80, 40, 20, 15 and 10 metre bands.

The SARL would like to put its station at the NARC on the air and is looking for volunteers to man the station for the full period. This would be a great opportunity for experienced contesters to show newcomers how much fun contesting is. If you are interested, drop a

line to contest@sarl.org.za this week and you will be contacted.

THE SARL DX RECORD TABLE FOR VHF, UHF & MICROWAVES TO BE UPDATED

The current SARL DX record table for VHF, UHF and Microwaves will be updated after 30 June 2012. All VHF amateurs throughout the country are invited to submit their record claims for 50, 70, 144, 432, 1 296 and 2 300 MHz or any microwave records that they may have made during the past year or earlier. To find out whether you qualify for a record check the 2011 record table by clicking on General Info on the homepage of the SARL, followed by Local information and then VHF, UHF, SHF, EHF SA records. The top five records of each category are listed. You can post your claims on the VHF forums, or ZSVHF mailman list or e-mail it to mcbosch@webafrica.org.za.

DO YOU NEED A CONTACT IN KG 10?

Dennis, ZS4BS, will be traveling to the Northern Cape on 6 to 8 July and spend most of the time in KG10. Dennis will be active on 40 and 30 metres while mobile and when at his base will be able to work on 80 metres as well.

If you need KG10, contact Dennis at zs4bs@iaru-r1.org to arrange a sked.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the week's expected Solar activity will be at moderate levels. Sunspots 1 512 and 1 513 harbours enough energy for M-class flares.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 47.

All the bands from 20 to 10 m will provide lots of DX fun with 20 m providing the best openings with 15 m not far behind. 10 m openings will be much less frequent due to the lower solar activity and then mostly on east-west paths.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

6/8 July - Dennis, ZS4BS, operating mobile in KG10, contact him per email to zs4bs@iaru-r1.org to arrange a sked if you need this grid square. 14/15 July - The IARU HF Championship on all the bands. Rules are available at tinyurl.com/iaru-hf-championship. If you wish to operate the station from the NARC, send email immediately to contest@sarl.org.za. 21 July - The first Radio Technology in Action (RTA) of 2012 in Durban at the University of KwaZulu-Natal. The full programme will be available on www.sarl.org.za early next week.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items -

if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by Dick, ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George Honiball, ZS6NE.

Thank you for listening. 73.

/EX

Police Explorers Begin Amateur Radio Classes:

Posted: 30 Jun 2012 03:16 AM PDT
http://www.eham.net/articles/28562

When four young members of the Pacific Police Explorers Club signed up to take classes for the amateur radio federal license exam, Keith Wilson, Franklin County deputy emergency management director, said it was it was a good day for amateur radio. Even though the classes, sponsored by the Eureka Fire Protection District and held in the district training center on Route 66, was filled with professionals in the emergency field, Wilson said the interest of the young people is vital to the future of amateur radio. "With cellphones, Facebook or Twitter, today's young people can communicate with their friends immediately. It would be understandable if they think amateur radio is out of date," Wilson said. "But in every major disaster, such as hurricanes, tornados or terrorist attacks, ham radio is the last communication standing. "Young people are crucial to the future of ham radio," he added. "In order to keep the amateur bands assigned by the FCC we must use them before they are gobbled up by others wanting to use the radio waves." Jill Pigg, Pacific Explorers sponsor, who also is taking the class to become a ham, said a federal amateur radio license will be an asset to the young Explorers. "The premise of the Explorers club is that they might want to pursue a career in law enforcement," Pigg said. "Whether or not they go in that direction, being a ham is a great discipline for them."

//
How About Some Wideband HF Radio?

Posted: 30 Jun 2012 03:14 AM PDT
http://www.eham.net/articles/28561

This is a bit that goes back to my halcyon days as a Marine radio operator. The single sideband radio, first proven by ham radio operators after World War II and then adopted as a global communications system by the now defunct Strategic Air Command in 1957, has great staying power. The Air Force operates a successor to that 1957 network known as the High Frequency Global Communications System, with 13 stations scattered around the world that provide global coverage to a wide range of military users, including Air Force One.

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

Amazon Power Failure knocks out QRZ for 12 hours

Posted: 30 Jun 2012 10:55 AM PDT
http://forums.qrz.com/showthread.php?352099-Amazon-Power-Failure-knocks-out-QRZ-for-12-hours&goto=newpost

A massive power failure in Northern Virginia, associated with violent summer storms, caused the Amazon Cloud to hiccup, throwing thousands of systems offline for an extended period. Hundreds of systems were affected, including QRZ.

This outage did not affect our servers but did cause a complete database failure. After waiting all night for Amazon to restore our data, we took the bold step this morning to restore from an automated backup. At this point in time we're not sure what data was lost, if any, but there is a possibility that some material may have been dropped.

To the best of our knowledge, the our callsign database did not lose any data. Candidates for data loss include parts of our Forums, however this has not been confirmed.

We appreciate your patience as this has been a nerve wracking 12 hours, and a sleepless night here at QRZ HQ.

SWL'S CAN ALSO RECEIVE QSL'S FOR THIS EVENT BUT THEY MUST FIRST CONTACT ME AFTER THIS WEEKEND WITH DETAILS OF TIMES, FREQUENCY AND MODE USED SO I CAN CONFIRM FIRST BEFORE I WILL SEND ANY SWL QSL.

MY EMAIL ADDRESS IS AS FOLLOWS: rgilmore1@hotmail.co.uk

QSL CARG LIGHTHOUSE.jpg

The Chaine Memorial Tower is a memorial to James Chaine, a former Member of Parliament for Larne, County Antrim. It is a cylindrical stone tower lighthouse with a conical roof, situated on the west side of entrance to Larne Lough

The tower at sunrise from Sandy Bay.Chaine developed Larne's short sea route to Scotland as well as establishing the town as a transatlantic port. The memorial, built in 1888, is a replica of an Irish Round Tower. The memorial is situated at the mouth of Larne harbour in Northern Ireland, and reached via Chaine Memorial Road. There is access from Curran Road via Bay Road.

The plaque which adorns the memorial is now difficult to read. It reads that the monument was erected by the...

"....contributions of every class in this mixed community irrespective of creed or party, all cordially united in esteem and affection for the Memory of JAMES CHAINE of Ballycraigy and Cairncastle Co. Antrim who represented this County in the Imperial Parliament of Great Britain and Ireland from February 1874 till 4 May 1885 when his early and lamented death in his 44th year of his age deprived his native County of one who had worked indefatigably for its interests especially in developing and improving the natural capabilities of the harbour of Larne and establishing its connection with Great Britain, the United States of America and with the inland parts of this County."

On 1 July 1899, an oil powered navigational light was installed 22 metres up the tower (The tower being a total of 28 metres in height). The light was installed to aid the navigation of the Hunter Rock, a submerged rock

approx 5 miles off shore.

The light was converted to coal gas in 1905, before finally being converted to electric in the latter part of 1935. During April 1948 the supply was changed from DC to AC.

Maintaining the Light now falls under the remit of the attending keeper at Ferris Point Lighthouse on the other side of the Harbour.

WE AT C.A.R.G (CARRICKFERGUS AMATEUR RADIO GROUP) REALLY HOPE TO HEAR YOUS ALL ON THE AIR THIS WEEKEND AND HOPE WE CAN MAKE THE CONTACT, WE WILL HAVE A FEW STATIONS RUNNING, USING DIFFERENT MODES AND MOST BANDS SO YOU CAN EXPECT TO FIND US ALMOST ANYWHERE IN THE SPECTRUM HI HI, THE SET UP WILL PROBABLY BE BASIC AS IT GETS AND POWER WILL PROBABLY NOT EXCEED 100WATTS, BUT WE DONT NEED ANYMORE THAN THIS AS LAST YEAR WE WORKED ACROSS THE WHOLE WORLD INCLUDING NEWZEALAND, THIS CONTACT IS PROBABLY THE FURTHEST DISTANCE AWAY FROM US HERE IN OUR SMALL COUNTRY THAN ANYWHERE ELSE!!

QRZ 1.jpg

THE ABOVE IS A PICTURE OF LASTYEARS BASIC SETUP!! IT INCLUDE THE TENT HI HI, RIGS: KENWOOD TS870S, TS450, YAESU FT857D, ICOM 7400, ANTENNAS WHERE AN END FED (TOP BAND), G5RV, GP, SNOWDONIA, IMAX, AND ANYTHING ELSE WE FELT LIKE PUTTING UP, SOMONE EVEN SUGESSTED WE TRY HOOKING UP A LARGE TREE HI HI TO SEE IF WE COULD GET IT TO TRANSMIT!!!! HA HA HA.

SO ALL I CAN SAY NOW IS 73'S TO ALL, AND WE REALLY HOPE TO HEAR YOUS ALL SOON.

BEST REGARDS, RICHARD "2I0RWG, GN0LIX/P

P.S ANY QUESTIONS OR COMMENTS PLEASE FEEL FREE TO GET IN TOUCH!! BUT I JUST THOUGHT I WOULD LET YOUS KNOW EARLY THIS YEAR SO YOUS CAN ALL GET THE DATE IN YOUR CALENDER AND GET YOUR EARS ON HI HI..

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 1st July 2012

HF News Readers Needed

Additional HF newsreaders are required to cover the 40 & 80M news broadcasts over the summer months due to holidays etc. Any members that wish to join the panel and are available to read the HF news would be most welcome. Please send an email to info /at/ irts.e

---

Short Wave Listeners

Short Wave Listener members will have seen the item on Page 4 of the current issue of Echo Ireland about call book entries. SWLs who want to be included in published listings are asked to email Joe Ryan EI7GY, the Membership Records Officer, at memrecords /at/ irts.ie

---

2012 IARU HF World Championship

The 2012 IARU HF World Championships will take place during the second full weekend of July, beginning at 12:00 UTC on Saturday 14 July and ending at 12:00 UTC on Sunday 15 July 2012.

The objective of this contest is to contact as many other amateurs, especially IARU Member Society HQ stations, around the world as possible using the 160, 80, 40, 20, 15 and 10 metre bands using phone and/or CW.

All IARU Region 1 Member Societies are invited to actively participate with their official stations and to encourage their members to also participate.

We need to have a station on all the contest bands both CW and SSB which makes a total of 12 stations. If you are interested in helping with your station or as an operator please contact Thos EI2JD through email at thoscaffrey /at/ hotmail.com or by phone to 0872953256. As we are celebrating the 80th Anniversary of the IRTS we will be using the special callsign EI80IRTS.

The rules for the 2012 contest are available on http://bit.ly/9droX1

Death of Dick Baldwin W1RU

The death has been reported of Dick Baldwin W1RU former General Manager of ARRL from 1975-1982 and former President of IARU International for seventeen years from 1982-1999. As ARRL Assistant General Manager Dick was primarily responsible for initiating preparations for WARC 79 and was a key player in turning the objective of obtaining three new bands at 10, 18 and 24 MHz into a reality. On his retirement from IARU in 1999 he was named President Emeritus by the Administrative Council. May he rest in peace.

North Cork Radio Group

The North Cork Radio Group is happy to announce that their next event is on Sunday 8th July. The NCRG will activate Seefin Mountain. Using the EI1NC/P call-sign; we hope to either see or work many of you!

DX News

Andy AB7FS will be active from the South Cook Islands until 25 August. His callsign will be E51AND. His QTH of Rarotonga counts as OC-013 for the Islands on the Air Award. QSL to his home call.

A large group of Indonesian operators will travel to the island of Kaliage Besar to operate as YE0M from 6 - 9 July. IOTA reference is OC-177 and QSL Manager is YB1GJS.

DXers will remember that Vlad UA4WHX activated a good number of African countries between 2005 and 2007. More recently he has been worked in Egypt as SU9VB, in Palestine as E40VB and in Bosnia-Herzegovina as E7/UA4WHX. At the time of writing he is now on the air from Montenegro as 4O7VB. His length of stay there is unknown. QSLs go via his home call.

A special event station, TM0TSR, will operate from Saint-Malo, France in connection with this year's Tall Ships Race. They will be QRV from 2 - 8 July and the QSL info is via F4FJH.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

1A, SOVEREIGN MILITARY ORDER OF MALTA (Reminder). By the time you read this, an international team of 13 operators will be active as 1A0C between July 1-4th. Activity will be on 80-6 meters using CW, SSB and RTTY. Special attention will be paid to non-European stations (especially

from the U.S. and Japan). QSL via OQRS or LoTW. Please carefully read,
the following URL page about the QSL Policy at:
http://www.1a0c.com/qsl-information
For more details and updates, see: http://www.1a0c.com

5C13, MOROCCO. Look for Moroccan amateur radio operators to use the
special prefix 5C13 between July 1-27th. Activity is in celebration
of the 13th anniversary of the crowning of Mohammed VI King of Morocco.
Stations heard as of print time: 5C13IG, 5C13KD, 5C13NK, 5C13SG and
5C13YZ.

9Y, TRINIDAD AND TOBAGO. Members of the Trinidad And Tobago Amateur
Radio Society will be active as 9Y4HQ during the IARU HF World Champion-
ships (July 14-15th). Activity will be on all HF bands using CW and
SSB. QSL ONLY via DF2RG, direct or by the Bureau.

C9, MOZAMBIQUE. Ivor, ZS1WY, is currently active as C91IW and is expected
to be there over the next year. However, Ivor is there working in Mo-
zambique, and operations may be limted. QSNs show he was on 160 meters.
QSL via ZS1WY.

CY9, ST. PAUL ISLAND (Update). The CY9M Team announced this past week,
[edited] "CY9M are delighted to welcome Bill, N2WB, to this exciting
expedition. Bill has a wealth of DXpeditioning experience visiting and
operating from some of the rarest places on Earth. Welcome aboard Wild
Bill!" The following media pages are available for this operation at:
Website: http://www.cy9m.com/
Twitter: https://twitter.com/#!/CY9M
Facebook: http://www.facebook.com/CY9M.2012

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that
the following operations are approved for DXCC credit:
3C0E - Annobon; 2012 Operation
3C6A • Equatorial Guinea; 2012 Operation
5X1RO • Uganda; 2012 Operation; **
J25DXA • Djibouti; 2011 Operation
J28RO - Djibouti; 2010 Operation **
XW4XR • Laos; 2012 Operation

** - Indicates logs have been uploaded to LoTW.
If you've had any of these operations rejected in a recent submission
please send an E-mail to <bmoore@arrl.org> to be put on the list for an
update.

DXPEDITION AWARDS FROM FRIEDRICHSHAFEN.....
* At last weekend's Friedrichshafen Convention, the German DX Foundation
announced at their DX forums that the 2011 "DXpedition of the Year"
went to the VP8ORK South Orkney DXpedition.

* Tevfik, TA1HZ, who was active as ZA1TC, received the WAEDC 2011 Hero
Award in Friedrichshafen, Germany.

DXPEDITION VIDEOS OF THE WEEK (New Feature). With more and more DXpeditions putting their videos on YouTube and other Web services, we decided to list them (possibly) each week. For this week's listings:
1976 - 7J1RL Okino Torishima Island -
English Ver. - http://www.youtube.com/watch?v=NABeU-hVk
JA Version - http://www.youtube.com/watch?v=mxQ8IfsuY#!

1997 - BS7H Scarborough Reef - http://www.youtube.com/watch?v=0WgagQIxM
2004 - ZK3SB Tokelau Island - http://www.youtube.com/watch?v=owLbRn94E
2008 - YJ8TZ Vanuatu DXpedition -
http://www.youtube.com/watch?v=eQd0Lkdq0
2010 - 3B8/IZ4AKS and 3B9/IZ4AKS; Mauritius & Rodrigues Islands Micro-DXpedition - http://www.youtube.com/watch?v=MCCZu_V3Y
2011 - YJ0VK Vanuatu DXpedition -
http://www.youtube.com/watch?v=xBOaGq37M

If you have a DXpedition video available on the Web and would like to have it listed in the OPDX, PLEASE send the URL to use and we will publish it.

EA6, BALEARIC ISLANDS. Flavio, IW2NEF, will be active again as EA6/IW2NEF from Mallorca Island (EU-004) between June 16-27th. Activity will be on the HF bands, 6 meters and 2 meters. QSL via his home callsign.

EI & GI, IRELAND AND NORTHERN IRELAND. Dave, WJ2O, is expected to tour both Ireland and Northern Ireland as EI/WJ2O/m and GI/WJ2O/m, respectively, between July 8-19th. His schedule is as follows:
Ireland - July 8-15th and 19th
N. Ireland - July 16-18th
Activity will be on the HF bands, and he plans as to be in the IARU HF World Championships (July 14-15th) as a Single-Op/Mixed-Mode from Ireland. QSL direct to his home callsign (see QRZ.com). For more information, see his Web site at: http://wj2o.com

FP/TO2, ST. PIERRE AND MIQUELON. Operators Yuri/VE3DZ and Victor/VA2WDQ/VA2WA will be active as FP/VE3DZ and FP/VA2WA from Miquelon (NA-032) between July 20-31st. Activity will be on 160-6 meters using CW, SSB and RTTY. Look for them to use the special callsign TO2U for the CQWW VHF (July 21-22nd) and the RSGB IOTA Contest (July 28-29th). Suggested frequencies are:
CW - 1824, 3524, 7024, 10114, 14024, 18074, 21024, 24894 and 28024 kHz
SSB - 3790, 7060/7140, 14240, 18140, 21240, 24940 and 28440 kHz
RTTY - 7041, 10142, 14084, 18104, 21084, 24914 and 28080 kHz
6m - 50.104/CW and 50.115/SSB

QSL cards will be available after the DXpedition via OQRS, by the Bureau or direct by using the PayPal system. For more details and updates, visit: http://www.to2u.contestgroupduquebec.com

HD081, ECUADOR. Members of the Quito Radio Club (HC1QRC) will be active as HD081QRC (Hotel Delta Zero Eighty One) between July 14-22nd. Activity

will be on all bands, CW and SSB. The operation is to commemorate the founding of the Quito Radio Club 81 years ago. Equipment will include both modern and some beautifully restored vintage radios by Gustavo, HC1BG. QSL via HC1JQ, direct or by the Bureau.

HG, HUNGARY (WFF Op). The members of the Regional Radio Sport Club Puspokladany and quest operators will activate the rare Hevesi Fuves Pusztak Nature Reserve (HAFF-020) between July 13-16th. Operators mentioned are Zoli/HA0DX (Organizer), Viktor/HG0NAZ, Pista/HA0KA and Imi/HA0BW. Activity will be on all HF bands using CW, SSB and the Digital modes, with up to 4 stations depending on the local situation. QSL via the HA QSL Bureau (via HA0HW).

IOTA NEWS.....
AS-074. Ian, 9M2FB, will be active from Pulau Ketam during the RSGB IOTA Contest (July 28-29th) as a Single-Op/24HR/CW-Mode/Dx-pedition entry. QSL via his home callsign direct (see QRZ.com).

EU-014. Peter, ON8VP, will be active as TK/ON8VP from Corsica (DIFM TK-001, MIA MCO-001, WLOTA 1390) between July 1-6th. Activity will be holiday style. QSL via his home callsign, the Bureau is preferred.

EU-015. The special event station SX9S will be active from Crete between July 1st and December 31st. This marks the 50th anniversary of the national park "Samaria Gorge" (SVFF-011). QSL via SV9AUE, by the Bureau or direct.

EU-075. Nikiforos, SV1EEX, will be active as SV1EEX/8 from Hydra Island until the middle of July. Activity will be on 40-6 meters using CW, SSB and PSK. QSL via his home callsign (see details on QRZ.com).

NA-067. Jon, WB8YJF, will be active as WB8YJF/4 from Ocracoke Island (USI NC-001S) between July 22-29th. Activity will include the RSGB IOTA Contest (July 28-29th). Operations will be on 80-10 meters using CW, RTTY, and SSB. QSL via his home callsign, direct (for a FAST reply) or by the Bureau.

NA-126. Operators Kevin/VE9MY and Linda/VE9GLF will be active from John's Island (CISA NS-127) before, during and after the RSGB IOTA Contest (July 28-29th). Both callsigns will be used as a Single-Op/Low-Power entries. QSL both callsigns via VE9MY (see QRZ.com), LoTW, direct or by the Bureau (prefered - E-mail requests are accepted). Visit: http://qsl.net/ve9my

ISWL CALLSIGNS (For July/August/Sepember). The following ISWL club callsigns will be used throughout the month of June/August/Sepember:

Look for G4BJC and M1SWL to be used by several ISWL members in July, August and September, to mark the Olympic Games 2012 in the U.K.

The operators and dates for both club callsigns are as follows:

G4BJC:
July 1-20th - GX4BJC - Arthur G-20358 / G0KOC - WAB: TQ62
July 21-27th - GO4BJC/A - John G-20579 / M0HEM - WAB: TQ48
July 28th-August 3rd - GO4BJC/A - Mike G-11331 / M0SMJ - WAB: SS20
August 4-10th - GO4BJC/A - Walt G-8343 / G3NYY - WAB: SO93
August 11-17th - GO4BJC/A - John G-11570 / G8XTJ - WAB: SP80
August 18-24th - GO4BJC/A - Peter G-20322 / G4VFG - WAB: SX65
August 25-31st - GO4BJC/A - Herbie G-20006 / G6XOU - WAB: TM22
September 1-7th - GO4BJC/A - Geof G-20665 / M0BAU - WAB: SJ37
September 8-9th - GO4BJC - Arthur G-20358 / G0KOC - WAB: TQ62
September 10-30th - to be notified

M1SWL:
July 1-20th - MX1SWL/A - Tom G-7964 / G3RPV - WAB: TL27
July 21-27th - MO1SWL/A - John G-11570 / G8XTJ - WAB: SP80
July 28th-August 3rd - MO1SWL/A - Peter G-20322 / G4VFG - WAB: SX65
August 4-10th - MO1SWL/A - Geof G-20665 / M0BAU - WAB: SJ37
August 11-17th - MO1SWL/A - Tony G-10476 / G4ZIB - WAB: SO87
August 18-24th - MO1SWL/A - Mike G-11331 / M0SMJ - WAB: SS20
August 25-31st - MO1SWL/A - Walt G-8343 / G3NYY - WAB: SO93
September 1-7th - MO1SWL/A - John G-20579 / M0HEM - WAB: TQ48
September 8-9th - MO1SWL/A - Herbie G-20006 / G6XOU - WAB: TM22
September 10-30th - MX1SWL/A - Tom G-796 4 / G3RPV - WAB: TL27

ALL QSLs will be handled by Herbie, G6XOU, and NOT the individual operators.

For more information, see <http://www.iswl.org.uk> or QRZ.com and eQSL.cc. NO LoTW.

K2, UNITED STATES (Update - Special Notice!!). The 4th annual "Original 13 Colonies - Independence Week - Special Event", has begun as of June 30th (OPDX.1067 for details). However, due to the effects of the severe storms in the Midwest and Northeast resulting in loss of power to many areas and the lack of propagation, the Special Event is being extended until midnight (0400Z) on Saturday 7 July (Sunday Zulu). Note that, due to other commitments, all colony operators may not be on the air at all times during that time period. They will do the best they can to help you get your contacts. PLEASE BE PATIENT! A SPOTTER's PAGE is available at: http://www.cwfun.org/funspots/us13

KH8, AMERICAN SAMOA (Reminder). By the time you read this, members of the Russian Robinson Club (RRC), Yuri/N3QQ and Dick/N7RO will be active from American Samoa until July 3rd. They are currently active as KH8PPG, but may sign KH8RRC, depending on how fast the FCC acts on their vanity callsign application from Pago Pago. Activity will be on 40-10 meters using CW, SSB and RTTY, with two stations on the air - one operating 100 watss and the other with 600 watts. Yuri tells OPDX that they "Plan to stay at hotel near the beach, and have a RTTY station ready to go, all tested/packed." QSL via N7RO. While there, they will install a UHF repeater system for the StarKist tuna plant, and also talk with the U.S. Fish & Wildlife Service (FWS), as well as boat owners about a potential expedition in the future to Rose Atoll (OC-190); possibly during this winter (no dates yet).

KH9, WAKE ISLAND. Paul, N6PSE, reported on eHam.net that the Intrepid DX Group "has just received a letter from the USAF denying our request to do a DXpedition from Wake Island". The group submitted a request two years ago and then "recently sent a follow up letter". Paul also states [edited], "I had E-mailed WA2YUN when I learned he was working on Wake. This was well after we had sent our proposal to the DoD. Now that the Colonel responsible for the base has denied our request, we will focus on other rare entities."

KH0, MARIANA ISLANDS. Hiro, JL1RXW, is now active as KH0XG from Tinian Island (OC-086) until July 3rd. Activity will be on the HF bands SSB only. QSNs show he is 40 and 15 meters. QSL via his home callsign ONLY, direct or by the Bureau. Don't send to the KH0 Bureau or TINIAN direct.

KH0, MARIANA ISLANDS. Kirk, WE8A, will be active as WE8A/KH0 from Saipan (OC-086) between Thursday, July 26th, and Sunday, July 29th. Activity will be on 80-6 meters, but with a focus on 30/17/12 meters using CW and SSB. Suggested operating frequencies on the 30/17/12 meter bands will be (+/- QRM): CW - 10106, 18071 and 24901 kHz
SSB - 18136 and 24936 kHz
QSL ONLY direct to: 5-1-35, Daikaidori, Kobe, 652-0803 JAPAN. Please do not send to the U.S. Bureau or JA Bureau. For more details and updates, go to: http://blog.zaq.ne.jp/kirc/category/5

PC100, THE NETHERLANDS (Special Event). Look for special event station PC100NOM to be active between July 2-29th. Activity is to promote the 100th anniversary of The Netherlands Open Air Museum in Arnhem. The operator is Fred, PA0FAW, and he will be operating on CW, SSB and PSK, ..etc. Fred's reference numbers are DIG1487, ISWL PA-11092 and WAB-11722. QSL via PA0FAW, direct, by the Bureau or eQSL. No LoTW, SWLs are welcome.

PQ7/PW7, BRAZIL. Look for special event stations, PW7FD (SSB & Digital) and PQ7FD (CW), to be active between July 1-30th, in honor of the Brazilian Firefighters. Activity will be on 40, 20, 17, 15 and 10 meters. QSL

Manager is PS7AB (qrz.com), direct (SASE w/1 USD), or by the Bureau
(QSLs from SWLs are welcome) or LoTW. For more information, see:
http://www.ps7ab.com.br/pq7fd.htm

PT0, ST. PETER AND ST. PAUL ROCKS. A report on QRZ.com, states that a
special event station, "PT0S is a DXpedition to St. Peter and St. Paul
Archipelago in the Nov/Dec 2012 time frame. " A suggested URL (which
seems to not be active yet) will be at: http://www.pt0s.com

Special event station 5P12EU has gone QRT on June 30th, at 2200z. The
operators were very active the last two days to give the opportunity
to have QSOs on as many bands as possible since an award is obtainable
for QSO on 3 bands (Bronze), 5 bands (Silver) and 7 bands (Gold). The
pdf-version of the award is free of charge. Details on QSLing and the
Online QSL Request Service can be found here:
http://logsearch-oz0j.oz0j.dk/5p12eu.asp
DIRECT QSLS CARD WITH INSUFFICIENT PAYMENT WILL BE RETURNED VIA BUREAU.
Logs will be uploaded or are now on LoTW. Details and rules for the
award are available at:
http://dl.dropbox.com/u/2651703/5p12euAWARD.pdf
http://www.oz5bd.dk/5p12eu/viewpage.php?page_id=
Freddy, F5IRO, reports that all his logs for J28RO, J25DXA and 5X1RO,
have been uploaded to LoTW.

QSL TC6BLH via TA1HZ, direct or by the Bureau. Members of the TC Special
Wireless Activity Team (TCSWAT) and the Giresun Radio Amateurs and
Nature Sports Club (GITRAD) activated the Boztepe Lighthouse, Sinop
(built in 1863), this past weekend. This was the first activation of
this lighthouse. For information on the "Western Black Sea Lighthouses
On The Air", visit: http://www.tcswat.org/awards/WEBLOTA/index.html

QSL RECEIVED VIA LoTW: 5P12EU, 6O0CW, A65EE, C6ANM, CM5FZ, CP1FF,
E7DX, EA8/RW3DO, ER1MM, G3VMW, G4BUE, HK3TU, IZ0SPA, JH2UVL, K8MM,

PA1T, PY4XX, RA2FT, RN1ON, RN6AJ, RZ3QZ, SK5A, SP1RKR, SQ9NKW, SV5/G0TSM,

TK5JJ, UA0BA, UT5EO, UT5UKY, VA5LF, VE1CHL, VE5MX, VK4CT, W7RTL, WI6I, WR5U, XF4DL, YO2CZW, YO3FRI and Z21BB

QSLS RECEIVED VIA MAIL: 3A2LF, 4Z5MU, 4W0VB, 9K2YM, 9M2AX, 9Q6AL, 9Y4LAS, BY8AC, CT1BWQ, CU3AK, DL1BI, EA9EU, EK6TA, EK7DX, ES1TU, ES3AX, EY7AD, FW0NAR, GQ7VJR, HK0NA, HK1NA, KH6/VE7AHA, MM0XAU, PJ5/SO6X, PJ5/SP6IXF, SU9VB, SV5BYR/5, T30D, UA0BA, V26E, V31IZ, YB8Y, YJ0VK, YV1FPT, ZK2C and ZL2MS

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

ST2AR QRT. Robert, ST2AR, reports on QRZ.com that he is off the air! He states, "After 2 years, 7 months and 138,000 QSOs the switch has been finally pulled. Last QSO was made on the 9th of June on 24-CW. As I write, I'm on the way to Italy where Rome is my new duty station for the next 5-6 years. See you also from some of the beautiful Italian islands. Thanks to Ralph, K2PF, all ST2AR contacts are now uploaded to LoTW. I will work on the eQSL log after returning home during the summer."

TO2, ST. BARTHELEMY. Operators Ludovic/HB9EOU and Andre/HB9CVC will be active as TO2D from St. Barthelemy Island (NA-146) between July 22nd and August 4th. Activity will be on 40-6 meters using SSB and RTTY. Suggested frequencies are:
SSB - 7058/7180, 14195/14269, 18145, 21295, 24945 and 28495 kHz
RTTY - 7035, 10140, 14080, 18100, 21080, 24920 and 28080 kHz
6m - 50118 kHz
QSL via HB9EOU. For more details and udates, visit:
http://st-barth.hb9eme.ch

TM70, FRANCE (Special Event). Operators Philippe/F5SKW, Dimitri/F5SWB, Freddy/F5IRO/J28RO, David/F8CRS, Yves-Michel/F5PRU, and possibly some other hams and French Servicemen will be active as TM70TRS or TM70TE from the 3rd floor of the Eiffel Tower, approximate 300 meters above the ground, between July 12-15th. Activity is to commemorate the 70th anni-versary of the French Army Signal Corps. Activity will be on CW, SSB and RTTY, and on the HF and VHF (JN18du) bands. Operations will be 24 hours each day. A special QSL card will be available. QSL via the F6KHX ARC or F5OGL, direct or by the REF QSL Bureau.

TT8, CHAD. Phil, F4EGS, will once again be active as TT8PK from N'djamena, until August 6th. Activity will be limited due to his work schedule and spare time. Operations last time were on 40-10 meters using CW, SSB and some RTTY. QSL via F4EGS, by the Bureau or direct (see QRZ.com for details).

VY0, CANADA (Update). Rob, KC0VEU, is now active with his new callsign AD0AX/VY0 from Eureka, Ellesmere Island, in the Nunavut Territory (NA-008, Grid Loc. EQ79ax) until July 5th. He is there on official business. Some-time during his stay, and weather permitting, he will attempt to operate from the PEARL facility 15km away which is located at 80'N - 86'25'W, and
therefore in the rare ER grid (ER60) for those who chase the CQ Grid Fields

award and the rare ITU Zone 75. PEARL (the Polar Environment Atmospheric Research Laboratory) is also a separate base for the Arctic Challenge <www.french-polar-team.fr>. This is Rob's fifth time on Ellesmere. QSL direct or by the Bureau to his home callsign.

XR, CHILE. Members of the Radio Club of Chile will be active as XR3HQ from the Chile HQ station in the IARU HF World Championships (July 14-15th). QSL via the Bureau.

Ham Radio Operators Help at Race:

Posted: 30 Jun 2012 05:08 PM PDT
http://www.eham.net/articles/28568

For the inaugural Race for the Heart, planners Phil Hartley and Wisconsin Rapids Police Chief Heuer asked the Amateur Radio Emergency Service, or ARES, team to help with communications. ARES members were asked to relay important information from runners and runner location back to the command center. Members also assisted participants in case of an emergency. During the event, ARES members were stationed at every point where a participant could run off course and get lost. Hams assisted race organizers with keeping water stations well stocked and worked with the Wisconsin Rapids Police Department to keep participants safe.

GB2RS NEWS

Sunday 1st July 2012

The news headlines:

Amateurs assist stricken vessel

German amateurs honour RSGB past president

Very special callsign for RSGB IARU Contest Team

If all else fails there's always amateur radio. David Ogg, M0OGY, was holding a QSO with Ian, VK3MO in Melbourne in Australia using the long path at nearly 24,000km. Later into the QSO he heard a Break station that turned out to be AI4FH, Maritime Mobile off the coast of Spain, who had lost his mast and sails in a massive storm. He asked for their assistance via amateur radio. David filmed the whole episode for YouTube and has posted the video. He says, `it just goes to show in these modern times, when all else fails there is amateur radio'. You can find the video on YouTube by searching on M0OGY and looking for the QSO with Ian, VK3MO.

At a DARC hosted dinner in Friedrichshafen, DARC Chairman Steffen, DL7ATE awarded RSGB Past President Colin Thomas, G3PSM the DARC Golden Badge of Honour. Colin received this award for his achievements as CEPT coordinator for WRC-12 Agenda Item 1.23.

The RSGB team for the forthcoming IARU contest on 14 and 15 July has obtained the special callsign GO2HQ for use in this Olympics year. This is in advance of the general validity of O prefix NoVs, which commence at 0000BST on 21 July. &#65533;

Martin Harrison, G3USF has produced a number of shorter 6 and 10 reports in order to catch up and produce a more current report. These reports are based on the data submitted by Costas, SV1DH and the intention is to update these short form reports when the full set of data is available. The reports are available at http://g7kse.co.uk/6and10 and, as always, any comments or suggestions are welcome.

A celebration of the world's first telecommunications satellite will take place on 7 July. This is when the Radio Adventurers of Maine activate the callsign W1A to commemorate the first messages through Telstar. They will be operating on site at the Andover, Maine satellite facility, the original earth station that uplinked the first messages via Telstar on 10 July 1962. The club's commemorative operation will

begin at 1300UTC on both 40 and 20m phone. Other bands will be added as propagation allows. QSL as directed on the air.

In June, the DXCC approved seven operations for DXCC credit. These are the 2012 TT8ES Chad operation, XX9E Macao, 2011 TL9EL DXpedition to the Central African Republic, the 2012 XW4XR Laos operation, the 2010 J28RO and 2011 J25 DXA Djibouti DXpeditions plus the 2012 5X1RO Uganda operation. If you had cards that were recently rejected for these operations, please send an e-mail to the ARRL DXCC Desk. Once your record is updated, results will appear in Logbook of the World accounts or in the live, daily DXCC Standings.

And now for the details of rallies and events for the coming week

Today, Sunday 1 July, sees the Barford Norfolk Radio Rally at Barford Village Hall & Green, Barford, Norwich NR9 4AB. The location is 9 miles southwest of Norwich, close to the A11 and A47. There is talk-in on S22, car parking, and the gates open at 9am. Admission is ?1.50, with children free. There will be a car boot sale, Bring & Buy, trade stands and a prize draw. Refreshments are available, as are disabled facilities. Contact radio@dcpmicro.com for more information.

Also today is the East Suffolk Wireless Revival, also known as the Ipswich Radio Rally. It takes place at The Orwell Crossing Lorry Park, A14 Eastbound, Nacton, Ipswich, IP10 0DD. There is talk-in on S22, car parking, and the gates open at 9.30am. Admission is ?1, and you'll find a car boot sale, Bring & Buy, special interest groups, an RSGB book stall, trade stands and more. Contact Steve, M1ACB, on 07711 329 624.

The final event for today, Sunday 1 July, is the 16th Red Rose QRP Festival at Formby Hall, Alder Street, Atherton, Manchester M46 9EY. There's free car parking, disabled facilities, trade stands, special interest groups, a Bring & Buy, catering and a licensed bar. Admission is ?2, with under-14s free. Details from Les Jackson, G4HZJ, on 01942 870 634.

Next weekend is also busy with two rallies on Saturday 7th and one on the 8th. The Bangor & District ARS Rally will be held on the 7th at Donaghadee Community Centre, County Down BT21 0HB. Doors open at 11.30am and admission is ?3. There will be trades stands and a Bring & Buy. More information from Bill, GI4AAM on 02891 816 707.

Also on Saturday 7th, the Stockport Rally will take place at Walthew House, Shaw Heath, Stockport SK2 6QS. Doors open at 10am and admission is ?1. Tables are available at ?10 each. Details from Bernard, G3SHF, on 01625 850 088 (day) or Nigel, G0RXA, on 07973 312 699 (eves).

The 49th Cornish RAC Rally takes place at Penair School, St Clements, Truro, Cornwall, TR1 1TN on Sunday 8 July. Doors open at 10.30am and admission is ?2. There will be trade stands and a Bring & Buy. Details from Steve on 01209 844 939.

Now for the news of special events

GB10SOTA, celebrating 10 years of Summits on the Air, continues from the summit of Mount Snowdon, GW/NW-001. Using HF, VHF and UHF, operation will continue until 15 July from the summit of the highest mountain in England and Wales. Details are on QRZ.com.

The Calgary Amateur Radio Association will be operating special event station CK6S from 5 to 15 July. This to celebrate the 100th Anniversary of the Calgary Stampede. The Calgary Stampede is an annual rodeo, exhibition and festival held every July in Calgary, Alberta, Canada. plans to use frequencies around 3.825, 7.180, 14.250, 21.320 and 28.475MHz. A special QSL card will be available through the QSL bureau or direct by following the CK6S/VE6AO QSL instructions on QRZ.com.

GB4TDF will be on the air to celebrating the 99th year of the Tour de France. Operation will be from Hancocks Radio Hut, Low Bentham, Lancaster, until 23 July. Main operators will be Barrie, G1JYB, Stephany, G1LAT and members of Sands Contest Group.

Radio amateurs from the Association of Radio Amateurs of the Emeraud Coast are celebrating the departure of the Tall Ships Race in St Malo from 2 to 8 July. TM0TSR will be on the air and there will be a live webcast of the event at www.tm0tsr.fr.

Cyprus has the EU presidency for the first time from 1 July until 31 December. The special event station P3EU will be active on the bands during this time. QSL via 5B4AHO.

And now the DX news compiled from 425 DX News and other sources

Tynemouth Amateur Radio Club is running its first ever mini DXpedition to the west coast of Scotland. They will be based in the Lochgilphead area until 7 July. It is intended to operate on all HF bands in a variety of modes, plus terrestrial and satellite VHF. They also hope to activate JURA, EU-008, and some nearby SOTA summits. Details are on the club website, www.g0nwm.com.

The Turkish Special Wireless Activity Team and GITRAD will be activating some new lighthouses for the Western Blacksea Lighthouses on the Air award. Today, 1 July, TC6BLH will be on the air at Sinop Boztepe Lighthouse. Details are at www.tcswat.org.

The DXCC entity of the Sovereign Military Order of Malta, which is based in Rome, is to be activated from 1 to 4 July. The callsign to be used is 1A0C. The Sovereign Military Order of Malta is considered one of the rarest European DXCC entities. The preferred QSL route is via the Online QSL Request System.

Claudio, IS0/IZ0KRC, is staying on Sardinia until 15 July 15He works holiday style in SSB/CW/digital modes on the HF bands and 6m. QSL via his home callsign either via the bureau or direct.

Now the contest news

The Worked All Britain 144MHz Low Power Phone contest takes place today, 1 July, from 1000 to 1400UTC. The exchange is signal report, serial

number and WAB square. The maximum permitted power is 10 watts. Full details of the rules and log sheets may be obtained from the WAB website, www.worked-all-Britain.co.uk or from the Contest Manager, G3XKT, email aebbooks@ntlworld.com.

July is the final month of the 80m Club Championships and we begin with the CW session on the 2nd. Using CW only between 1900 and 2030UTC, the exchange is signal report and serial number.

Tuesday 3 July sees the 144MHz UK Activity Contest take place from 1900 to 2130UTC. Using all modes, the exchange is signal report, serial number and locator.

VHF NFD takes place over the weekend of 7 and 8 July. At one time there was only one section in VHF NFD, but over the years the number has gradually increased. These days there are six sections, including two for single-ops who stay at home and sweep the bands looking for the portable entrants. The number of teams, sweepers excluded, entering is almost the same now as it was 15 years ago, which is the earliest date of the results on the Contest Committee website. Running from 1400 to 1400UTC and using all modes on the 50 to 1296MHz bands, the exchange is signal report, serial number and locator.

On Sunday 8th, the third leg of the 144MHz Backpackers Contest takes place. Most of it overlaps the final part of VHF NFD, but it continues for one hour after VHF NFD ends. The maximum power in this event is 3 watts. Running from 1100 to 1500UTC and using all modes, the exchange is signal report, serial number and locator.

The 2012 IARU HF World Championships will take place during the second full weekend of July, beginning at 1200UTC on Saturday 14 July and ending at 1200 UTC on Sunday 15 July. The objective of this contest is to contact as many other amateurs, especially IARU Member Society HQ stations, around the world as possible using the 160, 80, 40, 20, 15 and 10 metre bands using phone and or CW. The rules for the 2012 contest are available at www.arrl.org/iaru-hf-championship.

And now the solar factual data for the period from Friday the 22nd to Thursday the 28th of June, compiled by Neil Clarke, G0CAS on Friday 29th of June.

For the first two days of the period only one small sunspot group was visible. Solar activity was very low on the 22nd and the 24th. However, from the 25th other groups appeared and several C class solar flares took place and on the 28th. Activity increased to moderate levels when an impulsive M2 solar flare took place. Solar flux levels increased every day, from 84 units on the 23rd, which is the lowest daily figure since last August, to 120 by the 28th. The average was 96 units. The 90 day solar flux average on the 28th was 118 units, that's one unit down on last week. X-ray flux levels also increased and ended the period at B3.2 units. The average was B1.1 units. Geomagnetic activity was quiet every day and the average was Ap 7 units. Solar wind data from the ACE

spacecraft saw solar wind speeds vary between 340 and 520 kilometres per second. Particle densities were moderate most days, varying between 10 and 35 particles per cubic centimetre. Bz never varied more than minus and plus 8 nanoTeslas during the period. Es propagation took place between 28 and 70MHz daily, at times exceeding 100MHz, with very little propagation on 144MHz, for the UK anyway.

And finally the solar forecast. This week solar activity is expected to continue at low levels but there is a chance that activity could increase to moderate levels with an M class solar flare taking place on some days. Solar flux levels should increase and be around the 130 mark for most of the week. Geomagnetic activity should be at active levels at first due to a recurring coronal hole but levels should become quiet around midweek. MUFs during daylight hours at equal latitudes should be around 22MHz for the south and 19MHz for the north. Darkness hour lows should be about 14MHz. Paths this week to the Middle East should have a maximum usable frequency with a 50 per cent success rate of about 21MHz. The optimum working frequency with a 90 per cent success rate will be around 16MHz. The best time to try this path will be between midday and 1900 hours. Sporadic-E is expected to take place most days, also double-hop Sporadic-E is possible on 28MHz and 50MHz to the Middle East during any large openings.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

A DRM vacancy has arisen for Leicester and Rutland in Region 13. If you're dedicated to amateur radio, have a few hours to spare, and are prepared to travel within the area serving members and clubs, you could be a big help. Please contact Region 13 Regional Manager Jim Stevenson, G0EJQ, on 01522 532 604 or email g0ejq@live.co.uk.

Now for clubs that have several events this week. Lincoln Short-Wave Club is taking part in the WAB 144MHz QRP Contest on Sunday 1 July from 10am-2pm GMT. On Tuesday 3 it's the 144MHz UK Activity Contest at the shack from 20.00. Wednesday sees G5FZ on the air and preparation for VHF NFD, then on Thursday it's the repeater net on 145.725 from 20.00. There's further preparation for VHF NFD on Friday from 10am at the shack, then the Saturday Surgery from 9am also at the shack. VHF NFD is on Saturday and Sunday, all day, at the Brattleby Bomb Site. For more information contact Pam Rose, G4STO, on 01427 788 356.

Wythall Radio Club is holding a club net on 145.225MHz today, Sunday 1 July. Final preparations for VHF NFD are on Tuesday, and Saturday sees the start of the VHF NFD weekend event in Wythall Park. On Sunday 8 July there's another club net on 145.225MHz. Details from Chris, G0EYO, on 07710 412 819.

Coventry Amateur Radio Society is operating GX4WAB for the Torch Relay on Monday from the QTH of G8GMU. Friday sees a talk on SDR by Iain Young, G7III. Contact John, G8SEQ, on 07958 777 363.

Friskney and East Lincolnshire Communications is holding a club net on Monday from 7pm, on 144.165 USB, vertical polarisation. Tuesday sees a station meeting from 1900, to which all are welcome. On Wednesday there is a M3+M6 club net on GB3FR from 7.30pm, and on Friday there is a club net on GB3FR from 8pm. Also on Friday, from 1900 to 2230, the club is taking part in the third leg of the 2E0ITV Commemorative Multi-Mode Competition. For more information contact the FELCC Information Line on 07554 362 020.

South Birmingham Radio Society is making its final Field Day plans on Monday. There's a talking the main hall on Wednesday, then aerial and cable testing on Thursday. The trailer gets loaded on Friday, in advance of the weekend operating for VHF Field Day. Helpers are very welcome. Contact Don, on 01214 581 603.

Telford & District Amateur Radio Society is holding a committee meeting and putting GX3ZME on the air on Wednesday. Saturday at 10.30 sees the start of the VHF NFD weekend, operating from Long Mynd. On Sunday 8 July they are supporting Lions Day on Wheels with 2E0CLR. Contact Mike, G3JKX, on 01952 299 677.

Now we return to the traditional listing in date order. On Monday 2 July Gloucester Amateur Radio & Electronics Society is having a talk on a bargain basement approach to SDR by Steve, G4HFT. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 2 July Aldridge & Barr Beacon Amateur Radio Club is holding a general discussion and CW tuition. Details from Albert, G0KFS, on 01922 614 169.

On Monday 2 July Welland Valley Amateur Radio Society is holding its 2m club net on 145.275MHz FM. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

On Tuesday 3 July Derby & District Amateur Radio Society is holding a junk sale. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 3 July Loughborough & District Amateur Radio Club is holding a radio ramble from 7.30pm. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 3 July Worcester Radio Amateurs Association is running a club net on 145.350MHz FM from 7.30pm. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Wednesday 4 July Midland Amateur Radio Society is holding training classes, a general meeting is on the air. Details from Norman, G8BHE, on 07808 078 003.

On Saturday 7 July Hinckley Amateur Radio Society is taking part in the RSGB VHF NFD at Burton Dassett Country Park. Any club or individual is welcome to attend and operate, where applicable, and any help with the setting up etc would be gratefully received. Details from John, M0JAV, on 07836 731 544.

NEWS FOR THE NORTH OF ENGLAND

We start with clubs that have several events this week. Hornsea Amateur Radio Club is taking part in the 80m CC CW on Monday, then there's an activity night on Wednesday. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

Sheffield Amateur Radio Club is having a social evening and taking part in the RSGB 80m Contest CW on Monday. Saturday sees the start of the weekend event for RSGB VHF National Field Day, with the club active as G2AS/P. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Thursday Wakefield & District Radio Society is having a talk on HF propagation by Dave, G0EVA, then on Saturday the Intermediate and Advanced Licence courses continue from 13:30. Details from Ken, G8FSO, on 07900 563 117.

Now we return to the traditional listing in date order. On Tuesday 3 July Halifax & District Amateur Radio Society is holding a Foundation exam. Details from Martin, M0GQB, on 01422 341 317.

On Tuesday 3 July Otley Amateur Radio Society is holding Morse classes and taking part in the 144MHz UKAC Contest. Contact Paul, 2E0PAK, on 07768 996 370.

On Tuesday 3 July Stockport Radio Society is having an introduction to digital voice on HF & commercial DRM reception by Alex Emmerson, M3ASQ. More information from Nigel Roscoe, on 07973 312 699.

On Wednesday 4 July Denby Dale Radio Club is having part 2 of the talk by Andy, M0GGR, on his visit to Asiatic Russia. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 4 July Goole Radio and Electronics Society is preparing for VHF NFD. Contact Ken, G6YYN, on 01757 638 539.

On Thursday 5 July Ripon & District Amateur Radio Society is on the air. Details from Rob Hall, M0RBY, on 07876 085 631.

On Thursday 5 July South Manchester Radio and Computer Club is having a talk on metalwork for home construction by Ged, G8RSI. Details from Ron, G3SVW, on 01619 693 999.

NEWS FOR NORTHERN IRELAND

No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND

On Tuesday 3 July Livingston & District Amateur Radio Society is having an operating evening. Details from Norman, GM1CNH, on 07740 946 192.

On Thursday 5 July Aberdeen Amateur Radio Society is holding a junk sale. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Friday 6 July West of Scotland Amateur Radio Society is having a club night. Details from Sam, GM4BGS, on 07771 554 035.

On Saturday 7 July Cockenzie & Port Seton Amateur Radio Club commences its operations for VHF Field Day. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

We start with clubs that have several events this week. On Sunday 1 July Norfolk Amateur Radio Club is running the Barford Radio Rally at Barford Village Hall. On Monday they are taking part in the RSGB 80m Club Championship CW. Wednesday sees a club discussion on the pros and cons of contesting and why you do or do not take part. Details from Chris Danby, G0DWV, on 01603 898 678.

Worthing & District Amateur Radio Club is holding its monthly breakfast meeting at 9am on Sunday 1 July at The Goring Caf&#65533;. On Monday it's the 80m club championship CW contest, and Wednesday sees a talk by Adrian, G4LRP, on DF hunting for work and pleasure. Contact John, G8FMJ, on 01273 593 232.

Farnborough & District Radio Society is running a Top Band net on 1.995MHz from 20.00 to 21.00 on Monday. On Wednesday there's a slow CW net from 13.00 to 14.00 on 3.570MHz. Friday sees a CW net from 13.00 to 14.00 on 3.570MHz, followed by a 2m net from 20.00 to 21.00. Contact Neville, G3SPD, on 01252 404 816.

Chelmsford Amateur Radio Society is holding a table top sale at MASC from 7.30mm on Tuesday, overseen by Colin Page, G0TRM. On Saturday 7 they are operating GX4WAB as the Olympic Torch is carried through the City of Chelmsford. Contact Martyn, G1EFL, on 01245 469 008.

Brede Steam Amateur Radio Society is at the shack on Tuesday and Saturday. For more information contact Steve, on 01424 720 815.

Shefford & District Amateur Radio Society is visiting the Anglian Water Leighton Linslade Treatment Facility on Thursday, then Saturday sees the start of the VHF National Field Day weekend. Details from John Burnett, M6JBU, on 07860 804 793.

Mid-Sussex Amateur Radio Society is preparing for NFD on Friday, then commences operations for this weekend event on Saturday. Details from Rob, 2E0RJA, on 01444 232 129.

Now we return to the traditional listing in date order. On Monday 2 July Braintree & District Amateur Radio Society Club is holding a barbecue. For more information contact John, M5AJB, on 01787 460 947.

On Monday 2 July Burnham Beeches Radio Club is getting ready for the McMichael Rally. Contact Dave, G4XDU, on 01628 625 720.

On Monday 2 July Southdown Amateur Radio Society is holding a barbecue at the QTH of G3ZQB. Details from John, G3DQY, on 01424 424 319.

On Monday 2 July Surrey Radio Contact Club is holding a barbecue. Contact John, G3MCX, on 02086 883 322.

On Tuesday 3 July Stevenage & District Amateur Radio Society is having a talk on building on the Foundation licence. Details from Martin Juhe, M0XJP, on 07973 793 770.

On Wednesday 4 July Chesham & District Amateur Radio Society is holding a general meeting. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 4 July Southdown Amateur Radio Society is operating at the Hailsham shack. Details from John, G3DQY, on 01424 424 319.

On Thursday 5 July Bredhurst Receiving and Transmitting Society is holding a club night, with CW practice from 8:30 - 9pm. Contact Charles, G4VSZ, on 07982 244 788.

On Thursday 5 July Cray Valley Radio Society is holding a club meeting. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday 5 July Horndean & District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday 5 July Horsham Amateur Radio Club is running a photo quiz with G4LRP. Details are on the web at www.harc.org.uk.

On Thursday 5 July Vange ARS is holding a junk sale. Contact Steve, G0KVZ, on 01268 552 606.

On Friday 6 July Crystal Palace Radio and Electronics Club is having a talk on bhi DSP noise cancellation by Graham Somerville, M0ZGS. Contact Bob, G3OOU, on 01737 552 170.

On Friday 6 July Wey Valley Amateur Radio Group is holding its AGM. Details are on the web at www.weyvalleyarg.org.uk.

On Saturday 7 July Darenth Valley Radio Society commences its weekend event for VHF Field Day. Contact Bob, M0RAW, on 01322 663 804.

On Saturday 7 July Loughton & Epping Forest Amateur Radio Society is making its first visit of 2012 to Aylmers Farm, which coincides with the Olympic Torch Relay passing through Harlow. Contact Marc Litchman, G0TOC, on 02085 021 645.

NEWS FOR THE SOUTH WEST

We start with clubs that have several events this week. Exeter Amateur Radio Society has its 80m net on Monday at 19.45, the 2m net on Tuesday at 19.45 and the 4m net on Thursday at 19.00. Contact Nick, 2E0NRJ, on 01363 775 756.

Cornish Radio Amateur Club has its main club meeting on Thursday. Saturday sees setting up for the 49th Penair School rally, which takes place on Sunday 8 July. Details from Steve, G7VOH, on 01209 844 939.

South Bristol Amateur Radio Club is having a briefing for VHF NFD on Thursday, and commences operations for the weekend event on Saturday. Details from Andrew Jenner, G7KNA, on 07838 695 471.

Now we return to the traditional listing in date order. On Monday 2 July Riviera Amateur Radio Club is holding a portable RV with MX0RIV on the air. Contact Alan Wyatt, G2DXU, via email to rivieraarc@gmail.com.

On Monday 2 July Weston Super Mare Radio Society is having a natter night. Details from Paul, G3SDH, on 01761 221 206.

On Wednesday 4 July Taunton & District Amateur Radio Club is having illustrated talks by members about their shacks. More information from Peter Robinson, G0EYR, on 07811 635 819.

On Thursday 5 July Saltash & District Amateur Radio Club is having a talk. Contact Brian, M0BHG, on 01752 844 321.

On Thursday 5 July Swindon & District Amateur Radio Club is having an activity night and preparing for VHF NFD. Contact Den, M0ACM, on 07810 317 750.

On Thursday 5 July Yeovil Amateur Radio Club is holding a barbecue. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 6 July Torbay Amateur Radio Society is having a natter night plus an 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

On Saturday 7 July Plymouth Radio Club commences its weekend event for RSGB Field Day. Details from Rob James, 2E0ONO, via email to Robert-james@virginmedia.com.

NEWS FOR WALES

On Monday 2 July Dragon Amateur Radio Club is3 having a talk on an audio synthesiser project by Les Hayward, MW0SEC. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Tuesday 3 July Carmarthen Amateur Radio Society is having a rig check evening with GW4RVA. Details from Lloyd, 2W0LLT, on 01239 711 297.

On Tuesday 3 July Wrexham Amateur Radio Society is holding a quiz night. Details from Carl Morris, MW0TBB, by email to tydraig@wrexham-ars.co.uk.

The spam is mostly taken from web sites, meaning that people could go to the original sites to read it instead of coming here. Obviously, such Panix posts are pure noise, although it remains to be seen if they are spam. They certainly are spurious and useless.

But, remember, this is Usenet and Usenet is on its last legs. What happens here has become totally irrelevant to the greater scheme of things. Europe just shut down its largest Usenet server, and the U.S. has shut down most if its major news servers too. Usenet is going the way of Gopher. Gopher servers still are available, but almost no one uses them. So it will be with Usenet.

Usenet is going the
way of Gopher. Gopher servers still are available, but almost no one
uses them. So it will be with Usenet.

Given that it is an easy, working and uncomplicated system, you may be
right. Anything which is established, works well and is liked is a prime
target for wheel-reinventors and "upgraders".

Les.

1145. Weekly Highlights of Solar and Geomagnetic Activity, 25 June - 01 July 2012

Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
25 June - 01 July 2012

Solar activity was low to moderate during the week. The first three days of the period were marked by low level C-class x-ray flares, the largest of which was a C4/Sf from Region 1512 (S16, L=264, class/area Dki/290 on 29 June) on 28 June at 0452Z. Region 1512 was soon overshadowed by Region 1513 (N16, L=218, class/area Dao/120 on 01 July), which produced an impulsive M2/1b flare on 28 June at 1612Z. Subsequently, Region 1513 produced at least one impulsive M-class event each day for the remainder of the week, the largest of which was an M2.8/Sb on 01 July at 1918Z. While Region 1513 was the most prolific flare producer of the regions on the disk, it was dwarfed in area by Region 1515 (S17, L=204, class/area Ekc/850 on 01 July). Region 1515 appeared on the disk on 27 June and by 01 July had quadrupled in area. Both Regions 1513 and 1515 ended the week with beta-gamma magnetic characteristics. There were several CMEs observed during the week, however none were determined to be geoeffective.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit began the period at high levels before decreasing to moderate levels early on 25 June. Moderate levels continued throughout the week, increasing to high levels on 01 July at 1320Z.

Geomagnetic field activity ranged from quiet to active levels, with isolated minor to major storm levels observed at high latitudes late in the period. The geomagnetic field was at mostly quiet levels from 25-29 June. By 2100Z on 29 June, the phi angle at the ACE spacecraft switched from positive to negative polarity, indicating the arrival of the corotating interaction region. Solar wind speed at the ACE spacecraft, which had ranged between 350-500 km/s during the week, increased to 700 km/s by 30/1800Z as a coronal hole high speed stream (CH-HSS) became geoeffective. Concurrently, the Bz component

of the interplanetary magnetic field turned southward, eventually dipping to -10 to -12 nT while Bt reached 14nT before decreasing to 7 nT by mid-day on 30 June. The geomagnetic field responded with unsettled to active levels for the remainder of the period. Minor to major storm levels were observed at high latitudes during 30 June-01 July.

Forecast of Solar and Geomagnetic Activity
02 July - 28 July 2012

Solar activity is expected to be at low to moderate levels, with more M-class events from Regions 1513 and 1515 likely through 09 - 10 July.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at high levels through 08 July and from 17-21 July.

Geomagnetic field activity is expected to begin at unsettled to active levels, decreasing to mostly quiet to unsettled levels after 03 July until another CH-HSS becomes geoeffective on 27 - 28 July.

http://forums.qrz.com/showthread.php?352198-HamRadioNow-Episode-14-A-Simple-Station-(and-a-Complex-Contest)&goto=newpost

HAMRADIONOW.tv

Episode 14: Assembling a Simple Station,

and a Field Day Antenna Launching Contest

When most ham radio television shows feature a ham station, it's going to be

one of the monster-mega-stations. They're cool and impressive. And we'll

never own one! Viewers keep asking for a simple station and antenna they

can assemble themselves. So in this episode, Jeff and Gary put together

a Field Day GOTA station with a simple all-band dipole, tuner, transceiver
and

power supply that you can use as a template for your own home station.

In the middle of all that, we take a few minutes to watch an Antenna
Launching

Contest, with giant slingshots and air-powered 'potato guns' competing for

distance and accuracy. And one of them even hangs a real dipole!

Watch this episode at our web site, www.HamRadioNow.tv.

Civil War hero Johnny Clem Day: August 11, 2012 sponsored by COOKEN ARC
Newark. OH.

Posted: 01 Jul 2012 01:23 PM PDT
http://forums.qrz.com/showthread.php?352252-Civil-War-hero-Johnny-Clem-Day-August-11-2012-sponsored-by-COOKEN-ARC-Newark-OH&goto=newpost

Johnny Clem was born in Newark, OH and served in the army as a mere child, eventually moving up to the rank of General. His amazing story is celebrated in part by the Licking County Historical Society, and this special event station, W8TNX. See the LCHS website for more information.

Listen for us on or around 7.170 or 7.230 mhz from 10 am til 4 pm on Saturday, August 11, 2012. This is an annual tribute to the boy who became a man, and then a U.S. Army General.

QSLs:

Your may self-print your own special 8.5 x 11" certificate, once the logs have been posted.

eQSLs are available via LOTW.

Paper QSLs can be obtained by sending yours together with an sase to W3HKK.

Hope to hear you on August 11th!

The Gang at COOKEN.

13 colonies special event extended

Posted: 01 Jul 2012 04:53 AM PDT
http://forums.qrz.com/showthread.php?352200-13-colonies-special-event-extended&goto=newpost

Due to the strong storms that hit many states recently, leaving millions without power, the 13 Colonies Special Event will be extended for one full week. We will end Saturday night July 7th at 0400 or midnight eastern. Many of our operators were effected by this storm and are temporarily off the air and thousands of hams that want to participate that cannot at present, will have the opportunity all this week. We have operators who lost towers and are working mobile from their cars. This will afford time to set up

replacement antennas. We all wish those folks affected, the best of luck and a quick recovery.

ANNOUNCEMENT [edited]

PT0S - DXpedition to St. Peter and St. Paul Rocks

June 30, 2012, Sao Paulo and Miami

The Araucaria DX Group, in conjunction with the TX3A Team, is pleased to announce a DXpedition to St. Peter and St. Paul Rocks, PY0S, under the callsign PT0S. The DXpedition will take place in the late November to mid December, 2012 time frame. The actual dates will depend on weather conditions and will be announced on the PT0S website, <PT0S.com>.

There has been an official ban on Amateur Radio activities from PY0S. Although the ban, which was created for environmental and safety reasons, remains in place, the Araucaria DX Group was given a special permit by Brazil's SECIRM (Secretaria da Comissao Interministerial para Os Recursos do Mar), the Brazilian Navy, Ministry of Environment and LABRE to conduct a two week long operation.

The operation will have a strong low band focus. There will be a dedicated 160 meter station operating on 160 meters from sunset to sunrise. A second station will be on 80 and 40 meters at night. During the day we will operate two stations on the higher bands -- and 6 meters -- based on conditions. RTTY will also be supported.

The DXpedition's goal is to give this rare and difficult entity to as many amateurs as possible, taking maximum advantage of this unique opportunity. The group will be using newly designed RX antennas and receiving equipment to allow small and QRP stations to work PT0S on all bands, but especially on 80 and 160 meters. For operating procedures and advice on how to maximize your chances of getting into the log, please visit <PT0S.com>.

All QSOs will be loaded onto LoTW within 36 hours of taking place.

Operators will be Fred Carvalho/PY2XB (PY2XB/PY0F, PQ0F, VP5/PY2XB, 8P9XB), Peter Sprengel/PP5XX/PY5CC (PY0FM, PW0T, HK0NA). Tomi Pekarik/HA7RY and George Wallner/AA7JV. Due to environmental considerations, we have been limited to four operators.

For further information and regular news updates please go to <PT0S.com>.

About:

The Araucaria DX Group

The Araucaria DX Group (GRUPO ARAUC&#65533;RIA DE DX) was formed in the 70s by mostly Brazilian amateur radio enthusiasts. Today it has become a multi-national group focused on contesting and dxing. The group currently has 340 members, of which about 100 are from outside Brazil. The group includes 15 top of Honor Roll and several Contest Hall of Fame members. For details go to: http://www.araucariadx.com

TX3A Team:

The TX3A Team of HA7RY and AA7JV have conducted a number of two-man DX-peditions to Chesterfield Reef (TX3A), Mellish Reef (VK9GMW), Serrana Bank - Bajo Nouveo (5K0T) and Willis Islets (VK9WWI). The team focuses on putting difficult places on the air, especially on the low bands.

Background on St. Peter and St. Paul Archipelago

Due to their strategic importance, the Rocks of St. Peter and St. Paul are treated differently by the Brazilian government to other islands in its territory. The Secretariat of the Interministerial Commission for Sea Resources (SECIRM) manages the archipelago in a manner that maximizes protection of national and environmental interests in the region. The infrastructure of the archipelago is very complex. Researchers take turns constantly on the research station located on Belmonte islet. They conduct research in areas of geology, biology, oceanography, meteorology and other academic and national interest. The difficulties of access in terms of almost 1,000 km distance that separates this small part of the country from the continent, the absence of drinking water, the frequent earth-quakes; are just some of the difficulties encountered by the Brazilian government in managing the site.

As a consequence of several meetings with the Brazilian authorities, the organizers of the Expedition, represented by the Araucaria Dx Group's Chairman (PY5EG Atilano de Oms), had the opportunity to show the relevance of ham radio activity to the communications community as well how the DX-pedition intends to cooperate to meet the requirements of the occupation of the archipelago and demonstrate its compatibility with the ongoing activities. The Brazilian Navy through SECIRM is giving total support to the expedition.

Due the fact that the archipelago is a very important natural Brazilian reserve, a special permit from Ministry of Environment (ICMBIOS) has been

issued (NR 01-2012).

The expedition has also received a fundamental support from the Brazilian Amateur Radio League LABRE, as well from ANATEL (Agencia Nacional de Telecomunica��es). A special call has been assigned PT0S. During all contacts
with the Brazilian entities, we emphasized the importance of the work done by radio amateurs and reciprocity that could derive from this understanding. The operation is aimed not only at bringing this rare location to the DX community, but also to demonstrate that Amateur Radio is in fact totally compatible with the scientific and environmentally sensitive nature of the St. Peter and St. Paul Archipelago.

The Araucaria DX Group greatly appreciates the understanding and support of all its friends and Brazilian authorities.

Additional Background:

The archipelago of St. Peter and St. Paul is a group of small rocky islands and rocky which is situated in the central equatorial Atlantic Ocean, lying 627 km from the archipelago of Fernando de Noronha, 986 km the nearest point on the mainland and 1010 km from Natal, in Rio Grande do Norte. It was declared as part of the Brazilian territory, according to IBGE belonging to the state of Pernambuco, despite being closer to the state of Rio Grande do Norte. In 1998 a scientific station was opened on the island Belmonte, initiating the program Archipelago of S�o Pedro and S�o Paulo (Proarquip�lago) administered by the Secretariat of the Interministerial Commission for Sea Resources (SECIRM). The permanent presence of scientists in scientific station is required to prove the livability in the archipelago, which is seen as crucial for its international recognition as the archipelago as Brazilian territory.

Why bother removing a newsgroup for a temporary lack of activity? It's
not as if an idle group is consuming much in the way of resources.

Of course, removing it guarantees that there won't be any future return
of activity and provide an excuse to shut the system down entirely.

Amateurs Challenge Broadband-over-Power-Line Rules:

Posted: 01 Jul 2012 05:25 PM PDT
http://www.eham.net/articles/28570

You have to admire their persistence. ARRL, the national association for Amateur Radio, has yet again challenged the FCC's rules for Bgroadband-over-Power-Line (BPL), just as it has at every opportunity since the FCC first proposed BPL back in 2003. As you would expect from the name, BPL transmits broadband over the same lines that carry electric power along the street, siphoning off signals to houses and apartments along the way. Its proponents once hailed BPL as the "third wire" into the home for broadband service, the other two being the cable TV and telephone (or FIOS) connections. But in recent years BPL providers have scaled back their ambitions. Now they mostly help out electric utilities with internal communications for meter reading, load management, and the like. Few consumers receive their Internet service via BPL. But ARRL has not scaled back its opposition. Some BPL systems, as a by-product, generate radio signals on frequencies that overlap with the amateur radio bands. Everyone agrees that interference into amateur radio receivers is at least a theoretical possibility. But there is less agreement on how much interference BPL systems actually cause. The amateurs claim that a BPL system amounts to a city-sized antenna that blankets the amateur bands with interference. BPL providers counter that any interference comes from isolated equipment mounted on widely spaced power poles, and can be identified and adjusted if necessary. The FCC rules on BPL include unprecedented protections for amateur radio, including a requirement that BPL operators turn down power on equipment that causes interference, and if necessary, turn it off completely. But the amateurs want more: they want BPL to reduce power in all amateur bands, all the time, by a factor of at least 300. ARRL opposed the FCC's initial Notice of Inquiry on BPL; it opposed the subsequent Notice of Proposed Rulemaking; and it requested reconsideration of the initial rules. Unsatisfied with the FCC's response, ARRL took the FCC to court, specifically, the U.S. Court of Appeals for the D.C. Circuit. The court sided with the FCC on the major issues, but told the FCC to take a second look at some of the technical findings. (More details on the case are here.) The FCC duly requested public comment on those technical findings, and agreed to some small adjustments to the rules.

//
HamRadioNow: A Simple Ham Station:

Posted: 30 Jun 2012 05:00 PM PDT
http://www.eham.net/articles/28569

When any of the ham radio television programs showcases a ham station, most likely they choose one of the monster-mega-stations. They're cool. They're impressive. And you and I will never own one! Viewers keep asking for an example of a simple station they can assemble. And that's what we've done in this episode.
Jeff AC4ZO and Gary KN4AQ put together a simple Field Day GOTA station : Transceiver, Power Supply, Tuner, Antenna : that you can use as a template for your own basic station. In the middle of that, we take time out to watch a unique antenna launching contest at Field Day. Hams with giant slingshots and air-powered 'Potato Guns' compete for distance and accuracy. And some of them even hang antennas.

AMSAT NEWS SERVICE

ANS-183

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor at amsat.org

Remember to send in your 2012 AMSAT Field Day Satellite Summary Sheet to kk5do@amsat.org or kk5do@arrl.net by July 9, 2012. Field Day Rules and Sheets are linked at http://www.amsat.org.

In this edition:

* AMSAT Journal In the Mail

* Call For Articles - Author's Guide to the AMSAT Journal

* 13 Original Colonies Special Event Includes Satellite Operations

* Canada Scouts ARISS Contact Successful

* CQ Magazine Worked All Zones - Satellite Award

* Chinese Amateur Satellite Group Shows CAS-2 Satellite Model

* Soyuz to Fly 3 Hams Up, 3 Hams Staying, 3 Hams Coming Home

* KiwiSAT Hoping for Launch mid-2013

* Five CubeSats Ready for July 21 JAXA HTV-3 Launch

* AMSAT News Podcasts Available to Download and Listen

* Satellite Shorts From All Over

AMSAT Journal In the Mail

AMSAT Journal Editor Ed Long, WA4SWJ said this week the next issue of the Journal is at the print shop and will be in the mail soon.

With this issue we note that Ed is retiring as the Journal editor. Doug Loughmiller, W5BL will take over the reins of the Journal. Ed, thank-you for your years of hard work on the Journal! Doug, we look forward to working with you!

There has been a delay in publishing the Journal. AMSAT President Barry Baines, WD4ASW noted, "The reasons for not getting the Journal published on time is not due to the transition of editors, but due to lack of materials for publication. Please read the associated call for articles news item in this ANS ... and send Doug your materals!"

Here are some of the features of the upcoming Journal:

Satellite Export Controls - Progress ReportFUNcube Project UpdateSpotlight on VUSAT OSCAR 52 (VO-52)2011 AMSAT BoD Meeting, Symposium & General Meeting AMSAT Board of Directors Meeting Minutes, San Jose, CAAMSAT Activities at the 2012 Greater Houston HamfestMuseum Ships Weekend 2012 - A Record Breaking YearUpdates of AMSAT's on-going development of launch opportunities including Fox-1 aiming for early 2013.

AMSAT co-development and acceptance into three satellite programs in the NASA Edison small satellite flight demonstration mission.AMSAT partnership with Auburn University and The University of Alabama on a National Science Foundation (NSF) grant application.

Keep an eye on your mailbox for your next issue of the AMSAT Journal!

[ANS thanks Ed Long, WA4SWJ; and Barry Baines, WD4ASW for the above information]

Call For Articles - Author's Guide to the AMSAT Journal

You are invited to share your amateur radio in space ideas and experiences with fellow satellite operators.

The AMSAT Journal, a bi-monthly publication of AMSAT-North America, brings you the latest information in satellite mission planning, satellite-related hardware design and construction, satellite-related software design and

implementation, and amateur radio earth station construction.

AMSAT Journal Editor Doug Loughmiller, W5BL noted, "Publishing a quality publication is hard work, much like building a satellite itself, it requires a team working together to insure that the publication reaches the membership in a timely manner which contains informative and useful content. In my view the Journal should address a number of topics on a regular basis. I would like to enlist the services of individuals who would be willing to serve as a column coordinators for each of the topics", including:

Organizational newsSpacecraft Engineering TopicsSpacecraft Operational Topics (Command and Control, mission analysis etc.)Spacecraft Utilization (What's on the birds, what are we learning?)Hands-On Projects for ground station applicationsEducational NewsAmateur Radio AstronomyEMEHigh Altitude Balloon FlightsGeneral Space Science Topics.

Your articles are especially welcome. Simply type out your ideas on your computer and send them in. Your article will be "cleaned up" and formatted for you during the editorial processing of the AMSAT Journal. Send your article to the AMSAT Journal e-mail box via: journal@amsat.org.

There is no need to do any special formatting on your submission because the final layout format is driven by the magazine's type setting software. All you need to include is:

Your text in MS-Word or plain text formatGraphics in as high pixel resolution possible saved in separate files (jpg, gif, tiff).

An MS-Word file with embedded graphics is the most difficult format to typeset. Separate text and graphics files work the best.

If you have any questions, or need some help feel free to contact the editor at the AMSAT Journal at journal@amsat.org.

The AMSAT Journal is looking forward to hearing from you soon!

[ANS thanks Ed Long, WA4SWJ; Doug Loughmiller, W5BL; and Barry Baines, WD4ASW for the above information]

13 Original Colonies Special Event Includes Satellite Operations

The 2012 13 Colonies Special Event has been operating since July 1 but there is still time to work them since they plan to be on the air through July 5. Operators will be on the satellites again this year for the special event.

Recognizing that the 4th comes in the middle of the week (Wednesday) please keep in mind that there may be fewer operators available on the work days so, PLEASE BE PATIENT!

Please send your QSL requests directly to each operator.

Canada Scouts ARISS Contact Successful

On Saturday, June 23, Scouts Canada, Nova Scotia Council in Dartmouth, Canada called on-orbit astronaut André Kuipers, PI9ISS during an Amateur Radio on the International Space Station (ARISS) contact via telebridge station VK5ZAI in Australia.

The contact was held as part of a space event with Scouts of various ages in conjunction with groups earning their Science Badge awards. Over 150 were in attendance. The contact was Webcast and the presentation was captured for retransmission by Aliant IPTV Atlantic during July/August and for development of an edited CD for distribution to

interested parties.

There was excellent media coverage including 3 television stations and two newspapers. A 20 minute radio interview was held with "The Rick Howe Show" on Friday, June 22 on Amateur Radio - ARISS and Field Day Operations. In addition, an article is being prepared for periodcals: Royal Astronomical Society, Halifax Public Libraries, Radio

Amateurs of Canada.

[ANS thanks the ARISS Status Report for June 25, 2012 for the above information]

CQ Magazine Worked All Zones - Satellite Award

Sponsored by CQ Magazine, the Worked All Zones award program is one of the longest running in Ham Radio, having its start prior to WWII. CQ Magazine explains the details of this award on their website:

The WAZ program, while it involves the use of "DX Entities", does not rely on any particular "Entity's" status as a country. The WAZ award is geographically focused, which is where it's challenge lies. The CQ Worked All Zones (WAZ) Award and its variations are issued to any licensed amateur station presenting proof of contact with the appropriate number of CQ zones of the world. (The CQ Zones map and additional zone information is posted on the CQ web site.)

The Worked All Zones - Satellite award has been available for contacts made since January 1, 1989. While opportunities to contact many of the DX zones were more numerous when HEO satellites were active, your confirmed contacts back to 1989 would qualify you to apply for this award now.

The Satellite Award requires that the applicant submit QSL cards from at least 25 zones. Endorsement stickers

are issued at the 30, 35, 36, 37, 38, 39 and 40 zone levels. The Satellite Award is not band specific, you may apply QSO's from multiple bands. The Satellite WAZ certificate will indicate the number of zones that are confirmed when the applicant first applies for the award.

Applications and Cards for this award must be submitted to the WAZ Award Manager, Floyd Gerald, N5FG (n5fg@cq-amateur-radio.com)

You can find all of the details of the CQ Magazine Worked All Zone Award on-line.

[ANS thanks CQ Magazine WAZ Award Manager Floyd Gerald, N5FG for the above information]

Chinese Amateur Satellite Group Shows CAS-2 Satellite Model

This year the Chinese Amateur Satellite Group (CAMSAT) was a special guest in the AMSAT-DL booth at the HamRadio Fair in Friedrichshafen ☐ HamRadio 2012.

CAMSAT had a model of their next amateur radio satellite, CAS-2 which is planned as the next generation after their first CAS-1 (aka XW-1, HO-68) satellite. HO-68 carried a linear transponder and proved very popular with radio amateurs world-wide.

The May 20 announcement came to light that CAMSAT and students at the Qian Youth Aerospace Academy are now working on the next satellite CAS-2. The announcement indicates that two separate CAS-2 satellite structures are being built ☐ A1 and A2.

The launch of CAS-2 is planned for 2014 into a 1000 km orbit with an inclination of 12 degrees. This orbit means it may not be receivable in those countries at high latitudes.

It is understood that most of the room in CAS-2 will be taken up by the primary (non-amateur) payload and it has only been possible to fit a single channel FM amateur transponder in the satellite.

Further information in Google English can be seen online.

A photo on the AMSAT-UK web shows Fan

Shaomin, BA1EO with the CAS-2 model.

A group picture taken at Ham Radio 2012 in Friedrichshafen and a picture of the engraved glass plaque that CAMSAT presented to AMSAT-DL can be seen on the AMSAT Deutschland Facebook page.

[ANS thanks CAMSAT, AMSAT-DL, and AMSAT-UK for the above information]

Soyuz to Fly 3 Hams Up, 3 Hams Staying, 3 Hams Coming Home

Three Expedition 32 crew members to the International Space Station are scheduled to launch aboard the Soyuz TMA-05M from the Baikonur Space Center in Kazakhstan on July 15.

The Expedition 32 crew members are NASA astronaut Suni Williams KD5PLB, cosmonaut Yury Malenchenko RK3DUP and Japanese astronaut Aki Hoshide KE5DNI. The trio has been passing tests at the Gagarin Cosmonaut Training Center in Star City, outside of Moscow.

They will join Expedition 31's NASA astronaut Joe Acaba KE5DAR and cosmonauts Gennady Padalka RN3DT and Sergei Revin RN3BS on board the orbiting outpost.

Meanwhile, fellow Expedition 31 members cosmonaut Oleg Kononenko RN3DX and NASA's Don Pettit KD5MDT and Andre Kuipers PI9ISS returned to Earth on July 1.

A back-up ISS crew was also confirmed on Friday. It includes Canadian astronaut Chris Hadfield KC5RNJ/VA3OOG, NASA astronaut Tom Marshburn KE5HOC and cosmonaut Roman Romanenko (no call at this time).

[ANS thanks SpaceDaily.com for the above information]

KiwiSAT Hoping for Launch mid-2013

News from New Zealand, received via AMSAT-UK reports the development of the amateur radio satellite KiwiSAT is completed and it is now ready for a LEO launch. See: http://www.uk.amsat.org/8686.

KiwiSat carries a 435 or 1268 MHz to 145 MHz linear transponder for SSB/CW operation:

Transmit Power: 2 Watts PEP.Beacon frequency: 145.885 MHzUplink: (U-Band) 435.265 to 435.235 MHZ LSB orUplink: (L-Band) 1268.880 to 1268.850 MHz LSBDown link: 145.850 to 145.880 MHz USB

The KiwiSAT website says the team have been in discussion with ISC Kosmatras for a DNEPR launch. They hope the satellite will be launched mid-2013. On June 18, 2012, the KiwiSAT team released a status update.

In addition to the transponder KiwiSAT also carries an Attitude Determination And Control (ADAC) experiment developed by students at Massey University.

Five CubeSats Ready for July 21 JAXA HTV-3 Launch

Viet Nam's F-1 CubeSat team announced on June 23 they have passed flight safety review and are cleared to be included in JAXA HTV-3 mission to the ISS. F-1 arrived at Japan's Tsukuba Space Center where it and four companion CubeSats (RAIKO, WE WISH, FITSAT-1 and TechEdSat) will be integrated with the J-SSOD small satellite deployer before leaving for the Tanegashima launch pad.

After arriving at the ISS aboard the JAXA HTV-3 ISS resupply mission, the J-SSOD deployer will be integrated to the Japanese Experiment Module, also known as Kibo. They will be deployed with the Kibo robotic arm planned for the September, 2012 timeframe.

The five CubeSats on this mission include:

RaikoWe WishFITSat 1F-1 Vietnam Student CubeSatTechEdSat

RAIKO - Wakayama University, Japan

http://www.astro.mech.tohoku.ac.jp/RAIKO/ (Japanese)

This 2U CubeSat includes experiments for:

Earth photography with a fish-eye lens cameraPhoto tracking during deployment from ISS to measure relative motion.Experimental star sensorMembrane deployment experiment for de-orbitHigh speed data communication experiment by Ku-band communication equipment:

Orbit determination experiment by Doppler frequency measurement of Ku-band beacon. Mobile ground station and global cooperation for reception

FITSAT-1 - Fukuoka Institute of Technology, Japan

http://www.fit.ac.jp/~tanaka/fitsat.shtml

The main mission of this 1U CubeSat will be a demonstration of high speed data transfer from a satellite. A second experiment aboard the satellite involves an attempt at visual tracking from the ground of the high-output LED flash to investigate the possibility of optical communication with

satellites. The light from this flash will be received by the ground station equipped with a telescope with photomultiplier linked to a parabolic antenna tracking the 5.8GHz downlink.

Frequencies announced for FITSAT-1:

CW Beacon 437.250 MHz,

FM Data 437.445 MHz,

High speed data 5840.00 MHz.

WE WISH - Meisei Electric Co., Ltd., Japan

http://www.meisei.co.jp/news/2011/0617_622.html

The WE WISH mission is to investigate monitoring of the global environment from space with the use of an upper atmosphere measurement experiment. This includes GPS technology, and technical proof of concept of a micro infra-red camera.

F-1 Vietnam Student CubeSat

Vietnamese students in Hanoi plan to orbit the country's first satellite, their amateur radio CubeSat F-1 with the callsign XV1VN. The satellite will carry a low resolution C328 camera and two Yaesu VX-3R transceivers using 145.980 and 437.485 MHz.

VX-3R1, 437.485 MHz FM downlink:

Solar cell power only, operates in sunlight onlyOutput power: max 0.3W, half-wave dipole antennaMorse code beacon (10 chars) using PWM CW every 30 seconds

VX-3R2, 145.980 MHz FM downlink:

Rechargeable battery, operates in dark and sunlightOutput power: max 1.0W, half-wave dipole antennaAFSK 1200bps, half duplex, one AX.25 packet every 30 seconds

TechEdSat - San Jose State University

http://ncasst.org/techedsat.html

http://www.uk.amsat.org/5018

TechEdSat is a 1U CubeSat built by San Jose State University in partnership with NASA Ames Research Center and AAC Microtec. It's mission is to evaluate Space Plug-and-play Avionics (SPA) designed in Sweden by AAC Microtec, and to perform a communications experiment utilizing the Iridium and Orbcomm satellite phone network.

TechEdSat has received IARU frequency coordination for its downlink on 437.465 MHz.

[ANS thanks the CubeSat teams, AMSAT-UK, and Mineo Wakita JE9PEL for the above information]

AMSAT News Podcasts Available to Download and Listen

The Houston AMSAT Net, hosted by Andy W5ACM, meets every Tuesday evening at 8PM Central Time (UTC-5). They read the ANS bulletins and any late breaking amateur satellite news that has come out since the weekend ANS news cycle.

The net is streamed live on the AMSAT Echolink Node and via an MP3 stream. The audio is also available as a podcast from the current net including an archive of past net podcasts.

The Bruce KK5DO web page has the links to the podcasts (and live streaming information). Click on the "Listen to Live or Past Nets" link on the left side of the web page to find the links to the podcasts.

If you go to the iTunes store and search podcasts there for either kk5do, amsat or houston amsat net, you will find the same podcast able to be streamed right to your iPhone/iPad/iPod. Also, if you have an iPhone and you have downloaded the Echolink app, you can listen to the net live on Tuesdays at 8PM Central.

[ANS thanks Andy, W5ACM and Bruce, KK5DO for the above information]

Satellite Shorts From All Over

Amateur Radio Club K4BFT received good media coverage at Field Day this year operating near the Alabama Space and Rocket Center. Their satellite station has several shots in the media article in the link, including SatPC32. There were 3 local TV stations and 1 local newspaper that visited the Satellite Station this year. (via Tim, N8DEU)Hams like big antennas no matter what the operating mode. You'll enjoy the two videos "Moonbounce Swiss Style" when Sam Jewell G4DDK and John Worsnop G4BAO were shown round the HB9Q amateur radio moonbounce (EME) shack by Alex Artieda HB9DRI.Listen to some dramatic music, watch a fast-paced video and see a few animated high-fives in the SpaceX video and the latest views of Dragon crew capsule.The latest updates to the CQ Newsroom has news of the STRaND-2 satellite program and the ARISS volunteer initiative, along with amateur radio news.The Antenna Column by Kent Britain, WA5VJB in the Spring, 2012 issue of CQ VHF Magazinediscusses "Herringbone Log Periodics plus Another AMSAT LEO Antenna." Select the link 'Click here for a look inside!' and you will find the link to a preview version of the magazine article.Paul, 2M1EUB is making mobile satellite DX contacts from Scotland. He reports being to work K3SZH on FO-29. He plans to be on the air from Scotland until around July 8-9.Wyatt, AC0RA worked Bill OM3BD/NZ5N in Slovakia on AO-7 at a distance of over 7800 kms. Bill wrote, "The QSO was remarkably easy, we talked to each other for over a minute with strong sigs. I was expecting maybe 15 seconds of a signal way down in the noise, but this was no sweat at all, and it was just our first attempt. This suggests that significantly longer distances are possible. The AO-7 orbit seems a bit different this summer, my North America windows are longer and extend deeper into the USA."NASA/JPL posted an amazing video highlighting the incredible

engineering feat it will be to land the Curiosity Rover onto the surface of Mars.NASA Goddard Space Flight Center in Greenbelt, Maryland, invites you to try out their new, on-line game, called ☐Build it Yourself: Satellite!☐ This is a Flash-based game, a learning tool for students and adults that plays in your browser window.ARISS International Team meeting was held on Tuesday, June 19. Minutes have been posted.Plan Ahead! To celebrate Venezuelan Navy Day, members of the Grupo DX Caracas will be active as YW5B from La Blanquilla Island between July 11-16. Activity will be on 160-2 meters using CW, SSB, Satellites, FM and the Digital modes. (Ohio/Penn DX Bulletin No. 1065)The next Hudson Valley Satcom net dates are on Thurs day July 5 and July 19 at 8PM EDT (UTC-4 UTC) on the 146.97 MHz MBARC Repeater (PL 100). The echolink connection has been experiencing problems so you are invited to send an e-mail to N2OXV at arrl.net to make sure that the N2EYH-L EchoLink node is available if you plan to join via this route. (Stu, WA2BSS)

[ANS thanks everyone for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information. And with that please keep in mind the time a neutron goes into a cafe and asks the waiter, "How much for lunch?" The waiter replies, "For you, no charge." Just outside, two atoms are walking down the street and they run in to each other. One says to the other, "Are you all right?" "No, I lost an electron!" "Are you sure?" "Yeah, I'm positive!"

RAC Contest Log Question

Posted: 02 Jul 2012 12:50 PM PDT
http://forums.qrz.com/showthread.php?352377-RAC-Contest-Log-Question&goto=newpost

I'm fairly new to HAM radio(Licensed General in Sept. 2011, got first HF radio around Feb. 2012) I Picked up CW with the help of (CWA http://www.cwops.org) and now (while still learning) I'm doing well enough to peak in and try a few contests. Up until recently, I've only participated as a 'freebe' without really logging my entries only writing down the call sign and some exchange info even though not very consistently. (It's my understanding that by my not submitting a log, i'm not hurting anyone...Correct me if I'm wrong, and I'll change my MOP going forward).

This 2012 field day, I got on for fun, and made some field day contacts. 10-15 or so; and again this weekend, I casually participated in the RAC and racked up about 20 contacts. If for only the exercise, I'd like to submit my logs for the respective entities. For the RAC contest I used the N1MM logging program, and because I didn't really read the instructions, ;-) I began with the wrong contest setup so I remade the DB, and manually copied the call signs over.

Here's the question:If I don't have some of the exchange information for each QSO can I still submit the logs and will they be valid? Do they crosscheck for accuracy? I guess my question is should I even submit the logs. Or just wait until the next contest and do it right, now that I know better?

Thanks for any response. Hope the posting wasn't too convoluted. I tend to ramble when I type ;-)

73

W1A Celebrates Telstar At 50:

Posted: 02 Jul 2012 05:05 PM PDT
http://www.eham.net/articles/28572

A celebration of the world's first telecommunications satellite will take place on July 7th. This when the Radio Adventurers of Maine activate the callsign W1A to commemorate the first messages through the Telstar bird. They will be operating on site at the Andover, Maine satellite facility, the original earth station which broadcast the first messages via Telstar was uplinked on July 10th, 1962. The clubs commemorative operation will begin at 1300 UTC on both 40 and 20 meter phone.

July 4, 2012

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Summertime and the Loggin' is Easy - IARU HF
- MI QRP, SNS/NS, FISTS, Straight Key Sprints
- W0AIH to Host NU1AW in IARU HF
- Little Pistols Get Webinars, Too!
- How Do They Do It?
- CQ WPX Final Claimed Scores for CW & SSB
- Is This a Drill?
- Propagation Data Archive from Japan
- The Work of Many

NEW HF OPERATORS - THINGS TO DO

If you had fun operating on HF at Field Day, there are plenty of opportunities to keep the ball rolling. There are several sprints, digital and CW contests, and the biggest of the upcoming two weeks - the IARU HF Championship. This is a 24-hour contest that begins Saturday morning here in North America. Both CW and phone modes are used and the exchange is a signal report and your ITU zone <http://www.mapability.com/ei8ic/maps/ituzone.php> (not the CQ WW zone). Especially watch the higher bands as sunset falls and ionospheric absorption drops!

BULLETINS

Happy Independence Day to our US readers!

BUSTED QSOS

Sorry for causing any palpitations - the first use of the new Ontario section abbreviations will be this November in the 2012 Sweepstakes, not next year as reported in the previous issue. Also, the misdirection of internal links to the editor's personal C: drive was due to a newsletter editing program hiccup - apologies for not catching that on the way to publication.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

July 7-8

- MI QRP July 4th Sprint--CW (Jul 4)
- SNS and NS Weekly Sprints--CW,Digital (Jul 6)
- FISTS Summer Sprint--CW (Jul 6)
- 070 Club Firecracker PSK31 Sprint
- Venezuelan Independence Day Contest
- DL DX RTTY Contest
- Straight Key Weekend Sprintathon
- DARC 10-Meter Digital Corona
- QRP ARCI Summer Homebrew--CW

Jul 14-15

- CWops Monthly Mini-CWT Test (Jul 11)
- IARU HF World Championship
- DMC RTTY Contest
- CQC Great Colorado Gold Rush--CW

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

This year the International Amateur Radio Union (IARU) Headquarters station NU1AW will be operating in the IARU HF World Championship from the state of Wisconsin as NU1AW/9. Activity will take place on all bands on both modes from Paul W0AIH's hilltop multi-multi station in Wisconsin. The team of operators is still growing, however, some of the team members are W0GJ, N0IJ, K0MD, NE9U, W0UC and the host. With this year's contest, Paul will be one of a very few stations to have hosted both the W1AW and NU1AW operations!

Along with a new team taking the reins at North American QSO Party Headquarters (see the Conversation section below), National Contest Journal <http://www.ncjweb.com/> editor, Kirk K4RO, also announces that Chris Tate, N6WM is the new manage for the SSB NA Sprint. Chris replaces long-time manager Jim Stevens, K4MA - thanks, Jim! Because of the heavy contest schedule in February, the winter Phone NA Sprint will move to the third Sunday of March at the same time, 0000 to 0359Z on March 16, 2013. This is Saturday afternoon or evening, local time, in the US and Canada. The September dates are not changing.

It's hard enough keeping everything working at room temperature. Can you imagine trying to do it at the South Pole? The EDN article "Extreme electronics in Antarctica
<http://www.edn.com/electronics-blogs/analog-ic-startup/4375824/Extreme-electronics-in-Antarctica?cid=EDNToday>"
will take you into the shop of the most southern repair shop on the planet and introduce you to the "fuelies".

Scott N3JFP announces that the upgraded November Sweepstakes Log 4.7 <http://www.n3fjp.com/> is now available. The new version accommodates

the new Ontario sections and upgrads the Cabrillo output format to 3.0 (Cabrillo 2.0 is still being accepted). With the new sections going into effect in September, you will definitely need this version for this fall's contest. Scott will be adding the additional sections to his other major contesting programs including the Field Day program in plenty of time for next year.

While this item is a little late for the 2012 Field Day, it's never too early to start preparing for next year. The N1MM team produced a 12-minute video "Operating N1MM Logger on Field Day <http://n1mm.hamdocs.com/tiki-index.php?page=Video+-+Operating+N1MM+Logger+on+Field+Day#Video_Operating_N1MM_Logger_on_Field_Day>".
There are other helpful videos on the site, as well, and would be good training for the new operators you helped get started during Field Day. (Thanks, Larry K8UT)

Don't pass up opportunities to put ham radio in front of the public - summers are full of parades and fairs. Your club could operate a station, get a special call, work the pileups, and look fun and exciting. The St Charles ARC will be activating W0S from an actual float right in the July 4th Riverfest parade - speakers regaling the crowds with CW and voice! (Look for us at the low end of the General class band segments on 15 and 40 meters...a shameless plug.) All it takes is an enthusiastic team, some decorations, and a little ham innovation!

Engineering jokes <http://www.edn.com/electronics-blogs/other/4375942/5-Engineers--What-s-your-favorite-joke-about-engineers-?cid=EDNToday>
- no that's not an oxymoron - and EDN provides us with several groaners, some that you've probably heard, and more that you probably haven't. Enjoy!

Web Site of the Week - In past presentations and in various Webinars on contest station design, N6BV has focused on antennas at multi-multi superstations, like N6RO, W6YI, K3LR and KC1XX. But what about a Little Gun? In this latest Potomac Valley Radio Club webinar, "Antennas for Contesting -- Little-Gun vs a Superstation <http://pvrc.org/webinar/webinars.htm>", N6BV delves into more modest antenna installations that can still give a lot of bang for the buck in contests or DXing. (Thanks, PVRC President, Ken K4ZW)

WORDS TO THE WISE

"In theory, there is no difference between theory and practice. But, in practice, there is." Attributed to both de Snepscheut and Yogi Berra...I prefer Berra.

==> SIGHTS AND SOUNDS

How do they do it? Every year at Field Day, I hear some amazed operator shout, "I just worked a station that has a million transmitters!" That would be the W3AO team - check out how it's done in this great set of

photos <http://www.n3aln.com/W3AOFD2012.htm>. Amateur Radio Video News (ARVN) produced a DVD, "The Last Big Field Day <http://www.arvideonews.com/lbfd/index.html>" about W3AO's record-setting, all-time biggest Field Day effort - it makes for a great club program!

If you expect to have visitors during a contest or are setting up in a public place, here's an idea for some eye-catching PR. Connect a tablet or laptop to the Reverse Beacon Net <http://reversebeacon.net/> web site and use the call sign filter to show only spots of your call. The screen will display a zoom-able map of where your signal is being heard, worldwide. (Thanks, Pete N4ZR)

The Grumman Corporation produced the Lunar Modules that were so familiar during the space race to the Moon. EDN has packaged this nice slide show <http://www.edn.com/design/systems-design/4375902/Grumman-Lunar-Module-slideshow?cid=EDNToday> about the LM and its role in the Apollo program.

Take a look at this great 270-degree panorama <http://www.thomas-alfeld.de/dieter/afunk.php> of DJ3FS' "Funkbude" - I like that name! (Thanks, Tim K3LR)

"Wild ride at Georgetown's Power Tool Drag Race" <http://www.king5.com/video/featured-videos/A-wild-ride-at-the--158381785.html> - what more do you need to know? This is what they do in Seattle while waiting for summer to show up. There are quite a few YouTube videos <http://www.youtube.com/watch?v=gmRa9VaivNU> of the event, as well - search for "power tool drag race georgetown 2012"

==> RESULTS AND RECORDS

The final version of Claimed Scores for the 2012 CQ WPX Contest are now available for both CW <http://www.cqwpx.com/claimed.htm?mode=cw> and SSB <http://www.cqwpx.com/claimed.htm?mode=ph>. These are all of the logs received as of June 24. Scores are calculated by the log checking software and before any reductions. (Logs submitted as check logs are not included in the claimed scores.) Please check that your log has been placed in the correct category. Any feedback or corrections should be made to Randy Thompson, K5ZD <k5zd@cqwpx.com>, Director of the CQ WPX Contest.

Official Claimed Scores for the 2012 CQMM DX Contest <http://www.cqmmdx.com/logs/logs-received/> are available online, showing all logs received (including checklogs) with scores calculated before reduction by log checking process. Be sure that your log shows the correct category. If you find any errors, contact the CQMM Committee <help@cqmmdx.com> by email as soon as possible.

OPERATING TIP

You are - no you're not! When giving out exchanges, why say "You are..." and then give your own section? Wouldn't the right words be "We are..."? Actually, the right words are "Roger" or "Thank you" followed by your class and section without any extra verbiage.

==> TECHNICAL TOPICS AND INFORMATION

To pass cables underneath a driveway or walkway and if you have access on each side underneath, you can "drill" a hole with some PVC pipe and leave the pipe in place for use as a conduit. What's needed is a nozzle of some kind at the "drill" end of the pipe, and a threaded garden hose connection at the other. The nozzle can be a PVC pipe cap with some small holes drilled in the end. Water pressure will wash away the soil ahead of the nozzle. Use stiff PVC sections with fittings that can be screwed together. Add more sections as you work the pipe under the drive. Note that If you run into a rock, you're "done" and will have to try another location. Hardware stores may also have "water drill" kits that do the same job. (Thanks, Charlie N0TT and Mike K6BR)

The ARRL web site offers a three-part series <http://www.arrl.org/lightning-protection> about lightning protection and the IEEE also publishes and lightning protection guide <http://www.lightningsafety.com/nlsi_lhm/IEEE_Guide.pdf>. (Thanks, Tom W0IVJ and Larry W0QE)

Here is a simple RC filter <http://www.wentztech.com/radio/Technical/Misc/lm386.html> for the high-frequency hiss in audio output stages based on the LM386. Originally described in the SPRAT QRP journal <http://www.gqrp.com/sprat.htm>, quite a number of audio accessories and rigs use this IC. Getting rid of the hiss reduces operator fatigue quite a bit! (Thanks, Brien VE3VAW)

If you are just learning how to use an oscilloscope (or want to learn) the Instructables web site offers a nice introductory tutorial <http://www.instructables.com/id/Oscilloscope-How-To/> on learning to use the eyes of the electronic workbench.

Why are the outer shells of some coaxial power connectors positive when most are grounded? Steve KD1JV answer the question. "The reason the shell is positive is so when you have a battery-operated device with an ac adaptor jack, the shell is what activates the switch inside the jack to disconnect the internal battery...having the plus (contact) on the shell simplifies the jack wiring. Otherwise, you'd be switching the ground to the battery, and that could lead to complications. For stuff which does not have internal batteries, you will often find the adaptor which comes with the device has a negative shell."

Dink N7WA recommends the Pyle-Pro PHA40 4-Channel Stereo Headphone Amplifier that the Mike & Key Club uses at Field Day every year. Another recommendation comes from Scott W5WZ - he says, "I've had great luck using an ART HeadAmp 4 Headphone Amp. They seem to be pretty immune to RF and have independent audio gain for each of the 4 outputs.

A plus is that all inputs and outputs have paralleled 1/8" and 1/4" jacks."

One of the annual thorny problems is trying to minimize coupling between Field Day antennas while staying within the site size rules. Tom W8JI tackles this problem on his website <http://www.w8ji.com/antenna_coupling.htm> and opines, "Having two antennas in the nulls of each other is worth a whole lot more than distance."

The W1PNS/WA0ITP/AB8XA Battery Life Estimator <http://www.4sqrp.com/Battery_Capacity/index.php> is a really handy tool for testing battery capacity - something important at Field Day and for portable or emcomm use all year long. (Thanks, TJ W0EA)

Here's a tip from TS-590S owner Mark K6UFO that might also have some utility in other radios with adjustable display colors or shading - "I've read that you should configure the Menu A settings in amber and the Menu B settings in green, so you can tell them apart. Menu A/B settings are discussed in the manual on page 14."

Popular Mechanics has published the plans for an Arduino-based EMI detector <http://populamechanics/emidetector> that translates RF field strength into an audio tone. It's designed to help sniff out emitters of radio energy around the house. I wonder what it would do during a contest weekend?

Magazine roundup:

- National Geographic for June 2012 - "Solar Super Storms - How they could impact our high-tech world". Along with numerous fetching photos, the story covers the history of solar storms beginning with the enormous flare of 1859. Operators who were on the air during the 2003 CQ WW SSB contest will remember well the effect of the large flare, filling the bands with hiss and reducing the strongest signals to whispers.
- Popular Mechanics for July 2012 - "Welcome to the new solar maximum", more coverage of solar storminess which seems to have captured the public's attention. The article includes a good summary of the current solar monitoring satellites. The issue also includes "Build Your Own Telegraph" that lists parts and diagrams of a neat project for kids and students.
- Elektor for May 2012 - part three of the "AVR Software Defined Radio" adds an active ferrite antenna kit for VLF-MF reception and instructions for changing the tuning higher in frequency.
- Wired for June 2012 - Mythbusters host Adam Savage authors a great article on science and tech projects for you and your kids. He doesn't mention ham radio but you can run with the idea!

Technical Web Site of the Week - From ARRL Propagation Bulletin ARLP026, the Kyoto World Data Center for Geomagnetism <http://wdc.kugi.kyoto-u.ac.jp/> publishes planetary K and A indices

all the way back to 1932. With a perpetual calendar you can find your favorite contest weekend for any year, as well.

==> CONVERSATION

The Work of Many

National Contest Journal <http://ncjweb.com> editor, Kirk Pickering K4RO announces some changes in management for the North American QSO Party (NAQP) contests.

"After many years of service, Bruce Horn, WA7BNM will hand over management of the North American QSO Party (NAQP) to a new team of volunteers. I'd like to thank Bruce for all of the time, energy and resources he has put in to the NAQPs. These events are as vibrant and popular as ever and we have Bruce to thank for guiding their growth over the years.

"Bruce began overseeing the SSB NAQPs in January 1998 and took over the CW NAQPs in January 2003. As Bruce recalls, "Bob Selbrede, K6ZZ who was managing NAQP CW asked me if I'd be interested in managing the January 1998 NAQP SSB. Bob had been using an Excel spreadsheet for log checking, but it was limited by the maximum number of rows allowed by Excel at that time. I subsequently build at log-checking system using Microsoft Access, which was later used for CW log checking a couple of years later. I then wrote a more sophisticated log-checking system based on Web applications that I've used until the present. I started producing the CW results writeup and Correspondence (in addition to SSB) starting in January 2003. Finally, I started log checking the RTTY logs in January 2008, when the contest had a manager transition."

"In addition to assisting in the transition to the new NAQP management team, Bruce will continue to handle online certificates and team registration for the NAQPs. Bruce will also work directly with ARRL Headquarters on other contesting-related IT challenges, applying his considerable experience and programming skills.

"The new team of volunteers consists of operators who are very familiar with the NAQPs and includes contesters with decades of collective log-checking experience. Many thanks to these top contesters for offering their time and experience to carry the NAQPs into the future.

"The new NAQP contest managers (and contest report authors) are Chris Hurlbut, KL9A for NAQP CW and Bill Lippert, AC0W for NAQP SSB. Mark Aaker, K6UFO remains onboard as the NAQP RTTY contest manager. Log collection and log checking will be handled by Trey Garlough, N5KO and Tree Tyree, N6TR, respectively. Bruce, WA7BNM will continue to handle online certificates and team registration. Finally, Steve London, N2IC and Rich Strand, KL7RA will manage NAQP score records. (As the NCJ editor, Kirk will be responsible for the contest rules.)"

First, I join with K4RO in appreciation for WA7BNM's hard work to support one of my favorite contests. There is a lot going on behind the

scenes to make a contest like NAQP happen not just once a year but a half-dozen times! Thank you, Bruce. Second, if you step back and look at the transition, Bruce is being replaced not by one person but by six new workers. Six! The job has grown over the years, hasn't it?

I'll bet there is a person in your club like Bruce who doesn't get noticed all that often while doing a job that has gotten bigger and bigger with time. Does that person need some help? Does the job need to be divided into manageable chunks? My local club took a close look at the job of hamfest chair and discovered that there were basically eight major responsibilities and more than a dozen time-critical jobs that needed to be done over a sixteen-month period! Now we're careful to make sure the hamfest chair has at least one assistant and that volunteers are available to take some of those jobs.

On this Independence Day, let's take a moment to both recognize the hard-working volunteers who do so much on our collective behalf. Some are relatively anonymous (and may prefer to remain that way) but thank them anyway, publically or privately. Doing the work of many, they help make ham radio the thriving service that it is, providing enjoyment and satisfaction to us and public service to the nation and to our fellow citizens.

73, Ward N0AX

==> CONTESTS

4 July through 17 July 2012

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

IARU HF World Championship--Phone,CW, from Jul 14, 1200Z to Jul 15, 1200Z. Bands (MHz): 1.8-28. Exchange: RST and IARU zone. Logs due: 30 days. Rules <http://www.arrl.org/contests>

MI QRP July 4th Sprint--CW, from Jul 4, 2300Z to Jul 5, 0300Z. Bands (MHz): 1.8-28, 50. Exchange: RST, S/P/C, and QRPMI number or power. Logs due: 30 days. Rules <http://www.miqrp.org/>

SNS and NS Weekly Sprints--CW,Digital, from Jul 6, 0200Z to Jul 6, 0300Z. Bands (MHz): 1.8-14. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/>

FISTS Summer Sprint--CW, from Jul 6, 2000 EDT to Jul 6, 2400 EDT. Bands (MHz): 3.5-28. Exchange: RST, S/P/C, name, FISTS number or pwr. Logs due: 30 days. Rules <http://www.fists.org/>

070 Club Firecracker PSK31 Sprint--Digital, from Jul 7, 8 PM to Jul 8, 2 AM. Bands (MHz): 7. Exchange: RST and S/P/C. Logs due: Jul 21. Rules

<http://www.podxs070.com/>

Venezuelan Indep Day Contest--Phone,CW,Digital, from Jul 7, 0000Z to Jul 8, 2400Z. Bands (MHz): 1.8-28. Exchange: RS(T) and serial. Logs due: Aug 31. Rules <http://www.radioclubvenezolano.org/concurso.htm>

DL DX RTTY Contest--Digital, from Jul 7, 1100Z to Jul 8, 1059Z. Bands (MHz): 3.5-28. Exchange: RST and serial. Logs due: Aug 10. Rules <http://www.drcg.de/>

Straight Key Weekend Sprintathon--CW, from Jul 8, 0000Z to Jul 8, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: RST, QTH, name, member nr if member. Logs due: 5 days. Rules <http://www.skccgroup.com/>

DARC 10-Meter Digital Corona--Digital, from Jul 8, 1100Z to Jul 8, 1700Z. Bands (MHz): 28. Exchange: RST, serial. Logs due: 14 days. Rules <http://www.darc.de/ukw-funksport>

QRP ARCI Summer Homebrew--CW, from Jul 8, 2000Z to Jul 8, 2359Z. Bands (MHz): 1.8-28. Exchange: RST, S/P/C, QRP number or power. Logs due: 14 days. Rules <http://www.qrparci.org/contests>

CWops Monthly Mini-CWT Test--CW, from Jul 11, 1300Z with multiple operating periods, twice monthly on 2nd and 4th Wed. Bands (MHz): 1.8-28. Frequencies: 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

DMC RTTY Contest--Digital, from Jul 14, 1200Z to Jul 15, 1200Z. Bands (MHz): 3.5-28. Exchange: RST and serial. Logs due: Aug 15. Rules <http://www.digital-modes-club.org/>

CQC Great Colorado Gold Rush--CW, from Jul 15, 2000Z to Jul 15, 2159Z. Bands (MHz): 14. Exchange: RST, serial, category, CQC member nr. Logs due: 30 days. Rules <http://www.cqc.org/contests>

VHF+ CONTESTS

MI QRP July 4th Sprint--CW, from Jul 4, 2300Z to Jul 5, 0300Z. Bands (MHz): 1.8-28, 50. Exchange: RST, S/P/C, and QRPMI number or power. Logs due: 30 days. Rules <http://www.miqrp.org/>

Straight Key Weekend Sprintathon--CW, from Jul 8, 0000Z to Jul 8, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: RST, QTH, name, member nr if member. Logs due: 5 days. Rules <http://www.skccgroup.com/>

==> LOG DUE DATES

4 July through 17 July

- July 5 - ARS Spartan Sprint <http://www.arsqrp.blogspot.com/>
- July 8 - WAB 50 MHz Phone <http://wab.intermip.net/Contest%20Rules.php#OtherRules>
- July 9 - RSGB 80m Club Championship, CW <http://www.rsgbcc.org/hf/rules/2012/r80mcc.shtml>

- July 10 - REF DDFM 6m Contest
<http://concours.ref-union.org/reglements/actuels/reg_ddfm50_fr_0912.pdf>
- July 11 - ARRL June VHF QSO Party <http://www.arrl.org/june-vhf>
- July 15 - His Maj. King of Spain Contest, SSB
<http://www.ure.es/contest/431-sm-el-rey-contest-english-version.html>
- July 16 - Kid's Day Contest <http://www.arrl.org/kids-day>
- July 17 - Stew Perry Topband Challenge
<http://jzap.com/k7rat/stew.rules.txt>

Ohio/Penn DX Special Bulletin No. 1068.2

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1068.2
BID: $OPDX.1068.2
July 4, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, W2VU and N6PSE for the following DX information.

3D2C, CONWAY REEF (Press Release). Paul Ewing, N6PSE, sent out the following press release #1 on July 3rd: "The World-Wide DX Group, led by Hrane Milosevic-YT1AD, is pleased to announce our next DXpedition, as 3D2C from the remote South-Pacific atoll of Conway Reef. This Dxpedition will take place from September 24th to October 5th, 2012. The World-Wide DX Group is the same group which brought you the recent 3D2C Rotuma Island Dxpedition in September, 2011.
Our primary objective is to activate Conway Reef with a goal of providing as many DXers as possible a "new one" with this rare DXCC entity and, as a secondary objective, to give as many band-slots as possible. We will target European contacts during those periods when propagation is possible and we will ask JA and North America to stand buy during those brief periods when the bands are open to EU.
The team consists of sixteen operators including: Leader-Hrane Milozevic-YT1AD, Co-Leader Alex Romanov-UA4HOX, Co-Leader Paul Ewing-N6PSE, Dave Flack-AH6HY, David Jorgensen-WD5COV, Vasily Kozerodov-RW4NW, Dr. Alan Eshelman-K6SRZ-Team Physician, Alan Maenchen-AD6E, Sergej Yanovsky-RZ3FW, Craig Thompson-K9CT, Stanislav Vatev-LZ1CG, George Williams-N6NKT, Alexander Kuznetsov-RW3RN, Peter Sprengel-PY5CC and Mike Flowers-K6MKF.
Our QSL Manager is Hrane Milosevic-YT1AD. We will have OQRS, we will accept direct and bureau QSL cards. We plan to upload our logs to Club Log on a daily basis.
At this time, we are seeking Foundation, Club and individual support for this Dxpedition.
You can find out more about our plans at our website:
http://www.yt1ad.info/3d2c/index.html
Thank you,
The World-Wide-DX Group"

CQ NEW (Press Release). Richard Moseson, W2VU, sent out the following press release on July 3rd: "Logbook of the World Support for CQ WPX Award Goes "Live" -- Participants in CQ magazine's WPX award program may now use the American Radio Relay League's Logbook of the World (LoTW) system to apply for the WPX award and its endorsements. Amateurs will be able to use LoTW logs to generate lists of confirmed contacts to be submitted for WPX credit. Standard LoTW credit fees and CQ award fees will apply. LoTW support for the WPX award went 'live' on July 2.
Logbook of the World is the ARRL's electronic confirmation system for amateur radio contacts. It provides a confirmation when both stations in a contact submit their logs to the system and a match between the logs is confirmed.
The application process for the WPX award via LoTW is the same as applying for ARRL-sponsored awards (such as DXCC and Worked All States), according to ARRL, which adds that Logbook users will notice that a WPX account has automatically been created for them on their LoTW awards page.
ARRL adds that amateurs wishing to apply for the WPX Award via Logbook of the World will pay 12 cents for each QSO they use in their application.
A separate fee for the WPX Award (and endorsements) is payable to CQ: Subscribers will be charged $6 for each award, while non-subscribers will be charged $12 for each award. Endorsement stickers are $1 each.
WPX is the first non-ARRL award supported by LoTW. Support for the rest of CQ's operating achievement awards - including Worked All Zones (WAZ), the USA-Counties Award (USA-CA) and the CQ DX and DX Field Awards - will be phased in over time.
ARRL (www.arrl.org) is the National Association for Amateur Radio in the United States and publisher of QST magazine. CQ Communications, Inc. <www.cqcomm.com> is publisher of CQ Amateur Radio magazine and is the world's largest independent publisher of amateur radio magazines, books and videos."

Logbook of the World support for CQ WPX Award goes 'live'

Posted: 04 Jul 2012 02:34 AM PDT
http://forums.qrz.com/showthread.php?352593-Logbook-of-the-World-support-for-CQ-WPX-Award-goes-live&goto=newpost

Logbook of the World support for CQ WPX Award goes 'live'

Participants in CQ magazine's WPX award program may now use the American Radio Relay League's Logbook of the World (LoTW) system to apply for the WPX award and its endorsements.

Amateurs will be able to use LoTW logs to generate lists of confirmed contacts to be submitted for WPX credit. Standard LoTW credit fees and CQ award fees will apply. LoTW support for the WPX award went "live" on July 2.

Logbook of the World is the ARRL's electronic confirmation system for amateur radio contacts. It provides a confirmation when both stations in a contact submit their logs to the system and a match between the logs is confirmed.

The application process for the WPX award via LoTW is the same as applying for ARRL-sponsored awards (such as DXCC and Worked All States), according to ARRL, which adds that Logbook users will notice that a WPX account has automatically been created for them on their LoTW awards page.

ARRL adds that amateurs wishing to apply for the WPX Award via Logbook of the World will pay 12 cents for each QSO they use in their application. A separate fee for the WPX Award (and endorsements) is payable to CQ: Subscribers will be charged $6 for each award, while non-subscribers will be charged $12 for each award. Endorsement stickers are $1 each.

WPX is the first non-ARRL award supported by LoTW. Support for the rest of CQ's operating achievement awards - including Worked All Zones (WAZ), the USA-Counties Award (USA-CA) and the CQ DX and DX Field Awards - will be phased in over time.

ARRL (www.arrl.org) is the National Association for Amateur Radio in the United States and publisher of QST magazine. CQ Communications, Inc. (www.cqcomm.com) is publisher of CQ Amateur Radio magazine and is the world's largest independent publisher of amateur radio magazines, books and videos.

(e-mail: dl7voa@darc.de)

C9, MOZAMBIQUE
Ivor,ZS1WY, is currently active as C91IW and is expected to stay until
the end of 2013. He has been spotted already on 160m. QSL via ZS1WY.

CE, CHILE
The special event station 3G90AA celebrates the 90th anniversary of
the Radio Club of Chile until Jul 31. QSL via CE3AA.

CN, MOROCCO
Moroccan amateur radio operators may use the special prefix 5C13
from July 1-27 to celebrate the 13th anniversary of the crowning of
Mohammed VI King of Morocco.

E5, SOUTH COOK ISLANDS, OC-013
Wayne,N6NB (E51YNB), and Carrie,W6TAI (E51TAI), will be active from
Rarotonga (OC-013) in all modes on all bands from Jul 7-21. They also
plan to take part in the IARU HF World Championship (July 14/15).
QSLs for both calls via N6NB (QRZ.com).

ES, ESTONIA
Eddie,ES2TT, and Andrew,RN1CW, will show up as ES2012ABCS and ES3/RN1CW
from Haapsalu Castle (WCA ES-00003) working in CW/SSB/BPSK on 6m-40m
from Jul 6-8. The las will be uploaded to the WCA E-Log as well.
QSLs for ES2012ABCS via ES2TT and for ES3/RN1CW via RN1CW.

EU, BELARUS
The Borisov Amateur Radio Club (EW2WW) celebrates the 910th anniversary
of Borisov city by using the special event call EV910B in SSB and CW
on 80m-10m from Jul 1-31. QSL via EW2EO.
See also: http://www.qsl.net/ew2eo/award/borisove.htm

GW, WALES, EU-005
The special event station GB10SOTA is activated to celebrate 10 years

of "Summits on the Air" (SOTA) from Mount Snowdon (Yr Wyddfa, 1085m, GW/NW-001, EU-005, WLOTA 0453, Loc IO73xb). Listen for them to be QRV on HF, VHF and UHF from the highest mountain in England and Wales until July 15. QSL via MW0IDX. See also: http://www.sota.org.uk

HP, PANAMA
Sergio,HP1/IZ6BRN, has returned to Panama. Skeds can be arranged via Skype. QSL via IZ8CLM, LoTW, eQSL.

FP, ST PIERRE ET MIQUELON, NA-032
Eric,FP/KV1J, plans to hand out some IOTA points in SSB/CW/RTTY/PSK31 on 160m-6m operating from Miquelon (NA-032, DIFO FP-002, WLOTA 1417, Loc GN17) on July 10-17. If the conditions are fine he may also work via satellites. His plans include also the IARU HF World Championship. QSL via homecall. See also: http://www.kv1j.com/fp/July12.html

PA, THE NETHERLANDS
The special callsign PC100NOM is active from Jul 2-29 to promote the 100th anniversary of The Netherlands Open Air Museum in Arnhem. The operator is Fred,PA0FAW (ISWL PA-11092/WAB-11722), operating in CW, SSB and digital modes. QSL via PA0FAW.

PY, BRAZIL
The special event stations PW7FD (SSB, digital modes) and PQ7FD (CW) are working on 40m, 20m, 17m, 15m and 10m until July 30 as a tribute to Brazil's Fire Departments. QSL via PS7AB.

SP, POLAND
Jarek,SQ6OCO/p, activates Mielno Castle (WCA: SP-01236, ZWP: ZLL-03) until Jul 10. Listen for him on 7100, 14200 and 28500 kHz. QSL via homecall.

W, USA
The "Original 13 Colonies Special Event" which was announced in the last DX Newsletter has been prolonged until July 7.

VE, CANADA
The special event station CK6S is activated by the Calgary Amateur Radio Association to mark the 100th aniversary of the Calgary Stampede from July 5-15. QSL via VE6AO. All HAMs in the city of Calgary may use the special prefixes CJ6 for VA6 and CK6 for VE6 for the same period.

Awards in Friedrichshafen:
VP8ORK was awarded the "DXpedition of the Year 2011".
ZA1TC (Tevfik, TA1HZ) received the "WAEDC 2011 Hero Award".

European trip: Paolo,I2AE, has left for a 11,000 km trip through Northern Europe. He plans to activate several WFFs, IOTAs, WCAs and lighthouses.

LoTW: Freddy,F5IRO, uploaded his logs of J28RO, J25DXA and 5X1RO on Jun 26.

DXCC: Following stations are approved for DXCC credit:
3C6A (2012), 3C0E (2012), 5X1RO (2012), J28RO (2010), J25DXA (2011), XW4XR (2012)

ST2AR QRT: After two years and seven months Robert,ST2AR, went QRT with
138.000 QSOs in the log. He will work in Rome for the next 5-6 years.

SILENT KEY: Richard L. Baldwin,W1RU, holder of the Golden Badge of Honour
of the DARC, passed away at the age of 92 years on June 21.
Richard was President of the IARU and the ARRL for many years. During
this time he was responsible for the preparation of the WARC in 1979,
where the new bands 30m/17m/12m were allocated to amateur radio.
During his term as IARU President he was able to give the organization
a new representative direction.
Our condolences and sympathy are with his family and friends.
We do not want to be sad that we lost him, but grateful that we could
get to know him as a radio friend. We will always keep him in memory.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jul 7/8 DARC VHF/UHF Microwave Contest
Jul 7/8 Independence of Venezuela Contest
Jul 7/8 DL DX RTTY Contest
Jul 8 DARC 10m Digital Corona Contest
Jul 14/15 IARU HF World Championship

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
EU-014, TK, Corsica Island: Laurent,F8BBL, will be active as TK12IOTA from
Corsica (EU-014, DIFM TK-001, MIA MCO-001, WLOTA 1390) on July 7-21.
He will operate mainly in CW on 80m-10m. He also plans to operate as
TK12IOTA/p from Lavezzi Island (EU-164) on July 14 starting around
0800 UTC, and from the Sanguinaires Islands (EU-104) on Jul 18 starting
around 1000 UTC. QSL via F8BBL. See: http://rnb.dx-cw.net

EU-029, OZ, Sjaelland Archipelago: Philipp,OZ/HB9EYW, will be QRV in holiday
style from Falster Island (EU-029, DIA SJ-016, WLOTA 1961, Loc JO54XP)
mainly on 40m from Jul 10-19. QSL via HB9EYW.
See also: http://www.qrz.com/db/hb9eyw

EU-034, ES0, Hiiumaa/Saaremaa/Laanemaa County group: Frank,DL1FT, is going
to spend his holidays on Saaremaa Island (WLOTA 1401) and plans to show
up as ES0FTZ whenever his time permits from Jul 8-19. His preferred
bands are 40m and 20m. QSL via DL1FT (bureau/direct/LoTW/eQSL).
More information is available on his website: http://www.DL1FT.de

EU-075, SV, Peloponnisos (Argolis)/Attiki Region group: Nikiforos,SV1EEX/8,
is working in CW/SSB/PSK on 80m-6m from Hydra Island until mid July.
QSL only direct or eQSL via SV1EEX.

EU-115, EI/GI/MI, Ireland: Dave,WJ2O, will be on a roundtrip through
Ireland (EU-115, WLOTA 2484) and Northern Ireland from Jul 8-19.
Listen for him on the HF bands signing either EI/WJ2O/m or GI/WJ2O/m.
Dave will join the IARU HF World Championship as EI/WJ2O/m from Ireland
QSLs only direct via his homecall (QRZ.com).
Further information can be found at: http://www.wj2o.com

EU-128, DL, Schleswig-Holstein State East group: Heinz,DL4AO/p, will be QRV
from Fehmarn Island (GIA O-001, WLOTA 0637) in CW/RTTY/PSK/JT65A on
12m-30m from Jul 10-20. QSL via homecall.

EU-170, 9A, Dalmatia North group: Feri,9A/HA4BF/p, will spend his holidays
on Vir Island (ACIA IC-200, IOCA CI-141, CIA-55, MIA MC-451,WLOTA 4050)
from Jul 8-21. He will operate in SSB only.
QSL direct to HA4BF or via LoTW and eQSL.

EU-171, Jylland North group: Ric,DL2VFR, will be active mainly in CW on the
HF bands signing OZ0FR/p from Vendsyssel-Thy on Jul 7-20.
QSL via DL2VFR (bureau/direct). See: http://www.iota-expedition.com
---
Rene,OZ/DL2JRM, Anett,OZ/DO6XX, and Robin,OZ/DO2XX, are working from
the same island from Jul 7-21. They will use 100 watts and GP on 80-10m
in SSB and CW (only DL2JRM) QRV. Rene also plans short trips to other
DIA islands where he will show up as OZ/DL2JRM/m. QSLs via homecalls.

OC-177, YB0, Seribu Islands: 30 different operators are going to activate
Pulau Kaliage Besar (Loc OI34GI, YBFF-025) from July 6-9. Listen for
YE0M in CW, SSB and RTTY on 2m-160m. QSL via YB1GJS.
See also: http://ye0m.com

US Islands: Frandy,N1FJ/p, will be QRV from Three Mile Island (USi NH020,
not IOTA) from Jul 8-13. This island is located on Lake Winnipesukee
in Belknap County/New Hampshire. He will work mostly in CW on 15m-40m.
QSL via homecall.

Lighthouse activities

FP/KV1J LH 1417 Jul 10-17

WFF activities

DLFF: Some members of the clubstation DK0ASP will be active from the
Nature Reserve Rotwildpark Stuttgart (WFF DLFF-146) on Jul 7/8.
This will be the first activation of this nature reserve. They will
be QRV as DL2A with two stations on 20m, 30m and 40m. All QSOs will
be confirmed with a QSL via bureau.

FFF: The special event station TM7TDF (Tour de France) will be QRV from the
Parc Regional (FFF-078) on Jul 7/8. They will be active also from the
mountain Planche des Belles Filles (SOTA F/JU-027) on Jul 6/7.

MMMonVHF Newsletter no. 1/ WEEK 27 2012

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2012-07-04
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

HOT 144 MHz MS & EME DX-PEDITION NEWS - Pse do use:
http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: ZP: Paraguay ; square GG22; start 2012-07-07 **

Greetings from Paraguay,

I apologize for the need to change my operation, but family obligations
make it necessary.

I will not be on the air on Saturday July 7, but will be QRV from 0220z
(moonrise) on July 9 (my Sunday night) for several hours. QRG should be
144.131 and I will transmit first. I will be on the N0UK logger for
information.

I hope to hear all of you better with the new preamp!

This will be my last day to operate before returning to the U. S. for
six months. However, on my return to Paraguay in February I plan to be
active on EME on both 144 and 432 mHz from Asuncion.

Looking for many of you on Saturday...

73 de Steve ZP9EH

SOURCE: Moonnet

** DXCC: VP9I: Bermuda ; square FM72; start 2012-07-13 **

All is prepaired and running well. Outside the hours on the Moon the
Team will be qrv for Tropo and MS as well (any skeds pse Mail to DL9MS).
Callsign VP9I is confirmed (thanks to VP9GI!)
A team consistant of Dit, DF7KF, Angelo, DM1AC and Joe, DL9MS
are going to be qrv from Bermuda, FM72OH in July on 144 MHZ via EME
First Infos about the Bermuda Triangel Expedition
to FM72oh

RIG on 144 MHz: xp28 by 7kf, eme power and lna
Call shall be DF7KF/VP9 or possible a special licens call

QSL: only direct to Joe, DL9MS (no QSL via buro!)

SOURCE: to to Joe, DL9MS, direct to MMMonVHF

Latest V/U/SHF DX-PEDITION NEWS and EVENTS - Pse do use:
http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: ES: Estonia; square KO18; start 2012-06-26 **

Hallo, during my holidays on the island saaremaa I will activate KO18.
Activities from ko17/07/08 are also possible. more info later.
RIG:150W+11el Yagi

SOURCE: tnx to Ronny DL1RNW direct to MMMonVHF

** DXCC: YU: Yugoslavia; square KN04; start 2012-07-06 **

YT7W (YU7BCD) will be active in July V/U/SHF contest from KN04OW

YT7W (YU7BCD) will be active in July V/U/SHF contest on 2m band fm KN04OW with RIG:
OK/DL - 8 x 5 el. vert. stack + GS35 power - 24h
YO/UR - 4 x 6 el. vert. stack + 2x GI7 - 24h
I - 4 x 8 el. vert. stack + GS31 - 24h
SE/SW rotary system 11 over 11 el. + abt. 500W.

We'll be on 144.126 + - QRM CW
and 144.226 + - QRM SSB

Hope you'll find us easy.
Good luck in contest, Nesa YU2M

SOURCE: tnx to Nesa, YU2M, direct to MMMonVHF

** DXCC: LZ: Bulgaria; square KN32; start 2012-07-07 **

LZ9M qrv begin of july on KN32QP in Field Day Contest

LZ3GM & LZ5GM are going to test a new hill during the Field Day Contests.
We wish good luck to everyone!

SOURCE: tnx to Ivan, LZ3GM, direct to MMMonVHF

** DXCC: OH&SM: Finland&Sweden; square KP43-KP46-KP07-KP03; start 2012-07-09 **

Peter PA3BIY traveling through OH & SM with 2m station.

"From July 9th till the 31st we will be travelling in the Nordic countries for
a Holiday. However, I will have some 2 m equipment with me, and try to activate a
few squares along the route via MS. These are the provisional dates where I might
be active from the following locations:
July 12-16: KP43
July 16-18: KP46
July 21-22: KP07
July 23-24: KP03

In KP07 I may have the chance to be QRV from Dundret mountain, which has a magnificent
take-off towards the south.
During the trip I will try to be active on KST to announce my plans, but can't promise
anything! And as I will be travelling together with my XYL, Ham radio may not always
have first priority ;-) .

Equipment home made, 9 el. tonna and 400W
Hope to cu many of you on 2 m,

Peter, PA3BIY

SOURCE: Peter direct to MMMonVHF

** DXCC: F :France; square JN18; start 2012-07-12 **

FRENCH SPECIAL EVENT: This year 2012 is the 70th anniversary of the FRENCH ARMY SIGNAL
CORPS .

Starting July 12th until July 15th, in Paris, among the festivities of the French 14
Juillet,
will be held a special ham event from a very rare location .
>From the 3rd floor of the Tour Eiffel (about 300 m over ground), some Hams, all
Servicemen,
will be active, 24h a day. The crew consists namely of : Philippe/F5SKW, Dimitri/F5SWB,
Freddy/F5IRO,
David/F8CRS and Yves-Michel/ F5PRU. Some of them were operators in the past at TO4E or
FT5GA.
The callsign claimed is TM70TRS, but it could be also TM70TE
The activity is scheduled on CW, SSB and RTTY, HF & VHF bands (Grid Locator JN18DU)
A special QSL card to confirm your QSO?s will be available from the F6KHX ARC or from

Didier/F5OGL,
both either direct or via the French bureau.

Special notice for those who are able to receive the French TF1 TV Network programmes ;

A French TF1 TV Network technician?s team managed by the journalist Anne-Claire Coudray, has made a movie, showing the operators when preparing the station, for the operation, on last June 19th.
This movie will be included in the July 14th, morning (utc+2) , French Forces parade on the Champs Elys?, TV report. Have fun and luck.

SOURCE: tnx to Maurice, F5NQL, direct to MMMonVHF

** DXCC: EW: Belarus; square KO32-KO42; start 2012-08-01 **

Next Expedition from the SUDXF Team from KO43&KO32

>From August 1 to August 10, the team SUDXF will QRV MS, EME, TROPO of squares KO42, KO32. We start at the same time of two squares: one EME, from another MS and TROPO. After four days,
changing squares. Call - EW/UT2GWW. Range - 144 MHz? may be and 432 MHz. Frequencies: EME - 144,138 MHz,
MS - 144.353 MHz. The work is always in the first period.

Operators: EME - Anatoly, UY5HF, Alex, UR7GO. MS - Vlad, US8ZAL, Mike, US0GM.

QSL via US8ZAL

SOURCE: tnx to US8ZAL, direct to MMMonVHF

** DXCC: D6: Comoros; start 2012-08-01 **

Hi all

It?s just 6 weeks before the expedition and I promised to keep you informed.
These are our last news: We will arrive to Comoros on August 8^th and we will
be qrv on 6 meters from the following day, August 9^th until the 20^th .
We will run a dedicated station with K3 + pr6 preamp, ACOM1000, and a 6m8gj antenna.
QRV cw, ssb, digi modes (jt65a, iscat and jt6m) and EME . We will run a breakable beacon on cw or jt65a. We hope to have internet access and will be on on4kst chats.
QTH will be LH18PJ just at sea side. By now we have got the license for
HF and 6 meters and flight tickets are already booked.

Schedule is as follows:
8/8 arrive to qth
9/8 install 6m station
First windows:
9/8 MR at 21.10Z
9/8 MS at 09.00Z
Last windows:
19/8 MS at 16:40Z
20/8 MR at 05:05Z

20/8 pack 6m station and return home
MR will be looking to mountains in the island about 200 meters high at 2 Km, will see how it works.
MS will be looking to the sea, expecting good ground gain and low noise.
We don?t have any particular frequency, usually I will TX first on 193.
We will have elevation when moon is higher than 20 degrees. We expect to run about three hours
before/after MS/MR, and use the rest of diurnal time for terrestrial modes. Of course, if F2/TEP
opens it will have priority, sorry, I think you will understand us.

Hope to work all you from D64K

73 Josep
EA3AKY

http://ea3aky.blogspot.com/__

HF and 6m Activity planed as D64K (LH81PJ)

We will have a station dedicated to 6m with a K3, ACOM1000 and long yagi.

Dates to be confirmed.

Operators are: C31CT/EA3QS, IW3SQY, IZ4AKS, IZ8GCE, SP3DOI, IV3DSH, EA3AKY

Expedition website: www.d64k.com

SOURCE: Josep EA3AKY direct to MMMonVHF

** DXCC: VU: India; square ????; start 2012-05-23 **

Until July 8th, Taj, VU2DJ, Sabu, VU2ELJ, Sree, VU2OB, Prabin,
VU2POL, Peeter, VU2PJP, Murali, VU2FWW, Thomas, VU2VJT, Sunil,
VU2ATB, Ashraf, VU3MTY, Mujeeb, VU3WII and Sanal, VU3SIO, will
activate the special call sign 8T1M from 160 - 2 Meter in CW, SSB,
PSK, RTTY, FM and D-STAR. QSL via VU2MLQ.
http://www.malabarradiohams.org/

** DEADLINE for your NEWS input to MMMonVHF**

Call Signs: Radio Enthusiasts Connect with Nature, the World:

Posted: 03 Jul 2012 06:34 PM PDT
http://www.eham.net/articles/28577

A lot of people who spend a couple of days in the wilderness are there to roast marshmallows, cook Dutch oven potatoes and recount campfire stories. When members of Cache Valley's Bridgerland Amateur Radio Club (BARC) met June 23-24 and staked out spots up Logan Canyon's Swan Flat Road, they weren't there for the traditional camping experiences, though. The BARC's focus was to make contact with people all around the country and even the world. At least 40 members of the local club made their way up Logan Canyon last weekend as part of the American Radio Relay League's (ARRL) 2012 Field Day. Approximately 35,000 amateur radio operators throughout the nation -- the ARRL's largest annual gathering -- participated in Field Day. "It just gives an opportunity for different amateur radio clubs or groups to operate for 24 hours ... to get out and operate on emergency power," said BARC President Cordell Smart. When Field Day, which takes place over a 24-hour period, rolls around, makeshift radio stations all over the country -- some of them quite intricate -- are erected, and they operate on alternate power sources. The BARC used a spud gun to connect a series of antennae with hay baling twine. The club constructed a few different radio setups, including one for digital mode (PSK, RTTY) and morse code (CW). The BARC also had its UHF Portable Repeater on hand, which was then connected to the club's repeater system. The club operates on a series of three repeaters -- Mount Logan, Promontory Point and Red Spur. "There's really lots of things within amateur radio that are available, so it's not just one single thing," said Smart, who has been involved in amateur radio for more than 40 years. "There are many, many things, and that's what makes it so exciting and enjoyable is trying out those different aspects of amateur radio."

//
Plan for 20m Radio Mast Opposed:

Posted: 03 Jul 2012 06:32 PM PDT
http://www.eham.net/articles/28576

A Tauranga neighbourhood is in an uproar after it discovered that it will soon be overlooked by a giant radio aerial. They discovered too late that instead of amateur radio aerials having a maximum height of 9 metres in residential areas, a successful appeal has hoisted the height to 20m. The appeal by the Tauranga Emergency Communications Group and the New Zealand

Association of Radio Transmitters was not site specific and applied across all the city. They objected to rules in the council's proposed new City Plan that would have restricted new aerials to 9m. Older aerials around the city that pre-dated the current plan reached up to 16m. The first that Veda Glen residents heard about the Environment Court decision was when Pyes Pa radio ham Brian Heywood notified neighbours about his intention to erect a 20m high radio mast in his backyard. It would be topped by a flat rack of antennae measuring 13m long by nearly 15m wide. By the time Mr Heywood spoke to residents, Judge Jeff Smith had delivered his interim decision to partly allow the appeal, reducing the 26m height sought by the radio hams to 20m. The news came as a big shock to one of the residents closest to proposed mast, Janet O'Shea of Lochay Place, Veda Glen. She quickly organised a protest meeting last Saturday attended by 50 residents. "We were a very unhappy group of people. What irks all of us was that no one knew anything about this until it was too late." The irony was that their subdivision had a covenant to stop aerials protruding into views. Mr Heywood's home on a kiwifruit orchard sat beside one of the boundaries of Veda Glen. Mrs O'Shea said the mast and antennae would be visible from all over the subdivision and from points further afield like Aquinas College and the historic Te Maunga battleground. "It will be like a beacon." She was also concerned by the wider ramifications of Judge Smith's decision because it meant that radio hams would be allowed to erect 20m high masts as of right, without any consent needed from neighbours. "It will impact not just on us, but the entire community. It's a massive decision. I would ask the question as to whether or not every impact of such a structure has been taken into consideration on his decision making." Another neighbour Anne Porter said they would look straight at the aerial from their living room. "He has total disregard for the people around here ... he can do what the hell he likes and stuff everyone else, it's not right in my view." Mr Heywood, a retired radio engineer, responded that the appeal was on behalf of all Tauranga's amateur radio operators. There were 90 in the club and he represented the emergency communications group in the appeal. Although he could see his neighbours' points of view, he expected that, to some people, his new aerial would be a seven-day wonder and three months down the line people would accept it as a normal part of the neighbourhood environment. "It is a case of getting used to it."

San Jacinto Prankster Arrested Again for Pointing Laser at Fire Engine:

Posted: 03 Jul 2012 06:30 PM PDT
http://www.eham.net/articles/28575

SAN JACINTO, Calif. (KABC) -- A 31-year-old San Jacinto woman was behind bars for a second time after allegedly pointing a laser at a firefighter behind the wheel of a fire engine. Irene Levy's colorful history makes her no stranger to her community or local law enforcement. She is best known in San Jacinto for a stunt she pulled in May 2010 when she used an amateur radio to interfere with an emergency response dispatcher. Levy was found guilty of jamming emergency radio frequencies by broadcasting threats and making a fake bomb threat. As part of her probation, she was ordered to

complete a mental health program and stay out of trouble. But early Saturday morning, police said Levy violated her probation by pointing a laser beam at a CalFire crew twice as they responded and then returned from a call.

ARRL's Logbook of the World Now Supports the CQ WPX Award:

Posted: 03 Jul 2012 11:07 AM PDT
http://www.eham.net/articles/28574

Hicksville, NY - July 3, 2012) -- Participants in CQ magazine's WPX award program may now use the American Radio Relay League's Logbook of the World (LoTW) system to apply for the WPX award and its endorsements. Amateurs will be able to use LoTW logs to generate lists of confirmed contacts to be submitted for WPX credit. Standard LoTW credit fees and CQ award fees will apply. LoTW support for the WPX award went "live" on July 2.

PS1J - Brazillian National Jamboree - Brazilian Scouts

Posted: 04 Jul 2012 10:51 AM PDT
http://forums.qrz.com/showthread.php?352657-PS1J-Brazillian-National-Jamboree-Brazilian-Scouts&goto=newpost

During the 5th Brazilian National Jamboree occuring in Rio de Janeiro -
Brazil, between July 15th and 20th, the brazilian scouts organization,
named "União dos Escoteiros do Brasil" will activate the amateur radio
station PS1J

It will be a great opportunity to the young scouts taking part of the
event, supported by a team of scouting hams and a team of hams from
LABRE-RJ (national amateur radio association, Rio de Janeiro office), to
get in touch with the radio, to talk with another radio stations all over
the world, prepare the QSL card to send, learn about radio technique, CW
code, to make new friends and live some "radioscouting".

As so, we invite amateur radio fellows around the world to make contact
with the station PS1J during this event, specially at day time in Brazil,
from 10am-9pm UTC, when the scouts will be near the several radios
operating the station. The PS1J station will be active almost 24h a day
during "5th National Jamboree".

This will be a BIG event for scouting in Brazil, getting near 5000 members
camping on same site.

Frequencies to work will be: 3,740 Khz - 7,090 KHz - 14,290 KHz - 21,360
KHz - 28,390 KHz - Echolink @ JOTA-P / Scout-BR.

JULY 15th to JULY 20th, 24h a day...

PS1J Team

==> PUBLIC SERVICE: COLORADO HAMS PROVIDE DISASTER COMMUNICATIONS
DURING WILDFIRES

Thanks to an extremely dry season, portions of Colorado have been
ravaged by wildfires. As of July 5, only a handful of the fires are
considered extinguished or fully contained, with the majority
considered still active. According to InciWeb, almost 170,000 acres are
affected by 11 active fires. Since June 9 -- when the High Park Fire,
the first of the wildfires began -- hams in Colorado have been
assisting with disaster communications, providing communications
support to the State and served agencies. Read more here
<http://www.arrl.org/news/colorado-hams-provide-disaster-communications-durin
g-wildfires>.

==> ON THE AIR: LOGBOOK OF THE WORLD NOW SUPPORTS CQ'S WPX AWARD
```

The wait is over! After weeks of beta testing, the ARRL launched the integration of Logbook of The World (LoTW) -- its electronic confirmation system -- with CQ Magazine's Worked All Prefixes (WPX) Award on Monday, July 2. The WPX Award is the first of the CQ-sponsored awards that LoTW will support. More than 51,000 radio amateurs worldwide use Logbook of The World, and there are currently almost 432 million QSOs in the LoTW system. Read more here <http://www.arrl.org/news/arrl-launches-logbook-of-the-world-wpx-award-integration>.

==> AMATEUR RADIO IN SPACE: TRIO FROM ISS LANDS SAFELY IN KAZAKHSTAN

Three members of the Expedition 31 crew undocked from the International Space Station and returned safely to Earth Sunday, July 1, wrapping up a mission that lasted almost seven months. Russian Commander Oleg Kononenko, RN3DX, along with NASA Flight Engineer Don Pettit, KD5MDT, and European Space Agency Flight Engineer Andre Kuipers, PI9ISS, landed their Soyuz TMA-03M spacecraft in Kazakhstan at 0514 UTC. The trio -- who arrived at the station December 23, 2011 -- spent a total of 193 days in space, 191 of which were aboard the ISS. Read more here <http://www.arrl.org/news/trio-from-iss-lands-safely-in-kazakhstan>.

==> ON THE AIR: THE IARU HF CHAMPIONSHIP HEATS UP THE SUMMER

Radiosport fans are gearing up for the summer's biggest HF competition: the IARU HF World Championship <http://www.arrl.org/iaru-hf-championship>. This 24 hour long contest is the highlight of the summer HF contesting season, with plenty of opportunity to work DX from all around the globe on CW and SSB. Participants also get the chance to make QSOs with many IARU Member Society club stations and officials.

"The IARU HF Championship is one of radio sport's unique events," said ARRL Contest Branch Manager Sean Kutzko, KX9X. "It's the only major contest that uses International Telecommunication Union (ITU <http://www.itu.int/>) zones <http://iaru.org/ituzonesc.gif> as part of the exchange, and the only contest that gives special multiplier status for IARU Member-Society stations and their officials."

Hams can get in on the fun in a variety of ways. You may choose to enter as either a single operator, using either SSB only, CW only or a mixture of both modes. Single operator stations can choose from three power levels: High Power (greater than 150 W), Low Power (between 5 and 150 W) or QRP (5 W or less). You can also get some friends together at one station and participate as a Multioperator station with a single transceiver.

One of the fun things to do is see how many of the IARU special stations you can work during the event. "While most stations give their ITU zone as part of the contest exchange, IARU Member-Society stations give the abbreviation for their IARU society name, such as "ARRL" for W1AW," Kutzko explained. "In addition, IARU officials can give one of

four unique exchanges: AC if they are on the IARU Administrative Council, or R1, R2 or R3 for the ITU Region that official serves. It is always special to see so many nations represented on the air by their national organization. It reinforces the global nature of Amateur Radio and the common bonds we all have as amateurs."

The IARU HF World Championship <http://www.arrl.org/iaru-hf-championship> begins at 1200 UTC Saturday, July 14 and goes until 1200 UTC Sunday, July 15. Complete rules may be found online <http://www.arrl.org/contests>. Logs may be submitted via e-mail <iaruhf@iaru.org>; paper logs should be mailed to IARU International Secretariat, Box 310905, Newington, CT 06111-0905 USA. All logs must be e-mailed or postmarked no later than 1200 UTC August 14, 2012.

==> FCC NEWS: CALIFORNIA HAM CITED $17,000 FOR OPERATING UNLICENSED RADIO STATION

On July 2, the FCC issued a Notice of Apparent Liability for Forfeiture and Order in the amount of $17,000, accusing Brian R. Ragan, KF6EGI, of Suisun City, California, of "apparently willfully and repeatedly violating" the Communications Act of 1934, as amended, by operating an unlicensed radio transmitter on frequency 104.9 MHz and failing to allow an inspection of his station by FCC personnel. The Commission said that Ragan, "as a licensed Amateur Radio operator for at least six years, [he] should be aware that any radio equipment at his station must be made available for inspection at any time when requested by the FCC, and also should be aware of the proper operation of his amateur station in accordance with the Rules." Read more here <http://www.arrl.org/news/california-ham-cited-for-operating-unlicensed-radio-station>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things that the ARRL is doing on behalf of its members. This installment -- which covers the month of June -- takes a look at the new 9 cm band plan and a proposed 23 cm band plan, education and resource grants to schools, nominations for Director and Vice Director in five ARRL Divisions, W1AW's spring antenna inspections, the ARRL VEC preparations for the new Amateur Extra class exam, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-47>.

==> SOLAR UPDATE

Tad "A firework, a dancing flame <https://www.youtube.com/watch?v=uuwfgXD8qV8>" Cook, K7RA, reports: Solar activity jumped way up this week, with average daily sunspot numbers increasing by nearly 92 points to 118.1, while the average daily solar flux rose to 138.5 from 92.8 the week before. One new sunspot group appeared on June 29, another on July 1 and two more on

July 4. Geomagnetic activity this week was concentrated on June 30-July 2, and the causes were the usual suspects: solar flares and solar wind spewing from coronal holes. One unusual aspect was that the mid-latitude A index, measured in Virginia, was actually higher on July 3-4 than the planetary A index, which is usually higher than mid-latitude numbers. The planetary A index is made up of an aggregate of data from multiple geomagnetic observatories. The outlook for the near term is for increasing activity over the next few days, with solar flux at 155 on July 5, 160 on July 6-7, 155 and 150 on July 8-9, 145 on July 10-11, then 140, 135, 130, 125 and 110 on July 12-16. Solar flux is expected to dip below 100 on July 19-22. The planetary A index is expected at 8 on July 5-8, 10 on July 9, 7 on July 10 and 5 on July 11-26, followed by another active period with planetary A index at 20 on July 27-28 and 15 on July 29-30. Look for more on the ARRL website on Friday, July 6. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Katy Perry's Part of Me <http://en.wikipedia.org/wiki/Part_of_Me_%28Katy_Perry_song%29>.

==> ARRL RECOGNIZES: DENNIS JOHNSON, KF0QR, WINS JUNE QST COVER PLAQUE AWARD

The winner of the June QST Cover Plaque Award is Dennis Johnson, KF0QR, for his article "A 160 and 75/80 Meter Folded Dipole." Congratulations Dennis! The QST Cover Plaque Award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the July issue today.

==> THIS WEEK IN RADIOSPORT

This week:

- July 6 -- NCCC Sprint
- July 7-8 -- Venezuelan Independence Day Contest; DL-DX RTTY Contest; Original QRP Contest; PODXS 070 Club 40 Meter Firecracker Sprint (local time)
- July 8 -- SKCC Weekend Sprintathon; DARC 10 Meter Digital Contest; QRP ARCI Summer Homebrew Sprint
- July 9 -- NAQCC-EU Monthly Sprint
- July 11-12 -- CWops Mini-CWT Test

Next week:

- July 14 -- FISTS Summer Sprint
- July 14-15 -- IARU HF World Championship
- July 15 -- CQC Great Colorado Gold Rush
- July 19 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update

<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- July 20-22 -- ARRL Montana State Convention

DXCC-East Convention, Aug. 25, 2012 - Frederick, Maryland (For DXers and Contesters)

Posted: 04 Jul 2012 07:44 PM PDT
http://forums.qrz.com/showthread.php?352719-DXCC-East-Convention-Aug-25-2012-Frederick-Maryland-(For-DXers-and-Contesters)&goto=newpost

I look forward to see all that can make it to the 1st DXCC-East Convention in Frederick, Maryland on Saturday, August 25, 2012, 8:30 AM to 9:00 PM. We have a full day planned with dinner, great speakers and three Grand Prizes (IC-7600, FT-2000 and ACOM-1010) plus more.

Website: www.dxcceast.com

If you live in Maryland, Wash. DC, Virginia, West Virginia, Delaware and PA, you should not miss this event. No matter where you live, you are welcome to visit our wonderful state. It is our plan to make this event like the Visalia convention only on the east coast. Any money made from this evening will be used to support DX related activities (i.e. dx-pedition donations, educations and training and youth development).

As of today, July 4 we have 61 confirmed people for the dinner from 10 states and two countries.

Our goal is to have 150 - Please Please come join us in making this a successful event!

Sincerely,

David Collingham - K3LP

NCDXA President

WIANEWS WEEK COMMENCING JULY 8 2012.

Georg Schneider, VK2FDW SKEY (txt edition)

Joining us this week is Mal Brooks, VK3FDSL for the WIA along with VK4ERM and
VK3KI WIA President

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JULY 08 2012.

DO NOT RESPOND.

If you receive an email supposedly from wia about upgrades DO NOT RESPOND

The mail reads something like "This is to inform you that we are upgrading
the (wia.org.au) webmail system for an increase in storage quota. To
re-validate and increase your webmail account please click the link below."

IT IS SPAM.

If need be in the future we do need an upgrade it will be announced in the
AUDIO news service or on the WIA FRONTPAGE NEWS.

WIA
President Michael Owen VK3KI president@wia.org.au

Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Greetings Everyone, from the President and Board of the WIA.

Several amateurs have contacted the WIA asking what is the WIA Board going to do about the significant increase in amateur licence fees. Of note is advice received from the ACMA that the Amateur Radio Licence fee has increased from $67.00 to $72.00 as of the 1st July 2012.

This increase was mooted in late November last year, communicated to the amateur community by the WIA and is now published in ACMA document 'Apparatus licence fee schedule 1 July 2012.

Appendix A: Changes to the fee schedule April 2012, to the document highlights the role of the Consumer Price Index on apparatus licence tax. This ACMA publication can be read in its entirety on the WIA website at:

wia.org.au/members/legislation/other/documents/licence_fee_schedule-1july2012.pdf

Two components are considered in determining the cost of an amateur licence. Firstly, the actual costs incurred by the ACMA in managing the system, and, secondly, a tax component linked to CPI as explained earlier.

The Commonwealth 'Cost Recovery Guidelines', requires the ACMA to increase the management cost component by the cost increases it has incurred. Hence, the proposal, in November 2011, to increase the cost of amateur licences by $5 which became effective on 1 July 2012.

The WIA is similarly required to operate under the 'Cost Recovery Guidelines. The cost increases proposed by the ACMA are factual and answers the question 'Has the cost incurred by the ACMA in providing a service increased and if so by how much?' It is unlikely the ACMA is unable to demonstrate the cost increase it has identified.

As much as we may feel resentful and upset by the increase in our licence fees they are based on sound principles of Cost Recovery to which the WIA is required to comply as is the ACMA.

This has been Ewan VK4ERM for the WIA Board

Licence fee variation -- has increased from $41.00 to $49.00

Annual fee -- $72.00
2 years ---- $141.00
3 years ---- $209.00
4 years ---- $277.00
5 years ---- $346.00

These changes are effective as of 1st July.

Regards

WIA Office

This is Mal Brooks, VK3FDSL for the WIA

Last month the WIA Board announced that the 2012 Club Grant Scheme would continue with a maximum sum of $6,000 to be distributed this year. As a result of the discussion at the recent Open Forum, new Rules have been adopted with a much simpler and wider test for a Grant.

For a project to receive a Grant it must be considered by the Grant Committee and the Board to be sufficiently useful for any one or more of amateur radio, the Affiliated Club or the WIA to justify the making of a Grant.

The new Rules are on the Affiliated Club section of the WIA website, (HTTP://WWW.WIA.ORG.AU) together with an application form

To be eligible for consideration, an application for a Grant must be lodged by Monday 20 August 2012.

This is Michael Owen VK3Ki WIA President.

Let me update you on the 70 Cm band.

Internationally, the 420 - 430 MHz part of the 70 cm band exists by a footnote allocating the band on a secondary basis to amateur only in the USA, Jamaica, the Philippines and Australia.

In fact, use of the part of the 70 cm band 420 to 430 MHZ in Australia has been restricted to Advanced licensees and further restricted by various exclusion zones in NSW, the ACT, and the Jervis Bay area, Sydney, Perth and Melbourne.

In April 2008 the WIA reported on the public consultation by the ACMA in respect of its review of the band 403 - 520 MHz.

>From the outset it was obvious that the amateur band 420 - 450 MHz would be affected. Fairly early on, the bands 430 - 450 MHz was announced to be "out of scope" for the review. However, the ACMA has indicated that segment from 440-450 MHz may be used on a temporary basis by displaced land mobile services until they are relocated during the transition phase.

In September 2008 the WIA reported on the release of the submissions received by the ACMA, and in June 2010 the WIA further reported on the ACMA's announcements.

An examination of the WIA 70 Cm Band Plan shows that the band 420 - 430 MHz is largely "Restricted".

The band is allocated in Australia to radiolocation and mobile as primary, and that primary mobile use is by government networks supporting essential and emergency networks supporting police, fire and ambulance. That use commenced in 1999, and since 2009 the Council of Australian Governments has supported interoperability and harmonisation of those services.

The only real problem that the withdrawal of this segment creates is that there are a number of repeater link assignments that will need to be moved by 1st January 2013. There are some 34 licensees affected, mainly clubs.

In addition, there are other amateur repeater links that may be able to operate beyond that date, and the WIA is currently negotiating with the appropriate parties. When the matter is clarified, the WIA will also be in contact with the relevant licensees.

While the ACMA will be formally writing to the affected licensees, the WIA has undertaken to contact each licensee as soon as it is able to do so, to ascertain whether there are any special difficulties in moving and to ensure that the WIA repeater frequency coordination is available to assist as required.

Despite the issues yet to be resolved, the ACMA has advised the WIA that the band 420 to 430 MHz will be withdrawn as a secondary allocation at least for general amateur use from 1st January 2013.

SILENT KEY

It is with a great deal of sadness that we inform you of one of the gentlemen of Ham Radios passing, Mr Georg Schneider, VK2FDW from Wallsend in Newcastle.

Georg was 87 years of age.

Georg passed away on Wednesday 27th of June from a heart attack.

Georg had only recently moved to Wallsend from Stockton in Newcastle where after a considerable hassle with local council managed to finally get approval to install his Nally tower and his 4 element triband antenna.

Georg had a network of radio friends in the USA that gave him a great amount of pleasure to keep in touch with these friends from his new QTH, on his new antenna system.

There will be a memorial service for Georg on the 11th of July at Pettigrew Funerals of Wallsend at midday.

Submitted by Grahame O'Brien VK2FA on behalf of Charlie Hunt VK2CLH

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

W1A CELEBRATES TELSTAR AT 50

July 7, a celebration of the world's first telecommunications satellite.

This date is when the Radio Adventurers of Maine activates the callsign W 1 A to commemorate the first messages through the Telstar bird.

They will be operating on site at the Andover, Maine
satellite facility, the original earth station which
broadcast the first messages via Telstar was uplinked on
July 10th, 1962. The clubs commemorative operation will
begin at 1300 UTC on both 40 and 20 meter phone. Other
bands will be added as propagation allows.
QSL as directed on the air.

ETHERKIT RELEASES QRSS BEACON KIT

Etherkit which is a new amateur radio kit company devoted to open source hardware, has released its first product.

Called OpenBeacon, it is described as an open source crystal-controlled QRP beacon transmitter kit which can output a variety of slow-speed modes.

These include QRSS, DFCW, and Sequential Multi-tone Hellschreiber.

More information is on-line at etherkit.com

Amateur Radio Newsline celebrates 35th anniversary

America's most highly-respected ham radio news service is marking something of a milestone. AR Newsline has just celebrated its 35th anniversary.

Producer Bill Pasternak, WA6ITF writes:

In talking with Robert Sudock, WB6FDF, we realized that this week's newscast marks the 35th anniversary of the Amateur Radio Newsline.

I find it hard to believe that we have survived all of these years and that we are as fervent about what we do today as we were when Jim Hendershot, WA6VQP, and I produced that very first newscast -- then known as the Westlink Amateur Radio news -- some 1,820 weeks ago.

Thank you all for being a part of the Amateur Radio Newsline family.

Bill Pasternak, WA6ITF
Producer, etc..

NEW DATA TRANSFER METHOD PROMISES UP TO 2.5 TB PER SECOND

We have reported the basics on this earlier this year now further as American and Israeli scientists developed a new technology of wirelessly transmitting data using twisted beams of light that could produce a theoretical throughput of 2.5 terabits per second.

Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, has the story of the science making this possible:

The new method of high speed data transfer reportedly uses orbital angular momentum or O-A-M to increase the amount of information that can be carried by a single stream. To accomplish this feat, the researchers twisted together eight 300 Gigabytes per second visible light data streams using O-A-M technology over a space of one meter to achieve speeds of 2.5 terabits per second. The development comes just one month after it was finally proved that orbital angular momentum is actually possible.

Using this new orbital angular momentum technology an infinite number of conventional transmission protocols such as Wi-Fi and LTE, can be twisted together for faster speeds

without the need for more spectrum. For perspective, that's more than 8,000 times faster than the fastest home Internet connection at 300 Megabytes per second.

The development team says that it will be working increasing the transmission distance which currently at only 1 meter. The theoretical distance limit for this new method is likely to be less than one kilometre. At least in the foreseeable future.

For the Amateur Radio Newsline, I'm Heater Butera-Howell, KB3TZD, in Berwick, Pennsylvania

You can read more on-line at tinyurl.com/super-speed-data

DISCUSSION POINT

What use is an f-call

(Past editions of What use is an f-call can be found online at harg.org.au under F-troop.)

Troubleshooting is a skill that has to be learnt. Part of getting my Foundation License included a module on the skill. I've been working with complicated equipment for decades and to me, an amateur radio kit really isn't that complex.

As you might know, I've got a portable kit. I've set it up at least 50 or so times in the last year. I know this system backwards, still every now and then something unexpected happens.

Twice now, my own gear has surprised me. A couple of weeks ago I went on air to join a regular net. I tuned to the appropriate frequency and made my call, but I couldn't hear anyone. I called again, still nothing. I looked at the frequency, all as expected. The voltage was fine, I could see my SWR meter working as expected, when I keyed the mike, all was normal. I looked at the clock to make sure that I wasn't on the wrong time-zone. I turned up the volume, still nothing.

I tuned to another frequency, nothing. In fact, apart from the fact that I knew the volume was up, there was remarkably little noise to be heard at all. Then I checked the squelch. Hmm, well, if you turn it all the way, then it won't let anything through. I fixed it, and low and behold, there everyone was.

This morning, my transceiver surprised me again, in a completely different way. My normal antenna mount is a mag-mount, but the connector came off last week, so I used a bracket instead, ran my normal RG58 back to my radio, plugged it in and had a listen. I tuned to the local Air Traffic Information Service to get the local weather and heard nothing, thought nothing of it, changed to my memories and hit scan. After a bit, I heard someone on the local repeater. I keyed my mike and the SWR went through the roof.

That's weird.

I thought about my antenna connection, I knew that the bracket end was tight, I'd just climbed up a ladder to make it so, but what about this end? All I'd done is plug in a BNC. What about the adapter that goes from BNC to N-type? Turns out it had come loose in transit. Tightened it up, tuned to the ATIS, heard that, tuned to the repeater and all was well.

Just because you know it's right doesn't mean it really is.

I'm Onno VK6FLAB

CELEBRATING THE TOUR DE FRANCE CYCLING RACE 2012

Keep an ear open for special event station GB4TDF.

This to coincide with the 2012 Tour de France bicycle race.

The special event station began operation on June 26th and terminates
on July 23rd.

A special commemorative QSL card will be available. More is on QRZ.com
under GB4TDF.

The actual Tour de France cycling event started on June 30 and ends July 22.

(sourced to ArnewsLine)

PT0S - DXpedition to St. Peter and St. Paul Rocks

The DXpedition will take place in late November to mid-December.
The actual dates will depend on weather conditions.

There had been an official ban on Amateur Radio activities from PY 0 S.
Although the ban, which was created for environmental and safety reasons,
remains in place, a special permit by Brazil's S.E.C.I.R.M.
the Brazilian Navy, Ministry of Environment and LABRE to conduct a two week
long operation.

(SouthGate)

GB2VET - the special event station celebrating the army, navy and air force
reunion in the UK - is coming up again, the 10th Anniversary, at the end of
July, 27-28-29th.

(SouthGate)

CG3B - War of 1812 Bicentennial

Dave, VE3FOI, will use the special event callsign CG3B during the entire
month of July to celebrate the Bicentennial (200 years) of Peace between
the United States of America and Canada after the war of 1812, during various
Bicentennial functions in the Niagara on the Lake area, Ontario.

A special QSL card is available via the Bureau, attention VE3FOI.

This will be the first of many special event stations between 2012 and 2014
regarding the Bi-Centennial.

The Niagara Peninsula ARC takes pleasure in providing this special call sign
for General Issac Brock.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

New OSCAR-7 DX record

Wyatt AC 0 RA and Bill OM 3 BD have broken the AMSAT-OSCAR 7 long distance
record set in 2010

Their GPS-measured 7849km QSO between grid squares EN31vx and JN88mf
surpassed the prior 7843km record set in 2010.

Bill says that Wyatt did all the hard work by waking up at 3am, driving to a hill an hour away from his home, setting up his station, and working Bill before sunrise at 0955 UT on July 2.

It appears that an even longer distance is attainable, and Wyatt is looking for a suitable place from which they can try before Bill leaves Slovakia in mid-July.

Further information, pictures and recordings of the contact at qsl.net/nz5n/AO7record.htm

(SouthGate)

Radio hams swap places on the ISS

Three Expedition 32 crew members to the International Space Station are scheduled to launch aboard the Soyuz TMA-05M from the Baikonur Space Centre in Kazakhstan on July 15.

The Expedition 32 crew members are NASA astronaut Suni Williams KD5PLB, cosmonaut Yury Malenchenko RK3DUP and Japanese astronaut Aki Hoshide KE5DNI.

The trio has been passing tests at the Gagarin Cosmonaut Training Centre in Star City, outside of Moscow.

They will join Expedition 31's NASA astronaut Joe Acaba KE5DAR and cosmonauts Gennady Padalka RN3DT and Sergei Revin RN3BS on board the orbiting outpost.

Meanwhile, fellow Expedition 31 members cosmonaut Oleg RN3DX and NASA's Don Pettit KD5MDT and Andre Kuipers PI9ISS returned to Earth on July 1.

SPECIAL INTEREST GROUPS --- SUMMITS ON THE AIR
www.sotawatch.org
www.sota.org.uk

Youngest Mountain Goat

The youngest person in the UK, and probably further afield, to have achieved Mountain Goat status in the Summits on the Air (SOTA) awards programme is Jimmy Read M3EYP.

Jimmy (19), started trekking up the hills with his dad Tom M1EYP back in 2002 when he was 10 years old, and quickly developed an interest in hillwalking and amateur radio.

After studying for and gaining his Foundation amateur radio licence back in 2005, Jimmy went on to become a very keen "activator" of the summits. Activators need to make a minimum of four contacts from a summit in order to qualify for the points on offer, which are broadly proportional to the height of the hill or mountain.

He completed his mission towards 1000 points with a long day out in the Shropshire hills on Saturday 10th March 2012, in which he transmitted from the tops of Brown Clee Hill, Titterstone Clee Hill, Long Mynd and Stiperstones. Finally, just over the Welsh border, an activation of Corndon Hill gave him the final five points he needed to pass through the magical 1000 points mark.

Jimmy celebrated the milestone with a bottle of ale on the summit.

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News. Each item will only
be broadcast once, if you want a couple of mentions, please submit different
slants to keep your event 'fresh'.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

RESCUE RADIO: HAM RADIO RESPONDS AS WINDSTORM HITS MID WEST AND MID ATLANTIC STATES

The governors of several states have declared emergencies as temperatures rose in the aftermath of powerful storms that swept through the mid-Atlantic region Friday night, July 29th. The storm did damage from Indiana to New Jersey, although the bulk of its destruction was felt in West Virginia, Washington and suburban Virginia and Maryland. Amateur Radio Newsline's Fred Vobbe, W8HDU, begins our coverage of this severe weather outbreak and whats known about the ham radio response thus far:

--

A "super derecho" of violent thunderstorms left a more than 700-mile trail of destruction across the Midwest and mid-Atlantic on Friday, cutting power to millions and killing thirteen people.

A derecho is defined as a widespread and long-lived wind storm that accompanies rapidly moving showers or thunderstorms. The most severe derechos are given the adjective "super."

Winds gusted to 91 mph, equal to that of a category 1 hurricane, at the Fort Wayne International Airport, Ind., on Friday afternoon. Winds gusts were recorded at 72 mph at the repeater site KT8APR, which is located at WLIO Television on Lima Ohio's west side.

According to WLIO's Chief Meteorologist, Kyle Adams, on Sunday, July 1st , "Thousands here in West Central Ohio are still w/o power. According to the AEP website over 600,000 people in Ohio have no power. They are comparing the magnitude of the event to the remnants of Hurricane Ike that came through in September of 2008. They are saying power that all power is expected to be restored in 5-7 days."

As the storm moved to the east-southeast lightning and high winds of more than 80 mile per hour, knocked down transmission structures, poles, power lines and trees across AEP Ohio's service territory. The central Ohio counties of Franklin, Delaware and Licking were the hardest hit, with approximately 345,000 customers affected.

Statistically, on Sunday, July 1st, 112,760 were without power in Indiana. 140,461 were without power in Kentucky. In Ohio and West Virginia the number climbed to more than 600,000. As the storm strengthened Virginia had over 2.5 million people out of power, and Maryland has more than 1.3 million out of power.

Hams performed multifaceted roles from local discussion between each other, some relaying storm information to the National Weather Service, and others using advanced ham technology to relay data on the storm, and reports of damage to authorities. Hams in counties where storms raged called repeaters to the east, warning them of what they would be experiencing, allowing them to mobilize before the storm hit.

President Obama declared an emergency exists in the State of Ohio Saturday and ordered federal aid to assist state and local efforts due to the emergency conditions from severe storms. Now a second serious situation is unfolded from Indiana to the mid-Atlantic where millions remain without power and temperatures are once again soaring. Temperatures in the south are expected to hit 110 degrees or more.

Fred Vobbe, W8HDU, in Lima Ohio

**

Meantime in Indiana:

**

Indiana's heat wave broke for a short time when strong storms raced across the north central part of the state causing wide spread damage. The train of severe storm cells brought hail and high winds that toppled trees and snapped power lines leaving thousands of Hoosiers in the dark and without power.

Fort Wayne, Indiana was one of the hardest hit areas. Strong winds up rooted large trees and cracked power poles isolating neighborhoods with downed power lines and tree branches. Allen County hams responded with emergency communications as Ft Wayne police and fire frequencies became jammed with news of wide spread damage. Many reported dozens of traffic lights without power throwing traffic into a city wide grid lock. Now one week after the storm officials report nearly ten

thousand people still without power as daytime temperatures hover in the 98 degree range. Power crews from as far away as Oklahoma have arrived to help with the electrical problems.

Dozens of Red Cross blood drives have been cancelled in the wake of the storms, resulting in a shortfall of more than 1,000 potential blood donations leading into the 4th of July holiday. The Allen County Red Cross opened shelters for those without power.

In Hamilton and Tipton counties, just Southwest of ft Wayne amateur radio operators quickly scrambled to deal with the pop up storms. There were reports of wide spread wind damage across the two counties. Skywarn operators in Hamilton county relayed one report about a tree that had fallen on a car in Tipton county. Other counties in central and eastern Indiana reported only Skywarn activity as the rapidly building storms raced eastward into the Buckeye state.

Reporting from Indianapolis, this is Jack Parker , W8ISH.
--

More on this story as information becomes available. (W8HDU, W8ISH, ARNewsline(tm))

HAM RADIO AND THE INTERNET: QRZ.COM GOES OFF LINE DUE TO AMAZON CLOUD FAILURE

The same storm that wrought havoc across the mid-West and Mid-Atlantic States also took its toll on the Internet including one very popular ham radio website. According to Fred Lloyd, AA7BQ, who owns QRZ.com, the severe weather lead to an outage of what is known as Amazon's Elastic Compute Cloud center in North Virginia. The result was that services such as Netflix, Pinterest, Instagram, and other popular sites including QRZ became unavailable just after midnight Eastern time on Saturday June 30th.

According to a posting on QRZ by AA7BQ after service was restored, Amazon's service health dashboard indicated that there were power issues in its North Virginia data center. He said that the outage did not affect his servers but did cause a complete database failure. After waiting all night for Amazon to restore the QRZ.com data, he restored information from an automated backup.

According to Lloyd, the outage underscores the vulnerabilities of depending on the public cloud versus having your own data center. For those who have never heard the term Cloud computing, it is the delivery of computation and storage capacity as a service to a community of end recipients. As such, Cloud computing entrusts services with a user's data, software and computation over a network. The name comes from the use of a cloud-shaped symbol to signify the service. (QRZ.com, Wikipedia)

HAM RADIO IN SPACE: A NEW RECORD FOR THE AGEING AO-7 SATELLITE

A new DX record has been achieved on the ageing OSCAR-7 ham radio satellite. This between Wyatt Dirks, AC0RA, in Cedar Rapids, Iowa and Bill Dzurilla, OM3BD, in the Slovak Republic.

Their GPS-measured 7849 kilometer QSO between grid squares EN31vx and JN88mf surpassed the prior 7843 kilometer record set by Luciano Fabricio, PY5LF, and Joe Spandler, K3SZH, by 6 kilometers back in 2010. Take a listen to what a record breaking weak signal satellite contact sounds like after a bit of digital audio magic on our part:

--

Contact audio: Please download this weeks MP3 newscast at www.arnewsline.org to hear part of the contact.

--

To make this record happen Wyatt had to wake up at 3 a.m., drive to a hill an hour away from his home, set up his station, and work OM3BD before sunrise at 09:55 UTC on July 2nd. To make the path, OM3BD was running a Yaesu FT847 with SP2000 preamp fed by a pair of 10 element yagis on 2 meters, and an 8 element yagi for 70 cm. On this side of the Atlantic AC0RA also used a Yaesu FT-847 transceiver with a 7 element yagi on 2 meters and a 12 element yagi on 70cm.

It appears that an even longer distance is attainable. Wyatt says that he is looking for a suitable place from which they can try before Bill leaves Slovakia in mid July. We'll keep you posted.

More is on-line at tinyurl.com/ao7-dx-record. (Southgate)

YHOTY 2012: ERIN KING, AK4JG, NAMED AMATEUR RADIO NEWSLINE 2012 YOUNG HAM OF THE YEAR

Erin King, AK4JG, a 17-year-old from Columbus, Georgia, who re-founded her high school's radio club and then lofted a ham radio-carrying balloon to over 90,000 feet, recovered the flight data and used it to produce a truly striking video of that flight, has been named as recipient of the 2012 Amateur Radio Newsline Young Ham of the Year Award. Mark Abramowicz, NT3V, is here with the details:

--

Whoa, thank you. That's awesome! Ahhh...that's really cool! Thank you so much, I'm very excited!"

And that the reaction from Amateur Radio Newsline's Young Ham of the Year winner Erin King upon learning in a telephone call that she had been selected as this year's winner of the prestigious award.

Erin, who is the daughter of Paul, K4ETY, and Patricia King, of Columbus, has been a ham since only 2009 and holds an Extra Class license.

Erin says, ironically, she was in attendance at last year's Huntsville Hamfest where the Young Ham of the Year Award is presented, and never dreamed she'd be the one nominated and chosen to receive the next one...

"I went to Huntsville and saw the young ham last year and I was like 'that is so awesome,' " You know I feel so happy for her and everything and I'm just flabbergasted. "I thought that I would not be eligible anymore and I'd like forgotten about it and now that this just came out of nowhere and I'm super excited. Thank you so much."

Erin just graduated from Columbus High School and got involved in her freshman year in a program that would turn her focus to technology...

"When I went there, I got involved in robotics and I got interested in computer science and electrical engineering," Erin recalls. "I joined a program called the space program, which eventually led to how I started to get involved with ham radio.

"But then, after that, I got more involved in computer science as well, computer science classes and applied to MIT and that's where I'll be going to college next year. I was accepted 'early action' MIT and I'll be studying computer science and electrical engineering there and I'm also going to be joining the ham radio club that they have there."

Erin says ham radio came naturally...

"My teacher was a ham and he was my robotics coach as well and I went on a couple of balloon launches with him after I got my tech license I continued doing balloon stuff and that was really how I got involved with it," Erin explains. "It was like the cool thing that really exposed me to it to begin with.

"And then after that I joined two local radio clubs and I upgraded my license to General the next year and then Extra last year and I've had some fun outside of ballooning.

"Since then I've done some Field Day, a little bit of contesting, the school club roundup is something that I've done a couple of years.

"And I started a club at my school with the call sign W4CHS, for Columbus High School." Erin really got some attention when she got her

acceptance to MIT in a mailing tube. The school suggested the students "hack their tubes," meaning do something cool with them."

Erin did just that using her ballooning and ham radio skills to send her tube to the edge of space equipped with a camera, GPS units and a radio for APRS tracking and a parachute for the fall to earth.

She produced a video that's posted on You Tube. You can find the link <http://tinyurl.comak4jg-space-video> at our website, arnewsline.org.

Erin says right now, amateur radio is something she shares with her dad, but there is a link in her mom's family to the hobby.

"My dad actually kind of inherited my great-grandfather's call sign -K4ETY is my mom's grandfather's call sign that he had," Erin says. "And I never met him, but there's just kind of an interesting fun family fact."

Erin says she's hoping to get her sister, Rachel, who's 15, interested in amateur radio. She says her 16-year-old brother, Brandon, really doesn't demonstrate desire to jump in just yet. Erin says she's a well-rounded person, who not only enjoys space, but, the undersea world as well.

"Scuba diving is something that I started a couple of years ago with my mom and my sister and my brother just got certified last year," Erin says. "And, it's really fun and that's kind of something that not a lot of people know about me is that I'm a certified scuba diver as well as a ham radio operator."

So congratulations to Erin King, AK4JG, Amateur Radio Newsline's latest Young Ham of the Year!

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

The 2012 Amateur Radio Newsline(tm) "Young Ham of the Year Award" will be presented to Erin King, AK4JG, on Saturday, August 18th at the Huntsville Hamfest in Huntsville, Alabama. We hope to see many of you there. (ARNewsline(tm), YHOTY Judging Committee)

**

PROPAGATION: LARGE SUNSPOT ERUPTS ON THE SOLAR DISK

Space Weather reports that a strong solar flare has erupted on the face of the Sun.

According to the solar forecast reporting service a large, active sunspot named AR1515 is growing on the Earth looking side of the solar disk. On the morning of July 2nd it erupted, producing an M5.6-class solar flare that ionized Earth's upper atmosphere with a brief but intense pulse of X-rays and extreme ultraviolet radiation.

SpaceWeather says that more eruptions are in the offing as the sunspot turns more toward Earth. These will likely affect radio wave propagation on most of the frequencies used by radio amateurs and other radio based communicators.

For more information, including a video, and updates check spaceweather.com (SpaceWeather)

**

RADIO LAW: NEVADA HAM WINS LIMITED TOWER VICTORY

A happy ending to a long court battle involving the right of a Nevada ham radio operator to install towers and antennas on his own property.

You may remember back about four years ago when Tom Taromina, K5RC, and the W7RN Comstock Memorial Station crew were in the midst of a big antenna project on Tom's 10-acre homestead outside of Virginia City. Taromina had obtained a building permit for two rotating monopoles. The bases had been installed, and there were other existing antenna structures on the property.

Suddenly, the County issued a Stop Work Order on grounds that were never clear. The US District Court would later write: "The court is sympathetic to Plaintiff's frustration with the county's inconsistent interpretation of its zoning ordinances."

Now, after two trips to the U.S. District Court, the case is closed and K5RC may erect eight towers. Four of these will be less than 45' tall, and the other four greater than 45 feet. You can read the full text of this big win on-line at tinyurl.com/nevada-antenna-victory. (K7VY)

**

PUBLIC SERVICE: NYC HAMS ASSIST AT HAWAIIAN AIRLINES LIBERTY CHALLENGE

Members of the New York City Amateur Radio Emergency Communications Service provided maritime communication support of the recent Hawaiian Airlines Liberty Challenge.

The race took place on June 23rd on the rivers of New York Harbor between the Port of New York and New Jersey. The mission of the ham radio volunteers was to be an additional set of eyes and ears on the rescue and safety boats. Also to ensure that reliable communications was available in case an emergency condition arose on the water.

Team members utilized UHF and VHF repeaters, simplex, and VHF Marine radios to communicate with each other, to pass messages in regard to race setup, operations and to other safety boats. They also were in communications with boats in transit in the harbor, to operators of the Staten Island Ferry and the US Coast Guard Auxiliary.

The radio operators were at this event for 12 hours from 6:30 a.m. to 6:30 p.m. Eastern time. They were stationed on rescue and safety boats, as well as on shore with race officials. (Via e-mail)

ENFORCEMENT: NORCAL HAM ISSUED $17000 NAL FOR UNLICENSED OPERATION AND FAILURE TO PERMIT STATION INSPECTION

A Northern California amateur radio operator has been issued a $17,000 Notice of Apparent Liability or N-A-L. This, after the FCC accuses him of operating an unlicensed transmitter on 104.9 MHz and refusing to permit an inspection of his station. Amateur Radio Newslines Don Carlson, KQ6FM, has more:

--

In its July 2nd Notice of Apparent Liability, the FCC accuses Brian R. Ragan, KF6EGI, of Suisun City, California, of apparently willfully and repeatedly violating the Communications Act of 1934 as Amended. This by operating an unlicensed radio transmitter and failing to allow an inspection of his station by FCC personnel.

According to the FCC order, last February an FCC agent T-hunted a signal on 104.9 MHz to Ragan's residence. About two weeks later, agents repeated the exercise to locate the source of a signal on the same frequency after hearing the unlicensed station identifying itself over the air using the call letters KBRS. Again the chase took them to where Brian R. Ragan, KF6EGI, lived.

The agents were able to determine that the signal on 104.9 MHz exceeded the limits for operation under Part 15 for unlicensed devices. A search of the FCC database showed no authorization issued to Ragan or to anyone else for operation of a broadcast station on 104.9 MHz in Suisun City.

The NAL says that the FCC agents heard the station operating in the garage and attempted to inspect the station, but did not get any response when they knocked on the residence door. At this point the agents posted a Notice of Unlicensed Operation on the front door and departed.

About 48 hours after the Notice was left, a person who identified himself as Brian R. Ragan contacted the FCC concerning the matter. According to the FCC, during the conversation Ragan admitted to operating a broadcast station on frequency 104.9 MHz for six months. He also told the Commission that he was present when the agents were knocking at his door, but was afraid to answer because he heard the

agents say that they were with the FCC.

Now in issuing the proposed fine, the FCC says that Brian R. Ragan by his own admission, consciously operated the station and did so on more than one day. This says the regulatory agency makes the apparent violations of the Communications Act both willful and repeated.

As to the penalties the FCC has not only ordered the monetary $17,000 monetary forfeiture, but has also ordered that Ragan must also submit a written statement pursuant to Section 1.16 of the FCC Rules. This statement must be signed under penalty of perjury and state that he is in full compliance with Section 301 of the Communications Act and is no longer engaged in the unauthorized operation on 104.9 MHz or any other frequency for which he has no license. Also that he will make his authorized amateur station available for inspection as required by the FCC Rules.

While Ragan may request a reduction or cancellation of the $17,000 forfeiture, he must still provide the written statement on or before July 31st. That's also the last date on which he can file an appeal.

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, in Reno.

--

In the text of the Notice of Apparent Liability the Commission said that Ragan, as a licensed Amateur Radio operator for at least six years, should gave known that any radio equipment at his station must be made available for inspection at any time when requested by the FCC. Also he should be aware of the proper operation of his amateur station in accordance with the FCC's Rules. (FCC)

**

ENFORCEMENT: TWO IN BOSTON FINED $15000 EACH FOR UNLICENSED RADIO BROADCASTING

Two unlicensed broadcasters in Massachusetts will have to pay fines of $15,000 each. This after the FCC turns down both of their appeals. Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with the details:

--

The FCC has dismissed as late a pair of petitions for reconsideration from Lloyd Morris and Robert Brown whom the FCC alleges operated an unlicensed radio station in Boston, Massachusetts.

In 2010 the agency had fined each man $15,000 for allegedly operating a station called "Datz Hits Radio" on 99.7 MHz. In their appeals, both Morris and Brown told the FCC they didn't respond to the original notice nor pay the fine because they couldn't get advice on actions to take and how to file a response.

But in its order denying the appeals, the FCC noted that Morris and Brown broke the law by operating an unauthorized station despite repeated warnings and letters from the Commission ordering them to stop, actions which the FCC found particularly egregious.

The FCC also noted that once a public notice of action is released, petitions for reconsideration must be filed within 30 days. Morris and Brown filed a day late, and the FCC dismissed their petitions as untimely.

In the end, the agency upheld the fine for both men, saying in its decision their explanation was not sufficient to excuse a late response to the original notice.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Morris and Brown were given the customary 30 days to pay the outstanding fines. (FCC)

**

RADIO LAW: SUPREME COURT RULES AGAINST THE FCC IN WARDROBE MALFUNCTION CASE

The so-called Janet Jackson "wardrobe malfunction" indecency case which led to increased profanity delay equipment installations for both TV and radio stations has come to the end of the legal road. This after the United States Supreme Court says that it will not review a lower court's ruling that overturned the FCC's $550,000 fine against CBS Corporation for televising a fleeting view of Janet Jackson's breast during the live 2004 Super Bowl half time show.

A federal appeals court had ruled the fine was arbitrary and capricious because it was much larger than indecency fines had been previously, before the commission began issuing large fines for so-called fleeting indecent utterances.

Chief Justice John Roberts agreed with the other justices not to hear the FCC's appeal. In a concurring opinion, he noted the FCC had changed its indecency policy to include fleeting utterances, supporting the arbitrary and capricious arguments, but he also warned that any future wardrobe malfunctions will not be protected going forward.

The Supreme Court last month tossed out FCC indecency fines against Fox and ABC on narrow procedural grounds. At that time it told the regulatory agency that it is free to update its broadcast indecency guidelines. For their part broadcasters have insisted for years that the FCC's indecency guidelines are vague and chill free speech. (RW, Others)

**

NAMES IN THE NEWS: W7EQI SAYS THE MEDIA NEEDS A LEVEL PLAYING FIELD

A ham radio operator who serves in Congress says that its time to make the overall media landscape more of a level playing ground. Amateur Radio Newsline's Cheryl Lasek, K9BIK, has the details:

--

House Subcommittee on Communications and Technology Chairman Greg Walden, W7EQI, of Oregon says the way that the FCC regulates traditional video providers is based on a bygone era.

According to Walden, broadcast stations are going mobile and wireless carriers are streaming video at the same time that programmers and pay-TV providers are filling smartphone and tablet screens with their content. Meantime new entities are coming to market like Hulu, Netflix, YouTube and Roku and the Communications Act does not apply to these emerging services.

Walden is not suggesting that lawmakers expand video distribution regulation. Quite the opposite. He says that could harm competition from emerging Internet video providers just as existing cable, satellite and broadcast providers and programmers are experimenting with Internet distribution.

However if lawmakers don't intend to apply the old rules to new participants, then he says that Congress must recognize the inequity of continuing to apply those same old rules to traditional players such as TV stations, cable and satellite providers.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

Representative Walden made these remarks during his subcommittee's hearing on the future of video. (published news reports)

NAMES IN THE NEWS: W4ZDP HONORED FOR DEDICATION TO THOMASVILLE ARC

Billy Joe Lewis, W4ZDP, has been honored by Thomasville Amateur Radio Club for founding the club in 1953, and for his dedication to the club for many years.

Lewis became an amateur radio operator prior to the second World War. He served on the Burma Road during World War II, worked many years with his brother, Logan Lewis, at Lewis Enterprises, and spent decades serving as Thomas County Fire Chief.

Along with being a respected business man and dedicated public servant, Lewis founded the club in 1953 and served as Treasurer for 48 years. His dedication to Thomasville Amateur Radio Club, over many decades, has resulted in a strong and vibrant organization dedicated to the radio arts and to the public

The award was presented to W4ZDP at the annual ARRL Field Day event held at the Thomas County Ambulance Service in Thomasville, Georgia on June 23rd. (Via e-mail)
**

NAMES IN THE NEWS: G3PSM AWARDED THE DARC GOLDEN BADGE OF HONOR

UK radio amateur Colin Thomas, G3PSM, has been awarded Germany's Deutscher Amateur Radio Club Golden Badge of Honor. This, for his work in achieving an amateur radio allocation at 472 kHz.

According to the German national amateur radio society, G3PSM was involved in the European Conference of Postal and Telecommunications Administrations or CEPT preparatory process meetings and at the WRC-12 conference itself. As a result of his skillful lobbying at many meetings, the CEPT proposal for an amateur radio allocation near 600 meters was fully supported and eventually granted.

G3SPM received his award from the DARC Chairman Steffen Schoppe, DL7ATE, at a recent society hosted dinner. (DARC)

**

CLUB NEWS: WESTSIDE ARC CELEBRATES 60 YEARS

While we're handing out roses, we say congratulations to the Westside Amateur Radio Club on their 60th birthday. Headquartered just across the Mississippi River from New Orleans, Louisiana, the Westside Club, founded July 1st, 1952, is the oldest continuously operating amateur radio club in the New Orleans area. A special event station is in the planning stages and we'll have full details just as soon as we know them. (ARNewsline(tm))

WORLDBEAT: TASMANIA WELCOMES SOUTHERNMOST D-STAR REPEATER IN THE WORLD

Tasmania's first D-Star repeater is on the air. VK7RRR is the southernmost D-Star repeater in the world, and the first and only such public digital voice repeater in Tasmania. The system operates in the 70cm band listening on 432.725 MHz and transmitting on 438.125 MHz at 50 watts power out. Prior to the establishment of VK7RRR, Tasmania was the only Australian State or Territory that didn't have at least one D-Star repeater. (WIA)

**

HAM RADIO IN SPACE: STUDENTS DESIGN SUPERCAPICITOR BATTERY FOR ARISSAT

Students at Penn State university have designed and built a state-of-the-art super-capacitor type battery for the next amateur radio ARISSat satellite.

The battery was built to handle 16 charge cycles in a given 24-hour period. That will power the satellite in dark orbits, when the solar panels are not in sunlight.

Dakshina Murthy Bellur, is an assistant professor of electrical and computer engineering at Penn State. According to Bellhur, the unit is a simple design. They flip a switch, and they throw it out into space.

Bellhur supervised the battery work, which counted as the students' senior project. More can be found in cyberspace at live.psu.edu/story/60125 (Pennsylvania State University)

**

WORLDBEAT: US BBG CRITICIZES CAMBODIA OVER PROGRAMMING BAN

The United States Broadcasting Board of Governors has criticized the Cambodian Ministry of Information. This for a decision forbidding FM stations in Cambodia to air Khmer-language election programming from Radio Free Asia and the Voice of America during last week's elections.

According to a release the ban involved five stations. The Broadcasting Board of Governors said that Radio Free Asia and the Voice of America play a critical role in informing the Cambodian electorate on fundamental election issues. They also provide a platform for the full spectrum of political opinions in the country.

Presiding Governor Michael Lynton stated that news and information programs help shape a well-educated citizenry and should be encouraged, not denied. These attempts to silence Radio Free Asia and the Voice of America are counterproductive to the goals of building a democratic society in Cambodia. (RW)

**

HAM AWARD HAPPENINGS: LOTW SUPPORT FOR WPX GOES LIVE

Participants in CQ magazine's WPX award program may now use the American Radio Relay League's Logbook of the World or LoTW system to apply for the WPX award and its endorsements. Amateurs will be able to use LoTW logs to generate lists of confirmed contacts to be submitted for WPX credit. Standard Logbook of the World credit fees and CQ award fees will apply. Logbook of the World support for the WPX award program went live on July 2nd. (CQ)

**

ON THE AIR: CELEBRATING THE KING OF MOROCCO 13TH ANNIVERSARY

On the air, keep an ear open for Moroccan amateur radio operators to use the special prefix 5C13 through July 27th. This is in celebration of the 13th anniversary of the crowning of Mohammed VI as King of Morocco. Stations heard as of airtime 5C13IG, 5C13KD, 5C13NK, 5C13SG and 5C13YZ. QSL as directed by each operator. (OPDX)

**

ON THE AIR: PC100NOM CELEBRATES THE NETHERLANDS OPEN AIR MUSEUM

Also be on the lookout for Netherlands special event station PC-100-NOM to be active through July 29th. This operation is to commemorate then 100th anniversary of The Netherlands Open Air Museum in the city of Arnhem. The operator is PA0FAW who is using CW, SSB and PSK on the various High Frequency bands. QSL via PA0FAW, either direct, via the bureau or electronically using eQSL. SWL reports are also welcome. (OPDX)

**

DX

In DX, N6NB and W6TAI will be active as E51YNB and E51TAI from Rarotonga for the IARU High Frequency World Championship on July 14th and 15th. Their operation is expected to start a few days before the contest and last several days after the competition concludes. They will be on 40 through 15 meters using SSB only. QSL both callsigns via N6NB.

Members of the Trinidad And Tobago Amateur Radio Society will be active as 9Y4HQ during the same IARU HF World Champion ships on July 14 and 15th. Operations will be on all of the High Frequency bands using CW and SSB. QSL only via DF2RG, either direct or via the bureau.

ZS1WY is currently active from Mozambique as C-91-I-W and is expected to be there for the next year. However he is there working and operations may be limted. Recent Q-S-N reports show he was on 160 meters. QSL via ZS1WY.

A group of hams from the Quito Radio Club will be on the air as HD081QRC (Hotel Delta Zero Eighty One) between July 14th and the 22nd to commemorate the founding of that organization 81 years ago. Activity will be on all bands using CW and SSB. Equipment will include both modern and some beautifully restored vintage radios courtesy of HC1BG. QSL HC1JQ direct or via the bureau.

Lastly, W5JON tells Amateur Radio Newsline that he will once again be operating as V47JA from his vacation home overlooking Calypso Bay, on St. Kitts. Listen out for John from July 12th through August 2nd on 80 through 6 meters using SSB. He also plans to take part in the RSGB sponsored Islands On The Air Contest. QSL's to W5JON either direct or via Loogbook of the World.

(Various DX news sources)

**

THAT FINAL ITEM: NEW BROADCAST CENTER PROPOSED FOR ONE WORLD TRADE CENTER

And finally this week, the new spire built to replace the fallen twin towers of the World Trade Center in New York City will also become an antenna site. Amateur Radio Newsline's Jim Davis, W2JKD, has the details on this emerging story:

--

The Durst Organization that controls New York City's One World Trade Center in a partnership with The Port Authority of New York and New Jersey plans to add an installation for FM radio and television transmission antennas in the building's 408-foot spire. One that will ultimately bring the new building's height to 1,776 feet and make it the tallest building in North America.

The Empire State Building, 1,250 feet tall with its 204 foot antenna tower is currently the home to 19 FM stations and most of the city's digital television transmitters. Many radio and television broadcasters migrated to the Empire site after terrorist attacks of 911 caused the collapse of the World Trade Center's twin towers in lower Manhattan.

Yet to be determined is whether any of the city's FM broadcasters will leave their current primary sites at Empire State Building for the new location at One World Trade Center or if they will treat the new building spire primarily as a backup site.

I'm Jim Davis, W2JKD.

--

One thing that's pretty obvious is that at the prices being quoted for site rental income by Durst, it's unlikely that any ham radio repeaters will find a home at the new broadcast antenna site. Then again, once should never doubt the resourcefulness of New York City area hams. (B&C, RW, others)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, this newscast marks the beginning of our 35th year of service to the world's amateur radio community. We find it hard to believe that so many years have gone by since Jim Hendershot, WA6VQP with some help from Bill Pasternak, WA6ITF, produced the very 1st Westlink Radio Network newscast, which eventually became the Amateur Radio Newsline.

That was some 1820 weeks ago. This is week 1,281 and, believe it or not, in all this time we have never missed a newscast release date.

With that in mind, we want to take this opportunity to say thank you all of those who have come forward over the years as members of our all volunteer team of writers, producers, reporters and news anchors. It's their selfless devotion that has made all of this possible.

And to all of you in our vast world-wide audience who have so graciously supported our efforts these many years. To you we make the promise to continue to bring you the news of amateur radio and personal communications as we have the past 1281 weeks. Also, to do our very best to keep improving our air product as we proceed into the weeks, months and years ahead.

Let me end this week by simply saying thanks to all of you for being a part of the Amateur Radio Newsline family. Without your encouragement and ongoing support we would have no reason to exist. It is you who make it all worthwhile.

For now, with Bill Pasternak, WA6ITF, at the editor's desk, I'm Don Wilbanks, AE5DW, saying 73 for the 1281st time, and, as always, we thank you for listening.

Ohio/Penn DX Special Bulletin No. 1068.3

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1068.3
BID: $OPDX.1068.3
July 6, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and K6VVA for the following DX information.

P5, NORTH KOREA (P5/K6VVA Pending "CW ONLY" & IOTA AS-197 Activation Proposal Project). Rick, K6VVA, states: "This is a 'Work-In-Progress' Update & Interest Level Survey." Press release by Rick states on his Web page:

"P5 'CW ONLY' & IOTA AS-197 PROJECT
.....

HISTORY...
During the past 6 years, I have had more than 50 cordial telephone conversations with D.P.R.K. personnel seeking official permission to operate from P5. Along with email proposals and discussions in this matter, substantial efforts have been made to obtain a P5 license.

For more than a year now I have now been working with an NGO Organization which is well respected in the D.P.R.K. as a result of Humanitarian work they have done in P5 for many years. I have personally donated several thousands of dollars to this organization and another NGO specifically for both Food and Medical related relief projects to the people in need within the D.P.R.K. Representatives from both organizations personally supervise the final delivery and distribution of agricultral, food and medical related items in the D.P.R.K. to ensure the integrity of the donation programs.

NEW DEVELOPMENTS...
For several months now my NGO contact and I have been discussing a possible new venue which would be mutually beneficial in helping to accomplish each of our objectives in the D.P.R.K.

A longstanding goal has been to combine the need for a "CW ONLY" P5 Expedition with the first time activation of at least one P5 IOTA 'NEW ONE'. I believe an opportunity now exists to combine these goals in

conjunction with unique "Cultural" and "Humanitarian" objectives which
have been formulated for review by D.P.R.K. Authorities. There is strong
support from the NGO in this effort.

CLARIFICATION...
I need to make it very clear than I am *NOT* seeking any donations at
this point, but rather only an indication of the level of potential
contributions for the related "Humanitarian" purposes likely required
in order for approval of this project and issuance of a P5 license.

Although I will be paying ALL my own expenses for the Expedition, a
quite large 'threshold' amount for the 'Humanitarian' part of the proposal
has been established which may be necessary for this P5 Project to succeed.
NO future donations will come to me personally, but rather be directed to
the very well-respected NGO specifically earmarked for the D.P.R.K. relief
part of the P5 Project proposal AFTER the Expedition has concluded. There
are some remaining details yet to be finalized.

THE CHALLENGE...
WRITTEN APPROVAL from at least four separate D.P.R.K. Ministries and
entities (including the D.P.R.K. Military) is necessary in order for
this to happen. Based upon a detailed review of several previous P5
Expedition attempts that did not result in getting on the air, a key
objective in this matter is to minimize potential failure upon arrival
at the final destination in P5.

It has been a very long 6 years thus far, but I believe the time has
finally come to 'fish or cut bait'. I've espoused that 'Ham Radio Operators'
are known to be generous contributors to Humanitarian causes. Being able
to provide an indicator of this to the D.P.R.K. Authorities up-front can
potentially make the difference between another 'No', or finally YES' in
obtaining the desired P5 license.

Another purpose of this Expedition is to hopefully further 'open the door'
for a future Multi-Operator venue in P5, as well as activation of the other
3 remaining P5 IOTA 'NEW ONES'.

PREPARATION...
My FIVE 2011 IOTA Expeditions to NA-041, NA-066, NA-091, NA-184 and NA-242
('NEW ONE') were also used to fine-tune operational matters as well as test
antenna designs for P5 use in a small venue footprint most likely acceptable
to the D.P.R.K. Authorities. The plan is 4 days QRV with 200 watt radios and
'Verticals near salt water'. I have all the radio, antenna and computer
equipment necessary for this expedition, including two KPA500 amplifiers
(approval for use of the amps in P5 is questionable at this time).

Thanks very much in advance for your possible participation in the
Humanitarian aspect of this P5 'CW ONLY' and IOTA AS-197 Project. For

Rick, K6VVA * The Locust
FOC (First Class CW Operators' Club)
NCCC Co-Founding Member

P.S. This is NOT a solicitation for contributions or donations, but only an inquiry to obtain an idea as to the possibilities of achieving the minimum 'threshold' amount set forth in the proposal to hopefully make this 'Cultural & Humanitarian' endeavor also become a reality for P5 'CW ONLY' and first time activation of IOTA AS-197."

ERIN KING, AK4JG, NAMED 2012 AMATEUR RADIO NEWSLINE□

"YOUNG HAM OF THE YEAR"

(Santa Clarita, California) □ Erin King, AK4JG, a 17-year-old from Columbus, Georgia, who re-founded her high school's radio club and then lofted a ham radio-carrying balloon to over 90,000 feet, recovered the flight data and used it to produce a truly striking video of that flight, has been named as recipient of the 2012 Amateur Radio Newsline Young Ham of the Year Award.

Erin is the daughter of Paul, K4ETY, and Patricia King. She has two siblings: Brandon, age 16 and Rachel, age 15. Erin became a licensed radio amateur in 2009 and now holds an Extra Class license. She is a member of the ARRL, the Columbus Amateur Radio Club, and the Russell County Radio Club. She enjoys operating on local VHF and UHF repeaters as well as phone and digital modes on the High Frequency amateur radio bands. She is looking forward to mastering Morse Code as her next amateur radio challenge.

Erin became interested in amateur radio after joining a club at her high school dealing with robotics and then ham radio-equipped high-altitude balloon launches. This school group has participated in FIRST Robotics competitions, and Erin has twice been Team Lead for Programming. The club also launches several high-altitude balloon missions each year, in a program called DREAMS. They have flown various scientific experiments as part of these missions, in addition to planning, building, and integrating radios, Global Positioning System (GPS) units and TNCs to track and recover the balloons. To facilitate these activities, the group□s sponsor, Luther Richardson, KI4AOJ, has encouraged the students to obtain their amateur radio licenses.

A subset of this group, including Erin, has participated in the Massachusetts Institute of Technology's (MIT's) "InvenTeam" competition, designing and building a portable lightning detector and early warning system. In addition, Erin re-started the Columbus High School Radio Club and served as its president for the past two years. The club was active in the 1950s and '60s, and Erin's great-grandfather (the original K4ETY) was one of its mentors at that time. The new club obtained the callsign W4CHS (Columbus High School) and has been active on the air.

Erin's involvement with amateur radio and FIRST Robotics has helped fuel her interest in science and engineering. Last year, she applied for early admission to both Georgia Tech and MIT; she was accepted to both and will be attending MIT this fall.

Inside the shiny tube which contained Erin□s MIT acceptance letter was a note suggesting that the students □hack□ their tubes, meaning to do something cool with them, in a long-standing tradition of MIT hacks or stunts. Erin chose to send her tube to near-space.

Drawing on her ballooning experience, Erin planned, built, integrated, and tested a complete new tracking setup to fit into the very small shipping tube. The payload consisted of two GPS units, two custom-made antennas, one Argent Data OpenTracker+ kit (which Erin built), one handheld radio, and a fellow ham□s Byonics Pocket Tracker, a self-contained 100-milliwatt tracker/radio combination in an Altoids® tin. Erin also talked her mother into letting her use mom□s brand new GoPro Hero HD video camera.

With the assistance of a group of hams from the Columbus Amateur Radio club, Erin launched her balloon from Lumpkin, GA. A couple of hours later, she and the tracking team successfully recovered it, along with the complete HD video record of the flight. Erin took this video, as well as other photos and videos taken of the launch activities, and compiled it

into an 8-minute presentation, complete with background music. She posted it to YouTube, and put a link to it on the MIT hack-the-tube site (see). According to YouTube statistics, Erin☐s video has been viewed thus far in excess of 82,500 times.

This past May, Erin was invited to participate in no less than three forums and sessions at the 2012 Dayton Hamvention®. These included the 25th anniversary ☐Youth Forum,☐ the ☐Ham Radio Town Meeting☐ and an ☐ARRL Expo☐ presentation where her video was screened.

Award Ceremony

The 2012 Amateur Radio Newsline☐ "Young Ham of the Year Award" will be presented on Saturday, August 18th at the Huntsville Hamfest in Huntsville, Alabama. As the 2012 "Young Ham of the Year," Erin will receive -- courtesy of Yaesu USA -- an expense-paid trip to the Huntsville Hamfest, along with a gift of Yaesu brand ham radio equipment. CQ magazine will treat her to an expense-paid week at Spacecamp Huntsville, and will present Erin with a variety of CQ products. Amateur Radio Newsline☐ will provide Erin with a commemorative plaque at the award ceremony. Once again, the cost of year's plaque has been underwritten by Dave Bell (W6AQ), President of DBA Entertainment Inc., Hollywood, California. Heil Sound Ltd. will also be presenting Erin with a ham radio-related gift.

The presentation of the Young Ham of the Year Award has been a regular feature of the Huntsville Hamfest since 1993. This has been made possible through the generosity and kindness of the event's Planning Committee and the good offices of Huntsville Hamfest Association Vice President Charlie Emerson, N4OKL. (See http://www.hamfest.org)

This year's award ceremony will be hosted by Bill Pasternak, WA6ITF, and Don Wilbanks, AE5DW, of Amateur Radio Newsline☐, Rich Moseson, W2VU, of CQ Communications, and representatives of Yaesu USA and Heil Sound.

Award Program Background

The Amateur Radio Newsline☐ "Young Ham of the Year" award (formerly the Westlink Report Young Ham of the Year Award) has been presented annually since 1986 to a licensed radio amateur (ham) who is 18 years of age or younger and who has provided outstanding service to the nation, his/her community or the betterment of the state of the art in communications through the amateur radio hobby/service. A website with full information on the award program and background material is located at http://www.arnewsline.org/YHOTY.

Award Sponsors

The award program is sponsored by the Los Angeles, California-based Amateur Radio Newsline☐ with corporate support from Yaesu USA Corporation of Cypress, California, CQ Magazine of Hicksville, New York, and Heil Sound of Fairview Heights, Illinois.

Since 1976, Amateur Radio Newsline□ and its predecessor, the Westlink Radio Network, have been providing radio amateurs around the world with up-to-the-minute news at no cost to them. (See http://www.arnewsline.org)

The award's three major corporate underwriters are world leaders in their respective areas of Amateur Radio product support.

Yaesu USA, which has been a corporate underwriter since the inception of the award program in 1986, is considered the trailblazer in the design, manufacture and distribution of high quality amateur gear as well as commercial two-way, monitoring, marine and air-band communications equipment (See http://www.yaesu.com).

CQ magazine and its sister publications, CQ VHF, Popular Communications and WorldRadio Online, are published by CQ Communications, Inc., and are considered the trend-setting publications serving today□s modern radio amateur. (See http://www.cq-amateur-radio.com)

Heil Sound Ltd. Is considered as a world leader in the development and manufacture of new technology microphones and related audio products for professional sound reinforcement and amateur radio communications. (See http://www.heilsound.com)

//
Latest LOG4OM Released

Posted: 05 Jul 2012 09:26 AM PDT
http://forums.qrz.com/showthread.php?352778-Latest-LOG4OM-Released&goto=newpost

Download the new release at #http://www.pisto.it/wordpress/log4om-en/

Please take note this release is still a BETA version, but we strongly advise to

upgrade since is fixing a number of issues.

First of all i wish to say THANKS to the new Log4OM Team:

K7PT, G4POP, W4ELP, IW1AWH and IZ1OQT (in random order)

What's new in Release 1.10.4 Beta

THIS BETA WILL RESET YOUR ACTUAL CONFIGURATION. PLEASE PRINT YOUR CONFIG TO PDF

FROM SETTINGS FOLDER

- Omnirig implemented along with Hamlib as options for rig control. Omnirig

should be downloaded and installed from http://www.dxatlas.com

- Imported frequencies being interpreted incorrectly and rounded up are now

fixed.

- Now log4om retains grid configurations (e.g. Recent QSO) also after a

reinstall (new _user files added)

- Grey line maps optimized

- Improved Settings window closing speed

- Added Digital mode filter button for DXcluster

- Faster program startup

- Worked callsign lookup window for previous QSO is now resizable

- Some system log enhancements (even more events are logged now)

- Fixed an issue with Omnirig when the frequency selected goes over the
Int32

size of .NET environment.

Unfortunately Omnirig accepts frequency in Hertz and frequencies in the
range of

10 Gb (even less) are, in Hertz, bigger than the maximum Int32 value.

And Omnirig accepts only integers. This is an Omnirig limitation that we
need to

deal with

- Added help in English

- In Settings/Settings the text on the visualization buttons now match the
tab

titles of the logbook

- Band plans revised and now include CW, Digital and SSB

Ham Radio Operators Help with Waldo Canyon Fire:

Posted: 05 Jul 2012 05:41 PM PDT
http://www.eham.net/articles/28593

A 24-hour test helped local ham radio operators hone emergency skills and, in the blink of an eye, they were put to the test at the Waldo Canyon Fire. "With little or no sleep, we were contacted by the Amateur Radio Emergency Service District Manager Mike McQueen," said Amanda Alden of Canon City. "He told us the situation was looking grim for communications." Alden, along with Canon City residents Jeff Carrier and Phil Ott, and Pueblo West resident Neal Tew, "Didn't think twice about going to assist," Alden said. "We mostly handled health and welfare communications for the Summit shelter. "The four of us had never assisted in an actual emergency and it felt slightly overwhelming. June 25 became a real test of our abilities to remain calm and do what was needed," Alden said, referring to when the wind-stoked fire jumped two ridges and started burning homes.

//
Hams Explore Mystery of Radio:

Posted: 05 Jul 2012 05:40 PM PDT
http://www.eham.net/articles/28592

Amateur radio operators, also referred to as hams, in Veterans Memorial Park last weekend talked to people from around the globe to both test their equipment and compete against other clubs in a nationwide contest known as Field Day.

//
'Hams' Offer Information Lifeline When All Else Fails:

Posted: 05 Jul 2012 05:39 PM PDT
http://www.eham.net/articles/28591

When disaster strikes, amateur radio steps in: Disasters can wipe out phone lines and the Internet, leaving those hardest hit cut off from the world. That's when "hams" come to the rescue with an almost forgotten technology that can go where fallen cell towers cannot reach. Hams are the operators of amateur radio, the old-time tech that once connect people across oceans. Nowadays, hams are practically a stereotype -- laid-back, white-haired retirees who fiddle with dials and antennas, talking to fellow operators across the globe. But when disaster strikes these hobbyists provide a

lifeline of information to areas in desperate need. "A lot of agencies use amateur radio as a means to provide communication. Whether it's the Red Cross or emergency measures, a lot of public safety organizations leverage amateur radio capabilities to provide communication when all other types of communication have failed," said Don Trynor with the Central Toronto Amateur Radio Club (CenTor).

Sunspot AR1515 Grows 10 Times Wider Than Earth:

Posted: 05 Jul 2012 05:39 PM PDT
http://www.eham.net/articles/28590

Sunspot AR1515 has grown more than 10 times wider than the Earth. It has grown in size to encompass an area 62,137 miles (100,000 kilometers) long. According to SpaceWeather.com, "The active region is crackling with M-class solar flares and seems poised to produce even stronger X-flares in the days ahead." The latest solar flare, from sunspot AR1515, was felt at 5:47 a.m. Eastern Daylight Time (EDT), 0947 Greenwich Mean Time (GMT). Its peak hit about eight minutes later. It registered as a class M5.3 solar storm, according to the Space Weather Prediction Group operated by National Oceanic and Atmospheric Administration (NOAA)

//
Sun Unleashes Earthward Solar Flare:

Posted: 05 Jul 2012 05:39 PM PDT
http://www.eham.net/articles/28589

Our Sun may add to the fireworks as our American friends celebrate their Independence Day On Monday, July 2, a regiona of our Sun known as active region 1515 unleashed a solar flare aimed squarely at the Earth. This group sunspots - from which solar flares originate -- has been crackling with radio and X-ray energy for days and Monday's flare was an M5.6-class flare, just a notch down from the strongest possible. Read more about how flares are classified here: http://spaceweather.com/glossary/flareclasses.html While this isn't all that surprising, it will have some very noticeable effects here on Earth. Our sun goes through 11-year cycles and will near the peak of cycle 24 next year. As we get closer to that peak, flares are going to get more intense. This most-recent flare was only the latest in a string, including an X-class flare which dealt our Earth's magnetic field a glancing blow on March 7.

Colorado Hams Provide Disaster Communications During Wildfires:

Posted: 05 Jul 2012 11:26 AM PDT
http://www.eham.net/articles/28585

Thanks to an extremely dry season, portions of Colorado have been ravaged by wildfires. As of July 5, only a handful of the fires are considered extinguished or fully contained, with the majority considered still active. According to InciWeb, almost 170,000 acres are affected by 11 active fires. Since June 9 -- when the High Park Fire, the first of the wildfires began -- hams in Colorado have been assisting with disaster communications, providing communications support to the State and served agencies.

California Ham Cited for $17,000 for Operating Unlicensed Radio Station:

Posted: 05 Jul 2012 11:25 AM PDT
http://www.eham.net/articles/28581

On July 2, the FCC issued a Notice of Apparent Liability for Forfeiture and Order in the amount of $17,000, accusing Brian R. Ragan, KF6EGI, of Suisun City, California, of "apparently willfully and repeatedly violating" the Communications Act of 1934, as amended, by operating an unlicensed radio transmitter on frequency 104.9 MHz and failing to allow an inspection of his station by FCC personnel. The Commission said that Ragan, "as a licensed Amateur Radio operator for at least six years, [he] should be aware that any radio equipment at his station must be made available for inspection at any time when requested by the FCC, and also should be aware of the proper operation of his amateur station in accordance with the Rules."

FREE FLEA MARKET SPACE WITH ADMISSION! BRING YOUR ITEMS FOR SALE OR TRADE!!!

To get to UARC□s RADIOCOM 2012

NYS Thruway to Exit 30 (Herkimer). At stoplight from exit, take left, and
proceed over bridge. Take ramp to right (NYS 5S West) and proceed 5 miles
to the Frankfort exit marked FAIRGROUNDS.

Lost? . Call K2IQ

146.76 (-600)

for Talk-In!

Back By Popular Demand!!!

UARC□s Club Table Sale

Sell up to 3 items at our table instead of renting your own space!

How it works:

Bring your items for sale to our club table when you arrive (amateur radio and related electronic items only, please). Leave us your ☐asking☐ and ☐minimum☐ price (if applicable). If the item sells, UARC will collect the proceeds and hold them for you. Stop by the table during the Hamfest, or by 12:00 Noon to collect the proceeds of the sale or your unsold items. UARC will charge the seller a 10% commission for all items sold. All sales are final, and transactions are between buyer and seller. Sellers assume responsibility for any sales taxes, and buyers for any and all payments. There will be no charge for unsold items, but all unsold items must be claimed by 12:00 Noon on the day of the Hamfest. UARC assumes no liability for unclaimed items left after the Hamfest.

SARL NEWS - SUNDAY 8 July 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on "Amateur Radio Today" and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 MHz FM from Pretoria with relays on 7 066 and 3 695 kHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

GET READY FOR THE IARU HF WINTER CHAMPIONSHIPS

BOOK NOW FOR THE RTA IN DURBAN ON 21 JULY

A NEW RECORD FOR THE AGEING AO-7 SATELLITE

G3PSM AWARDED THE DARC GOLDEN BADGE OF HONOUR

You are listening to ZS6SRL. Stay tuned for more details on these items and other important and interesting items.

GET READY FOR THE IARU HF CHAMPIONSHIPS

Many radio amateurs are gearing up for the winter's biggest HF competition: the IARU HF World Championship. This 24 hour long contest is the highlight of the winter HF contesting season, with plenty of opportunity to work DX from all around the globe on CW and SSB. Participants also get the chance to make QSOs with many IARU Member Society club stations and officials.

The IARU HF Championship is one of radio sport's unique events. It is the only major contest that uses International Telecommunication Union (ITU) zones as part of the exchange, and the only contest that gives special multiplier status for IARU Member-Society stations and their officials.

Amateurs can get in on the fun in a variety of ways. You may choose to enter as either a single operator, using either SSB only, CW only or a mixture of both modes. Single operator stations can choose from three

power levels: High Power (greater than 150 W), Low Power (between 5 and 150 W) or QRP (5 W or less).

The SARL as an IARU Member Society has applied to ICASA for the call sign ZS9HQ as a special event station. If you would like to be part of the activity at the NARC send an email to Geoff Levey, ZS6GRL, at contest@sarl.org.za. If you can not be at the NARC, you can also operate the SARL call sign from your own stations. Geoff is coordinating the time slots.

Individual radio amateurs are encouraged to participate. The rules can be found on www.sarl.org.za. The report is RS57 or RST57 South Africa is in ITU zone 57.

One of the fun things to do is see how many of the IARU special stations you can work during the event. While most stations give their ITU zone as part of the contest exchange, IARU Member-Society stations give the abbreviation for their IARU society name. In addition, IARU officials can give one of four unique exchanges: AC if they are on the IARU Administrative Council, or R1, R2 or R3 for the ITU Region that official serves. It is always special to see so many nations represented on the air by their national organization. It reinforces the global nature of Amateur Radio and the common bonds we all have as amateurs.

The IARU HF World Championship begins at 12:00 UTC Saturday, July 14 and goes until 12:00 UTC Sunday, July 15. Complete rules may be found on www.sarl.org.za link from the news item on the home page.

There are a number of SARL prizes to be won. The station that achieves the highest score on SSB or CW will receive a certificate and an ARRL Handbook. Stations achieving the highest score on each band will receive a certificate and all participants who send in a log will receive a certificate of participation. Please copy your log to contest@sarl.co.za to participate in the local of the championships.

BOOK NOW FOR THE RTA IN DURBAN ON 21 JULY

Full details of the SARL Radio Technology in Action symposium to be held in Durban on 21 July are now available on line at www.sarl.org.za. You can pre book and take part in an additional prize draw. If you like a programme to be sent to your inbox send an email to rta@sarl.org.za with RTA Durban in the subject line a PDF copy will be mailed to you.

A NEW RECORD FOR THE AGEING AO-7 SATELLITE

A new DX record has been achieved on the ageing OSCAR-7 amateur radio satellite between Wyatt Dirks, AC0RA, in Cedar Rapids, Iowa and Bill Dzurilla, OM3BD, in the Slovak Republic. Their GPS-measured 7849 kilometre QSO between grid squares EN31vx and JN88mf surpassed the prior 7843 kilometre record set by Luciano Fabricio, PY5LF, and Joe Spandler, K3SZH, by 6 kilometres back in 2010.

To make this record happen Wyatt had to wake up at 03:00, drive to a hill an hour away from his home, set up his station, and work OM3BD before sunrise at 09:55 UTC on July 2nd. To make the path, OM3BD was running a Yaesu FT847 with SP2000 preamp fed by a pair of 10 element yagis on 2 metres, and an 8 element yagi for 70 cm. On the other side of the Atlantic AC0RA also used a Yaesu FT-847 transceiver with a 7 element yagi on 2 metres and a 12 element yagi on 70cm.

YOUTH DAY SPRINT RESULTS

The winner of the SARL Youth day Sprint is Karel Bezuidenhout ZU6KB. Karel is 18 year old and will receive a certificate and a hardcover ARRL Handbook. Second was 16 year old Hendrik Veldman, ZU6LD . He will receive a certificate and ARRL Basic Antennas and third was 15 year old Dean Coetzee ZS6DPC. He also receives a certificate and the ARRL ABCs of Software Defined Radio Guide. The lucky draw prize, a 40 metre receiver kit was won by Mishaat operating from ZS2PE and the year SARL student membership was won by Tom Lewis ZU5TOM.

Congratulations to all the winners. Their prizes will be in the mail during next week.

G3PSM AWARDED THE DARC GOLDEN BADGE OF HONOUR

UK radio amateur Colin Thomas, G3PSM, has been awarded Germany's Deutscher Amateur Radio Club Golden Badge of Honour for his work in achieving an amateur radio allocation at 472 kHz. According to the German national amateur radio society, G3PSM was involved in the European Conference of Postal and Telecommunications Administrations or CEPT preparatory process meetings and at the WRC-12 conference itself. As a result of his skilful lobbying at many meetings, the CEPT proposal for an amateur radio allocation near 600 meters was fully supported and eventually granted.

OCTOBER RADIO AMATEUR'S EXAMINATION

The Sandton Amateur Radio Club will again offer a course leading to the Radio Amateur's Examination to be held in October 2012.

This course will be of interest to anyone who wishes to obtain an amateur radio licence, and also to anyone travelling around Southern Africa who makes use of radio communication.

The course begins on 26th July 2012 and extends over 12 weeks, up to the examination on 18th October.

Lectures are held every Thursday evening at the National Amateur Radio Centre, Octave Street, Radiokop.

The course includes the required HF assessment, and an optional practical Antenna Building Day.

Registration takes place at the first session at 19:00 on 26th July, and includes a general introduction to Amateur Radio and to the course. There is no charge for this first session and anyone interested in

finding out what amateur radio is all about, is welcome to attend this introductory session.

For more information and pricing please contact: Greg Maynard Cell: 079 111 2850 Email: greg-m@mweb.co.za

CONTEST NEWS

The committee only received 10 logs from five Clubs for the digital leg of the SARL 80 metre Club Contest.

1st West Rand ARC - 26 points from 4 logs 2nd Sandton ARC - 17 points from 2 logs 3rd Port Elizabeth ARS - 11 points from 2 logs

The combined scores after three contest are: 1st West Rand ARC - 179 points 2nd Bloemfontein ARC - 46 points 3rd Port Elizabeth ARS - 21 points

The full details were published in HF Happenings 511.

HF PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the week's expected Solar activity will be at moderate levels. Behemoth sunspot AR 1 515 is crackling with M-class flares and appears to be on the verge of producing an X-class explosion.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 103, more than double that of last week.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. 10 m openings will be more frequent due to the higher solar activity.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 14 July - IARU HF Championship competition from 12:00 UTC 14 July till 12:00 UTC 15 July. Offer your service at the NARC station by email to Geoff Levey, ZS6GRL, at contest@sarl.org.za. 21 July - SARL Radio Technology in Action symposium in Durban. Get details from www.sarl.org.za, request program by email to rta@sarl.org.za. 26 July - RAE course by the Santon ARC. Contact Greg Maynard at 079 111 2850 or email to greg-m@mweb.co.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by Dick, ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click

on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Johan ZS4SS, and edited by George Honiball, ZS6NE.

Thank you for listening. 73. /EX

Maui Prep Amateur Radio Enthusiasts Broadcasting Around the World:

Posted: 06 Jul 2012 05:00 PM PDT
http://www.eham.net/articles/28597

NAPILI - Nathaniel Muto, 11, may well be the youngest ham in Hawaii! Nathaniel, Griffin Sagar, 12, and Maui Preparatory Academy teacher Ian Cowan recently took the FCC technician class exam at the Maui County Civil Defense headquarters in Wailuku. "All three passed with flying colors! Our three test-takers have now earned their amateur (ham) radio licenses and are now contacting hams from around the world from the Maui Prep Amateur Radio Club station located in a classroom on our beautiful campus," explained former Maui Prep Principal Dr. Mike Manafo. "Through the benevolence of hams on Oahu and Maui, along with the Schools of the Future grant, we now have a fine station capable of transmitting on 11 different amateur frequency bands and able to reach stations throughout the world on SSB, CW and FM." To date, KH6MX, the club's call sign, has contacted more than 300 stations in 17 different countries. The Maui Prep Amateur Radio Club grew from a one-week interim activity in February to a full-fledged club that meets Tuesdays and Thursdays after school until 4 p.m. MPA students are welcome to join at no cost and work toward earning their radio license.

//
FCC Shuts Down Fallbrook Pirate Radio Station:

Posted: 06 Jul 2012 05:00 PM PDT
http://www.eham.net/articles/28596

The Federal Communications Commission (FCC) issued a Notice of Unlicensed Operation (NOUO) to a Fallbrook resident for broadcasting on an unlicensed broadcast radio station, also known as a "pirate" radio station. According to the NOUO document, the FCC received information that an unlicensed broadcast radio station on 106.1 MHz was allegedly operating in Fallbrook. On May 22, agents from the San Diego FCC office confirmed by direction-finding techniques that radio signals on frequency 106.1 MHz were emanating from a residence in Fallbrook's Gird valley area that reportedly belonged to Lewis A. Parks. According to Robert Gonsett, who is involved with the Fallbrook Amateur Radio Club and works in the broadcast engineering field, broadcast stations that are unlicensed are nicknamed pirate stations; they are not pirated stations, which would imply that an existing station was taken over by outlaws. "A pirate station is a new

station, created from scratch, often using equipment that has not been approved by the FCC," he said. "The important point to make to the public is that all radio and television broadcast stations that transmit signals 'over the air' in the US must be licensed by the FCC in Washington, DC. There are some extremely low powered exceptions. For example, in the FM broadcast band, you can legally use a wireless microphone provided the device meets stringent restrictions established by the FCC. The device must be so low powered, and the antenna so short, that it would not be heard much beyond a radius of about 100 feet. So, if you find a device that transmits further than that, you have most likely found a pirate transmitter that would not be legal for use in the United States without a license from the FCC."

//
Sun Erupts with Strongest Summer Solar Flare Yet:

Posted: 06 Jul 2012 05:00 PM PDT
http://www.eham.net/articles/28595

The most powerful solar flare of the summer so far erupted from the sun Friday (July 6), the latest in a string of powerful storms this week from our nearest star, space weather experts say. The sun storm occurred just after 7 p.m. EDT (2300 GMT) and registered as a class X1.1 solar flare -- one of the strongest types of solar flares possible, according to the U.S. Space Weather Prediction Center (SWPC) run by NOAA and the National Weather Service.

//
Solar Flare Results in Radio Blackout:

Posted: 06 Jul 2012 05:00 PM PDT
http://www.eham.net/articles/28594

NASA sun-watchers have reported that the Sun has released another M-class solar flare, causing a moderate radio blackout on the morning of July 5. Astronomers have been watching Active Region 1515, a particular sunspot complex on the surface of the Sun, which is currently moving across the Earth-facing side of the Sun. Sunspots are caused by regions of magnetic activity on the surface of the Sun, which are capable of causing eruptions of energy and particles which potentially affect the Earth. Since, July 3, astronomers have watched region 1515 emit 12 M-class flares. The strongest flares are called X-class, while M-class rank second. The NASA release notes that Thursday's M-class flare was about half as strong as the weakest of the X-class flares. July 5's flare occurred around 7:44 AM EDT, and caused disruption to the layer of charged particles surrounding the Earth, called the ionosphere. High energy X-rays and UV light from the flare can cause continuous changes in the ionosphere, deflecting radio waves as they travel through it. The National Oceanic and Atmospheric Administration (NOAA) classifies radio disruptions on a five-point scale, from R1 to R5, with R5 being the greatest disruption. Thursday's flare qualified as an R2. The NASA release notes that the radio disruption has since subsided.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 8th July 2012

Volvo Ocean Race Festival

As part of the celebrations in Galway for the Volvo Ocean Race, Galway Radio Experimenters Club have been QRV with a special event call sign EI12VOR. Located in the Global Village in South Park in the Claddagh area, they worked in conjunction with Scouting Ireland. Planned activities included Morse training, a Fox Hunt and QSL card design.

South Dublin Radio Club

We mentioned a few weeks ago that Daniel EI9FHB has been explaining the technology behind Radio-Frequency Identification to members of South Dublin Radio Club. At the club's meeting on Tuesday last, Daniel followed up his earlier presentation with a further talk about this technology. This included a demonstration of how transmissions from some of the devices in use in this area can be picked up on 13.56 MHZ, just below the 20 metre amateur band.

Solar and Wind Power operation

Olivier EI8GQB (who is also ON4EI) plans to operate for most of July from a caravan, using "green energy" - solar and wind power. He has a 500Ah battery bank, plus 180W solar panel and a 400W wind generator. He plans to use the EI80IRTS call sign during the IARU HF Championship contest next weekend and will use the contest call sign EI1A (Echo-India-One-Alpha) during the IOTA contest at the end of the month. Olivier's QRZ.COM page will carry a Live Information Banner with messages and live frequencies as well as daily information with photos and video.

Order of Malta Amateur Radio Station

Over the past week, the Italian Relief Corps of the Order of Malta operated an amateur radio station from the Order's headquarters in Rome. Donations collected as a direct result of this operation are to be used to finance a project tied to emergency communications.

The Sovereign Order of Malta is a sovereign subject of international law, even though it is not a country. From a DXing point of view, however, it is a separate entity and a relatively rare one at that, so the amateur radio operation last week - call sign 1A0C (One-Alpha-Zero-Charlie) - was one of the big attractions on the bands.

The 1A0C operation covered all bands from 6 metres to 80 metres, using SSB, CW and RTTY. Their QSO total was over 40,000, with almost 15,000 unique call signs in the log. This includes 80 EI and GI call signs, many of these achieving QSOs on 6 metres, which was no doubt welcome.

Bushvalley Amateur Radio Club

Bushvalley Amateur Radio Club from Dervock, Co. Antrim, will be running a Special Event Station on Saturday 21st July 2012 in conjunction with the Kennedy Kane McArthur Marathon celebrations. The call sign used will be GB0KKM. Dervcock-born Ken McArthur was the winner of the Marathon at the 1912 Olympics in Stockholm; more details on Kennedy Kane McArthur can be found at www.bit.ly/LRrK3T

Amateur Station Licence Examination

Fourteen candidates sat the licence examination on Thursday 28th June. We understand that ComReg have already issued the results to candidates. The next examination will be held in early October 2012 - exact date to be announced shortly.

EI DXCC List

We note two new EI call signs in the EI DXCC List at www.irts.ie/dxcc - the new award holders, both of whom live in Wexford, are Bernard EI4II (a very active participant in international contests) and Jim EI9GLB. Jim tells us that his initial DXCC award comes entirely from Logbook of the World QSLs.

Contest News

The Islands On The Air contest, held during the last weekend in July, always attracts considerable interest in Ireland. Plans by Olivier EI8GQB to participate in the IOTA contest were mentioned earlier in this bulletin. We are also aware that the Papa Lima DX Group (EJ0PL) will return to Little Saltee, EU-103, for the contest, while Gerard EI5KF will be operating from Bere Island EU-121.

In other contest news, those who entered the 80 metres counties contest in June should note that the deadline for log submissions is 17th July.

DX News

Laurent F8BBL will be on Corsica from now until 21st July. Corsica counts as EU-014 for the Islands on the Air Award. He will use the call sign TK12IOTA which will also be of interest to the prefix hunters. On 14 July he will make a side-trip to Lavelli Island, IOTA EU-164, signing TK12IOTA/P and finally on 18 July he will operate from Sanguinaires Island, IOTA EU-104, again using TK12IOTA/P.

Eric KV1J travels to the St Pierre and Miquelon Islands off the coast of Canada from 9 - 17 July. He will be on the air as FP/KV1J on all bands 160 - 6m. He will also take part in the IARU HF Contest on the weekend of 14/15 July.

John W5JON will be on the Caribbean islands of St Kitts and Nevis from 12 July until 2 August. He will use the callsign V47JA and will be active in the IOTA Contest on 28 - 29 July.

Moroccan stations are permitted to use the prefix 5C13 instead of their usual CN prefix until 27 July. This is to celebrate the 13th anniversary of the crowning of King Mohammed VI.

A special event station, CK6S, will be QRV from the city of Calgary in Canada from now until 15 July. This celebrates the 100th Anniversary of the famous Calgary Stampede. QSL manager is VE6AO.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 1st-July, through Sunday, 8th-July there were 210 countries active. Countries available: 1A, 3A, 3B8, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5N, 5R, 5T, 5V, 5Z, 6W, 6Y, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J5, J6, JA, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH3, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OZ, P2, P4, PA, PJ2, PJ4, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP5, VP8/h, VP9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

1A, SOVEREIGN MILITARY ORDER OF MALTA (Wrap-up). The 1A0C operation went QRT on July 5th. As per their Web page, the 1A0C operation made 40957 QSOs with 14479 unique callsigns (14735/CW, 20268/SSB, 5950/RTTY and 4/FM). Breakdown by continent is as follows: 427/AF, 3226/AS, 27142/EU,

9320/NA, 288/OC and 554/SA. QSL via OQRS or LoTW. The OQRS is now available online at: http://www.1a0c.com/qsl-information

3B9, RODRIGUES ISLAND. A team of operators from Switerland known as the "Radio 7 Team" will be active as 3B9SP from Rodrigues Island (AF-017) between October 16-23rd. Operators currently mentioned are Manfred/HB9ACA, Michel/HB9BOI, Herbert/HB9BOU, Eugen/HB9BQP, Nicolas/HB9CYF, Cedric/ HB9HFN, Bertrand/HB9SLO, Fritz/HB9TNA and Alain/HB9TYJ. The pilot station will be Sebastien/HB9ICC and the coordination in Mauritius is Jacky, 3B8CF. Their goal is to set up three amateur radio stations that can be run together on different Amateur Radio bands. Mostly one on CW, one on SSB and the third running special modes like RTTY and PSK31. They hope to use small 400 watt solid state amplifiers for the CW and SSB stations. Activity will be on 160-6 meters using two 3 element Spiderbeams (20/17/ 15/12/10m), verticals for 40/30/20m, a Butternut HF2V for 160/80/40m and a Slim Jim for 6 meters. QSL via HB9ACA direct or use the OQRS on ClubLog. The logs will be uploaded to LotW within 6 months after the DX Operation.

7T50/7U50/7V50/7W50/7Y50, ALGERIA. Members of the "Amateurs Radio Algeriens" (ARA - 7X2ARA) will be active using special prefixes to celebrate the 50th anniversary of the Algerian Independence between now and December 31st. A special award/diploma is available for obtaining 50 points by working the following stations:
7T50I - Official Station (RC Algiers); 10 points; QSL via 7X2ARA
7W50I - Radio Club Station from East and South East area (RC Bou-Saada); 5 points; QSL via 7X2ARA
7V50I & 7U50I - Radio Club Stations from the south zone (RC Laghouat); 5 points; QSL via 7X2ARA
7Y50I - Radio Club Station from the West and South West area (RC Mos-taganem; 5 points; QSL via 7X2ARA
7X ordinary Algerian stations; 3 points

Complete details about the award are available on QRZ.com under any of the above special callsigns.

9A20, CROATIA (Special Event/Contest). This year the Croatian Radio Amateur Association team will participate in the IARU HF World Championship (July 14-15th) using the special callsign 9A20HQ. They shall be active on all six bands and both modes. QSOs with 9A20HQ are valid for the "20th Anni-versary of the 9A prefix" award and will be automatically confirmed via the Bureau - no need to send your cards. Details/rules for the "20th Anniversary of 9A prefix" can be found on:
http://www.hamradio.hr/index.php?option&#65533;m_content&view&#65533;ticle&id!16&Itemidy8

9H, MALTA. Giammario, IK0PEA, will be active as 9H3EA from Bugibba near La Valletta between August 5-17th. Activity will be holiday style on the HF bands plus 6 meters. He will be using a Kenwood TS 480-SAT with a vertical antenna. He may also use a dipole antenna for better performance on 30 and 40 meters. Focus will be on the Digital modes and SSB. QSL via his home callsign, by the Bureau or direct.

AFRICAN TOUR (6W & C5). Dom, M1TKA, will activate two African countries during the month of August. His tentative schedule is as follows:
August 15-22nd - Senegal; Callsign 6W/M1KTA
August 22-29th - Gambia; Callsign C5/M1KTA
Activity will be on most HF bands using SSB, PSK and CW (in that order). He also mentions that he will use 6 meters if open from Senegal. For more information and updates, visit his Blog page at: http://m1kta-qrp.blogspot.com

AP, PAKISTAN. Operators Asad/AP2AUM, Muhammad/AP2MF and Khalid/AP2MKS will be active as AP2ARS from Swat District between 1300z July 14th and 1900z July 15th. They will operate from an elevation of 2300m ASL using frequencies 7050 and 14150 kHz, and the satellites. Power output will be 150 watts to an Inverted V dipole for HF and an egg beater for the satellite communications (Grid Locater: MM65HH). QSL via: PARS AP2ARS, P.O.BOX 1450, Islamabad, 44000, Pakistan.

CY9, ST. PAUL ISLAND (Update). The CY9M Team posted the following press release (#3) on July 6th [edited]: "Very soon it's time for an international team of 10 amateur radio operators to board their flights to Nova Scotia, Canada, to participate in the expedition to St. Paul Island, a top-40 'most wanted' DXCC.

Quick Facts: CY9M St. Paul Island, July 26th-August 1st, 160-6 meters, QSL via M0URX.

Once the team arrives at St. Paul, in the Gulf of St. Lawrence, we plan to unpack and prepare six Elecraft K3 transceivers, four amplifiers, raise three Hex Beams and a number of other antennas in order to be active all bands from 160 through 6 meters CW, SSB and Digital.
The power station consists of three generators that will constantly charge three large battery tanks for maximum efficiency. We plan to consume more that 500 litres of fuel, large amounts of camping food and other 'necessities', including several hundred litres of water all of which are not found on the island.
The team, together with 2 tons of equipment and supplies, head out to sea on a 42 foot motor vessel on the evening of 25th July or on the morning of the 26th depending on weather. We expect to be active starting July 26th and continuously rock the bands until August 1st, weather permitting.
Participation throughout the IOTA contest.
After the activity, all contacts will be verified via LoTW and for those who want paper QSL, Tim Beaumont, M0URX, lends us his excellent manager services. The log will be available through ClubLog, likely after the expedition.
The activity is supported both financially and through the loan of equipment by several large clubs such as NCDXF, GDXF, ARRL and companies like Elecraft, Acom and DX Engineering. But we are most proud that so many individual amateur operators and DX chasers contribute to the activity out of their own pocket.
If you would like to donate any amount to the CY9M St. Paul Island Dxpedition, please click here: http://www.cy9m.com/donor
Feel free to follow us on Twitter and Facebook for the latest news

updates.
We look forward to working you from St. Paul Island, a top 40 most
wanted DXCC.

DIAMOND DXCC (Additional Diamond DXCC Tools and Reports Now Available).
The ARRL Web page reports, "The Diamond DXCC Award, celebrating the 75th
anniversary of DXCC, has proven to be popular around the world. Nearly
700 applications have been filed, with K3RA presently sitting atop the
list with 200 of the 231 possible entities in the log. Some incredibly
rare places have been on the air in 2012 so far, including Tibet and
Socotra Island! Recently ARRL has been able to add some additional tools
and reports to the Diamond DXCC system. An online form has been added that
is similar to the Online DXCC application. The Diamond DXCC application
works the same way, except it is tailored to work for just the Diamond
DXCC entities." For the complete report and more details, visit:
http://www.arrl.org/news/view/additional-diamond-dxcc-tools-and-reports-now-
available

DXPEDITION VIDEOS OF THE WEEK. With more and more DXpeditions putting
their videos on YouTube and other Web services, we decided to list them
(possibly) each week. For this week's listings:
1993 - AH1A Howland Island DXpedition:
http://www.youtube.com/watch?v=uIxN-85js
2006 - 5A7A Libya DXpedition: http://www.youtube.com/watch?v=Ofy8MZLYY
2011 - A71DLH Qatar DXpediiton: http://www.youtube.com/watch?v=f0zo-fS
J0

If you have a DXpedition 'video' available on the Web and would like to
have it listed in the OPDX, PLEASE send the URL to use and we will publish
it.

E5, SOUTH COOK ISLANDS (Update). Norman, 5B4AIF, will be active as E51E
from a villa in Tautu Village on Aitutaki Island (OC-083) between December
10th and January 5th (2013). Activity will be holiday style using just basic
antennas. Norman states, "I hope to have the HF2V for 40/80m. Shipped in
advance everything else will travel with us. Inverted V's will be used
for other bands unless I can get something 2nd hand to leave there. The
radio will be a IC-7000, the amp will have the full legal power of 400
watts. I would like to operate at least SSB and RTTY, I am learning CW
so if I am feeling able I will do some slow morse, but if no one sends

slowly I will have to try another mode." Suggested frequencies are:
CW - 1825, 3525, 7020, 10105, 14025, 18075, 21025, 24895 and 28025 kHz
SSB - 1840, 3793, 7185, 14215, 18160, 21295, 24950 and 28485 kHz
RTTY - 3630, 7035, 10145, 14090, 18105, 21090, 24925 and 28090 kHz
6m - 50105/CW and 50130/SSB

QSL via EB7DX only. He is a ClubLog user. He now has a Web page up
and running with a "bands/modes" needs survey available at:
http://aitutaki2012.com

EF8, CANARY ISLANDS. Luis, EA8AY, will be active as EF8X from Tenerife
Island (IOTA AF-004, DIE S-012, WLOTA 1276, EAA TF) during the RSGB IOTA
Contest (July 28-29th) as a Single-Op/All-band entry. QSL via W2GR.
Visit his Web site at: http://www.ea8ay.com/ef8x

EI1/EI8/EI80, IRELAND. Olivier, EI8GQB/EI1A/ON4EI, will operate as EI8GQB
between July 7-31st, from a caravan with green energy. He will take part
in the IARU HF World Championship (July 14-15th) and RSGB IOTA Contest
(July 28-29th). He will operate as a Single-Op/2R (2 radios) with 5
different antennas in a portable condition like disaster/emergency
situation. Follow his activities on <http://www.qrz.com/db/EI8GQB>
where you will find a "Live Information Banner" with message and live
frequencies as well as daily information with photo and video. Between
July 28-29th, look for Olivier to use his new special contest callsign
EI1A during the RSGB IOTA Contest. He plans to use a solar panel and
a wind generator only. QSL EI8GQB and EI1A ONLY via the Bureau to ON4EI.
ADDED SPECIAL ACTIVITIES: Between July 14-15th, look for EI80IRTS to be
activated by Olivier/ON4EI and Bernard/EI4II from the Irish Radio Trans-
mitters Society (IRTS) HQ (Headquarter) station during the IARU HF World
Championship. Also, look for EI80IRTS to be active on July 21st. This is
a special callsign celebrating the 80th anniversary of the Irish Radio
Transmitters Society.

GO2, ENGLAND. The RSGB IARU UK HQ team (GR2HQ) will be active during the
IARU HF World Championship (July 14-15th) with the special callsign GO2HQ
to celebrate the London Olympics this year. Other UK stations will also
start using the GO prefix on July 21st. Please QSL GO2HQ via M0OXO - see
<www.gr2hq.com> for more details.

H4, SOLOMON ISLANDS (IOTA Op). Vadym, UT6UD, will be active as H44UD from
New Georgia Island (OC-149), Western Province of Solomon Islands, between
July 10-17th. Activity will be holiday style, and he will work mainly on
CW during his evening and morning. If conditions permit, Vadym will try to
find time to activate the IOTA groups OC-047 and OC-158. QSL via his home
callsign, by the Bureau or direct.

IOTA NEWS.............
AS-113. Members of the Amateur Radio Taipei (ART) will be active as
BO0M from Matsu Island between July 27-30th. Activity will
include an entry in the RSGB IOTA Contest (July 28-29th).
Operators mentioned are Tang/BM2AAV, Ken/BV1EL, Eddie/BV2DD,
Evan/BV2KS, Lee/BV2NT, Lee/BX2AB, Calvin/BX4AG, Alfred/VR2SA

and Bom/XX9LT. QSL only via: A.R.T. QSL Service, PO Box 73-326, Taipei, Taiwan. Visit the ART Web page at: http://art.ham.org.tw/en

EU-017. Dario, IZ4UEZ, to be active as ID9/homecall from Isola Lipari (IIA ME-001, MIA MI-053, WLOTA 1144, IPA: ME) between July 6-11th. Activity will be holiday style, using SSB only (RTTY under conditions). Equipment will be a FT857 w/100w into a fishing rod antenna, QSL via his home callsign, direct or by the Bureau.

EU-032. Operators Jacky/F4EGH (SSB) and Leon/ON4ZD/OS0S (CW) will be active as TM0BI from Fort Boyard Island (DIFM AT026, DFCF 17003) both days July 25th and 26th, between 0700-1600z (+/-). This year they were not able to receive permission to remain during the night on the fort. Activity will be on the usual island frequencies on SSB and CW +/- 17 kHz above the band edge. There will be no Digital activity. All QSL info is available on QRZ.com.

EU-073. Members of Taranto ARMI section and 599 DX Team will be active as IJ7T from San Pietro Isle (IIA TA-002) between July 20-22nd. Activity will be on the HF bands and 6 meters using CW, SSB and RTTY. Operators mentioned are Fabrizio/IZ7LDC (Team Leader), Francesco/IZ7AUH (Co-Team leader), Luigi/IZ7HYA (Logistic/ Equipment), Elso/I7LGM, Simone/IZ0BTV, Antonio/IK7WDS, Giuseppe/ IK7MOF, Alessandro/IZ7FMM and Aurelio/IZ8EGM. QSL via IK7WDS, direct or by the Bureau. QSL cards can also be requested via the OQRS on ClubLog. For more information, visit: http://www.armi.ta.it

EU-096. Tony, OH1TD, will be active from his summer home on Korpo Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op entry. QSL via OH Bureau.

EU-123. Iain, MM0TFU, will be active as MM0TFU/p from Blackwaterfoot on the west side of the Isle of Arran (IOSA CL01, SCOTIA CS14), Clyde Islands, between July 19-28th. Activity will be before and during the RSGB IOTA Contest (July 28-29th). QSL via LoTW, preferred. QSL also via his home callsign, direct or by the Bureau.

EU-132. Adam, DJ0IF, will be active as SN0RX from Wolin Island during the RSGB IOTA Contest (July 28-29th). QSL via SP8RX.

EU-146. Ronny, ON6CQ, will be active as PA/ON6CQ from the Island of Schouwen Duiveland during the RSGB IOTA Contest (July 28-29th) as a Single-Op/SSB entry. QSL via ON6CQ, direct or by the Bureau (preferred), or 100% by LoTW.

EU-170. Feri, HA4BF, will be active as 9A/HA4BF/p from Vir Island (ACIA IC-200, CIA-55, IOCA CI-141, MIA MC-451, WLOTA 4050) between July 8-21st. Activity will be holiday style and SSB only. QSL

via his home callsign, direct, LoTW and eQSL.

EU-171. Operators Netti/DO6XX, Robin/DO2XX and Rene/DL2JRM will be active as OZ/homecalls from Vendsyssel-Thy/Nordjylland (DIA NJ-001) between now and July 21st. Netti and Robin will be active on 80-10 meters using SSB, with 100w and GP antenna. Rene will be active 80-10 meters using CW and SSB, with 100w and GP antenna. Rene will also operate /m from different DIA islands. QSL via their home callsign, by the Bureau or direct.

EU-171. Ric, DL2VFR, will be active as OZ0FR/p from Vendsyssel-Thy/ Nordjylland (DIA NJ-001) between now and July 20th. Activity will be on all HF bands, mostly CW. QSL via his home callsign, by the Bureau or direct. Visit the Web site: http://www.iota-expedition.com

NA-067. Sergej, K0KOC, will be active as homecall/p from Ocracoke Island (USI NC001S, WLOTA 0466, Hyde County, NC) between July 26-30th. He will be using a Elecraft KX3 10W QRP, most of the time operating the Digital modes (JT65, PKS-31, RTTY), powered by 20w sun panels and LiFo battery only. QSL via his home callsign, direct or by the Bureau.

IQ1, ITALY (Special Event/Award). Members of the "Associazione Radioamatori Italiani" (ARI) will activate their club station as IQ1TW between July 1-31st. A special operating award - "Apollo Space Program • From the Earth to the Moon" - will be available. The award is to "commemorate and keep alive the memory of the space program which has revolutionized the life of humankind". To qualify for the award, you need to have confirmed contacts with the ARI Headquarters Station IQ1TW and any three stations from the following list: IZ1UMD, IZ1RFU, IZ1XBB, IZ1WVX, IZ1LBH, IK1WGZ, IZ1RGY, IZ2SMV and I1MXI. On July 20th, the anniversary of the first moon landing, a confirmed contact with IQ1TW (without the necessity of the other 3 contacts) will qualify you for the award. The special event stations will operate with 200 watts using dipole and vertical antennas. Full details, including a list of the planned HF operating frequencies and modes, log and confirmation information, rules, and application instructions are posted on the ARI web pages at: http://aritortona.xoom.it

NOT THE QSL MANAGER. Tim, KQ8M, reports that he is receiving QSLs for VE2CSI, and he is not the QSL Manager. He was only the the QSL Manager for the 1992 CQWW DX CW Contest between November 28-29th. Otherwise, QSL to M0URX according to QRZ.com.

QSL MANAGER OF THE YEAR. The Golist QSL Manager Data Service is reviving its QSL Manager of the Year Award. The purpose of this award is to recognize the service of QSL Managers world-wide for the service they provide to the World Wide DX Community. Nominations for this award will

be accepted by the Golist from DX and Contest clubs, world-wide, for the year of 2012. Each DX club and Contest club is encouraged to poll their members for their nominations for the Top 5 QSL Managers for 2012. The definition of a QSL Manager for this award is any person who confirms contacts via printed QSL Card for any station other than their Primary Call Sign. Each club should tabulate the votes of their members and submit to the Golist the Top 5 vote getters as voted by members of their club. Votes should be tabulated and sent to the Golist by August 1, 2012, to be eligible for the QSL Manager of the Year award. Each club world-wide may only send one submission for voting purposes. Records of submission will be maintained by the GOLIST. A plaque, donated by DX Publishing, Inc., publisher of QRZ-DX and THE DX MAGAZINE, will be awarded to the QSL Manager of the Year selected at the W4DXCC Convention held in Pigeon Forge, Tennessee, in September 2012. The recognized format for your club's submission is as follows: Club Name; Club Officer (Name, Call Sign, club office and email address); Top 5 QSL Manager Nominees (list name and callsign). In the subject line of your official email: *QSL Manager of the Year-2012*. Send to: <golist@gmail.com>. Ending Date: August 1, 2012.

QSL RECEIVED VIA LoTW: 7Z1CQ, 8P6NW, 9M2TO, 9V1YC, A45XR, CT1JOP, E72U, EA1VT, EA2RCF, EO2012KW, ER1DA, FG5FU, FK8DD, G3ZQH, G3ZRN, G4MLW, G5CL, HA5AQ, HI3TEJ, HK1MW, HP1/IZ6BRN, K1DW, K9ZM, LU5FF, LY2MM, N2MH, NP2KW, OE9ICI, OH8L, OK1DX, OM0CS, ON4KEB, PA7RA, PJ7PT, R7AU, R7NA, VE1NB, VE2PID, W0RU, W5PR, WS7V, YT9M and YU2VZ

QSLS RECEIVED VIA MAIL: 3DA0FC, 3Y8XSA, 4C1JPG, 4M5CW, 4M5M, 6Y5R, 8P6EX, 9L0W, 9M0L, 9M6YBG, 9Q0HQ/7, A52JY, A52KJ, AP2JZB, CU1AC, CU2X, ER1DA, EK6TA, FJ/OH2YL, FO/OH1RX, FR1LB, HK0NA, J69MV, J79XB, KH9/W0CN, LX1NJ, OH0R, OM7M, PZ5T, SM0/JH0CJH, SV2ASP/A, TX6T/P, TX8CW, VP6T, WP3Y, XP1A, ZD7XF and ZK2C

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

SK9, SWEDEN. The Swedish SSA Youth Team (SK0YT) initiative will be manning SK9HQ during the IARU HF World Championship (July 14-15th) as a Multi-Multi entry on 160-10 meters SSB. Their QTH will be Kvarnberget ARC club station SK0UX. A total of seven youngsters will participate this time and the aim is to introduce "contesting" and to give them the opportunity to practice operator techniques. QSL via SM6JSM.

SV9, CRETE. Claude, HB9CRX, will be active as SV9/HB9CRX from Kissamos Island (EU-015) between July 9-21st. Activity will be on 30-6 meters using CW only and running QRP 5 watts. QSL via his home callsign.

SX1, GREECE. Members of the Radio Amateur Association of Greece (RAAG), the National Technical University of Athens and DXPlus Hellenic Radio Amateur M.I. Team will activate special event station SX1GR from the "Sacred Rock of Acropolis of Athens" between July 18-22nd. Look for activity to be on all HF frequencies using CW, SSB, RTTY and PSK31. Activity will also be on 6 and 2 meters. The station/stations will be active during the hours of museum operation. A special QSL award and

special engraved QSL plaque will be available on request for any QSO. For additional information please contact SV1HER at: vanikiotis@freemail.gr QSL via SV Bureau. See QRZ.com for more details.

TC, TURKEY (Correction/Update to OPDX.1066). Tevfik, TA1HZ, informs that there has been a mistake regarding the callsign to be used from Kefken Island's (AS-159) Lighthouse during the RSGB IOTA Contest weekend. It was originally mentioned that the TC2KLH callsign would be used, but the callsign now will be TC0KLH during the activity between July 27-29th. Please QSL via the TA QSL Bureau.

TM70, FRANCE (Special Event/Update - Callsign Granted). Operators Philippe/F5SKW, Dimitri/F5SWB, Freddy/F5IRO/J28RO, David/F8CRS, Yves-Michel/F5PRU, and possibly some other hams and French Servicemen will be active as TM70TE from the 3rd floor of the Eiffel Tower, approximately 300 meters above the ground, between July 12-15th. Activity is to commemorate the 70th anniversary of the French Army Signal Corps. Activity will be on CW, SSB and RTTY, and on the HF and VHF (JN18du) bands. Operations will be 24 hours each day. A special QSL card will be available. QSL via the F6KHX ARC or F5OGL, direct or by the REF QSL Bureau.

TO5, MARTINIQUE. Lars, K9FY, will be active as TO5U from Martinique (NA-107) between July 11-18th. Activity will be holiday style on all HF bands using CW and SSB ("as condx and time away from beaches and Caribbean-French eateries and water holes allow"). QSL via his home callsign direct.

UE95, RUSSIA (Special Event). Look for special event UE95K to be active between July 14-22nd. Activity is to celebrate the 95th anniversary of Pavel Kamozin, a twice hero of the Soviet Union, as a flight commander, deputy commander, and commander of a squadron of a fighter aviation regiment. QSL via RV3YR.

V3, BELIZE (Update). Operators Henry/W5HNS, Jay/K0BCN and Marty/W5MRM will be active as V31WH, V31MX and V31MO, respectively, from Cay Caulker (NA-073). The team will arrive on July 23rd, and possibly be on the air that day. They will return to the U.S. on July 31st. Activity will be on 40-10 meters using a 5 band hexbeam and a 40m dipole, operating CW, PSK and SSB. Jay and Henry are the CW ops (as well as SSB) and Marty will operate on SSB. They may possibly have two transceivers on before the RSGB IOTA contest. During the RSGB IOTA Contest (July 28-29th), they will sign V31MX and be on the contest allowed bands alternating SSB and CW (on 40m and up). QSL via their home callsigns or LoTW.

VP2M, MONTSERRAT. Operators Bob/W5UQ and Bill/W5SJ are in their last minute preparations for their annual July trip this time they hold the callsigns VP2MUQ and VP2MSJ, respectively, between July 17-24th. Activity will be a casual, holiday style, DXpedition with an emphasis on CW on the 30/17/12 meters bands plus some limited RTTY..... EXCEPT for the weekend when Bill will take on the CQWW VHF Contest (July 21-22nd) with a 7 element, M2, 6M7JHV and Bob's Expert Amp, 1K FA for all bands, including 6 meters for the contest. They'll be operating from Gingerbread Hill.

QSLs go to W5JAY.

VY2, CANADA. A group of Eastern Ontario amateur radio operators will be operating from Prince Edward Island (NA-029) between July 12-16th. During the IARU HF World Championship (July 14-15th), they will be using VY2RAC as Canada's HQ station. They will be operating as Multi-2 entry, both CW and SSB. QSL via: Radio Amateurs of Canada, 720 Belfast Road, Suite 217, Ottawa, Ontario, K1G 0Z5, Canada.

ZL9, CAMPBELL ISLAND (Update). Members of the Hellenic Amateur Radio Association of Australia announced that they have received a landing permit from the NZ Dept. of Conservation for ZL9HR Campbell Island DXpedition in November.

ZS, SOUTH AFRICA. Bernie, ZS4TX, announced this past weekend that he will be active during the upcoming CQWW DX RTTY Contest (September 29-30th) as a Single-Op/All-Band/High-Power entry. He also mentioned that he will be in the CQWW DX CW Contest (November 24-25th) as a Single-Op/Single-Band (15m)/High-Power entry. QSL both events via LoTW.

An International Radio Station in Your Basement:

Posted: 07 Jul 2012 05:20 PM PDT
http://www.eham.net/articles/28601

Ham radio is alive and well, and despite cell phones and the Internet, is still the best way to run a parade, marathon, or send information during a catastrophe. Some folks may remember being able to talk to astronauts in the space station from school. Others maybe knew someone with an international ham radio setup in the basement. What you didn't know is that you can still do that (minus astronauts) for about $15 for the license and starting at $90 for the handheld style of ham radio or cheaper if you hit an amateur radio flea market like the one I went to this morning in South Milwaukee (with roots in the military, these ham things start at the crack of dawn). But why now, what else does it do, and how does it work, you may ask? I just found out that parades, bike races, marathons are being managed by understated folks with ham radios. The kind of guy that may not want to tell you his last name, but who has an internationally recognized call sign that ties to his home address at qrz.com. It makes sense -- routes are long, and walkie-talkies only reach so far. Cell phones do not have an open line and cannot broadcast. However, a ham operator at a route juncture can signal others about conditions and race details.

Need QSL Cards from New Guinea or Solomon Islands (1939-1943):

Posted: 07 Jul 2012 04:30 PM PDT
http://www.eham.net/articles/28598

A 501C-3 non-profit is building a $3.5M WW2 Educational Center adjacent to the last remaining operating WW2 PT Boat. We are looking for QSL cards from subject and-or LT Arthur Reginald Evans (NZ) who radioed in the rescue of PT 109's crew. Donor will receive honors and ceremonial ride onboard PT 658 (completely restored with weapons systems and 2000HP Packard engines) and discounted weekend room at next year's Memorial Day celebrations at Jantzen Beach Red Lion Hotel in Portland, OR.

GB2RS NEWS

Sunday 8th July 2012

The news headlines:

* Society publishes proposals for strategy and new governance arrangements.

* Final call for 2 metre data band plan consultation

* Olympics frequency regulations start taking effect

On 7 July, the Society published two very important consultative documents. These are on the RSGB website and in the August Edition of RadCom. They contain proposals for a 3-year strategy for the society, together with new governance arrangements. All members are encouraged to participate during the consultation period that runs until 20 August. You can make comments by joining in two Litmus Tests to be conducted via the website, by e-mail either to strategy@rsgb.org.uk or governance@rsgb.org.uk or by post to RSGB HQ.

A recent item on GB2RS and a fuller article in July's RadCom detailed proposed changes to the 144MHz data band plan and the intention to consult on these changes using a Litmus Test via the RSGB website. Responses have been generally very positive and it is intended to bring the consultation to an end on 15 July. A final call for comments will be posted on the website this week. Anyone wishing to make an input can find the consultation at www.rsgb.org/consultations. Owing to a technical issue, if you have previously posted on this Litmus Test, you will have to recreate your user account if you wish to post again. This was caused by our moving the Litmus Test to a new server. The Society apologises for any inconvenience this may cause.

As previously announced by Ofcom, the temporary restrictions on 70cm, 2.3GHz and 3.4GHz around Games venues are now in force until 23 September. Changes to repeaters affected by Annex C of the Ofcom 70cm restrictions have also been implemented. GB3OK at Orpington, Kent and GB3NS at Banstead, North Surrey have changed to their new 9MHz split operating frequencies. GB3EK at Margate in East Kent has temporarily reduced power; whilst the new temporary Olympics repeater GB3OY in East London has begun operation. The RSGB website has details of these, as well as important updates for the temporary usage of 2m and Ofcom's enhanced enforcement powers that also come into effect later this month, at www.rsgb.org/Olympics. The next edition of RadCom will also include details, as well as the latest arrangements for special events and operating opportunities.

A new DX record has been achieved on the ageing OSCAR-7 satellite. This was between Wyatt, AC0RA in Iowa and Bill, OM3BD in the Slovak Republic. Their GPS-measured 7849km QSO between grid squares EN31vx and JN88mf surpassed the prior 7843km record set in 2010. To make the path, OM3BD was running a Yaesu FT-847 with SP2000 preamp fed by a pair of 10 element Yagis on 2m and an 8 element Yagi for 70cm. AC0RA also used a Yaesu FT-847 transceiver with a 7 element Yagi on 2m and a 12 element Yagi on 70cm.

Tasmania's first D-Star repeater is on the air. VK7RRR is the southernmost D-Star repeater in the world, and the first and only such public digital voice repeater in Tasmania. The system operates in the 70cm band, listening on 432.725MHz and transmitting on 438.125MHz with 50 watts of output power.

There have been four named storms in the Atlantic already this year. Although none have made the news, it is time for the reminder that amateur radio continues to play a part in gathering and distributing information for the weather and emergency services each year. Radio amateurs in Region 1 are reminded that some frequencies may be in use by nets in North and Central America. It is possible for Region 1 amateurs to cause unintentional interference to these nets. 14.300MHz is used by the Maritime Mobile Service Net daily and, as well as handling traffic from Maritime Mobile

Copyright © RSGB 2012. Not for public release before Monday 9 July 2012 except as a GB2RS broadcast. Stations, also gathers weather reports from maritime stations to assist forecasters. 14.325MHz is used by the Hurricane Watch Net and the net is established whenever it appears that a storm may affect the US mainland. The net gathers weather information and links to the American National Hurricane Centre. 14.265MHz is used by the Salvation Army Team Emergency Radio Network, which provides Health and Welfare traffic links for those in affected areas, as well as supporting the Salvation Army Disaster relief response should a hurricane strike. A number of other frequencies are used by specific countries and details of those can be found on the IARU Region 1 website, www.iaru-r1.org.

And now for the details of rallies and events for the coming week

The 49th Cornish Radio Amateurs Club Rally takes place today, 8 July, at Penair School, St Clements, Truro, Cornwall, TR1 1TN. Doors open at 10.30am and admission is £2. There will be trade stands and a Bring & Buy. Details from Steve on 01209 844 939.

On 15 July, the McMichael Rally and Boot Sale takes place at Reading Rugby Club, just off the A4 east of Reading. There is free car parking and the gates open at 9.30am. Admission is £2. There will be trade stands, special interest groups and a car boot area. More details from Pete, G8FRC on 01189 695 697.

QRP in the Country will take place on 15 July at Upton Bridge Farm, Long Sutton, Langport, Somerset TA10 9NJ, regardless of the weather.

Organiser Tim Walford says the cattle sheds have been cleaned and it will be indoors if the weather stays bad. The farm gate opens at 10am. Don't forget to bring your entries for the Ten Part Receiver Challenge!

Now for the news of special events

Poldhu Amateur Radio Club will be operating GB5TEL from Goonhilly Earth Station on Wednesday 11 July to celebrate the 50th anniversary of the first transatlantic TV transmission via Telstar.

Riviera Amateur Radio Club will be operating a portable station from Brixham Breakwater on Thursday 19 and Friday 20 July in support of RNLI Torbay's Lifeboat Week 2012. The club callsign MX0RIV will be active on HF and VHF frequencies. Up-to-date frequencies are on the club website, www.rivieraarc.org.uk.

GB10SOTA, celebrating 10 years of Summits on the Air, continues from the summit of Mount Snowdon, GW/NW-001. Using HF, VHF and UHF, operation will continue until 15 July from the summit of the highest mountain in England and Wales. Details are on QRZ.com.

The RSGB team for the forthcoming IARU contest on 14 and 15 July has obtained the special callsign GO2HQ for use in this Olympics year. This is in advance of the general validity of O prefix NoVs, which commence at 0000BST on 21 July.

GB4TDF will be on the air to celebrating the 99th year of the Tour de France. Operating from Hancocks Radio Hut Low Bentham, Lancaster until 23 July. Main operators will be Barrie, G1JYB, Stephany, G1LAT, and members of Sands Contest Group.

Moroccan operators will use the special prefix 5C13 until 27 July in celebration of the 13th anniversary of the crowning of Mohammed VI as King of Morocco. QSL as directed by each operator.

Netherlands special event station PC100NOM will be active until 29 July to commemorate then 100th anniversary of The Netherlands Open Air Museum in the city of Arnhem. The operator is PA0FAW who is using CW, SSB and PSK on the various HF bands. QSL via PA0FAW, either direct, via the bureau or electronically using eQSL. SWL reports are also welcome.

Copyright © RSGB 2012. Not for public release before Monday 9 July 2012 except as a GB2RS broadcast. And now the DX news compiled from 425 DX News and other sources

N6NB and W6TAI will be active as E51YNB and E51TAI from Rarotonga for the IARU HF World Championship on 14 and 15 July. Their operation is expected to start a few days before the contest and last several days after the competition concludes. They will be on 15 to 40m, using SSB only. QSL both callsigns via N6NB.

Members of the Trinidad and Tobago ARS will also be active as 9Y4HQ during the IARU HF World Championships. Operations will be on all of the HF bands using CW and SSB. QSL only via DF2RG, either direct or via

the bureau.

Quito Radio Club will be on the air as HD081QRC, Hotel Delta Zero Eighty One, between 14 and 22 July, to commemorate the founding of that organisation 81 years ago. Activity will be on all bands using CW and SSB. QSL HC1JQ direct or via the bureau.

W5JON will once again be operating as V47JA from his holiday home overlooking Calypso Bay on St Kitts from 12 July until 2 August on 6 to 80m using SSB. He also plans to take part in the IOTA Contest later in July. QSLs to W5JON either direct or via Logbook of the World.

Now the contest news

VHF NFD takes place over this weekend, ending at 1400UTC today, 8 July. At one time there was only one section in VHF NFD, these days there are six sections, including two for single-ops who stay at home and sweep the bands looking for the portable entrants. The number of teams, sweepers excluded, entering is almost the same now as it was 15 years ago, which is the earliest date of the results on the Contest Committee website. Using all modes on the 50 to 1296MHz bands, the exchange is signal report, serial number and locator.

Today, Sunday 8th, the third leg of the 144MHz Backpackers Contest takes place. Most of it overlaps the final part of VHF NFD, but it continues for one hour after VHF NFD ends. The maximum power in this event is 3 watts. Running from 1100 to 1500UTC and using all modes, the exchange is signal report, serial number and locator.

Tuesday 10 July sees the 432MHz UK Activity Contest taking place from 1900 to 2130UTC. Using all modes on the bands, the exchange is signal report, serial number and locator.

Wednesday 11 July sees the SSB leg of the 80m Club Championships from 1900 to 2030UTC. The exchange is the usual signal report and serial number.

The 2012 IARU HF World Championships will take place next weekend, 14 and 15 July, beginning at 1200UTC on the 14th and ending at 1200UTC on the 15th. The objective of this contest is to contact as many other amateurs, especially IARU Member Society HQ stations, around the world as possible using the 160, 80, 40, 20, 15 and 10 metre bands, on phone and/or CW. The UK HQ station will be active and looking for as many QSOs as possible on as many HF contesting bands and modes as possible with as many people as possible. This includes UK stations. As mentioned earlier, the UK HQ station will be using a very special callsign for the event, GO2HQ, which should get them noticed. They will be the only Golf Oscar station in the world. The exchange is signal report and ITU zone, which for the UK is 27. As in previous years, there are awards for individuals and clubs who work it, see the rules on www.gr2hq.com.

Copyright © RSGB 2012. Not for public release before Monday 9 July 2012
except as a GB2RS broadcast. And now the solar factual data for the
period from Friday the 29th of June to Thursday the 5th of July,
compiled by Neil Clarke, G0CAS on Friday the 6th of July

Two large sunspot groups dominated the solar disc all week and produced large solar flares every day. Solar activity was moderate but increased to high on the 2nd, 4th and the 5th. Seven M class solar flares took place on the 4th and ten on the 5th. Sudden ionospheric disturbances and coronal mass ejections were associated with the larger flares. Over one hundred smaller C class solar flares took place throughout the period. Solar flux levels increased from 117 units on the 29th to 166 by the 2nd. The average was 149 units. The 90 day solar flux average on the 5th was 121, that's 3 units up on last week. X-ray flux levels increased from B3.9 to C2.6 units by the 5th. The average was B8.4 units. Geomagnetic activity was dominated by the coronal hole disturbance that arrived on the 30th when the Ap index was 27 units and lasted until the 3rd. Only the 29th was quiet, with an Ap of 5 units. The average was Ap 16 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 360 kilometres per second on the 29th to 730 by the next day. Speeds then gradually declined to 450 kilometres per second by the end of the period. Particle densities were moderate for the first 3 days, reaching a peak of 25 particles per cubic centimetre during the morning of the 30th. Bz initially varied

th between minus 6 and plus 5 nanoTeslas on the 29 , but increased to minus and plus 12 nanoTeslas during the disturbance. VHF aurora was reported from high latitude stations during the early evening of the 2nd. A good 144MHz Es opening to Portugal, Spain and Morocco took place around 1800 hours on the 4th, with one or two stations also working Madeira and the Canary Islands. Es occurred daily up to 70MHz.

And finally the solar forecast. This week the active side of the Sun is expected to be rotating out of view. Solar activity should be moderate on some days. Solar flux levels should remain around present levels but could decline later in the week to around 130 units. Geomagnetic activity could increase due to any coronal mass ejections that head our way, however, if none do, then activity should remain mostly low. MUFs during daylight hours at equal latitudes should be about 23MHz for the south and 20MHz for the north. Darkness hour lows should be around 14MHz. Path this week to Australia should have a maximum usable frequency with a 50 per cent success rate of around 21MHz. The optimum working frequency with a 90 per cent success rate will be about 15MHz. The best time to try this path will be between 0800 and 1100 hours. During the evening peaking around 2200 hours the long path will be at its best with an MUF of around 27MHz and the optimum working frequency of about 21MHz. Sporadic-E is expected to take place all most every day, with openings occasionally up to 144MHz.

And that's all for this week from the propagation team.

except as a GB2RS broadcast.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. Lincoln Short-Wave Club is taking part in VHF NFD at Brattleby Bomb Site all day today, Sunday 8 July. On Tuesday they are taking part in the 432MHz UK Activity Contest from the shack and on Wednesday G6COL is on the air for the 80m Club Calls SSB. There's a club net on 145.375MHz from 8pm on Thursday, and Saturday morning sees the surgery in the shack, plus a special event station for Lincoln Scouts at Brayford Wharf, opposite Nando's. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Telford & District Amateur Radio Society is taking part in Lions Day on Wheels today, Sunday 8 July. On Wednesday it's the 3rd 2m DF hunt, with 2E0CLR as the fox. Contact Mike, G3JKX, on 01952 299 677.

Wythall Radio Club is holding a Sunday club net on 145.225MHz today and next Sunday, and there's a committee meeting in the shack on Tuesday. Details from Chris, G0EYO, on 07710 412 819.

South Birmingham Radio Society is unloading its trailer on Monday, then holding an exam revision session on Thursday. Friday sees shack and aerial work. Contact Don, on 01214 581 603, for more information.

Now we return to the traditional listing in date order. On Monday 9 July Gloucester Amateur Radio & Electronics Society is holding a DF hunt. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 9 July Stratford Upon Avon District Radio Society is holding a barbecue and is on the air. Contact G0CHO, on 01608 664 488.

On Tuesday 10 July Derby & District Amateur Radio Society is holding a committee meeting. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 10 July Eagle Radio Group is having a talk on simple wire antennas by Peter Day, G3PHO. Contact John, M6JMS, on 01754 873 926.

On Tuesday 10 July Friskney and East Lincolnshire Communications Club is attending a talk on the solar cycle by BBC Sky at Night astronomer Paul L Money FRAS, FBIS. This talk is open to the public and takes place at Wainfleet Coronation Hall, High Street, Wainfleet, Lincolnshire, PE24 4BT. Doors open at 8.30 and admission is £2.50. For more information contact the FELCC Information Line on 07554 362 020.

On Tuesday 10 July Loughborough & District Amateur Radio Club is conducting practical antenna comparisons. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 10 July Worcester Radio Amateurs Association is having a talk. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Wednesday 11 July Midland Amateur Radio Society is holding a committee meeting and training classes. Details from Norman, G8BHE, on 07808 078 003.

Copyright © RSGB 2012. Not for public release before Monday 9 July 2012 except as a GB2RS broadcast. On Wednesday 11 July South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday 11 July Welland Valley Amateur Radio Society is taking part in the 80m SSB contest. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

On Friday 13 July Coventry Amateur Radio Society is taking part in Castles on the Air at Kenilworth Castle. Contact John, G8SEQ, on 07958 777 363.

NEWS FOR THE NORTH OF ENGLAND We start with clubs that have several events this week. Sheffield Amateur Radio Club is holding a barbecue and QRP portable evening on the club fields and surrounding hills on Monday. On Wednesday they are participating in the RSGB 80m Contest SSB from the club station, G3RCM. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

Friskney and East Lincolnshire Communications is holding a club net on Monday from 7pm, on 144.165 USB, vertical polarisation. On Wednesday there is a M3+M6 club net on GB3FR from 7.30pm, and on Friday there is a club net on 145.450MHz from 8pm. For more information contact the FELCC Information Line on 07554 362 020.

Otley Amateur Radio Society is holding a Morse class, is on the air and doing antenna refurbishment on Tuesday. Saturday sees the start of the IARU HF World Championship Contest weekend event, from noon to noon. More information from Paul, 2E0PAK, on 07768 996 370.

On Wednesday 11 July Hornsea Amateur Radio Club is holding a barbecue and taking part in the 80m Club Contest at Bewholme on Wednesday. Saturday sees the start of the IARU HF World Championship Contest weekend event, from noon to noon. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

Now we return to the traditional listing in date order. On Monday 9 July Bolton Wireless Club is having a talk by John, G4NTY on building 6m and 4m Super Moxons. For details, send an email to boltonwireless@gmail.com.

On Tuesday 10 July Morecambe Bay Amateur Radio Society is holding a treasure hunt. Contact Sheila, on 07867 516 836.

On Wednesday 11 July Denby Dale Radio Club is holding a club net on 145.575MHz from 1930. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 11 July Goole Radio and Electronics Society is having a debrief after the VHF NFD contest. Contact Ken, G6YYN, on 01757 638 539.

On Thursday 12 July Keighley Amateur Radio Society is having a talk on RAYNET from 8.15 at Parkside Social Club, Butt Lane, Haworth, BD22 8QJ. Further details are on the KARS website.

On Thursday 12 July South Manchester Radio and Computer Club is watching the Secret War DVD. Details from Ron, G3SVW, on 01619 693 999.

On Thursday 12 July Wakefield & District Radio Society is having a talk and demo on the Kenwood TS2000X by Phil, 2E0GBF. Contact Ken, G8FSO, on 07900 563 117.

Copyright © RSGB 2012. Not for public release before Monday 9 July 2012
except as a GB2RS broadcast.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday 10 July Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Thursday 12 July Aberdeen Amateur Radio Society is having a club holiday. Contact Fred Gordon, MM0ODL, on 01975 651 365.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week. Farnborough & District Radio Society is running a Top Band net on 1.995MHz from 2000 to 2100 on Monday. On Wednesday, Bob, G0YYY will be presenting the club awards. Friday sees a CW net from 1300 to 100 on 3.570MHz, followed by a 2m net from 2000 to 2100. Contact Neville, G3SPD, on 01252 404 816.

Chelmsford Amateur Radio Society is having a club net from 8.30pm on Tuesday, then Wednesday sees a committee meeting at 7.30pm in Danbury Village Hall. Contact Martyn, G1EFL, on 01245 469 008.

Chesham & District Amateur Radio Society is holding a members' equipment forum on Wednesday, then Sunday sees a visit to the McMichael rally & boot sale. More details from Terry, G0VFW, on 01442 831 491.

Norfolk Amateur Radio Club is holding an informal meeting on Wednesday, when the shack and workshop will be open and members will be taking part in the RSGB 80m Club Championship SSB. Sunday 15 July sees the club's very informal family and friends get together on the North Norfolk Coast at West Runton. Details from Chris Danby, G0DWV, on 01603 898 678.

On Thursday Reading & District Amateur Radio Club is having a talk on squeezing the last few nanoseconds out of digital logic super-fast processors by Des Howlett G8FIF. Sunday 15 July sees the club running the McMichael Radio Rally at Reading Rugby Club, Sonning. Details from Pete, G8FRC, on 01189 695 697.

Now we return to the traditional listing in date order. On Monday 9 July Coulsdon Amateur Transmitting Society is having a natter night. Details from Steve Beal, G3WZK, by email to secretary@catsradio.org.

On Monday 9 July East Kent Radio Society is having a barbecue at the QTH of Paul, G3VJF. Details from Karl Davies, M1DFM, on 01227 710 120.

On Monday 9 July West Kent Amateur Radio Society is holding a club meeting. Details from Keith, G4JED, via email to westkentars@googlemail.com.

On Tuesday 10 July Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 10 July Harwell Amateur Radio Society is holding its summer DF hunt. Details from Malcolm, G8NRP, on 01235 524 844.

Copyright © RSGB 2012. Not for public release before Monday 9 July 2012 except as a GB2RS broadcast. On Tuesday 10 July South Essex Amateur Radio Society is having a talk on astronomy by Bruce, G1JJS. Details from Dave, G4UVJ, on 01268 697 978.

On Stevenage & District Amateur Radio Society is holding an operating evening. Contact Martin Juhe, M0XJP, on 07973 793 770.

On Wednesday 11 July Darenth Valley Radio Society is having a talk on SSTV by Ray, G0FDU. Details form Bob, M0RAW, on 01322 663 804.

On Wednesday 11 July Harwich Amateur Radio Interest Group is holding a Scrapheap Challenge. Details from Kevan, 2E0WMG, on 07766 543 784.

On Wednesday 11 July Southgate Amateur Radio Club is on the air in the Spinney. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

On Wednesday 11 July Worthing & District Amateur Radio Club is holding a discussion evening and is on the air for the 80m Club Championship SSB contest. Contact John, G8FMJ, on 01273 593 232.

On Thursday 12 July Bredhurst Receiving and Transmitting Society is holding a club night, with CW practice from 8:30 - 9pm. Details from Charles, G4VSZ, on 07982 244 788.

On Thursday 12 July Edgware & District Radio Society is having a discussion on why members like amateur radio and what brought them into the hobby. More information from Mike, G4RNW, on 02089 500 658.

On Thursday 12 July Hilderstone Radio and Electronics Club is closed due to a school prize giving. Contact Chrissie Turner, by email to

hilderstoneclub@gmail.com.

On Thursday 12 July Horsham Amateur Radio Club is holding a social evening at the Bridge Inn, Amberley. Details are on the web at www.harc.org.uk.

On Thursday 12 July Huntingdonshire Amateur Radio Society is on the air on 6m. Contact David Leech, G7DIU, on 01480 431 333.

On Thursday 12 July Shefford & District Amateur Radio Society is having a 2m pedestrian fox hunt, with Terry, G4OXD and Peter, M0CKA as foxes. Details from John Burnett, M6JBU, on 07860 804 793.

On Thursday 12 July Vange ARS is watching a DVD. More information from Steve, G0KVZ, on 01268 552 606.

On Thursday 12 July Verulam Amateur Radio Club is holding a joint social evening with the GB3VH repeater group from 7.30pm at the Rose and Crown, Sandridge. Contact Ralph, G1BSZ, on 01923 265 572.

On Friday 13 July Cambridge & District Amateur Radio Club is holding an operating evening for beginners. Contact Ron, G3KBR, on 01223 501 712.

On Friday 13 July Mid-Sussex Amateur Radio Society is holding a post-event equipment check. Details form Rob, 2E0RJA, on 01444 232 129.

On Friday 13 July Radio Society of Harrow is having a talk on smartphone ham software by M0SFX. More information from Linda, G7RJL, on 02083 868 586.

On Friday 13 July Wimbledon & District Amateur Radio Society is on the air. Contact Andrew Maish, G4ADM, on 02083 353 434.

On Sunday 15 July Loughton & Epping Forest Amateur Radio Society is operating GB0IS for Theydon Bois Donkey Derby. Contact Marc Litchman, G0TOC, on 02085 021 645.

Copyright © RSGB 2012. Not for public release before Monday 9 July 2012 except as a GB2RS broadcast.

NEWS FOR THE SOUTH WEST We start with clubs that have several events this week. Exeter Amateur Radio Society is considering 4m ex-PMR radio operations in the Moose Centre at 19:00 on Monday. The club 2m net is on Tuesday at 19.45 and the 4m net on Thursday at 19.00. Contact Nick, 2E0NRJ, on 01363 775 756.

South Bristol Amateur Radio Club is having a VHF NFD debriefing on Thursday. The GB2BLE Lundy Island DXpedition departs on Saturday, and on Sunday there's a club visit to QRP in the Country. Details from Andrew Jenner, G7KNA, on 07838 695 471.

Now we return to the traditional listing in date order. On Sunday 8 July Cornish Radio Amateur Club holds its 49th Rally at Penair School. Details from Steve, G7VOH, on 01209 844 939.

On Monday 9 July Riviera Amateur Radio Club is having a club night with MX0RIV on the air. Contacs Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

On Monday 9 July Weston Super Mare Radio Society is holding a Morse class and a natter night. Details from Paul, G3SDH, on 01761 221 206.

On Tuesday 10 July Mid Somerset Amateur Radio Club is having a demonstration of the merits of WDMorse by Ian Davies, G3KZR. Contact Nick, 2E0FGQ, on 01749 346 320.

On Tuesday 10 July Plymouth Radio Club is having an antenna building workshop with Chris Wingate, M5CJW. Details from Rob James, 2E0ONO, via email to Robert-james@virginmedia.com.

On Thursday 12 July Swindon & District Amateur Radio Club is holding an activity night. Contact Den, M0ACM, on 07810 317 750.

On Thursday 12 July Yeovil Amateur Radio Club is having CW training and local testing of homebrew rigs. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 13 July Torbay Amateur Radio Society is having a natter night and holding an 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES No news items have been received for Wales this week.

Litmus? Isn't that something to do with either red faces on the part
of the Politburo, or the rank-and-file membership being left feeling blue?

Or, unless I misheard, something about ass-id?

This raises another query. Why bother in the first place with all that
technogimmickry hoo-hah?

Why not save a great deal of time and effort, and proceed directly
to the Club Nite Survey, in order to do what you wanted to do in the
first place?

1209. Weekly Highlights of Solar and Geomagnetic Activity, 02 - 08 July 2012

Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
02 - 08 July 2012

Solar activity ranged from low to high during the period. There were five major solar events, beginning on the 2nd of July. Region 1515 (S18, L=206, class/area=Fhc/900) was responsible for all of them. After a lackluster performance in the week prior (5 C-class x-ray events), it began this week with three M-class x-ray flares. The largest flare, an M5/2b at 2/1052UTC, brought activity to high levels for the first time since May 17th. The flare was accompanied by a Type II radio sweep (1063 km/s) and a 380 sfu Tenflare. A CME was subsequently observed in LASCO C3 coronagraph imagery at approximately 2/1254UTC, with most of the ejecta directed south of the ecliptic plane. The CME was also visible in STEREO-A and B COR2 coronagraph imagery.

Activity dipped to low levels on the 3rd when no M flares were observed. However, Region 1515 developed a beta-gamma-delta magnetic configuration that day. Activity returned to high levels the following day when Region 1515 unleashed an M5/2b flare at 4/0955UTC. Later in the day (04/2209UTC), it produced an M4 x-ray event accompanied by a 12,000 sfu 245 MHz burst, a Type II sweep (no speed estimate available), and a 220 sfu Tenflare. Of the seven M-class events that day, Region 1515 was responsible for six of them. The remaining M-flare, an M1/2n at 04/1639UTC, was produced by Region 1513 (N16, L=218, class/area=Dso/240). This event was accompanied by a 200 sfu Tenflare, and Type II radio (807 km/s) and Type IV radio emissions. A CME was captured by STEREO-B COR2 imagery at 04/1754UTC and STEREO-A COR2 coronagraph imagery at 04/1854UTC, and appeared to have an earth-directed component, consistent with Region 1513s geoeffective position.

High activity levels continued through the 5th and 6th of July as Region 1515 grew to its peak, covering 900 millionths of the solar disk and containing 60 spots. July 5th saw Region 1515 produce an M6.1/1b flare at 05/1144UTC accompanied by a 290 sfu Tenflare. The

following day, this region produced the largest flare of the week, an X1 x-ray event at 06/2308UTC. Although no optical flare was reported, the event was accompanied by a 520 sfu Tenflare, a Type II sweep (1771 km/s), and a Type IV sweep. A CME was subsequently observed in LASCO C3 coronagraph imagery at 06/2324UTC.

Activity dropped to moderate levels on the 7th as Region 1515s magnetic complexity, area and spot count decreased to beta-gamma, 780 millionths, and 43 spots respectively. A new region, Region 1520 (S15, L=86, class/area=Fhc/1070), was numbered as it rotated on to the east limb. It produced an M1 x-ray flare at 7/0728UTC.

High activity levels returned on the 8th, when Region 1515 produced an M6/1n at 08/1632UTC. The event was accompaned by a 640 sfu Tenflare, Type II (2271 km/s) and Type IV radio sweeps. LASCO C2 coronagraph imagery first indicated a CME at 08/1648UTC, with most of the ejecta directed southwest.

Two proton events were observed at geosynchronous orbit during the week. A 10 MeV greater than 10 pfu event began at 07/0400UTC, peaked at 07/0745UTC (25 pfu), and ended at 07/2110UTC. This event was associated with the X1 x-ray flare observed at 06/2308UTC described above. Both 10 and 100 MeV protons were elevated again on the 8th of July following the M6/1n flare described above. Neither the 10 nor the 100 MeV protons had crossed their flux thresholds (10 pfu and 1 pfu) by the end of this report, ending the period at 6 pfu and 4 pfu, respectively.

The greater than 2 MeV electron flux at geosynchronous orbit were at high levels from July 2nd through the 6th, and at moderate levels on the 7th and 8th.

Geomagnetic field activity began the week at active levels for the first three synoptic periods (02/00-02/09UTC), then decreased to quiet to unsettled levels until the 5th, when one active period (05/12-05/15UTC) was observed. The unsettled to active periods were attributed to the presence of a coronal hole high speed solar wind stream. Solar wind speed at the ACE spacecraft was between 650-700km/s on the 2nd, decreasing to around 500 km/s on the 5th, with the Bz-component of the interplanetary magnetic field between 0 and -5 nT for much of the period. Activity for the remainder of the week was at quiet to unsettled levels with the exception of the 21-24UTC period on the 6th associated with a prologned period of negative Bz, and the 21-24UTC period on the 8th. Analysis of data from the ACE spacecraft suggest the activity on the 8th was associated with the arrival of the CME associated with the M1/2n flare on July 4th described above. Wind speed at ACE jumped from 400 to 472 km/s around 08/1500UTC and the Bz component of the solar wind began a smooth rotation from +10 to -9 nT over the course of the next nine hours.

Forecast of Solar and Geomagnetic Activity
09 July - 04 August 2012

Solar activity is expected to be at moderate levels with a chance for high activity until Region 1520 reaches the west limb on 19 July. Low levels of activity are expected from 20-23 July, until old Regions 1515 and 1513 return on 23 and 24 July respectively. Moderate levels of activity, with a chance for high levels, are then expected through the end of the period.

There is a chance for proton events as Region 1520 moves into a favorable position beginning on the 13th of July though the 19th.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at high levels from 28 July through 01 August associated with coronal hole high speed stream effects.

Geomagnetic field activity is expected to begin at unsettled to active levels with CME passage, decreasing to mostly quiet levels from 10 July through 26 July. Activity is expected to increase to unsettled to active levels from 27 July through 2 July with the arrival of a coronal hole high speed stream. Activity is expected to then decrease to mostly quiet to unsettled levels through the end of the period.

Big Solar Storm Hits Earth HF black Out Wide Spread across the HF bands

Posted: 08 Jul 2012 10:07 AM PDT
http://forums.qrz.com/showthread.php?353169-Big-Solar-Storm-Hits-Earth-HF-black-Out-Wide-Spread-across-the-HF-bands&goto=newpost

Extent of blackout of HF (high frequency) radio communication dependent
upon current X-ray Flux intensity.

Sunspot 1515 which is now about to rotate onto the western limb produced a
strong M6.9 Solar Flare at 16:32 UTC Sunday afternoon. Because of the
Sunspots location, any potential CME would be directed mostly away from
Earth. More updates to follow.

Space Weather Message Code: ALTXMF

Movie of the CME LINK

Serial Number: 176

Issue Time: 2012 Jul 08 1631 UTC

ALERT: X-Ray Flux exceeded M5

Threshold Reached: 2012 Jul 08 1630 UTC

NOAA Scale: R2 - Moderate

Potential Impacts: Area of impact centered on sub-solar point on the sunlit
side of Earth. Extent of blackout of HF (high frequency) radio
communication dependent upon current X-ray Flux intensity. For real-time
information on affected area and expected duration please see
http://www.solarham.net/index.htm

AMSAT NEWS SERVICE

ANS-190

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor@amsat.org

In this edition:

* New AO7 Distance Record Set Twice This Week

* Italian HF Special Event Commemorates Apollo Space Program

* Listen for ARRL TI-2: Space in the Classroom Satellite Contacts

* University of Florida SwampSat CubeSat Plans for December 2012 Launch

* Satellite Presentation at University of Missouri on July 20

* Near Space Balloon Flight Ham AK4JG Named Newsline Young Ham of the Year

* ARISS Status - 2 July 2012

July 8, 2012

To All RADIO AMATEURS

BID: $ANS-190.01

New AO7 Distance Record Set Twice This Week

On July 2 at 0955Z Bill Dzurilla, NZ5N operating from Slovakia as OM3BD (grid JN88) reported a successful contact via AO-7 Mode B with Wyatt Dirks, AC0RA (grid EN31). The GPS-measured distance between grids JN88 and EN31 is 7849 km. Bill wrote, "Wyatt did all the hard work by waking up at 0300 his time, driving to a hill an hour away from his home, setting up his station, and working me before sunrise. It appears that an even longer distance is attainable,

and Wyatt is looking for a suitable place from which we can try before I leave Slovakia in mid-July."

Prior distance records set via AO-7 included:

PY5LF and ZS6BB 7630 kmPS8RF and ZS2BK 7694 kmK3SZH and PY2OV 7738 kmZS6BB and EA6SA 7766 kmPY5LF and K3SZH 7843 kmOM3BD and AC0RA 7849 km (July 2 record with AC0RA in grid EN31)OM3BD and AC0RA 7903 km (July 4 record with AC0RA in grid EN41)

On July 4, Wyatt, AC0RA woke up early and this time drove 150 miles to EN41 and set up his portable station. A contact, lasting 30 seconds, with OM3BD extended the distance record to 7903.55 km.

The theoretical maximum range of AO-7 is estimated at 7907 km.

Recordings, pictures, and further info at http://qsl.net/nz5n/AO7record.htm.

[ANS thanks and congratulates Bill Dzurilla, OM3BD/NZ5N and Wyatt Dirks, AC0RA for the above information]

Italian HF Special Event Commemorates Apollo Space Program

ARI, the Associazione Radioamatori Italiani, and their club station IQ1TW announced a special operating award "Apollo Space Program - From the Earth to the Moon" for contacts between July 1 - July 31, 2012. This is to commemorate and keep alive the memory of the space program which has revolutionized the life of mankind.

To qualify for the award you need to have confirmed contacts with the ARI Headquarters Station IQ1TW and any three stations from this list: IZ1UMD, IZ1RFU, IZ1XBB, IZ1WVX, IZ1LBH, IK1WGZ, IZ1RGY, IZ2SMV, I1MXI.

On July 20, the anniversary of the first moon landing, a confirmed contact with IQ1TW (without the necessity of the other 3 contacts) will qualify you for the award.

The special event stations will operate with 200 watts using dipole and vertical antennas.

Full details, including a list of the planned HF operating frequencies and modes, log and confirmation information, rules, and application instructions are posted on the ARI web pages.

[ANS thanks Associazione Radioamatori Italiani and the DXNL Bulletin #1786 -Jun 27, 2012 - for the above information]

Listen for ARRL TI-2: Space in the Classroom Satellite Contacts

The ARRL Teachers Institute - Space in the Classroom is this coming week - July 9-12. The Institute will meet in Dayton, Ohio and is sponsored by the Dayton Amateur Radio Association. Additional support from ARRL ETP donors and Yaesu make this program possible.

The TI-2 Space curriculum focuses on the nuts and bolts of setting up and operating a satellite ground station. This serves as excellent preparation for a scheduled contact with the ISS through the Amateur Radio on the International Space Station (ARISS) program. But it also provides instruction for continued use of satellites and other man made space assets

to explore naturally generated signals, space and a variety of topics.

The course is 4 days: the first half will be setting up and learning to operate the ground station, the second half will be practice making satellite contacts and instruction in using space borne assets in the classroom. Participants will receive all the equipment necessary to set up a basic satellite ground station.

Matt Severin, N8MS will be instructing the Teachers' Institute. He will have 8 teachers learning how to set up and operate ground stations. They plan to operate from about 1200 to 2000 UTC each day, give or take a few hours. Our primary amateur radio satellites will be AO27, SO50, FO29, and VO52. They will try to capture data and telemetry from the many cubesats currently operating. Amateur satellite operators are invited to take a moment to say hello and work a few of the teachers in Matt's group.

Full details of the ARRL TI-2: Space in the Classroom program can be found on the ARRL Web.

[ANS thanks the ARRL and Matt Severin, N8MS for the above information]

University of Florida SwampSat CubeSat Plans for December 2012 Launch

A cubesat called SwampSat, built by students at the University of Florida, was recently unveiled. They also demonstrated the operational satellite to Florida's Lieutenant Governor.

SwapSat is planning on a ride to orbit on the SpaceX Falcon 9 rocket into a 450 km orbit with an inclination of 45 degrees in the December 2012 timeframe.

The SwampSat downlink will transmit 1 watt of RF on 437.385 MHz, 1200 bps AX25 packet radio. The University of Florida posted a video of SwampSat on YouTube.

Satellite Presentation at University of Missouri on July 20

Attention amateur radio operators near Kansas City, Missouri!

On July 20, the Hams in Space Team will be giving their Satellite Presentation at the University of Missouri, Kansas City's Communiversity. Communiversity is the University's Community Education Program available to anyone from the community who wishes to attend.

Randy Schulze, KDØHKD wrote, "We're preparing this presentation to be enjoyed not only by Licensed Hams but also to members of the general community as a means of putting Amateur Radio's best foot forward, through information about at least one of the fun and amazing things that can be done with Ham Radio! If you plan to attend this presentation, please register early. If the anticipated attendance exceeds the capacity of the presently scheduled class room, the University may be able to make arrangements to move the presentation to a larger class room."

You will find all of the registration information on the University of Missouri Kansas City Communiversity Web Site.

Randy concluded, "So spread the word to your friends; Hams and Non-Hams alike! Register to attend the Hams In Space Presentation at the University of Missouri, Kansas City, Communiversity, and help put Amateur Radio's Best Foot Forward while at the same time supporting an Outstanding Community Service!"

The class schedule is:

7:00 PM, Friday, July 20, 2012

Communiversity; University of Missouri, Kansas City

Flarsheim Hall, Room 260,

5110 Rockhill Road

Kansas City, Missouri

http://www.umkc.edu/commu/

The Hams in Space web page can be found at: http://hamsinspace.com

[ANS thanks Randy Schulze, KDØHKD for the above information]

Near Space Balloon Flight Ham AK4JG Named Newsline Young Ham of the Year

ERIN KING, AK4JG, NAMED 2012 AMATEUR RADIO NEWSLINE□ "YOUNG HAM OF THE YEAR"

(Santa Clarita, California) - Erin King, AK4JG, a 17-year-old from Columbus, Georgia, who re-founded her high school's radio club and then lofted a ham radio-carrying balloon to over 90,000 feet, recovered the flight data and used it to produce a truly striking video of that flight, has been named as recipient of the 2012 Amateur Radio Newsline Young Ham of the Year Award.

Erin is the daughter of Paul, K4ETY, and Patricia King. She has two siblings: Brandon, age 16 and Rachel, age 15. Erin became a licensed radio amateur in 2009 and now holds an Extra Class license. She is a member of the ARRL, the Columbus Amateur Radio Club, and the Russell County Radio

Club. She enjoys operating on local VHF and UHF

repeaters as well as phone and digital modes on the High Frequency amateur radio bands. She is looking forward to mastering Morse Code as her next amateur radio challenge.

Erin became interested in amateur radio after joining a club at her high school dealing with robotics and then ham radio-equipped high-altitude balloon launches. This school group has participated in FIRST Robotics competitions, and Erin has twice been Team Lead for Programming. The club also launches several high-altitude balloon missions each year, in a program called DREAMS. They have flown various scientific experiments as part of these missions, in addition to planning, building, and integrating radios, Global Positioning System (GPS) units and TNCs to track and recover the balloons. To facilitate these activities, the group's sponsor, Luther Richardson, KI4AOJ, has encouraged the students to obtain their amateur radio licenses.

A subset of this group, including Erin, has participated in the Massachusetts Institute of Technology's (MIT's) "InvenTeam" competition, designing and building a portable lightning detector and early warning system. In addition, Erin re-started the Columbus High School Radio Club and served as its president for the past two years. The club was active in the 1950s and '60s, and Erin's great-grandfather (the original K4ETY) was one of its mentors at that time. The new club obtained the callsign W4CHS (Columbus High School) and has been active on the air.

Erin's involvement with amateur radio and FIRST Robotics has helped fuel her interest in science and engineering. Last year, she applied for early admission to both Georgia Tech and MIT; she was accepted to both and will be attending MIT this fall.

Inside the shiny tube which contained Erin's MIT acceptance letter was a note suggesting that the students "hack" their tubes, meaning to do something cool with them, in a long-standing tradition of MIT hacks or stunts. Erin chose to send her tube to near-space.

Drawing on her ballooning experience, Erin planned, built, integrated, and tested a complete new tracking setup to fit into the very small shipping tube. The payload consisted of two GPS units, two custom-made antennas, one Argent Data OpenTracker+ kit (which Erin built), one handheld radio, and a fellow ham's Byonics Pocket Tracker, a self-contained 100-milliwatt tracker/radio combination in an Altoids® tin. Erin also talked her mother into letting her use mom's brand new GoPro Hero HD video camera.

With the assistance of a group of hams from the Columbus Amateur Radio club, Erin launched her balloon from Lumpkin, GA. A couple of hours later, she and the tracking team successfully recovered it, along with the complete HD video record of the flight. Erin took this video, as well as other photos and videos taken of the launch activities, and compiled it into an 8-minute presentation, complete with background music. She posted it to YouTube, and put a link to it on the MIT hack-the-tube site.

According to YouTube statistics, Erin's video has been viewed thus far in excess of 82,500 times.

This past May, Erin was invited to participate in no less than three forums and sessions at the 2012 Dayton Hamvention. These included the 25th anniversary "Youth Forum," the "Ham Radio Town Meeting" and an "ARRL Expo" presentation where her video was screened.

AWARD CEREMONY

The 2012 Amateur Radio Newsline□ "Young Ham of the Year Award" will be presented on Saturday, August 18th at the Huntsville Hamfest in Huntsville, Alabama. As the 2012 "Young Ham of the Year," Erin will receive -- courtesy of Yaesu USA -- an expense-paid trip to the Huntsville Hamfest, along with a gift of Yaesu brand ham radio equipment. CQ magazine will treat her to an expense-paid week at Spacecamp Huntsville, and will present Erin with a variety of CQ products. Amateur Radio Newsline□ will provide Erin with a commemorative plaque at the award ceremony. Once again, the cost of year's plaque has been underwritten by Dave Bell (W6AQ), President of DBA Entertainment Inc.,

Hollywood, California. Heil Sound Ltd. will also be presenting Erin with a ham radio-related gift.

[ANS thanks Amateur Radio Newsline for the above information]

ARISS Status - 2 July 2012

1. Virginia Contact to be Rescheduled

The ARISS contact that was scheduled with the Virginia Air and Space Center in Hampton, Virginia on Tuesday, June 26 was not successful due to ground station issues. ARISS will try to re-schedule this event for the week of July 23.

2. ARISS Contact Featured at STEM Conference

On Thursday, June 28, an Amateur Radio on the International Space Station (ARISS) contact was held between Expedition 30/31 crewmember André Kuipers and students attending the STEM Solutions Youth Summit which was part of the U.S. News STEM Solutions 2012 conference in Dallas, Texas. Telebridge station K6DUE in Maryland provided the radio hookup. The contact, a highlight of the event, provided youth the opportunity to ask Kuipers about life and work in space. Leland Melvin, Associate Administrator for Education, and Charlie Bolden, NASA Administrator, attended the conference.

[ANS thanks Carol, KB3LKI, for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at
one-half the standard yearly rate. Post-secondary school students enrolled
in at least half time status shall be eligible for the student rate for a
maximum of 6 post-secondary years in this status. Contact Martha at the
AMSAT Office for additional student membership information.

Webinar - Update on Cycle 24 And More

Posted: 08 Jul 2012 03:42 AM PDT
http://forums.qrz.com/showthread.php?353121-Webinar-Update-on-Cycle-24-And-More&goto=newpost

Carl Luetzelschwab, K9LA, in an August 2009 PVRC Webinar discussed the
solar minimum between Cycle 23 and 24, and the early status of Cycle 24.
His July 2012 Webinar will review our recent solar minimum, review Cycle
24's present status, and discuss propagation in relation to the progress of
Cycle 24. Two other topics to be discussed will be the effect of trees on
HF and MF propagation, and the best height for your antenna.

The presentation will be held on two dates.

Date: Wednesday, July 18

Time: 9 PM EDT (Thursday, July 19 - 01:00 UTC)

Registration (free): https://www2.gotomeeting.com/register/606121362

Date: Saturday, July 21

Time: 19:00 UTC (3 PM EDT)

RFinder - The Worldwide Repeater Directory (WWRD) now supports AvMap G5/G6 APRS

Posted: 06 Jul 2012 08:14 PM PDT
http://forums.qrz.com/showthread.php?352968-RFinder-The-Worldwide-Repeater-Directory-(WWRD)-now-supports-AvMap-G5-G6-APRS&goto=newpost

Press Release

07/06/2012

From the QTH of W2CYK

For immediate release

RFinder - The Worldwide Repeater Directory (WWRD) now has a new user interface! AvMap G5/G6 APRS, the GPS for Amateur Radio Operators.

We are pleased to announce that RFinder support AvMap Points of Interest. This means you can pre-populate your GPS device with repeater data on your route, and see machines on the map or in a listing with connection details such as frequency, shift, PL, etc. Just go to http://web.rfinder.net, put in your location and radius. Choose AVMap and click export. Then import the resulting file into AvMap GeoSat software on Windows or Mac and write it to your device.

The WWRD Supporting AvMap is just another step of making The World Wide Repeater Directory, it's third party applications such as RT Systems and CHIRP and of course the RFinder family of programs on iPhone, Android and www, Ham Radio's one-stop-shop for repeater data, no matter what the technology used for repeating radio signals. No matter what computing device you use to look up repeater data anywhere on earth. AvMap APRS GPS was the next logical place for The World Wide Repeater Directory to be.

RFinder is available in the Apple App Store for iPhone and Android, the web version can be found at http://www.rfinder.net.

RT Systems radio programming software for Window is WWRD enabled and can be found at http://www.rtsystemsinc.com

CHIRP is open source software and is WWRD enabled and can be found at http://chirp.danplanet.com

AvMap information can be found at http://www.avmap.us/products/terr/geosat_6_aprs-664/introduction

W2S Town of Lake Pleasant, Hamilton Co. Adirondacks through July 15

Posted: 08 Jul 2012 11:02 AM PDT
http://forums.qrz.com/showthread.php?353176-W2S-Town-of-Lake-Pleasant-Hamilton-Co-Adirondacks-through-July-15&goto=newpost

Members of the Speculator Amateur Radio Club are operating special event station W2S celebrating the bicentennial of the Town of Lake Pleasant through 15.

Lake Pleasant is in Hamilton County, NY - a rare one for you county hunters.

Operation will take place from various locations. Some may be QRP from remote spots including SOTA summits including Pillsbury Mountain W2/GA-027 and Fish Mountain W2/GA-316.

Sunday July 8 starting about 2PM, W2S will be on the air SSB QRP from the Speculator pavilion.

W2S frequencies 3.955, 7.261 (7.185 during broadcast qrm), 14.290 SSB; 7.031, 14.031 CW.

Other bands/frequencies may be tried if conditions warrant. During QRP ops we may also call on standard QRP frequencies if no action on above frequencies.

See club web site sparcham.org for QSL info and other details. Scheduled future operations will be posted if possible.

//
Special Thanks to "13 Colonies" Sponsors And Operators

Posted: 07 Jul 2012 08:26 PM PDT
http://forums.qrz.com/showthread.php?353099-Special-Thanks-to-quot-13-Colonies-quot-Sponsors-And-Operators&goto=newpost

Greetings All,

I'd like to express a special thanks to Mr Ken Villone, KU2US, and all of the event operators associated with the "13 Colonies" Special Event.

When the weather threw a wrench into the middle of the event, many of our Amateur bretheren were put off-the-air. (I was not one of them, luckily, but I've 'been there') The bad weather, loss of power, etc, meant that many operators who might want to participate in this fun activity were going to lose that opportunity through no fault of their own.

But the 13 Colonies folks stepped up and, with no obligation to do so, extended the activity through the 7th of July (0400Z 08 July) to give everyone a chance to work them. THAT is sportsmanship and makes Amateur Radio the kind of environment that I like being associated with.

Kudos to all of the 13 Colonies crew! Thank-you for sacrificing your time and less-than-ideal propagation to make Amateur Radio more fun for the rest of us!

Ham Enthusiast Enjoys Waves of Popularity for Stricken Yacht Video:

Posted: 08 Jul 2012 05:32 PM PDT
http://www.eham.net/articles/28602

A North Lincolnshire amateur radio enthusiast who was surfing the air waves to Australia ended up helping a stricken sailor and his yacht which had been battered by waves of a different kind following a big storm in the Atlantic. David Ogg, of Winteringham, was connected up to a fellow enthusiast in Melbourne, Australia when he then heard a "break station" alert off the coast of Spain, where a vessel had lost its mast and sails. Fortunately, assistance came through amateur radio. And David, who is chairman of the Brigg and District Amateur Radio Society, recorded how things unfolded in a half-hour video. He told the Radio Society of Great Britain: "It just goes to show in these modern times, when all else fails, there is amateur radio."

Telstar 50th Anniversary Special Event July 10th only

Posted: 09 Jul 2012 01:10 PM PDT
http://forums.qrz.com/showthread.php?353333-Telstar-50th-Anniversary-Special-Event-July-10th-only&goto=newpost

On Tuesday July 10th from 11am ~ 5pm, the AT&T Middletown club will setup a special event station.

We will be operating with call-sign "W2NFA" from the site where the remnant background microwave

radiation from the ☐Big Bang☐ was first detected.

This location was also the receive site for the first Television broadcast via satellite test.

http://www.tvhistory.btinternet.co.uk/html/telstar.html

When: Tuesday July 10th, 2012

Where: Crawford Hill - Holmdel NJ

http://en.wikipedia.org/wiki/File:Be...rd_Hill_NJ.jpg

Time : 11:00am ~ 17:00pm EDT

Bands : 15, 20 and 40 meters.

SSB: 7.275 MHz, 14.275 MHz, 21.325 MHz

CW: 7.040 MHz, 14.040 MHz, 21.040 MHz

http://www.youtube.com/watch?v=uKH-GijnAGk

A special anniversary certificate will be emailed back to all contacts.

QSL to:

AT&T

Going /AM: An Interview With PH9HB

Posted: 09 Jul 2012 12:17 AM PDT
http://forums.qrz.com/showthread.php?353261-Going-AM-An-Interview-With-PH9HB&goto=newpost

Hi folks,

just wanted to let you know about my last piece for DXCoffee.com, which I hope will reveal as interesting as it's been writing it!

It's about Jerry van der Goot, an airline captain who operates /AM during some of his flights. You probably have noticed PH9HB/AM on the cluster.

Here is the interview with him in English:

http://www.dxcoffee.com/eng/2012/07/...r-radio-cloud/

And here in Italian:

http://www.dxcoffee.com/ita/2012/07/...ano-dal-cielo/

Thanks a lot for your attention and vy 73,

Chris

Radio Club Granted 2012 Olympic License:

Posted: 09 Jul 2012 05:04 PM PDT
http://www.eham.net/articles/28605

WARRINGTON Amateur Radio Club (WARC) have been granted a licence to cover both the 2012 Olympic and Paralympic games. In a collaborative effort with West Manchester Radio Club and South Manchester Radio and Computing Club, WARC have been granted the special call sign GB2012MV (Manchester Venue) for the event at Old Trafford, home of Manchester United, one of the venues for the Olympic football tournament. A spokesman for WARC said: "This is going to be a massive effort by a dedicated group of north west amateur radio enthusiasts, operating from three venues across the region, Warrington and two in Manchester. "Following the popularity of GX4WAB Olympic torch call sign, we can see this being a fantastic event and look forward to adding many thousands of contacts in the UK and around the world to the station log." The decision by Ofcom means that GB2012MV will be one of only four nationwide to be permitted to broadcast.

Sun Storms: Solar Activity at Fiery High:

Posted: 09 Jul 2012 05:01 PM PDT
http://www.eham.net/articles/28604

(CBS News) This has already been a summer of record heat in the continental United States. But our sun is not content with just breaking records in the first week of July. It has also been an intense period of solar flares - massive, violent outbursts from the sun that can wreck havoc here on Earth. And it shows no signs of stopping. Even on the surface of the sun, things are heating up. Last week saw several huge solar flares, the biggest of which occurred on Friday, July 6. Labeled an X1.1 class solar flare - the strongest classification used by the U.S. Space Weather Prediction Center - the sun storm caused radio blackouts here on Earth as particles ejected from the sun crashed into our planet's atmosphere. It was the fifth X-class solar flare of 2012. Earlier in the week, several other powerful solar flares erupted from the sun. Most of them appear to be coming from the same area of our star: a giant sunspot called AR1515. Technically a group of sunspots, AR1515 is an enormous plain of volatile activity. NASA estimates AR1515 stretches across 118,681 miles, making it longer than fifteen Earths put together.

==> ARRL TO HOST WEBINAR ON AMATEUR RADIO RESPONSE TO 2012 HURRICANE
SEASON: JULY 17

The ARRL will host a webinar
<https://www3.gotomeeting.com/register/249211478> from 8-9:30 PM EDT
Tuesday, July 17 (0000-0130 UTC Wednesday, July 18) to present
information about the 2012 hurricane season and the Amateur Radio
response. The program will offer presentations from representatives
from the National Hurricane Center (NHC <http://www.nhc.noaa.gov/>) and
WX4NHC <http://www.wx4nhc.org/> (the Amateur Radio station at the NHC),
the VoIP Hurricane Net <http://www.voipwx.net/>, the Hurricane Watch
Net (HWN <http://www.hwn.org/>) and the ARRL. Webinar registration is
open to all, but this informative web session will be of particular
interest to those amateurs in hurricane-prone areas. If you are
interested in emergency communications and hurricane preparedness and
response, you are invited to attend this online presentation.

The following items will be included in the webinar:

- Opening remarks and introduction of presenters.
- Meteorological Overview of the Upcoming Season, presented by VoIP
Hurricane Net Director of Operations and ARRL Eastern Massachusetts
Section Emergency Coordinator Rob Macedo, KD1CY.
- Amateur Radio WX4NHC at the National Hurricane Center: Who We Are and
What We Do and How to Contact WX4NHC and Submit Surface Reports During
a Hurricane, presented by WX4NHC Assistant Coordinator Julio Ripoll,
WD4R
- WX4NHC Weather Initiatives: APRS, ON-NHC, CARMEN and CWOP Programs
and Equipment, presented by WX4NHC Coordinator John McHugh, K4AG
- ARRL Coordination and Interface, presented by ARRL Emergency
Preparedness Manager Mike Corey, KI1U
- VoIP Hurricane Net, presented by Rob Macedo, KD1CY
- Hurricane Watch Net, presented by Hurricane Watch Net Assistant Net
Manager Tom Gerard, KB3ONZ
- Q&A Session and Closing Remarks

To register for this webinar, please click here

==> TROPICAL STORM DEBBY SPAWNS SEVERE WEATHER AND SKYWARN RESPONSE

On Sunday, June 24, 2012 Tropical Storm Debby spawned severe weather in
Pinellas County, Florida, particularly in the Pass a Grille area of St.
Petersburg. The Pinellas County SKYWARN net was activated around 10:35
AM with the issuance of a Severe Thunderstorm Warning. The net remained
active at several different alert levels for just over 11 hours, until
9:45 PM that evening. In all, 27 Amateur Radio operators checked in to
the net and the four operators who rotated duties as the net control.

The most significant event occurred in the evening, when one of 10
tornadoes spawned by Debby touched down in southern Pinellas. At about
8:14 PM, a Tornado Warning was issued for Pinellas County as radar
indicated a tornado near Ft. Desoto Park, moving north. The Net was
immediately moved from standby to code red. For Pinellas county, code
red means severe weather is imminent. At 8:23 PM, Jack Satterfield,
W4GRJ, reported multiple transformers blowing in the Pass a Grille area

and advised that his son's house located just south of his location had a window blown out. This report was relayed to the NWS within 1-2 minutes. The NWS put this report in a Severe Weather Statement released shortly afterward. W4GRJ made follow up reports of roofs torn off of a couple of buildings and power lines down in Pass a Grille, all of which were relayed to NWS.

Post storm surveys by the NWS indicated an EF-1 tornado with winds of 80-85 mph had touched down in Pass a Grille at 8:21 PM and lifted at 8:25 PM. The tornado had a path length of 3.3 miles and a width of 50 yards. The tornado actually started as a waterspout that then moved onshore. Damage included a tourist rental building that had the top unit removed/destroyed; fortunately no one was in this top unit.

When asked about the way the reports were passed on to the National Weather Service, Justin McBride, KJ4REU, Pinellas SKYWARN Coordinator replied, "Our net maintained contact with the National Weather Service throughout the event using the NWS online chat system, which allows us to interact directly with the forecasters in real time and quickly relay reports received from our spotters." Justin added, "This event highlighted the unique ability of SKYWARN Amateur Radio operators to get reports to the NWS well ahead of other sources. The reports of the tornado damage in southern Pinellas from the spotter located in Pass a Grille were relayed to the NWS approximately 10 minutes before 911 and the media received and/or relayed the information." Asked to summarize the performance of the SKYWARN spotters, McBride said, "Our SKYWARN activation for Tropical Storm Debby underscored the value of training, organization, and frequent practice in our program, which allowed us to respond effectively to the situation. Although ultimately the damage and injuries associated with this storm system were only minor to moderate, the event gave us additional experience, which will better prepare us for future, more severe events." - source: Kevin Poorman, KV4CT <kevin.poorman@verizon.net>, West Central Florida Public Information Coordinator

==> COLORADO WILDFIRES RESPONSE

Thanks to an extremely dry season, portions of Colorado have been ravaged by wildfires. As of July 5, only a handful of the fires are considered extinguished or fully contained, with the majority considered still active. According to InciWeb <http://www.inciweb.org/state/6/>, almost 170,000 acres are affected by 11 active fires. Since June 9 -- when the High Park Fire <http://www.inciweb.org/incident/2904/>, the first of the wildfires began -- hams in Colorado have been assisting with disaster communications, providing communications support to the State and served agencies. Complete report here <http://www.arrl.org/news/colorado-hams-provide-disaster-communications-during-wildfires>. -- ARRL Letter, ARRL Web SIte

==> MINNESOTA FLOOD 0F 2012 - HAMS RESPOND

Northeast and north central Minnesota recently suffered one of its worst rain fall events in many years. As much as 10 inches of rain inundated this part of the state, and its effects will be felt for many years as recovery takes place.

A powerful low pressure area moved into the region from the Pacific Northwest on the heels of previous systems that had saturated the ground in the Upper Midwest. Along with another moisture laden front from the south, the stage for flooding was set. The National Weather Service had been warning of the potential for flash flooding in the days preceding the arrival of the system, and with the ground saturated, the potential became a reality as the area of low pressure moved slowly across the region on June 19 and 20. Torrential rainfall from severe thunderstorms that trained along the front caused havoc as many communities and counties were affected. Homes and businesses were flooded, and roads and bridges were either dangerously compromised or washed out by rushing flood waters.

Lake County Emergency Coordinator Jeff Nast, KC0MKS, reported that Northland SKYWARN was activated from 1800Z on June 19 until 0145Z on the next day. Lake County RACES/ARES was also activated on June 20 to provide emergency communications for a fiber cable failure at the Knife River expressway bridge.

Cook County officials requested disaster response communications for the hospital in Grand Marais. All communications were severed during the storm, and the hospital was without contact with the hospitals in Duluth. Pat Scully, N0WSI, made the request and a communications response resulted. "We were without phone, cell, Internet, and 911 service for approximately 12 hours," reported Jayne Fingerman-Johnson, N0UYQ, of the Cook County ARES Response Team (CCART). "We set up our Amateur Radio station at the Cook County Northshore Hospital to provide communications to the outside world."

Garry Hooghkirk, KD0DHB, Bob Schulz, KC0NFB, and Tom Kurtovich, KB0LSS, responded to the St. Louis County EOC in Pike Lake. Gary Hanson, KD0CVO, Dave Leslie, KC9MKJ, and Doug Nelson, AA0AW, activated the Douglas County, Wisconsin EOC to coordinate communications to Grand Marais as well as for net controls for a Duluth/Superior net to record road closure information to help travelers trying to get through the area. "We had people running net control from the Douglas County EOC, and St. Louis EOC was also manned," Nast reported. "We also had a presence at the NWS during the net." [See more info, links here <http://www.n0lcr.org/>.]

Nast activated the EOC in Two Harbors for Lake County. Bob Hoyt, KC0EIM and Grant Forsyth, KC0WUP went up to the radio desk at the National Weather Service office in Duluth to become real time providers of any weather information needed. Garry Hawkinson, W0ELH, set up and monitored 7.250 MHz SSB as a back up.

Bill Fleischman, KC0ZZL, located phone numbers for Life Flight to establish hard wire communications with them if needed. Ham

communicators handled closure information and a doctor replacement issue. Dave Miller, W0NWO, was instrumental in coordinating many facets of the response. Several local amateur operators went mobile and called in damaged areas to the net.

A call for help came in from MPR (Minnesota Public Radio): One of their reporters had a relative living up the shore in Two Harbors, and hams were able to give her information so that her Dad's medical supply service could get supplies to him.

Regular communication services were restored to the Northshore communities and the amateur response was no longer required. Thanks to the active participation by many local ARES members, a ready and capable multifaceted response resulted. Thanks to all operators who took time from their own issues to make Amateur Radio work in this time of need. While the severity and widespread magnitude of the flooding exceeded expectations, the hams were still able to meet the challenge. Once again, Amateur Radio proved itself as being the one reliable means of communication in a real emergency when all else fails. -- KD0CI's Radio Newsletter, July 2012 issue; by Doug Nelson AA0AW, with contributions by Jayne Fingerman-Johnson N0UYQ, Kenny Broshofske KD0CI, and Jeff Nast, KC0MKS

==> LETTERS: ON UPGRADING

Thanks for the excellent commentary in the June ARES E-Letter about license upgrading. In recent years, I have seen a large number of new hams join the hobby specifically so they could become involved in disaster response work. They have become a valuable community asset, yet have limited themselves to the VHF/UHF frequencies in the false belief that only VHF/UHF frequencies are necessary in an emergency.

Mike's article presents very convincing reasoning as to the need for these individuals to extend their capabilities by upgrading. Well Done! -- Dale Williams, WA8EFK, Vice Director, ARRL Great Lakes Division

==> TIPS: DIY EQUIPMENT LABELING

Here is an interesting DIY project for labeling your equipment <http://blog.makezine.com/2012/02/18/make-projects-soda-can-label-embossing/> with tape. This tape should be fairly permanent if you use pop rivets to fasten it to something. Seems like it would make a good equipment ID for when you have to take expensive stuff into the field (emergency exercises, Field Day, or actual emergencies). And several locals swear by E-6000 glue as an alternative for application of the labels. --Rick Herndon, K5FNI, Mathis, Texas; Life Member, ARRL; Official Emergency Station

==> LETTERS: US VIRGIN ISLANDS SECTION WORKS WITH EMA/EOC

Thanks for the nice tribute to NP2B in the last ARES E-Letter. lt will be an honor to continue John's fine legacy. [Fred Kleber, K9VV/NP2X is the new US Virgin Islands Section Manager, taking the reins from

longtime SM John Ellis, NP2B, who stepped down recently after exemplary service to the section -- ed.]

John and I have been working with VITEMA, the Virgin Islands Territorial Emergency Management Agency for a little over a year. We have built up their St. Croix EOC comms center from scratch. While the agency had most of the equipment, they needed assistance to assemble it and operate it. We were able to obtain leftover hardware and assistance from FEMA to assemble a fully-functional emcomm center.

We have been working closely with VITEMA mangament and the VI National Guard. It just so happens that the VITEMA Director is also a Brigadier General in the Guard. We participate in the weekly FEMA HF net (FNARS) and are in the process of organizing a weekly HF net between key governmental agencies in the VI and Puerto Rico.

Last year we activated for a couple of tropical storms that were in the area. Our goal is to continually "push the bar higher" and be even better prepared for another direct strike. Being on a small Caribbean island means that evacuation is much less of an option. This places a much greater importance on emcomm as the bulk of our post-storm relief will come from "off-island." I can tell you that my previous CERT, NHC, NIMS, ICS and ARRL emcomm training has proven invaluable in this exercise.

There are some photos of our progress on the VITEMA <http://www.vitema.gov/radio/index.html> website. We will be hosting license classes shortly for VITEMA and TSA personnel. Hopefully this will lead to even more KP2 activity! While the comms stuff is cool, the best part is that we have made life-long friendships within VITEMA and the community. These too will be invaluable when the "rubber hits the road" and we have to pull together in the aftermath of a storm. -- Fred Kleber, K9VV, ARRL USVI Section Manager, Gallows Bay Station, Christiansted, VI

==> TRAINING: ARRL COURSES UPDATED

The former Amateur Radio Emergency Communications (AREC) series of three levels of emergency communications courses has been reconfigured into two new courses: An introductory course for radio amateurs who want to volunteer to provide services for public service and emergency communications, and a course for leaders and managers who are responsible for training and coordinating response efforts. The course descriptions for both of these courses that make up the ARRL's ARES® training program can be found in the ARRL Online Course Catalog <http://www.arrl.org/online-course-catalog>. Links to register for each course are included in the course descriptions.

Introduction to Emergency Communication

The Introduction to Emergency Communication course (#EC-001) is an update of the former Level 1 course. It is designed to provide basic

knowledge and tools for any ham who wants to serve as a Public Service volunteer. It also provides an opportunity for non-hams who rely on communications in emergency situations to learn about Amateur Radio and its unique role in emergencies.

The course is offered online using the Moodle online learning platform <http://moodle.org/>. When you register for the course, you will need to demonstrate completion of two FEMA course pre-requisites: Introduction to the Incident Command System <http://training.fema.gov/EMIWeb/IS/IS100b.asp> (ICS-100 [IS-100.b]) and National Incident Management System <http://training.fema.gov/EMIWeb/IS/IS700a.asp> (IS-700). This is a mentored course. You will be assigned to correspond with an experienced radio amateur who will be your resource for any questions you have about the course content.

Public Service and Emergency Communications Management for Radio Amateurs

The Public Service and Emergency Communications Management for Radio Amateurs course (#EC-016) is designed for Amateur Radio operators who will be in leadership and managerial roles, organizing other volunteers to support public service activities and communications emergencies. In this course, participants will learn how radio amateurs prepare and organize to support local community events and, when working in coordination with governmental and other emergency response organizations, how to deploy their services to provide communications when needed in an emergency.

This course is available online on the ARRL website to all League members. The course can be accessed without a fee or enrollment directly through the ARRL website. To view the course, you must be logged into the ARRL website as a member, or as a "Guest" member. This is a self-study course that you may complete at your own pace.

==> LETTERS: SOMETIMES WE GET NOTICED

I wanted to share this story of interest to others who volunteer and support their communities in times of need. After recent major forest fires in the mountains above Colorado Springs with the loss of several lives and 350 homes lost, and a resulting 32,000 evacuees, flash flooding became our next urgent concern. Our local RACES team was activated by the Sheriff's Office to act as spotters for rising streams and possible flash flooding.

On a recent night as I stood in rain on the center span of the steel pedestrian bridge about 20' above a dark raging torrent of Monument Creek's muddy water, a passerby stopped to observe with me and comment about how amazingly fast the water had come up. I quickly agreed and said "Yeah, my buddy and I have been here awhile watching it and you should have seen it -- it went from just ankle deep to chest high in a matter of seconds!" Seeing my yellow safety vest he asked if I was with

the city works or other agency. I said, "No, we're just a bunch of ham radio operators who volunteer our time to the county; we're actually with the El Paso County Sheriff Office." I then went on to explain there was similar flash flood spotter teams strategically placed throughout the county watching streams rise and then using our radios to report observations back to the EOC. He said, "It's great to know someone's out here watching our backs!" He then turned and extended his hand to shake mine and said "Nice to meet someone on the front lines." He thanked me for being there and then went on his way.

I must say I wore a proud smile as I walked back across the bridge in the drizzle realizing that yep, that's what we do alright; we're out here watching our community's back while they sleep, watch TV, and live their lives. It sure felt great and meant a lot to be paid a huge unsolicited thanks, especially from someone who probably is sleeping a little better tonight knowing that someone has his back! -- Steve Galchutt, WG0AT <qrp.wg0at@gmail.com>, Monument, Colorado

==> K1CE FOR A FINAL

ILLW 2012

Posted: 10 Jul 2012 11:02 PM PDT
http://forums.qrz.com/showthread.php?353530-ILLW-2012&goto=newpost

With only 6 weeks to 18-19th August for the 15th annual International Lighthouse Lightship Weekend event entries are almost at the 300 mark (298 actual), with expectations of reaching close to 500 this year. This event is NOT a contest but a fun weekend involving lighthouses in over 40 countries world wide.

For full details of the event and its history see the official web site at http://illw.net

Come and join us and help publicize these wonderful structures that have saved many lives over the years.

//
3V8BB QSL LOTW?

Posted: 10 Jul 2012 03:51 PM PDT
http://forums.qrz.com/showthread.php?353495-3V8BB-QSL-LOTW&goto=newpost

Has anyone received a QSL via LOTW yet from 3V8BB? If not what direct address should I use?

I worked him on 3/24, 20 and 15m. Does anyone know who ran that operation? The web site does not say.

This is a new one for me.

Tnx,

Chuck WA4USA

DXNL 1788 - Jul 11, 2012
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

7X, ALGERIA
The special event stations 7T50I (Radio Club Algiers), 7U50I and
7V50I (Radio Club Laghouat), 7W50I (Radio Club Bou-Saada) and
7Y50I (Radio Club Mostaganem) are celebrating the 50th anniversary of
the independence of Algeria until Dec 31. A special award is available.
QSLs via 7X2ARA.

9A, CROATIA
The team of the Croatian Radio Amateur Association will participate in
the IARU HF World Championship (Jul 14/15) using the special callsign
9A20HQ this year. All QSOs will be confirmed via bureau automatically.
See also: http://www.hamradio.hr/index.php?view=article&id=2116

9Y, TRINIDAD AND TOBAGO
The "Trinidad and Tobago Amateur Radio Society" will join the upcoming
IARU HF World Championship as 9Y4HQ in CW and SSB on all bands.
QSL via DF2RG.

AP, PAKISTAN
Pakistani hams (AP2AUM, AP2MF, AP2MKS) announced to show up as AP2ARS
from the Swat district (35.5044 N, 72.5996 E; Loc MM65hh) from a height
of 2300m a.s.l. from Jul 13-15. Listen for them on 20m and 40m running
150 watts into an Inverted V dipole and via satellite.
Unfortunately QSL only direct via: PARS AP2ARS, Box 1450 Islamabad,
44000, Pakistan. See also: http://www.pakhams.com

CE, CHILE
The Radio Club de Chile (CE3AA) will sign XR3HQ in CW and SSB on all
bands during the IARU HF World Championship. QSL via bureau.

DL, GERMANY
The German team DA0HQ will be active from eight different QTHs using
the special DOK HQ12

in CW and SSB on the six main HF bands during the
IARU HF World Championship. The DA0HQ operators are looking forward to
make many QSOs. In the interest of fairness everybody should work
several HQ stations during this contest.

As every year the district Mecklenburg-Western Pomerania plans a
special activity to support the SOP award (Sea of Peace).
DL0SOP will be QRV from Jul 1-31 and hands out some points for the SOP
and also the special SDOK SOP12. See also: http://www.mydarc.de/dl0sop

EI, IRELAND
Olivier,ON4EI, will be active as EI8GQB using an hybrid wind-solar
power system from his caravan until Jul 31. He will take part in the
IOTA Contest as EI1A. More details at QRZ.com. QSLs via ON4EI.

Olivier,ON4EI, and Bernard,EI4II, will join the upcoming IARU HF World
Championship as Irish HQ station using EI80IRTS (and also on Jul 21).

F, FRANCE
Philippe,F5SKW, Dimitri,F5SWB, Freddy,F5IRO/J28RO, David,F8CRS,
Yves-Michel,F5PRU, and possibly also others will be active as TM70TE
from the 3rd floor of the Eiffel Tower, approximately 300 meters above
the ground, from July 12-15 to commemorate the 70th anniversary of the
French Army Signal Corps. QSL via F6KHX oder F5OGL.

FM, MARTINIQUE
Lars,K9FY, wants to enjoy the pile-ups on 160m-10m signing TO5U from
Ducos on Martinique (NA-107, DIFO FM-001, WLOTA 1041) from Jul 11-18.
QSL via homecall, unfortunately only direct.

G, ENGLAND
The RSGB team has applied the special call GO2HQ or the IARU Contest
and they will work from several DXCCs. They have also launched a
special awards program. QSL via M0OXO. See also: http://www.gr2hq.com

GW, WALES
The "Strumble Head DX & Contest Group" will be active again as MC0SHL
from Ramsey Island (EU-124, Loc IO71) on 40m-6m using two Hexbeams and
a Windom with one station dedicated to digital modes (mostly RTTY)
from Jul 12-16. The Team members include Ant,MW0JZE, Charles,M0OXO,
Chris,G1VDP, and Rob,MW0RLJ, with his XYL Jane. They will operate from
their farm HQ in the Pembrokeshire National Park (WFF GFF-015) if they
are unable to get to the island due to bad weather.
QSL via M0URX (OQRS), LoTW and Clublog. See also: http://www.mc0shl.com

H4, SOLOMON ISLANDS
Vadym,UT6UD, will be active as H44UD from New Georgia Island (OC-149)
from Jul 10-17. Activity will be holiday style and he will work mainly
in CW during his evening and morning. If conditions permit, Vadym will
try to activate also the IOTA groups OC-047 and OC-158. QSL via UT6UD.

HC, ECUADOR
Members of the Quito Radio Club (HC1QRC) will be active as HD081QRC
in CW and SSB on all bands from Jul 14-22. The operation is celebrate
the 81st anniversary of the founding of the Quito Radio Club. Equipment
will include both modern and some beautifully restored vintage radios
by Gustavo,HC1BG. QSL via HC1JQ.

JA, JAPAN
Following stations will join the IARU HF World Championship from Japan:
8N1HQ (JA1HGY, Minato-city, 160m CW, 10m CW)
8N1HQ (JG1ZUY, Kimitsu-city, 15m SSB)
8N1HQ (7J1YAJ, Naka-gun, 40m CW, 40m SSB)
8N3HQ (JH3AIU, Miki-city, 15m CW)
8N4HQ (JH4WBY, Okayama-city, 80m CW, 80m SSB, 10m SSB)
8N8HQ (JH8ZMM, Iwamizawa-city, 20m CW, 20m SSB)
QSLs will be sent via bureau automatically.

8J1MBR is a special event call on the occasion of the 60th anniversary
of
Mobara City (JCC 1210) in Chiba prefecture in the Kanto region on
Honshu (AS-007, WLOTA
2376). It is active until Mar 31, 2013.
QSL via bureau.

HAMs are celebrating the 20th anniversary of Yachimata City (JCC 1230)
(known
for Suika = watermelon and peanuts) and activate the special
event station
8J1SPY until Mar 31, 2013. Yachimata-City is located in
the Chiba prefecture (AS-007, WLOTA 2376). QSL via
bureau.

The special event stations 8N0CLEAN and 8N5CLEAN are active during the
"Clean Reception Environment Month" until Oct 31. QSLs via bureau.

The special event station 8J6OKAJO is working until Dec 31 to mark the
400th anniversary of Oka Province Castle Town (now Taketa-city JCC 4408
Jo: Castle) in the prefecture Oita on Kyushu (AS-077, WLOTA 0963).
QSL via bureau.

The special callsign 8J9HC is active Aug 12 to celebrate the
36th All Japan High School Cultural Festival in Toyama (JCC 2801) on
the island of Honshu (AS-007, WLOTA 2376). QSL via bureau.

LX, LUXEMBURG
The radio society "Radioamateurs du Luxembourg" will be represented by
LX75HQ during the IARU HF World Championship. QSL via LX2A.

The special event station LX75RL marks the 75th jubilee of the society
outside of the contest until Dec 31. QSL via LX2A.
See also: http://www.rlx.lu

UA1, EUROPEAN RUSSIA
The special event call UE95K marks the 95th birthday of Paul Kamozine
from Jul 14-22. He was a pilot and twice hero of the Soviet Union.
Operation takes place in all modes from Bryansk (oblast Bryanskaya,
UA3Y, oblast #118). QSL via RV3YR, direct preferred.

V4, ST KITTS AND NEVIS
once again John,W5JON, will be operating as V47JA from Calypso Bay on
St. Kitts (IOTA NA-104, Loc FK87pg) between Jul 12 and Aug 2. Activity
will be in SSB on 80m-6m (incl. 60m) and also during the RSGB IOTA SSB
Contest and the CQWW VHF Contest (Jul 21/22). His equipment includes:
Kenwood TS-590S and a SB200 amp, a 80m-10m multiband dipole and a
S9 vertical. His XYL Cathy,W5HAM, will occasionally operate as V47HAM.
All QSLs should be sent via his homecall W5JON, also via LoTW.

VE, CANADA
The Hamilton Amateur Radio Club (VE3DC) and the 1812 Special Committee
are pleased to announce that the special callsign XM31812 will be QRV
from Jul 13-15 to commemorate the Bicentennial of the War of 1812.
QSL via VE3ATX. See also: http://www.wix.com/xm31812/xm31812

A group of HAMs is going to visit Prince Edward Island (NA-029) from
Jul 12-16. They will join the upcoming IARU HF World Championship as
the Canadian HQ station VY2RAC. QSL via: Radio Amateurs of Canada,
720 Belfast Road, Suite 217, Ottawa, Ontario, K1G 0Z5, Canada.

VP2M, MONTSERRAT
Bob,W5UQ, and Bill,W5SJ, will be active as VP2MUQ and VP2MSJ from
Gingerbread Hill during their annual July DXpedition from Jul 17-24.
They will be QRV in holiday style focussing on CW, 30/17/12m and RTTY.
QSLs via W5JAY.

VP9, BERMUDA
A team of Dit,DF7KF, Angelo,DM1AC, and Joe,DL9MS, will show up as
DF7KF/VP9 (or with a special call) on 144 MHz via EME working from
Bermuda (Loc FM72oh) starting on Jul 13. QSL via DL9MS, only direct.

LG/SJ, MOROKULIEN
Bernd,DH1SBB, Claus,DO9BC, Guenther,DG7SF, and Mike,MD0VMD, will be QRV
as LG5LG and SJ9WL (alternating each day) from Morokulien on the border
between Norway and
Sweden (Loc JO69cw). Activities will take place in
SSB and digital modes on 160m-6m (mainly 40m/20m) from Jul 13-17.
QSLs via LA4EKA (please no eQSL).

HAM RADIO IN TURKMENISTAN: N8OO (ex-EZ5AA) states that all amateur radio
activities from Turkmenistan is illegal for about ten years.

HEAD QUARTERS AWARD 2012
Die "Brave Radio Friends" sponsor the HEAD QUARTERS AWARD 2012.
Applicants must work a minimum of 10 different HQ stations during the
IARU HF World Championship. Each HQ stations counts only once on any
band or mode. The award is for free and available only as a PDF.

MMMonVHF Newsletter no. 1/ WEEK 28 2012

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2012-07-11
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

HOT 144 MHz MS & EME DX-PEDITION NEWS - Pse do use:
http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: VP9I: Bermuda ; square FM72; start 2012-07-13 **

All is ready for takeoff on friday! The Team shall as well have 70cm (2x 16el Xpol
circular)
and a small 23cm circular setup there. Call always VP9I

All is prepaired and running well. Outside the hours on the Moon the Team will be qrv
for Tropo and MS as well (any skeds pse Mail to DL9MS).
Callsign VP9I is confirmed (thanks to VP9GI!)
A team consistant of Dit, DF7KF, Angelo, DM1AC and Joe, DL9MS
are going to be qrv from Bermuda, FM72OH in July on 144 MHZ via EME
First Infos about the Bermuda Triangel Expedition
to FM72oh

RIG on 144 MHz: xp28 by 7kf, eme power and lna
Call shall be DF7KF/VP9 or possible a special licens call

QSL: only direct to Joe, DL9MS (no QSL via buro!)

SOURCE: to to Joe, DL9MS, direct to MMMonVHF

** DXCC: OX: greenland ; square HP15; start 2012-07-28 **

OX3LX qrv from HP15EO on HF, 2m 4m and 6m

Again this year I have some work to do in HP15 so therefore I will be QRV when not at QRL on 2m,4m and 6m.
It will also be possible to find me on HF 1.8-30MHz where I am QRV from NA-151.

Main focus is 2m EME and 4m Es

Setup is:
4m/6m 100W 4 elm duoband.

2m 1KW M2-5WL 17 elm yagi with manual elevation and azimut.

QRG's will be decide when on site. please find me on EU/NA ON4KST or JT65 EME chat

****

** DXCC: OH&SM: Finland&Sweden; square KP43-KP46-KP07-KP03; start 2012-07-09 **

Peter PA3BIY traveling through OH & SM with 2m station.

"From July 9th till the 31st we will be travelling in the Nordic countries for a Holiday. However,
I will have some 2 m equipment with me, and try to activate a few squares along the route via MS.
These are the provisional dates where I might be active from the following locations:
July 12-16: KP43
July 16-18: KP46
July 21-22: KP07
July 23-24: KP03

In KP07 I may have the chance to be QRV from Dundret mountain, which has a magnificent take-off towards the south.

During the trip I will try to be active on KST to announce my plans, but can't promise anything! And as I
will be travelling together with my XYL, Ham radio may not always have first priority ;-) .

Equipment home made, 9 el. tonna and 400W
Hope to cu many of you on 2 m,

Peter, PA3BIY

SOURCE: Peter direct to MMMonVHF

** DXCC: F :France; square JN18; start 2012-07-12 **

FRENCH SPECIAL EVENT: This year 2012 is the 70th anniversary of the FRENCH ARMY SIGNAL CORPS .
Starting July 12th until July 15th, in Paris, among the festivities of the French 14 Juillet, will be held a special
ham event from a very rare location . From the 3rd floor of the Tour Eiffel (about 300 m over ground), some Hams, all Servicemen,
will be active, 24h a day. The crew consists namely of : Philippe/F5SKW, Dimitri/F5SWB, Freddy/F5IRO, David/F8CRS and Yves-Michel/ F5PRU.
Some of them were operators in the past at TO4E or FT5GA.
The callsign claimed is TM70TRS, but it could be also TM70TE
The activity is scheduled on CW, SSB and RTTY, HF & VHF bands (Grid Locator JN18DU)
A special QSL card to confirm your QSO?s will be available from the F6KHX ARC or from Didier/F5OGL,
both either direct or via the French bureau.
Special notice for those who are able to receive the French TF1 TV Network programmes ;

A French TF1 TV Network technician?s team managed by the journalist Anne-Claire Coudray, has made a movie, showing the operators
when preparing the station, for the operation, on last June 19th.
This movie will be included in the July 14th, morning (utc+2) , French Forces parade on the Champs Elys?, TV report. Have fun and luck.

SOURCE: tnx to Maurice, F5NQL, direct to MMMonVHF

** DXCC: LA: Norway; square KQ21; start 2012-07-20 **

Mek SP7VC and Waldi SP7IDX will be active as LA/SP7IDX and LA/SP7VC from Mageroya isl. EU-044,QTH: locator KQ21VC at Nordkapp at the Barents Sea - between 20.07-29.07.2012
We will work in holiday style (we also go fishing).We plan to use 2 stations: the first for HF band the second for the 50Mhz. We will operate on bands from 80 to 6m on ssb, rtty, also in IOTA Contest 2012

SOURCE: tnx to Mek, SP7VC, direct to MMMonVHF

** DXCC: EW: Belarus; square KO32-KO42; start 2012-08-01 **

Next Expedition from the SUDXF Team from KO43&KO32

>From August 1 to August 10, the team SUDXF will QRV MS, EME, TROPO of squares KO42, KO32. We start at the same time of two squares: one EME, from another MS and TROPO. After four days, changing squares. Call - EW/UT2GWW. Range - 144 MHz? may be and 432 MHz. Frequencies: EME - 144,138 MHz, MS - 144.353 MHz. The work is always in the first period.

Operators: EME - Anatoly, UY5HF, Alex, UR7GO. MS - Vlad, US8ZAL, Mike, US0GM.

QSL via US8ZAL

SOURCE: tnx to US8ZAL, direct to MMMonVHF

** DXCC: D6: Comoros; start 2012-08-01 **

Hi all

These are last news about our expedition to Comoros Islands (IOTA AF-007), from 8th to 21 August 2012.
The team members are Fabrizio IW3SQY, Paolo IV3DSH, Franco IZ8GCE, Sigi DL7DF, Les SP3DOI, Josep EA3AKY
and Salvador C31CT/EA3QS. We will be with the call D64K, locator LH18PJ. QTH is close to the west coast,
just at sea side, having a very good take-off to EU, Africa, and America, unfortunately to the east we will
have high mountains, about 400 meters to Asia, and 2000 meters to VK/ZL (volcano is just there).
The team has already obtained all permissions and the license has been sent to the DXCC Desk.
The license covers from 160 to 6 meters and we will be active on all bands and modes, including 6 meters EME. More info is in our web www.d64k.com
We hope to have internet access and to be qrv on on4kst chat and, possibly,
we will have on-line log. If we are not in the chat, you may send a SMS to
my phone number +34 655 565 034 in case you hear our beacon and we don&#65533;t answer the calls.
We will have a dedicated station on 6 meters with K3+PR6, ACOM1000, 6M8GJ antenna,
with elevation, fed with 25 meters of ecoflex15.

Operating frequencies will be:

Beacon: 50.103
CW/SSB: 50.103 (please split up 1 if good condx)
EME: 50.193 JT65A D64K transmits first sequence

We will be on EME at moonrise and moonset, starting the moonrise of August 9th (21:10z) and finishing at moonrise of August 20th (05:00z + 3 hours). Usually we will be on EME three hours after MR or before MS. We will run a beacon (k3 and 6m8gj) beaming to the best place to have F2/TEP conditions outside EME periods. Anyway if there is any F2/TEP it will have priority. We are also QRV to try any MS sked with south African stations.

Please check EME procedure at http://www.bigskyspaces.com/w7gj/DXpedition%20Procedure.pdf before calling us in this mode.

Hope to hear you from D64K

73 Josep and the team

EA3AKY
http://ea3aky.blogspot.com/
www.d64k.co

Hi all

It?s just 6 weeks before the expedition and I promised to keep you informed.
These are our last news: We will arrive to Comoros on August 8^th and we will
be qrv on 6 meters from the following day, August 9^th until the 20^th .
We will run a dedicated station with K3 + pr6 preamp, ACOM1000, and a 6m8gj antenna.
QRV cw, ssb, digi modes (jt65a, iscat and jt6m) and EME . We will run a breakable beacon on cw or jt65a. We hope to have internet access and will be on on4kst chats.

QTH will be LH18PJ just at sea side. By now we have got the license for
HF and 6 meters and flight tickets are already booked.

Schedule is as follows:
8/8 arrive to qth
9/8 install 6m station
First windows:
9/8 MR at 21.10Z
9/8 MS at 09.00Z
Last windows:
19/8 MS at 16:40Z
20/8 MR at 05:05Z
20/8 pack 6m station and return home
MR will be looking to mountains in the island about 200 meters high at 2 Km, will see how it works.
MS will be looking to the sea, expecting good ground gain and low noise.
We don?t have any particular frequency, usually I will TX first on 193.
We will have elevation when moon is higher than 20 degrees. We expect to run about three hours before/after MS/MR, and use the rest of diurnal time for terrestrial modes. Of course, if F2/TEP opens it will have priority, sorry, I think you will understand us.

Hope to work all you from D64K

EA3AKY

http://ea3aky.blogspot.com/__

HF and 6m Activity planed as D64K (LH81PJ)

We will have a station dedicated to 6m with a K3, ACOM1000 and long yagi.

Dates to be confirmed.

Operators are: C31CT/EA3QS, IW3SQY, IZ4AKS, IZ8GCE, SP3DOI, IV3DSH, EA3AKY

Expedition website: www.d64k.com

SOURCE: Josep EA3AKY direct to MMMonVHF

** DXCC: SP: Poland; square JO84; start 2012-08-05 **

Rolf, DK2ZF will be qrv from Holiday Place in JO84TH

Holiday style - most of the time will be fishing.. hopefully succesful ! But will join the Perseids !!!
No internet - its an isolated site - 70.200 with QSX 69.950/990 for DL

SOURCE: tnx to Rolf, DK2ZF, direct to MMMonVHF

** DXCC: EI: Ireland; square IO42; start 2012-08-05 **

EI9E/P - Perseid meteor shower from IO42SD

We hope to be QRV from the evening of the 12th to the afternoon of the 15th from
IO42.(Dates may vary).
Will be on ON4KST when operation starts.
Equipment,QRG,s,Modes,Dates to be decided and when confirmed will be updated here.

QSL Direct or via Bureau.
For direct QSLs please send via EI8IQ with donation to cover return postage.

SOURCE: tnx to EI8IQ direct to MMMonVHF

** DXCC: DL: Germany; square JO44; start 2012-08-25 **

Andy DG3XA will be qrv from the Island of Amrum JO44EP

QRV 144 Mhz with 50 watts @ 3 ele
6m with Dipol
TRXV: IC 7000
very small rig, because i carry my rig by bike on the island.

School's Radio Operators Make 44 Global Contacts:

Posted: 10 Jul 2012 05:26 PM PDT
http://www.eham.net/articles/28607

A SCHOOL's amateur radio station has linked up with more than 40 people from across the world as part of a special birthday event. Eureka Primary School, in Dunsmore Road, Midway, held its first Legion-Air Day on Sunday after working with the Swadlincote and District branch of the Royal British Legion on a unique idea to celebrate the legion's 91st birthday. Jacqui Johnson, who teaches information and computer technology (ICT) at the school, set up an amateur radio station with her husband, and said: "We have a radio station set up at the school, but we wanted a special call sign for this event and went with GB2SBL -- Swadlincote British Legion. "We had had promises of potential contacts from The Falklands, Northern Ireland and Portugal as well as many local groups.

'Hams' Love Frequency: Amateur-Radio Enthusiasts Enjoy Unique Hobby:

Posted: 10 Jul 2012 05:24 PM PDT
http://www.eham.net/articles/28606

Hobbies come in varieties as wide as the people who have them. Personal fitness classes, dance and sports help unify the mind and body, while art mediums give an outlet for creativity. Some people collect items like stamps and shot glasses, travel buffs plan trips all over the world while others spend hours behind computers and sketchbooks designing clothes, shoes and purses. Some curl up with books, or enjoy latest movies; some take voice and instrument lessons and lift up beautiful notes for audiences to enjoy. But "hams," or amateur radio enthusiasts, enjoy an exact and useful hobby as they communicate through frequencies.The American Radio Relay League's 2012 Field Day, involving more than 35,000 amateurs across the U.S. and Canada, was held June 23-24 in Waterfront Park in Orange Beach. "Ham Radio is a popular hobby and a service in which licensed participants operate communications equipment with a deep appreciation of the radio art," according to arrl.org. "The unique hobby of Amateur Radio is a mix of fun, public service, and convenience."

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JULY 15 2012.

DO NOT RESPOND.

If you receive an email supposedly from wia about upgrades DO NOT RESPOND

The mail reads something like "This is to inform you that we are upgrading
the (wia.org.au) webmail system for an increase in storage quota. To
re-validate and increase your webmail account please click the link below."

IT IS SPAM.

If need be in the future we do need an upgrade it will be announced in the
AUDIO news service or on the WIA FRONTPAGE NEWS.

Last Monday night, several Redcliffe (VK4) club members were addressed by a pirate station on their local Redcliffe repeater. The station was using the call sign, VK4NFL.

If you hear this station or any other pirate station or man-made noise on the Redcliffe repeater, could you record as many of the exchanges as possible either on paper or using a smart phone or MP3 recording software on a PC and send the information to either VK4YJV or VK4EA via the Redcliffe club's web site, so they can provide further information to the ACMA.

If the pirate station who was on the air last Monday night is listening to this broadcast, be aware Redcliffe club members are already know the suburb you live in and will soon will know your address!

That information has already been passed to the ACMA.

It just goes to prove that the club's regular foxhunts can not only find the fox but in this case are close to finding a pirate!

What use is an f-call?

(Past editions of What use is an f-call can be found online at harg.org.au
under F-troop.)

Recently I witnessed something quite amazing. I was at an Amateur Radio club
relaxing and chatting with other amateurs. We were scattered throughout the
clubhouse, several little groups of interest scattered around. People moving
between groups as their interest changed and a whole dynamic ecology of
knowledge was being distributed. There were radios set-up all over the place,
an Oscilloscope was plugged into a kit to check its operation while the local
club shop was open for business with connectors and adapters. It was a real
hive of activity, BBQ going in the background and all.

While all this was happening, a few amateurs gathered around a set and
stopped talking. The radio was tuned to a station that was directing a
pile-up. If you're unfamiliar, a pile-up is what happens when one station
calls CQ and several stations respond. Then others hear the commotion and
they join in, then more hear it and before you know it, there are 20 or 30
stations all on the same frequency, scattered all over the globe chiming in

and exchanging signal reports.

Now I've heard a few pile-ups like that. I had the joy of being the source of one of them during the International Lighthouse and Lightship Weekend when the station I was operating seemed to be getting calls from all over the place for a solid 80 minutes or so.

Back to the pile-up I was describing earlier, the one at the clubhouse.

The thing that set this pile-up apart for me was that it was all done in Morse or in the vernacular, CW. It was the first time I'd heard Morse clustered like that. Until then I've heard the local repeater beep out its call, I've contributed my own in the form of pre-recorded audio at the top of What use is an F-call?, but this was quite something. You could hear differences in tonality, speed, how someone tapped their key, their difference in signal strength. Each signal had their own personal characteristic, unlike a voice pile-up where you can make out the odd call-sign, this seemed to be a whole lot more crisp affair.

I'd already decided that I was going to spend some effort learning Morse, but this just made my day.

If you get the chance to hear a CW pile-up, have a listen. You might not yet speak the lingo, but you'll hear more than you thought you would.

I'm Onno VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

AO, AM, AN: Spain celebrates Euro2012

You will be hearing these prefixes on the bands until July 31st, because the Spanish PTT has authorized all radio amateurs in Spain to use them, to celebrate their Soccer Win, at the request of EA Digital Federation.

We hope you enjoy the contacts in the same way you enjoyed the soccer show of late!

Ham radio from the Eiffel Tower

Operators Philippe/F5SKW, Dimitri/F5SWB, Freddy/F5IRO/J28RO, David/F8CRS, Yves-Michel/F5PRU, and possibly some other hams and French Servicemen are active as TM70TRS or TM70TE from the 3rd floor of the Eiffel Tower, approximately 300 meters above the ground, until today Sunday July 15.

Activity is to commemorate the 70th anniversary of the French Army Signal Corps and activity is on CW, SSB and RTTY, and on the HF and VHF (JN18du) bands 24 hours each day.

QSL via the REF QSL Bureau.

North Korea 'CW Only' and IOTA AS-197 Project

Rick, K6VVA, states: This is a 'Work-In-Progress and warns it is not a money grabbing DX scheme at all contrary to many ill-informed blogs.

This P5 'CW ONLY' & IOTA AS-197 PROJECT is being planned, does seem to be gaining momentum towards a positive outcome and we suggest you visit Rick K6VVA 's web page and make your own mind up.

http://www.k6vva.com/p5/p5interest.html

Amateur radio features in the European Communications Office annual report.

The report says:

The ECO has taken the lead role in the activities of the regulatory affairs working group (WG RA PT2) on amateur radio issues. We are working closely with the International Amateur Radio Union (IARU) Region 1.

We also work with non-CEPT countries which have inconsistent entries in CEPT deliverables on amateur radio and those non-CEPT members who have expressed an interest in joining the CEPT regulatory framework.

Following the closure of WG RA PT2 in the second part of 2011, the Office is now leading this activity and reporting directly to WG FM.

==========

NEWS FROM ARNEWSLINE USA

NEW BROADCAST CENTRE PROPOSED FOR ONE WORLD TRADE CENTRE

The new spire built to replace the fallen twin towers of the World Trade Centre in New York City will also become an antenna site. Amateur Radio Newsline's Jim Davis, W2JKD, has the details on this emerging story:

The Durst Organization that controls New York City's One World Trade Centre in a partnership with The Port Authority of New York and New Jersey plans to add an installation for FM radio and television transmission antennas in the building's 408-foot spire. One that will ultimately bring the new building's height to 1,776 feet and make it the tallest building in North America.

The Empire State Building, 1,250 feet tall with its 204 foot antenna tower is currently the home to 19 FM stations and most of the city's digital television transmitters. Many radio and television broadcasters migrated to the Empire site after terrorist attacks of 911 caused the collapse of the World Trade Centre's twin towers in lower Manhattan.

Yet to be determined is whether any of the city's FM broadcasters will leave their current primary sites at Empire State Building for the new location at One World Trade Centre or if they will treat the new building spire primarily as a backup site.

I'm Jim Davis, W2JKD.

One thing that's pretty obvious is that at the prices being quoted for site rental income by Durst, it's unlikely that any ham radio repeaters will find a home at the new broadcast antenna site. Then again, once should never doubt the resourcefulness of New York City area hams.

SUPREME COURT RULES AGAINST THE FCC IN WARDROBE MALFUNCTION CASE

The so-called Janet Jackson "wardrobe malfunction" indecency case which led to increased profanity delay equipment installations for both TV and radio stations has come to the end of the legal road. This after the United States Supreme Court says that it will not review a lower court's ruling that overturned the FCC's $550,000 fine against CBS Corporation for televising a fleeting view of Janet Jackson's breast during the live 2004 Super Bowl half time show.

A federal appeals court had ruled the fine was arbitrary and capricious because it was much larger than indecency fines had been previously, before the commission began issuing large fines for so-called fleeting indecent utterances.

Chief Justice John Roberts agreed with the other justices not to hear the FCC's appeal. In a concurring opinion, he noted the FCC had changed its indecency policy to include fleeting utterances, supporting the arbitrary and capricious arguments, but he also warned that any future wardrobe malfunctions will not be protected going forward.

The Supreme Court last month tossed out FCC indecency fines against Fox and ABC on narrow procedural grounds. At that time it told the regulatory agency that it is free to update its broadcast indecency guidelines. For their part broadcasters have insisted for years that the FCC's indecency guidelines are vague and chill free speech.

G3PSM AWARDED THE DARC GOLDEN BADGE OF HONOUR

UK radio amateur Colin Thomas, G3PSM, has been awarded Germany's Deutscher Amateur Radio Club Golden Badge of Honour. This, for his work in achieving an amateur radio allocation at 472 kHz.

According to the German national amateur radio society, G3PSM was involved in the European Conference of Postal and Telecommunications Administrations or CEPT preparatory process meetings and at the WRC-12 conference itself. As a result of his skilful lobbying at many meetings, the CEPT proposal for an amateur radio allocation near 600 meters was fully supported and eventually granted.

G3SPM received his award from the DARC Chairman Steffen Schoppe, DL7ATE, at a recent society hosted dinner.

Trans-Tasman 80m phone results

Results for the Trans-Tasman 80m phone contest held in May. Congratulations to Ron, ZL4R, for achieving First ZL. Bill, QRP as ZL3VZ, achieved second ZL, and Alastair and Quentin operating ZL3YOK, achieved third ZL.

Congratulations to Ash VK3SSB, from Horsham Victoria, who took out the overall First place. The full results have now been published on the WIA website. Follow the link from the NZART web site "Rules" page.

The next Trans-Tasman contest Saturday, the 21st of July, from 8pm.
This is the new Multi-Mode contest which includes separate categories for 160m phone, as well as CW and Digital modes on both 80m, and 160m.
There's also an overall "multi-mode" category for any combination of these modes or bands. The "multi-mode" category is well suited to multiple operators, clubs, and anyone wanting more activity than any one mode can offer.

This is the first year that this contest has been fully managed in ZL, and the contest manager, Rob, ZL3AKM, wishes to thank everyone who participated.

(Sourced from the NZART News via vk7news)

ALARA CONTEST 25th and 26th August 2012

All licensed operators throughout the world are invited to participate.
Also open to SWLs.

YL works everyone, OMs & Clubs work YLs only.

One contest (combined phone and CW) run over 20 hours.

Saturday 25th August 2012 ---- 0400 hours UTC to 1359 hours UTC

Sunday 26th August 2012----- 0400 hours UTC to 1359 hours UTC

Bands to be used are 3.5, 7, 14, 21 and 28 MHz only.

The following are suggested frequencies for easier location of contacts:
28.38 to 28.41
21.17 to 21.2 and 21.38 to 21.41
14.25 to 14.28
7.07 to 7.1
3.56 to 3.59

LOGBOOK OF THE WORLD NOW SUPPORTS CQ'S WPX AWARD

After weeks of beta testing, the ARRL has launched the integration of
Logbook of The World (LoTW), its electronic confirmation system, with
CQ Magazine's Worked All Prefixes (WPX) Award.

The WPX Award is the first of the CQ-sponsored awards that LoTW will support.

More than 51,000 radio amateurs worldwide use Logbook of The World, and there
are currently almost 432 million QSOs in the LoTW system.

LY 54 SOP

On air until July 31st, to celebrate the 54th anniversary of SOP
(Sea of Peace), Baltic Sea.

Every year in July the local radio amateurs of Mecklenburg-Vorpommern
district accomplish special activities supporting the application of the SOP.

The SOP is awarded for contacts with different countries/areas bordering
the Baltic Sea and Norway each year during the month of July.

(TARCinc)

The team at the Hellenic Amateur Radio Association of Australia are pleased
to announce that the landing permit for the ZL9HR DXpedition to Campbell
Island has been issued by the New Zealand Department of Conservation.

The DXpedition will take place between the 28 November and December 9.

An international team is being assembled for this event on the sub-Antarctic
Campbell Island.

This will be the biggest DXpedition by an Australian club in 25 years
and the biggest one in 2012 worldwide.

For all information please go to the DXpedition website at ZL9HR.com

73 From ED VK2ARE, Australian Publicity Officer for ZL9HR and member of
the Hellenic Amateur Radio Association of Australia.

THE QNEWS WORK BENCH - the nuts and volts report - Measure Twice cut Once.

LiPo is the abbreviation for Lithium Polymer, one of the more recent
rechargeable battery technologies. These rechargeable batteries are gaining
popularity as prices fall and capacities improve.

NERG news suggest a great plain English introduction to these batteries can
be found at the RC Helicopters web site.

See the "Understanding RC LiPo Batteries" page at:

chelicopterfun.com/rc-lipo-batteries.html

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

STUDENTS DESIGN SUPERCAPICITOR BATTERY FOR ARISSAT

Students at Penn State university have designed and built a state-of-the-art
super-capacitor type battery for the next amateur radio ARISSat satellite.

The battery was built to handle 16 charge cycles in a given 24-hour period.

That will power the satellite in dark orbits, when the solar panels are not
in sunlight.

Dakshina Murthy Bellur, is an assistant professor of electrical and computer engineering at Penn State. According to Bellhur, the unit is a simple design. They flip a switch, and they throw it out into space.

Bellhur supervised the battery work, which counted as the students' senior project.

More can be found in cyberspace at live.psu.edu/story/60125

(ARNewsLine)

WW SPECIAL INTEREST GROUPS --- INTERNET --- THE HAMS DOMAIN
TWITTER http://twitter.com/VK1WIA
www.HamRadioNation.com

A D I F 2 K M L is an application that plots your ham radio QSOs as pins on Google Earth.

You can see where your QSOs or QSLs came from as the Earth spins slowly on your PC screen.

Hams that use digi-modes like PSK usually record the Maidenhead Grid of the stations they work. ADIF2KML uses those grids to calculate LAT and LON, then creates a KML file. The data shown includes notes like the ham's name, callsign, QSL received etc.

This is version 2 of this program. The new version eliminates the need for Excel and does the whole conversion in Visual Basic. But you still have the option of creating a .csv file so that you can run your own analysis of your log in a spread sheet.

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News. Each item will only be broadcast once, if you want a couple of mentions, please submit different slants to keep your event 'fresh'.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might

even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

Posted: 11 Jul 2012 06:59 PM PDT
http://forums.qrz.com/showthread.php?353655-E40VB-QSL-information&goto=newpost

I sent an email to UA4WHX (ua4whx@udm.ru) today about the Pay Pal
information for E40VB on May 17 and 25, 2012. He IS the QSL mgr and he
rquested $3.00 via Pay Pal and he will send my QSLs directly to my home
address. Be sure to type in your QSO information in the Pay Pal information
box + send it via an email after you make your payment. i will post here
when I reveive my QSLs. He confirmed my Pay Pal payment a few hours after I
made it!

This will be a new DXCC country for me #314.

DO NOT send QSLs to the E40VB QRZ.com address in Palestine. They will be
sent back to you unclaimed!

//
You've heard of Quartzfest* but did you know we now have a monthly
Newsletter?

Posted: 11 Jul 2012 11:04 AM PDT
http://forums.qrz.com/showthread.php?353593-You-ve-heard-of-Quartzfest*-but-did-you-know-we-now-have-a-monthly-Newsletter&goto=newpost

Hey, have you seen our new Quartzfest* Newsletter yet? Quartzfest* has been
in existence since 1997 and I'm proud as Quartzfest's Organizer to announce
that this month, July 2012, we have a fully formatted and informational
newsletter that covers a variety of topics including an "Ask an Elmer"
column.

For those of you who haven't seen the July newsletter, drop by our
Quartzrfest* website www.quartzfest.org and at the top of the page,
click "newsletter". There are two versions, both .pdf files but one is
small (about 600kb) for easy and fast downloading, the other is larger
(1.10Mb) and higher quality in case you want to print the newsletter. While
on our website, feel free to browse the site and enjoy our pictures and
reports from past Quartzfest's.

My plan as of now is to have a Quartzfest* newsletter published each month
and it will be both posted on the website and sent to subscribers by email
on the 1st of each month.

If you want it our Quartzfest* Newsletter delivered to your email inbox
simply click subscribe on the website and enter the requested
information...it's painless and only takes a few seconds.

If you haven't already made plans to attend Quartzfest* along with me and
hundreds of other hams...INCLUDING FRED AA7BQ, QRZ.com founder and owner,
and Gordon West WB6NOA , put January 15th - 25th on your calendar NOW!!!

If you haven't registered on our Yahoo! groups yet, we have two of them.
Feel free to join both...

1. "Quartzfest_Wanderers"
http://groups.yahoo.com/group/quartz...guid=518264060 (for everyday use to
keep in contact with friends or discuss antennas, RV issues, etc.)

2. "Quartzfest" http://groups.yahoo.com/group/quartzfest/ (for
Quartzfest planning ONLY)

I hope you enjoy reading the newsletter and you're having a safe and fun filled summer.

Steve KO4QT

Quartzfest* Organizer

http://forums.qrz.com/showthread.php?353578-Sheriff-s-colorado-river-station-amateur-radio-association-n6crs-tests-radios&goto=newpost

NEEDLES ☐ With 5,000 square miles of law enforcement and search and rescue responsibilities from the Nevada state line south about 70 miles to the Riverside County line and from the Colorado River east almost 90 miles, the San Bernardino County Sheriff☐s Department realized the need for a command post equipped with a variety of communication equipment able to communicate with allied law enforcement and public service agencies from remote locations.

Sheriff☐s deputies, search and rescue members, Needles Citizens on Patrol and professional staff from the department☐s Colorado River Station held emergency communications training from the CRS command post on June 23 at Jack Smith Park in Needles. Personnel tested their ability to set up the command post on a moment☐s notice and, under simulated emergency conditions using only emergency generator power, began communicating with other amateur radio operators nationwide as part of the annual American Radio Relay League Field Day event.

==> + EXECUTIVE ORDER POSES NO THREAT TO THE AMATEUR RADIO SERVICE

On July 6, 2012, the White House released an Executive Order
<http://www.whitehouse.gov/the-press-office/2012/07/06/executive-order-assign
ment-national-security-and-emergency-preparedness->
that addresses National Security and Emergency Preparedness (NS/EP)
communications functions of the federal government. Contrary to some
concerns raised in a few Amateur Radio circles, the Order does not
appear to contain any threat to the Amateur Service or its ability to
continue support communications during times of emergency or disaster.
It also poses no threat to amateur spectrum.

"The purpose of the new entity, which would be created by this Order within the Executive Branch, appears to be to plan for future NS/EP communications and to ensure survivability, hardness and interoperability, as well as to develop a long-term strategic plan for NS/EP communications," said ARRL Regulatory Information Manager Dan Henderson, N1ND. "Based on the Amateur Service's ongoing, positive working relationship with officials at the Department of Homeland Security's Office of Emergency Communications, it is hard to envision that any new management plan would not include Amateur Radio. Nothing in this Order directly affects Amateur Radio's daily operations." A good summary of the content of the Order can be found here <http://www.federalnewsradio.com/519/2933910/Obama-assigns-new-responsibilities-for-keeping-government-connected-in-case-of-emergency>.

==> + LEGISLATIVE NEWS: STATE-LEVEL PRB-1 LAW NOW ON THE BOOKS IN ILLINOIS

Following in the footsteps of various other states, Illinois Governor Pat Quinn signed HB 1390 -- a state-level PRB-1 law -- on June 30, effective immediately. PRB-1 (as codified in Section 97.15(b)) was released by the FCC in 1985 and states that "[s]tate and local regulation of a station antenna structure must not preclude amateur service communications. Rather, it must reasonably accommodate such communications and must constitute the minimum practicable regulation to accomplish the state or local authority's legitimate purpose." Read more here <http://www.arrl.org/news/state-level-prb-1-law-now-on-the-books-in-illinois>.

==> AMATEUR RADIO IN SPACE: THREE HAMS SCHEDULED TO HEAD TO ISS THIS WEEKEND

NASA will televise the launch and docking of the next mission to the International Space Station (ISS), scheduled for 8:40 PM (CDT) Saturday, July 14 (0140 UTC Sunday, July 15). NASA Flight Engineer Sunita Williams, KD5PLB, along with Russian cosmonaut Yuri Malenchenko, RK3DUP, and Japan Aerospace Exploration Agency astronaut Akihiko Hoshide, KE5DNI, are completing preparations as they undergo their final Soyuz spacecraft fit. Live NASA TV coverage of the Soyuz TMA-05M spacecraft launch from the Baikonur Cosmodrome in Kazakhstan begins at 8:30 PM CDT on Saturday, July 14 (0130 UTC July 15). Read more here <http://www.arrl.org/news/three-hams-scheduled-to-head-to-iss-this-weekend>.

==> + PUBLIC SERVICE: ARRL TO HOST WEBINAR ON AMATEUR RADIO RESPONSE TO 2012 HURRICANE SEASON

The ARRL will host a webinar from 8-9:30 PM EDT Tuesday, July 17 (0000-0130 UTC Wednesday, July 18) to present information about the 2012 hurricane season and the Amateur Radio response. The program will offer presentations from representatives from the National Hurricane Center (NHC) and WX4NHC (the Amateur Radio station at the NHC), the VoIP Hurricane Net, the Hurricane Watch Net and the ARRL. Webinar registration is open to all, but this informative web session will be

of particular interest to those amateurs in hurricane-prone areas. If you are interested in emergency communications and hurricane preparedness and response, you are invited to attend this online presentation. Read more here <http://www.arrl.org/news/arrl-to-host-webinar-on-amateur-radio-response-to-2012-hurricane-season>.

==> ON THE AIR: ADDITIONAL DIAMOND DXCC TOOLS AND REPORTS NOW AVAILABLE

Recently, the ARRL has been able to add some additional tools and reports to the Diamond DXCC system, including an online form that is similar to the Online DXCC application and a listing of operators who qualified for the basic award and how many entities they have credited. Read more here <http://www.arrl.org/news/additional-diamond-dxcc-tools-and-reports-now-available>.

==> + QST: CHECK YOUR MAILBOX FOR THE AUGUST 2012 ISSUE OF QST

This cover of the August issue of QST spotlights the ARRL International Earth-Moon-Earth (EME) Contest. With the advent of very sensitive receiving preamplifiers and commercially available high-gain Yagi antennas, many VHF operators are enjoying successful weak signal contacts. With a total path length of about 500,000 miles, EME is the ultimate DX! So why not set aside a couple of hours and explore the August issue of QST.

Avid kit-builder and homebrewer Jim Veatch, WA2EUJ, is no stranger to the ARRL Hombrew Challenge. As the winner of the First Homebrew Challenge and the Second Homebrew Challenge (advanced category) <http://www.arrl.org/news/the-arrl-second-homebrew-challenge-and-the-winners-are>,
Veatch once again won the Homebrew Challenge III <http://www.arrl.org/news/the-arrl-homebrew-challenge-iii-and-the-winner-is> with his compact competent transceiver that covers 12 meters, as well as 10 and 6 in a professional looking package that offers features well beyond the requirements -- for a total parts cost of $198.30. This remarkable radio is a dual conversion, downconverting superhet design that uses the latest digital signal processing technology from the second IF on. Read about it -- and find out how to build it yourself -- in Veatch's article "The DSP-610 Transceiver."

If your rig is set up for sound card modes, you can run your radio from afar. In "Remote Control Made Easy," John Raydo, K0IZ, shows how to set up your station to operate via remote control. Operating this way, Raydo says, can help avoid antenna restrictions, as well as allow hams to operate while traveling and can even minimize local RFI problems. If Murphy has ever visited your antenna tuner, you will definitely want to read "My Tuner Tuned My Antenna -- But Now It Doesn't!" by QST Technical Editor Joel Hallas, W1ZR. Hallas shows ways to get your antenna tuner back to doing what it should -- tuning your antenna each and every time.

August 17, 2012 marks the 100th anniversary of the signing of the Radio Act of 1912. It was this piece of legislation that introduced the first rules for Amateur Radio and changed the way we, as radio amateurs, operate. Join ARRL News Editor S. Khrystyne Keane, K1SFA, as she looks at how Congress, in the wake of the RMS Titanic disaster, took swift action to try and tame the chaos of the airwaves. David Palmer, KB5WIA, made an overland trek to activate a rare grid square for satellite ops. In his article "Backpacking with Satellites," Palmer explains how he was able to work hams using AO-57, VO-52, AO-27, FO-29, AO-51 and SO-50 from CM-79, a grid square that has no roads, houses, electricity or trails.

ARRL Contributing Editor Phil Salas, AD5X, takes a look at the MFJ-994BRT and MFJ-998RT remote automatic antenna tuners in this month's Product Review. He says these antenna tuners "provide reasonably priced remote auto tuner solutions for stations with high power amplifiers." QST Editor Steve Ford, WB8IMY, checked out the ICOM ID-31A 70 cm handheld transceiver with D-STAR, saying that it "may be the most user-friendly D-STAR transceiver available. It is also a high feature analog FM transceiver, includes a GPS receiver and works with a host of available options -- a very flexible and useful package."

Of course, there are the usual columns you know and expect in the August QST: Happenings, Hints & Kinks, The Doctor Is In, Short Takes, How's DX and more. Look for your August issue in your mailbox. QST is the official journal of the ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> QEX: THE JULY/AUGUST 2012 ISSUE

The July/August issue of QEX -- the ARRL's "Forum for Communications Experimenters" -- is coming soon, and it is full of theoretical and practical technical articles that you won't want to miss. Published bimonthly, QEX features technical articles, columns and other items of interest to radio amateurs and communications professionals. The mission of QEX is threefold: To provide a medium for the exchange of ideas and information among Amateur Radio experimenters; to document advanced technical work in the Amateur Radio field, and to support efforts to advance the state of the Amateur Radio art. Read more here <http://www.arrl.org/news/em-qex-em-the-july-august-2012-issue>.

==> + W1AW: W1AW'S ECHOLINK AND IRLP NODES TEMPORARILY SUSPENDED

Recent upgrades
<http://www.arrl.org/news/disruptions-possible-as-arrl-reconfigures-internet-services>
to the ARRL's Internet system has caused access to both the W1AW EchoLink Conference Server W1AWBDCT and W1AW's IRLP Node 4292 <http://www.arrl.org/echolink-irlp> to be temporarily suspended. Access to both W1AW systems can be expected by month's end. We apologize for the inconvenience.

==> SOLAR UPDATE

Tad "Don't let the Sun catch you crying <http://www.youtube.com/watch?v=49c7WeFTay0>" Cook, K7RA, reports: Solar activity rose moderately this week: the average daily sunspot numbers were up nearly 3 points to 120.9, while the average daily solar flux rose more than 28 points to 166.8. There was quite a bit of geomagnetic activity -- the most happening on July 9 -- when the mid-latitude A index reached 29, planetary A index was 30 and Alaska's college A index was 60. The latest prediction shows quiet geomagnetic conditions with the planetary A index at 5 on July 12-26, then 20 on July 27-29, 10 on July 30-31, 15 on August 1-2, 10 on August 3-4, and 8 on August 5. The predicted solar flux is 160 on July 12-13, 155, 145, 140, 130, 120, and 115 on July 14-19, 105 on July 20-21, then rising to 165 on July 28-August 2. Look for more on the ARRL website on Friday, July 13. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. ==> + SILENT KEY: WALT MAXWELL, W2DU (SK)

M. Walter Maxwell, W2DU, died July 3 at his home in DeLand, Florida, of natural causes. He was 93. Maxwell was best known in the Amateur Radio realm for his ground-breaking series of articles, "Another Look at Reflections." Published in QST in seven parts from 1973-1976, the series explained in plain English concepts such as line loss, SWR, baluns and antenna tuners. The articles were later compiled into a book, Reflections: Transmission Lines and Antennas, which included additional material on matching networks, antennas and the Smith Chart. It was first published by the ARRL in 1990 and went through several editions. Later editions were published by CQ Communications. Read more here <http://www.arrl.org/news/walt-maxwell-w2du-sk-wrote-reflections>.

==> TWO OPERATIONS APPROVED FOR DXCC CREDIT

ARRL DXCC Manager Bill Moore, NC1L, reports that two operations -- the 9X0PY (Rwanda) operation (December 24, 2011-January 7, 2012) and the S21YD (Bangladesh) operation (1994, 1995, 1998 and 1999) -- have been approved for DXCC credit. "If you have had these operations rejected in a recent application, please send an e-mail <bmoore@arrl.org> to the ARRL DXCC Desk," Moore said. "When responding, please include the reference number on your credit slip (found in the upper right hand portion) to help expedite retrieval. Please note that due to heavy e-mail volume, you may not receive a reply. Once updated, results will appear in Logbook of The World (LoTW <https://p1k.arrl.org/lotwuser/default>) accounts, as well as online in the daily listings <http://www.arrl.org/dxcc>."

==> THIS WEEK IN RADIOSPORT

This week:

- July 14 -- FISTS Summer Sprint
- July 14-15 -- IARU HF World Championship
<http://www.arrl.org/news/the-iaru-hf-championship-heats-up-the-summer>
- July 15 -- CQC Great Colorado Gold Rush
- July 19 -- NAQCC Straight Key/Bug Sprint

Next week:

- July 20 -- NCCC Sprint
- July 21 -- Russian Radio Team Championship; Feld Hell Sprint
- July 21-22 -- North American QSO Party (RTTY); DMC RTTY Contest; CQ
Worldwide VHF Contest
- July 22 -- RSGB Low Power Contest
- July 25 -- SKCC Sprint
- July 25-26 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations web page

NZART Headquarters Infoline Issue 255

13 July 2012

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· Infoline Distribution

· Call Book Updates please

· DX'Pedition to Campbell Island

· FMTAG Notes

· VHF Records Vacancy

· Finnish IARU HQ Station OH0HQ

· ARDF IARU Championships (Book)

Debby Says…Another fairly newsy issue of HQ Info Line. I confess the VHF Records vacancy may take up quite a bit of room, however the sooner we get volunteers coming forward the sooner I can stop including in this issue.

Council are urgently seeking a suitable person to fill this important position.

Council elections are looming again, and I urge you all to consider standing for your region. The Returning Officer will place a call for nominations in the August issue of Break In, so let your branch know that you are available so they can nominate you.

Lastly for this issue….Headquarters will be closed from Friday 13th to Wednesday 25th July. Please contact your area Councillor if you have any urgent enquiries.

*****

Infoline Delivery

As noted in the last infoline, this issue we have implemented a change in the email delivery of infoline. Those who previously received their infoline as an MS Word attachment will received this as the text of an email message.

There are always possibilities of errors, so if you get two copies of this issue, please drop us a note back and we will tidy up the list. Please check the email address each was sent to though, you may be listed under two different addresses.

You can always look up old issues of Infoline on the NZART web page at http://www.nzart.org..nz/h-quarter/infoline/

Alan ZL1AMW - Webmaster

Call Book & Branch Information

The Callbook Editor would appreciate all branches who have updated their data for Callbook to check their details on the website and advise him of errors.

Can the following Branches please advise either Debby or the Callbook Editor of any changes or if the existing details are still correct:
6,20,23,24,30,35,41,46,51,61,66,70,74,78,80,87.
Let's see if we can make this Callbook the most up to date ever!

Your assistance is much valued.
Lorne Douglas ZL2AHB
Callbook Editor

DX’Pedition to Campbell Island

The team at the Hellenic Amateur Radio Association of Australia are pleased to announce that the landing permit for the ZL9HR DX'Pedition to Campbell Island has been issued by the New Zealand Department of Conservation.

The DX'Pedition will take place between the 28th. of November and the 9th. of December.
An international team is being assembled for this event on the sub-Antartic Campbell Island.
This will be the biggest DX'Pedition by an Australian club in 25 years and the biggest one in 2012 worldwide.
For all information please go to the DX'Pedition website at ZL9HR.com.

73 From ED VK2ARE, Australian Publicity Officier for ZL9HR and member of the Hellenic Amateur Radio Association of Australia.

FMTAG NOTES

CALL BOOK 2012/2013 BEACON, LINK AND REPEATER LISTINGS

At the beginning of June, FMTAG sent an email to all Branches (and NZART-affiliated groups), requesting that they check their Beacon, Link, Repeater (and their Trustees) listings for the 2012/2013 Call Book, and to reply to FMTAG.

Please contact FMTAG if the Branch has not received the email:
fmtag@nzart.org.nz

As at the time of writing (Thursday the 12th of July) FMTAG has not received information from the following Branches:

12 Hamilton 20 Manawatu
27 New Plymouth

33 Rotorua 34 South Canterbury

37 Southland 38 Taumarunui
48 Wanganui

49 Westland 51 Eastern Bay of Plenty 55
Waitomo

56 Christchurch West 66 Auckland VHF 78 Far
North

85 Mercury Bay 86 Musick Point 87
South Taranaki

The close-off for returns is the 31st of July. After that date, blank spaces will appear in Call Book.

Please help ensure that this Call Book is the most accurate ever.

PROPOSALS

Branch 30 Otago has applied to relocate its 830 repeater to Halfway Bush Road, located at TOPO50 CE17 010.08 178.44. An engineering investigation, in accordance with RSM PIB38, confirms that there will be no interference to other stations, and that the repeater can remain on 438.300 MHz.

Branch 30 Otago has applied to relocate its 625 link station to Halfway Bush Road, located at TOPO50 CE17 010.08 178.44. An engineering investigation, in accordance with RSM PIB38, confirms that there will be no interference to other stations, and that the link transmit frequency can remain on 146.250 MHz and its receive frequency on 146.850 MHz.

Branch 30 Otago has applied for a power increase of its 665 repeater at Highcliff, located at TOPO50 CE17 132.79 162.56. An engineering investigation, in accordance with RSM PIB38, confirms that there will be no interference to other stations, and that the repeater transmit frequency can remain on 146.650 MHz and its receive frequency on 146.050 MHz.

FINAL RECOMMENDATIONS TO NZART COUNCIL

This item was published in HQ Infoline 254. No adverse comments have been received.

Branch 18 Hutt Valley has applied for a power increase of its 700 repeater at Fitzherbert, located at TOPO50 BQ32 643.78 350.86. An engineering investigation, in accordance with RSM PIB38, confirms that there will be no interference to other stations, and that the repeater transmit frequency can

remain on 147.000 MHz and its receive frequency on 146.400 MHz.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART website:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

******

NZART Officer Vacancy – NZART VHF/UHF/SHF Records Coordinator

NZART Council is calling for expressions of interest from NZART members for the following Officer Vacancy

The VHF/UHF Records Coordinator is responsible to NZART Council for the coordination, maintenance and promotion of the New Zealand VHF/UHF/SHF records.

Description of the position

a.. NZART is a body that promotes Amateur Radio within New Zealand.
b.. The NZART VHF/UHF/SHF Records Coordinator is appointed by NZART Council to coordinate and to promote, the keeping of accurate records pertaining to performance of VHF/UHF/SHF activities and operating by NZ amateurs.
c.. The NZART VHF/UHF/SHF Records Coordinator reports to NZART Council through an appointed Liaison Councillor.
d.. Although referred to by VHF/UHF/SHF, the task may extend to other bands.

Duties of the position

To maintain, review and update when necessary, the established:

a.. VHF/UHF/SHF Records Lists,
b.. the VHF/UHF/SHF Record Claim Rules, and
c.. the Record Claim Form.

To receive completed Record Claim Forms submitted by radio amateurs, appropriately process to verify by making whatever enquiries may be necessary, and make the concluding decision to accept or to reject the claim

a.. To amend the Records lists as appropriate.
b.. To promote active operating for records achievement among New Zealand amateurs.
c.. To arrange for presentation trophies and certificates relating to

Records.
d.. To appoint assistants as necessary.
e.. To provide advice and guidance on Records issues.
f.. To liaise with overseas radio amateurs and other amateur societies on Records matters.
g.. To write occasional entries for Break-In about Records.
h.. At time of dispute, to refer incidents involving Records Claims and the Rules to NZART Council.

Work Experience

The NZART VHF/UHF/SHF Records Coordinator will be expected to demonstrate competent performance in:

a.. Maintaining accurate and detailed records.
b.. Good written language skills for communication with members, overseas societies, and articles for publication.
c.. The accurate measurement of distances and global positions, recognise and understand the errors possible in GPS reports, in the selection of map series and in grid references.
d.. A good working knowledge of all the measurement and technical terms listed on the Claim Form.

Personal Skills

The NZART VHF/UHF/SHF Records Coordinator will require:

a.. Good person skills.
b.. An understanding of the requirements and issues involved in Amateur Radio hill-top activity including possible interference to other radio services.
c.. A good knowledge of Amateur Radio and the aims of IARU and NZART.
d.. Competency in spread sheet and word processor applications and with any specialised software appropriate to the position.

Applicants for this role can be located anywhere in New Zealand. The ideal person for this role would have experience in the area of VHF/UHF/SHF operating and/or contesting.

Officer Positions are voluntary; however operating expenses will be refunded as per the NZART Policy on Officers Expenses.

Applications for this position will be accepted from interested persons in writing with supporting documentation through the General Secretary, NZART, PO Box 40525, Upper Hutt 5140.

This advertisement is authorised by NZART Council.

JUNE 2012

******

OH0HQ - FINNISH IARU HQ STATION FROM ALAND ISLANDSIn a departure from the traditional HQ pattern in Finland, the Finnish Amateur Radio League (

SRAL), Contest Club Finland (CCF) and Radio Sporting Team (OH0Z) are organizing the activation of HQ station from the western Aland Islands at the OH0Z contest site (JP90xi). The team will put a minimum of five (5) stations on the air, challenging the midnight sun of the Finnish Summer which never sets. Now you have an excellent opportunity to work The Finnish HQ station from Aland Island (IOTA-002). The operator roster per today: Bob/K3EST (guest) together with Juha/OH1JT, Tomi/OH6EI, Martti/OH2BH, Pekka/OH2TA, Kari/OH2XX, Juha/OH6XX, Harry/OH6VM and Timo/OG9X. QSL cards via bureau or SRAL, P.O. Box 44, 00441, Helsinki, Finland In the same IARU HF World Championship Contest Toni/OH2UA and Kim/OH6KZP will be running multi-single as OH0X from Brando, eastern Aland Islands. QSL via OH2TA. 73sJouko OH1RXvice chairmanContest Club FinlandARDF IARU Championships book

Dear OM’s, YL’s and XYL’s

In recent months I have many of you approached with a request to send me information about the ARDF championships organized between 1961 (Sweden) and 2012 (Serbia). Over time much has been changed in the structure of these championships, the rules and the equipment. etc.

Jan Hoek - PA0JNH, is an active fox hunter since the mid 60s.Mid last year he started collecting information on these IARU ARDF Championships. These included reports with photographs of the championships. Furthermore, the maps used, participant numbers, medals, badges, results lists and everything else that has to do with the championships.

The data were found, among others, in my archive (participant since 2001 in France), the club magazines of DARC and VERON, websites and from anyone who was willing to look into his or her own archive to discover what old data could be brought back to the surface.

I contacted via mail and Internet most members of the IARU ARDF Working Group and a number of amateurs who have participated in past competitions. In any case, in so far as they could be reached.

Ultimately, a large amount of information has been collected. All this is brought together in a book that will soon appear.

It has the title: IARU ARDF - European - Region 1 - World Championships in general and the Dutch participation

The book is printed in full colour and has approximately 250 pages and is A4 size.

It is self-published, in cooperating with the Fox-hunting Committee of VERON, in one limited edition. There will be both a Dutch and an English version. These are completely identical in terms of the content and size of the book.

The book consists of three parts.

The first part deals with the development of the rules, the types ARDF competitions, the (registration) equipment, the organization of the championships and the state of affairs during a championship.

The second part contains each individual championship with an overview of what has happened with the accompanying photographs and any other details.

Finally, an overview of the Dutch participants, the numbers of participants and the participating societies, a summary of all the championships containing the Dutch results, a total overview of all the numbers 1, 2 and 3 individually and in the teams. Furthermore, some more statistical information and pictures of the participants who individually have won a medal 10 times or more.

In late August (ARDF competition in Bad Bentheim) the book will be available for the first time.

The selling price is set at Euro 27.50.

Who wants a copy can now have a reservation, than he/she is sure of a copy. This is best done via an email to PA0JNH: pa0jnh@kpnmail.nl.

The aim is to to distribute the books as much as possible via ARDF or other fox hunts meetings at which PA0JNH is present in our country or in Belgium / Germany. The books will be present at the 16th ARDF World Championships in September in Serbia. Of course someone else can take one or more books (after payment) for you from there. For those who want to receive the book by postal service, there will be additional costs for packaging and shipping.

These costs are (per book):

Europe (CEPT-countries): Euro 12.00 (registered mail)

Outside Europe (non-CEPT countries): Euro 18.00 (registered mail)

Payment can be made in cash at the event or through an international payment (in advance) through a bank via IBAN (International Bank Account Number). The details are provided upon request via email. Outside Europe, the transfer fees are to be paid by the applicant. You can specify in your email how many books and which version(s) (English or Dutch) you want. Please also indicate in your email how you want to get the book(s). By post or at the Championships in Serbia.

Finally, many thanks to all who helped in collecting the data.

I hope to meet you in September in Serbia.

73,

Jan Hoek, PA0JNH

RESCUE RADIO: HAMS CONTINUE WILDFIRE RESPONSE

Wind-fanned wildfires are proving stubborn, but firefighters are beginning to gain ground in their fight against the numerous stubborn blazes dotting the United States West. One of the worst hit is Colorado. Amateur Radio Newsline's Norm Seeley, KI7UP, who grew up there and knows the area well has the latest:

--

In Colorado, one of the hardest hit states, the ARRL reported that since June 9 when the first of the wildfires began, hams have been assisting with disaster communications. This, by providing communications support to the State and to several served agencies.

Shortly after the High Park fire broke out, radio amateurs in Estes Park and Fort Collins were called upon to help provide communications support to the American Red Cross. Hams set up a crossband repeater to provide communications from Red Cross Headquarters in Estes Park to their facilities at the fire base, as well as to an evacuation center at a local high school.

On June 26th, ARRL Colorado Section Manager Jack Ciaccia, WM0G, and Boulder County Emergency Coordinator Allen Bishop, K0ARK, were returning from the High Park Fire when they were notified that Boulder County Office of Emergency Management had activated ARES for the Flagstaff Fire. A lightning strike had hit just west of Boulder, caused a 20 acre fire that due to high winds had become a 230 acre

blaze in only 30 minutes. .

According to Ciaccia, the Boulder Office of Emergency Management wanted ARES positions manned at the Emergency Operations Center. They also wanted to send additional operators to video positions and set up packet and voice communications at a local school that would serve as the evacuation center. Ciaccia said that within one hour, ATV equipped hams had a video camera set up, while other hams at the evacuation center team had set up packet communications, providing data and video, as well as 2 meter FM voice communications. Other portable video positions were fully operational by the end of two hours.

According to Ciaccia, the live video feeds were displayed on huge video screens at the Emergency Operations Center. This permitted the entire emergency staff to see heli-tankers and US Forest Service bomber aircraft making fire retardant drops. They could also see the fire live from the backside, which was not otherwise visible without our portable ATV teams live video feeds.

When the Type I federal fire teams showed up to determine whether the fire would escalate to their level, they noticed the live video feeds at the EOC and made special trips to the ham radio field video sites. Until then there were apparently unaware that a television resource was available that could be used for their purposes and were quite pleased at that capability. The federal officials wanted the A-T-V to continue operations if the fire escalated to a Type I. Thankfully, this fire never grew beyond 300 acres and it remained at a Type II level.

The served agencies in this response included the Boulder County Sheriff's Office and their Office of Emergency Management. Both were extremely pleased that the ham radio community responded so fast and so well.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Meantime, hams were also active in assisting firefighters at the Waldo Canyon Fire. Amateur Radio Newslines Bill Pasternak, WA6ITF, is in the newsroom with that part of the story:

--
According to Amanda Alden, K1DNN, of Canon City, Colorado, her group was contacted by the Amateur Radio Emergency Service and told that the situation for communications due to the Waldo Canyon blaze was looking grim. Alden, along with Canon City residents Jeff Carrier, K0JSC and Phil Ott, WA0NLK along with Pueblo West resident Neal Tew, KD0NBL, immediately responded. Most of their assignment was the handling of health and welfare communications for a shelter at Summit.

At that point, Jeff Reynolds and Chaz Carmichael, W4CHZ, arrived to help at the Cripple Creek shelter. Here the ham radio operators stayed

around the clock, helped make food, ate with the evacuees and slept on cots while providing various forms of communications. The hams stayed on site until evacuations began lifting.

Amanda Alden is best known as a contributor to the Ham Nation video podcast on TWiT-TV. She was quoted as saying that the hams are proud of how quickly we came together and kept the emergency lines open for the real heroes and victims of the Waldo Canyon Fire.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

Elsewhere across the West, firefighters are making slow progress in Utah, Wyoming and Montana. A wildfire that had burned more than 390 squares miles in southeastern Montana was reported to now be 90 percent contained. A separate fire in the same region of the state near Fort Howes, was 65 percent contained after blackening nearly 97 square miles. We will have more on ham radio involvement in these wildfire emergencies in future Amateur Radio Newsline reports. (Denver Post, ARRL, other sources)

RESCUE RADIO: FCC TO INVESTIGATE PHONE FAILURES AFTER JUNE 29 STORM

The Federal Communications Commission is looking into the damage that a massive wind storm caused to wireless and landline phone networks in the mid-Atlantic U-S-A. Amateur Radio Newslines Heather Butera-Howell, KB3TZD, is here with more:

--

The storm took place on Friday, June 29th. It swept from the Midwest into the Northeast with the mid-Atlantic states including Virginia and West Virginia taking the worst pounding.

David Turetsky, is the Chief of the FCC's Public Safety and Homeland Security Bureau. In an e-mailed statement he said that his agency plans to meet with a number of carriers in the coming weeks to explore the cause of service issues to 911 service centers and the overall lessons learned. Truetsky continued by saying that these and other issues will be taken under advisement to ensure that the public receives the best communications service possible and is able to communicate effectively and in a way that safeguards public safety in these situations.

FCC spokesperson Lauren Kravetz said the commission is still investigating the problems with emergency calls, but that 911 operators might have been unable to identify a caller's number and location. She said it is unclear how many people were unable to make an emergency call at all.

For the Amateur Radio Newsline, Im Heateher Butera-Howell, KB3TZD, in Berwick, Pennsylvania.

--

According to The Washington Post, many 911 callers in the region heard silence, busy signals or recorded messages saying the line was inoperative. Meantime, here in West Virginia, so far there have not been any reports reaching us concerning ham radio related severe weather watch or post storm amateur radio emergency communications efforts. (The Hill)

**

RESCUE RADIO: ARRL TO HOST HURRICANE RESPONSE WEBINAR

Still with emergency communications matters, word that the ARRL will host a webinar from 8 9:30 PM Eastern Daylight Time on Tuesday, July 17th. This, to present information about the 2012 hurricane season and the Amateur Radio response.

The program will offer presentations from representatives from the National Hurricane Center and WX4NHC which is the Amateur Radio station at the National Hurricane Center. Also on the agenda are presentations by the VoIP Hurricane Net, the Hurricane Watch Net and the ARRL.

Webinar registration is open to all, but this informative web session will be of particular interest to those amateurs living in hurricane-prone areas.

If you are interested in emergency communications and hurricane preparedness and response, you are invited to attend this online presentation. To register for this webinar, please go to tinyurl.com/ham-hurricane-webinar and fill out the required registration form. (ARRL)

RADIO LAW: ILLINOIS GOVERNOR SIGNS MEASURE PROTECTING HAM RADIO ANTENNA RIGHTS

Some good news for hams in Illinois. That state now has its own PRB One-like law to protect the antenna rights of radio amateurs. Amateur Radio Newsline's Cheryl Lasek, K9BIK, has the rest of the story:

--

Illinois Governor Pat Quinn has signed Illinois House Bill 1390 into law. This despite unfounded fears on the part of some of the states radio amateurs as widely posted to the Internet. Fears that home owners associations and real estate groups would try to derail the measure. It turned out that these fears were totally groundless.

With Governor Quinn's signature affixed, the Illinois Municipal Code was amended by adding Section 11-13-1.5. Paraphrased, it basically reads as follows:

With regard to Amateur radio communications and antenna regulations, and not withstanding any provision of law to the contrary, no ordinance or resolution may be adopted or enforced by a municipality that affects the placement, screening, or height of antennas or antenna support structures that are used for amateur radio communications. Also, a municipality may not regulate the antennas or antenna support structures that are used for amateur radio communications in a manner inconsistent with this Section.

It should be noted that Illinois House Bill 1390 does not supersede such things as deed restrictions, Covenants, Conditions Restrictions and homeowners association rules that forbid the installation of outdoor antennas. These are considered to be personal and binding business contracts and therefore not subject to override by the new PRB One-like law.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

According to several knowledgeable sources in Illinois, it took less than 3 months to gain House approval, 20 days for Senate approval, and 38 days before Governor Quinn signed the new measure into law. (Various)

**

COMMUNICATIONS HAPPENING: THE GREAT INTERNET BLACKOUT A WHIMPER

The over-hyped Great Internet Blackout of 2012 came and went with little more than a whimper on Monday, July 9th. This, as the so-called "Doomsday" deadline passed with few reports of service outages.

At 12:01 a.m. Eastern Daylight Time the FBI shut down temporary servers it had set up to handle Web traffic for thousands of computers infected with a virus spread by a ring of cyber criminals that the bureau busted last year. Those using the estimated 200,000 computers still infected with the virus were expected to lose their Internet connectivity after the servers were taken off line.

But like the Y-2-K fears some 12 years ago, this latest loss of service simply failed to materialize. According to the FBI, 41,800 of the 211,000 worldwide computers infected with the virus were in the United States, but U.S. Internet providers reported far fewer victims.

(Published news reports)

**

ENFORCEMENT: KJ6CEY ARRESTED FOR ALLEGEDLY POINTING LASER AT FIRE ENGINE

Thirty-one year old Irene Levy, KJ6CEY, of San Jacinto, California, is in trouble with the law once again. This time after allegedly pointing a laser at a firefighter behind the wheel of a fire engine.

At around 3:45 a.m. on June 30th, officers from the San Jacinto Police Department responded to a call to assist CalFire. When officers arrived, the fire personnel claimed that Levy had shined a laser light at the driver of their engine while they were driving on East Main Street. Also that she had shined the laser at their driver several times earlier in the evening as well.

Levy was taken into custody and booked into the Larry Smith Correctional Facility charged with pointing a laser at a moving vehicle and violating the terms of her probation. At last report she was being held in lieu of $25,000 bail.

You may recall back in May of 2010 when Levy used an amateur radio station to interfere with an emergency response dispatcher. In that case Levy was found guilty of jamming emergency radio frequencies by broadcasting threats. As part of her probation, she was ordered to complete a mental health program and stay out of trouble. (Riverside.com)

**

ENFORCEMENT: FCC ISSUES NOTICE OF UNAUTHORIZED OPERATION TO FALLBROOK CA RESIDENT

The Federal Communications Commission has issued a Notice of Unlicensed Operation to a Southern California, resident for operating an unlicensed transmitter on 106.1 MHz.

According to the FCC Notice, the agency received information that an unlicensed broadcast radio station on 106.1 MHz was allegedly operating in the city of Fallbrook, just North of San Diego. On May 22nd, agents from the San Diego FCC office confirmed by direction finding that the signal on 106.1 MHz was emanating from a residence in Fallbrook's Gird valley area that reportedly belonged to one Lewis A. Parks.

Bob Gonsett, W6VR, is involved with the Fallbrook Amateur Radio Club and works in the broadcast engineering field. He was quoted in the Fallbrook Village News that the station in question was relatively low powered, yet still strong enough that it could be heard for about a mile radius. The unlicensed transmission was picked up by a listener who ordinarily receives KPLM on 106.1 MHz. FCC records show that no license is issued for operation of a broadcast station at this location on 106.1 MHz in Fallbrook.

In the Notice of Unlicensed Operation, Parks was warned that operation of radio transmitting equipment without a valid radio station authorization constitutes a violation of the federal laws. As such it could subject the operator of such a transmitter could be subject to severe penalties. These include but are not limited to substantial monetary forfeitures, seizure of the offending radio equipment, along with criminal sanctions including imprisonment. More on this story is on-line at tinyurl.com/unlicensed-fallbrook-station. (W6VR, Fallbrook Village News)

**

ENFORCEMENT: YET ANOTHER UNLICENSED FLORIDA BROADCASTER FACES A PROPOSED $15000 FINE

The FCC proposed a $15,000 fine against Luis Ernesto Rivas Jr. for operating an unlicensed station in Miami. Earlier this year agents from the Miami office of the Enforcement Bureau traced the source of RF transmissions on 89.1 MHz to an antenna on a roof in Miami. While monitoring the station, they heard a reference to "The Streets FM."

According to the commission's account of the incident, the agents went to the building roof with the building owner and saw radio transmission gear, including an FM transmitter connected to a transmitting antenna and a laptop computer. The computers screen displayed a Facebook webpage stating 'Underground Station In Miami @ USTREAM: Go To Our Website www.thestreetsfm.com ...On 89.1 Miami #1 Underground Station."

The agents found a Web page for the station at www.thestreetsfm.com and matched a photo of Rivas from the site with one from the Florida Department of Motor Vehicles.

Now, in issuing the Notice of Apparent Liability, the FCC says that all of the facts point to Rivas as being responsible for operating the illegal station. It also noted that it had Rivas operated another illegal station in Florida in 2007. That garnered him an extra $5,000 penalty, making the total fine $15,000.

Rivas has the customary 30 days from the date that he was notified of the proposed fine to pay it or to file an appeal. (FCC, RW)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

CHANGING OF THE GUARD: INVENTOR LEONARD KAHN EX- WB2SSP -S.K.

Communications inventor Leonard R. Kahn, the former WB2SSP, passed away on June 3rd in Florida.

Kahn is likely best remembered for his development of the Kahn-Hazeltine AM Stereo system that used independently modulated upper and lower sidebands. He was also the inventor of the CAM-D AM digital system. Kahn's AM stereo design was later revamped for monaural use and used in the Power-Side system, in which a decreased signal in one sideband is used to improve coverage and loudness. Power-Side became the basis for CAM-D, Compatible AM Digital, a digital system that is still used on several AM stations.

Leonard Kahn worked for RCA Labs for many years and turned out over 80 domestic and 100 foreign patents. As such, he is considered one of the five "fathers of the wireless industry." (Published reports)

**

THE CHANGING OF THE GUARD: VHF PIONEER LARRY HOGUE, W6OMF-SK

And sadly we also bid farewell to Larry Hogue, W6OMF, who passed away undergoing open heart surgery on June 29th.

W6OMF was the long time Net Control Operator for the Northern California Sidewinders On Two Sunday night net and was one of the leading spokesmen for VHF DX on the West Coast. He was considered by many as being the driving force behind Sidewinders on Two's presence on the West Coast and the Sunday night net had check-ins from Oregon in the North to Los Angeles in the South. (WB6AEA)

**

HAM RADIO IN SPACE: HAM IN SPACE SESSION IN KANSAS CITY

This note for amateur radio operators near Kansas City, Missouri. On July 20th, the Hams in Space Team will be presenting a satellite lecture at the University of Missouri, Kansas City's Communiversity. The Communiversity is the University's Community Education Program available to anyone from the area who wishes to attend.

According to Randy Schulze, KD0HKD, the group is preparing a seminar to be enjoyed not only by licensed radio amateurs but also to members of the general public. This as a means of providing information about one of the fun and amazing things that can be done within the hobby.

If you plan to attend, please register early. All necessary information is on-line at www.umkc.edu/commu. (ANS)

**

WORLDBEAT: WARRINGTON ARC GRANTED GB2012MV FOR OLYMPIC GAMES

The United Kingdom's Warrington Amateur Radio Club have been granted a license to cover both the 2012 Olympic and Paralympic games. In a collaborative effort with West Manchester Radio Club and South Manchester Radio and Computing Club, the Warrington group has been assigned the special call sign GB2012MV for the event at Old Trafford, home of Manchester United soccer team. This is one of the venues for the Olympic football tournament. The decision by telecommunications regulator Ofcom means that GB2012MV will be one of only four stations nationwide to be permitted to officially commemorate the Olympic games. The club will begin transmissions on Wednesday, July 25, the start of the Olympic football tournament and end on September 9, which will be the closing ceremony of the Paralympics. (Southgate)

**

WORLDBEAT: GB2VET FROM JULY 27 TO 29

Also, U-K special event station GB2VET, celebrating the army, navy and air force reunion's 10 anniversary will be operational July 27th to the 29th from East Park in the city of Hull. Plans are to operate all available bands using both World War 2 and modern gear. Modes will include D-Star on VHF and UHF. There will also be a display of vintage equipment as well. (2E0BRQ)

**

ON THE AIR: CELEBRATING THE APOLLO MOON MISSIONS

The Italian Radio Association known as the ARI have announced sponsorship of a special award to commemorate the Apollo Space Program. This specific for contacts made before July 31st this month. To qualify for the award you need to have confirmed contacts with the ARI Headquarters Station IQ1TW and three other stations. More information is on-line at aritortona.xoom.it. (Press release)

**

ON THE AIR: EIFFEL TOWER ON THE HAM BANDS

F5SKW and several other French radio amateurs will be on the air 24 hours a day through July 15th as TM70TRS or TM70TE from the 3rd floor of the Eiffel Tower, in Paris. This activity is to commemorate the 70th anniversary of the French Army Signal Corps. The operation will use CW, SSB and RTTY, and on the HF and VHF bands. A special QSL card will be available. QSL via the F6KHX Amateur Radio Club or F5OGL, direct or by the REF QSL Bureau.

This operation also brings to mind a question we frequently get asked by listeners here in the United States. That being, are there any ham radio repeaters operating from the Eiffel Tower? If you know the answer, please drop us an e-mail with repeater call signs and operating frequencies to newsline (at) arnewsline (dot) org. (OPDX)

**

DXCC: SIX OPERATIONS APPROVED FOR DXCC CREDIT

Bill Moore, NC1L, the ARRL Awards Branch Manager, reports that several operations have been approved for DXCC credit. These include the 2012 operations as 3C0E operation from Annobon; 3C6A from Equatorial Guinea, 5X1RO from Uganda and XW4XR from Laos. Also approved are the 2011 J25DXA and 2010 J28RO operations from Djibouti. If you've had any of these operations rejected in a recent DXCC submission please send an E-mail to bmoore (at) arrl (dot) org to be put on the list for an update. (ARRL DXCC)

**

DX

In DX, word that the long awaited St. Paul Island CY9M operation will take to the airwaves from July 26th to August 1st. This as an international team will put this rare island, located approximately 14 miles northeast of the northern tip of Cape Breton Island, Nova Scotia, Canada, on the air. No word yet on bands or modes. QSL via M0URX.

The Hellenic Amateur Radio of Association of Australia is organizing a DXpedition to Campbell Island from November 28th through December 9th. Campbell Island whose prefix is Zed-L-9 is number 15 on the current

DXCC most wanted list. You can follow the planning for this one at www.zl9hr.com.

A group of operators from Switzerland known as the Radio 7 Team will be active from Rodrigues Island as 3B9SP from between October 16th and the 23rd. Most operation will be on CW and SSB with some RTTY and PSK 31. Bands mentioned are all of the HF frequencies plus 6 meters. Logs will be uploaded to Logbook of the World within 6 months after the operation concludes. QSL via HB9ACA.

The World-Wide DX Group will be on Conway Reef from September 24th to October 5th. Their announced goal is to provide as many DXers as possible with this rare DXCC entity. The group says that it will target European contacts during those periods when propagation is possible and we will ask Japan and North America to stand buy during those brief periods when the bands are open to Europe. The World-Wide DX Group is the same group which brought you the 3D2C Rotuma Island Dxpedition in September, 2011.

Lastly, the Araucaria DX Group, in conjunction with the TX3A Team, will sponsor a DXpedition to St. Peter and St. Paul Rocks, in the late November to mid December time frame. The actual dates will depend on weather conditions. The operation will have a strong low band focus. There will be a dedicated 160 meter station operating from sunset to sunrise. A second station will be on 80 and 40 meters at night as well. During the day we will operate two stations on the higher bands including 6 meters based on conditions. RTTY will also be supported. More on this planned operation is on-line at www.pt0s.com.

(Above from various DX news sources)

**

THAT FINAL ITEM: MEET COLBY AND VISIT HIS CORNER

And finally this week the story of an inquisitive pre-teen who has his first experience with ham radio with a television camera watching and recording the event. The young mans name is Colby, he's 9 years old, and he is the star of a new children's television series called Colby's Corner that recently began airing on Christian Television Network station WLCN in Summerville, South Carolina. .

The theme of the show is very simple. Its Colby learning about various aspects of life by experience as would any other youngster. Only Colby is sharing his encounters with the kids who watch on WLCN. And one of his recent trips took him to a ham radio station operated by Vince Lombardo, K4AOC.

For those of you who are out of the coverage of WLCN but would like to watch Colby learn about ham radio from a real pro, that episode and all of the others can be seen on line on YouTube. A direct link to the one we have been describing is tinyurl.com/colbys-ham-radio. The show also has a website at www.colbyscornertv.com. (NN4F, QRZ.com)

FORECASTED GLOBAL LIGHTNING NOISE (QRN)-

Northern hemisphere low latitude regions can expect VERY HIGH thunderstorm lightning induced QRN tied to summer season

proximity to the Inter-Tropical Convergence Zone (ITCZ) and tropical warm core low pressure systems.

Northern hemisphere mid latitude regions can expect HIGH TO VERY HIGHthunderstorm lightning induced QRN tied to summer

season cold/warm/occluded fronts and associated extra-tropical cold core low pressure systems, as well as tropical warm core low pressure systems.

Northern hemisphere high latitude regions can expect HIGH thunderstorm lightning induced QRN tied to summer

season cold/warm/occluded fronts and associated extra-tropical cold core low pressure systems.

Southern hemisphere low latitude regions can expect HIGH thunderstorm lightning induced QRN tied to winter season proximity

to the Inter-Tropical Convergence Zone (ITCZ) as well as cold/warm/occluded fronts and associated extra-tropical cold core low

pressure systems.

Southern hemisphere mid latitude regions can expect MODERATEthunderstorm lightning induced QRN tied to winter

season cold/warm/occluded fronts and associated extra-tropical cold core low pressure systems.

Complete details and rules on the "IARU HF World Championship" are
available at: http://www.arrl.org/iaru-hf-championship
ADDED NOTE: Special multipliers are given out for working IARU regional
officials such as AC, R1, R2 and R3, plus country headquarters stations.

LATE/LAST MINUTE DX UPDATES AND PRESS RELEASE

AT1/VU2, INDIA. Members of the ARSI (Amateur Radio Society of India) will be active as AT1HQ, the HQ callsign of the ARSI, for the IARU HF World Championship (July 14-15th) Contest this weekend on all bands. This will be run by multipler stations across India running the same callsign. The stations and operators making this possible include Aravind/VU2ABS, Kumar/VU2BGS, Nand/VU2NKS, Pai/VU2PAI, Prasad/VU2PTT, Chandra/VU2RCT, Ganesh/VU2TS, Raman/VU3DJQ, Deepak/VU2CDP and Mur/VU2MTT. QSL via VU2PTT. ADDED NOTE: Also, look for Gopal, VU2GMN, on SSB to be giving out the R3 multiplier as the IARU Region 3 Director.

9A22, CROATIA (WFF Op!). Members of Radio Clubs "Karlovac" (Karlovac), "Duga Resa" (Duga Resa) and "Croatian Flora Fauna" (Zagreb) are expected to activate the Special Forest Reserve "Javornik - Tisov vrh" (9AFF-061), on July 14th, located within a mined area of Plje�evica mountain. They used the special callsign 9A22MINE, remembering that some areas in Croatia have remained affected by landmines for 22 years. QSL via 9A1MB. All other details are available on QRZ.com.

HL0, SOUTH KOREA. Operators Aves/DS2AGH, Sungki/HL1IWD, Harry/WX8C and Jussi-Pekka/OH6RX will be active as HL0HQ from the KARL HQ club station in Seoul during the IARU HF World Championship (July 14-15th). QSL via DS2AGH direct or by the Bureau.

LR5/LR7, ARGENTINA. Members of the Radio Club Argentino (LU4AA) will be active during the IARU HF World Championship (July 14-15th), giving the multiplier RCA. Look for the following stations to be on the air:
LR5H - 80/15m SSB and 40m/CW; Operators LU2NI, LU3HY, LU5DX, LU5HM, LW5HR, LU7HE and LU8ADX
LR7D - 20m/SSB; Operators LU1DK, LU4DX and LU7DR
LR5F - 20m/CW; Operator LU5FF
LR7H - 160/10m/CW and 160m/SSB; Operator LU7HF and LU7HN
LR7F - 40/10m/SSB, 80/15m/CW; Operators LU4FPZ, LU3FMD, LU6FEC, LU9FEL, LU7FTS and LU6FN
QSL via the Bureau or direct to LU4AA.

OH0, ALAND ISLAND (OH0HQ - FINNISH IARU HQ STATION): Martti, OH2BH, reports the following [edited]:
"In a departure from the traditional HQ pattern in Finland, the Finnish Amateur Radio League (SRAL), Contest Club Finland (CCF) and Radio Sporting Team (OH0Z) are organizing the activation of HQ station from the western Aland Islands at the OH0Z contest site (JP90xi). The team will put a minimum of five (5) stations on the air, challenging the midnight sun of the Finnish Summer which never sets. Now you have an excellent opportunity to work The Finnish HQ station from Aland Island (IOTA-002).
The operator roster is as follows: Bob/K3EST (guest) together with Juha/OH1JT, Pekka/OH2TA, Tomi/OH6EI, Martti/OH2BH, Kari/OH2XX, Juha/OH6XX, Harry/OH6VM and Timo/OG9X.
QSL cards via bureau or SRAL, P.O.Box 44, 00441, Helsinki, Finland

In the same IARU HF World Championship Contest OH2UA and OH6KZP will be running multi-single as OH0X from Brando, eastern Aland Islands. QSL via OH2TA."

TC50, TURKEY. This year the TRAC Radio and Community of Radio Amateurs
will participate in IARU HF World Championship (July 14-15th) using the
special callsign TC50HQ. Activity will be on all six bands and both modes.

Move Over Raspberry Pi, Give Kids a Radio Ham Pi:

Posted: 12 Jul 2012 05:32 PM PDT
http://www.eham.net/articles/28628

Hobbyists spark an interest in electronics: Schoolchildren should be given simple radio kits to build so they can learn basic electronics, communications minister Ed Vaizey said yesterday. "It would be great to get amateur radio kits in schools like we have with the Raspberry Pi," he added, referring to the cheap PC that's sneaking into classrooms to promote computer science to youngsters. The Tory MP spoke at the opening of the Radio Society of Great Britain's National Radio Centre, which aims to show groups of schoolchildren and other visitors the history and principles of radio technology. It is hoped that teaching tykes the foundations of wireless communications will help them appreciate and take a greater interest in things they take for granted - from Oyster cards to 3G mobile web surfing. "Looking around the room, I can see amateur radio appeals to a certain demographic, but there's nothing wrong with that," Vaizey told the society's radio hams. He acknowledged that the broadcast hobbyists were involved in "long-term technical work, which may not have the glamour of jumping out of aeroplanes but still contributes to national greatness".

//
Executive Order Poses No Threat to the Amateur Radio Service:

Posted: 12 Jul 2012 12:33 PM PDT
http://www.eham.net/articles/28620

On July 6, 2012, the White House released an Executive Order that addresses National Security and Emergency Preparedness (NS/EP) communications functions of the federal government. Contrary to some concerns raised in a few Amateur Radio circles, the Order does not appear to contain any threat to the Amateur Service or its ability to continue support communications during times of emergency or disaster. It also poses no threat to amateur spectrum.

//
State-Level PRB-1 Law Now On the Books in Illinois:

Posted: 12 Jul 2012 12:32 PM PDT
http://www.eham.net/articles/28619

Following in the footsteps of various other states, Illinois Governor Pat Quinn signed HB 1390 -- a state-level PRB-1 law -- on June 30, effective immediately. PRB-1 (as codified in Section 97.15(b)) was released by the FCC in 1985 and states that "[s]tate and local regulation of a station antenna structure must not preclude amateur service communications. Rather, it must reasonably accommodate such communications and must constitute the minimum practicable regulation to accomplish the state or local authority's legitimate purpose."

//
Three Hams Scheduled to Head to ISS This Weekend:

Posted: 12 Jul 2012 12:32 PM PDT
http://www.eham.net/articles/28618

NASA will televise the launch and docking of the next mission to the International Space Station (ISS), scheduled for 8:40 PM (CDT) Saturday, July 14 (0140 UTC Sunday, July 15). NASA Flight Engineer Sunita Williams, KD5PLB, along with Russian cosmonaut Yuri Malenchenko,

RK3DUP, and Japan Aerospace Exploration Agency astronaut Akihiko Hoshide, KE5DNI, are completing preparations as they undergo their final Soyuz spacecraft fit.

//
ARRL to Host Webinar on Amateur Radio Response to 2012 Hurricane Season:

Posted: 12 Jul 2012 12:31 PM PDT
http://www.eham.net/articles/28617

The ARRL will host a webinar from 8-9:30 PM EDT Tuesday, July 17 (0000-0130 UTC Wednesday, July 18) to present information about the 2012 hurricane season and the Amateur Radio response. The program will offer presentations from representatives from the National Hurricane Center (NHC) and WX4NHC (the Amateur Radio station at the NHC), the VoIP Hurricane Net, the Hurricane Watch Net and the ARRL.

//
Additional Diamond DXCC Tools and Reports Now Available:

Posted: 12 Jul 2012 12:33 PM PDT
http://www.eham.net/articles/28616

Recently, the ARRL has been able to add some additional tools and reports to the Diamond DXCC system, including an online form that is similar to the Online DXCC application and a listing of operators who qualified for the basic award and how many entities they have credited.

13 Colonies Special Event -- Wow!

Posted: 12 Jul 2012 12:29 PM PDT
http://www.eham.net/articles/28609

I never thought I would see this, but with bad T-storms, straight line winds, static, bad QSB, electric outages, record blistering heat and huge solar storms with radio black outs, The 13 Colonies Special Event had a BANNER YEAR! What else could of went wrong? A Snow Storm? Grand total QSO count is 60,927. +20,000 over last year! I would like to thank all you operators who called us, who were ladies and gentlemen on the air, had patience and yes, compassion! Also, kudos to our HF and Satellite stations who tried their best to please everyone. Not all were happy, but that was a very, very few. Try to understand that it is my job to evaluate the response every year. I have been wrong every year! The response has been gratifying and much more than anticipated.Pile ups galore, even from EU! Many thanks to the bonus special event station WM3PEN in Philadelphia! They add that extra patriotic "Flair" to the event, and folks appreciate their participation, as we do too!

SARL NEWS - SUNDAY 15 JULY 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on "Amateur Radio Today" and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 MHz FM from Pretoria with relays on 7 066 and 3 695 kHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

BOOK NOW FOR THE RTA IN DURBAN ON 21 JULY

FORUM MODERATORS APPOINTED

PROBLEMS EXPERIENCED WITH LOAD CONTROL SYSTEM IN WESTERN PROVINCE

You are listening to ZS6SRL. Stay tuned for more details on these items and other important and interesting items.

BOOK NOW FOR THE RTA IN DURBAN ON 21 JULY

Bookings have been coming in steadily and it looks like we are heading for a bumper Radio Technology in Action Symposium next Saturday. Listen to Amateur Radio Today later this morning for a preview by Tony Voorveld of his presentation "Tuning into nature". Full details of the symposium to be held in Durban on 21 July are available on line at www.sarl.org.za.

You can pre book and take part in an additional prize draw for the ARRL Book "Basic Antennas". If you like a programme to be sent to your inbox send an email to rta@sarl.org.za with RTA Durban in the subject line and a PDF copy will be mailed to you.

Pre-booking closes on Thursday 19 July. After that you can register at the venue from 08:30. Only cash or cheques will be accepted. The symposium starts at 09:00. The venue is the University of KwaZulu-Natal School of Engineering, use gate 8 at Rick Turner Avenue (used to be Francois Road) . You will find the GPS coordinates on www.sarl.org.za select RTA. Note that this is a new venue.

FORUM MODERATORS APPOINTED

The Council of the SARL has approved the appointment of three moderators to assist the SARL Councillor responsible for the SARL Forum portfolio, Pierre van Deventer, ZS6A. They are: Brad Philips, ZS5Z Vincent Harrison, ZS6BTY Roger Conroy, ZR3RC

Please give them your full support.

PROBLEMS EXPERIENCED WITH LOAD CONTROL SYSTEM IN WESTERN PROVINCE

Problems are experienced and all radio amateurs in the Paarl and Stellenbosch Municipal areas where the load control system is currently being installed (this is the system installed to switch the geyser off during peak hours) please take note. This unit causes disturbances right through the HF spectrum. ICASA has investigated a complaint and are currently having discussions with the Municipal officials and the South African Bureau of Standards.

This morning they were wondering whether there were more amateurs experiencing disturbances, and would welcome feedback from you. The investigating official is Brennan Marais and can be contacted on 021 431 9811 or on his cellphone 082 569 8774. E-mail is bmarais@icasa.org.za.

In the meantime please be advised to decline the installation of this unit at your premises. If you want to hear how this unit sounds please phone Theo, ZS1BO, at 082 855 5623.

FUN CONTEST ON SUNDAY 22 JULY

The Boland Amateur Radio Club will be holding its 40 metre sprint phone contest on Sunday 22 July from 15:00 - 18:00 CAT. This is a fun activity to promote contacts on 40 metres between radio amateurs in Southern African countries. It is also an ideal opportunity for Mobile stations, Field stations and RaDAR stations to participate.

In this contest only wire or mobile antennas may be used and a maximum output of 100 watt. The following frequencies may be used 7 060 - 7 100 and 7 135 -7 200 kHz. Only three [3] contacts per frequency are allowed before you have to change frequency. You may only return to a previously used frequency after five [5] contacts.

Only Excell logsheets will be accepted and can be sent to zs1bak@bark.org.za or by post to BARK, P.O. Box 273, Strand, 7139.

Full details can be found on page 43 and 59 in the 2012 contest manual at www.sarl.org.za.

URL on for printed version: www.sarl.org.za/public/contests/SARL_2012_Contest_Manual_issue_10.pdf)

IARU HF WINTER CHAMPIONSHIP

The SARL is taking part in this contest with the call sign ZS9HQ. So to all of you out there, here is an opportunity to get a new call sign in

the log. It will be the first time that this call sign is used. The shack at NARC is going to be used for the Phone operators. The following operators will be flying the ZS9HQ flag: CW Operators:- ZS1EL - Vidi La Grange ZS1AAX - Allan Smith ZS6C - Joop Hesp ZS6A - Pierre van Deventer

Phone Operators:- ZR6NGB - Nigel Burgess ZS6RLM - Roy McKay ZR6DX - Noel Hammond ZS6GRL - Geoff Levey ZS6RIC - Rikus Joubert

We thank all the operators who have come to the party.

SARL WINTER QRP COMPETITION

The SARL Winter competition is a fun activity to promote contacts between radio amateurs in Southern Africa. The use of self constructed equipment and operation of a portable/field station and the use of temporary antennas are encouraged, but is not a requirement.

The winter QRP competition will be on the air from 12:00 to 15:00 UTC on Saturday 21 July with CW and Phone activity on 40 metre. An RS(T) report and 6 character grid square will be exchanged. Each SSB contact counts 1 point and each CW contact 2 points. Each prefix worked counts as a prefix multiplier.

Logs must be submitted within 7 days after the competition and can be e-mailed to contest@sarl.org.za or posted to West Rand Amateur Radio Club, P.O. Box 5344, Weltevredenpark , 1725.

EAST RAND RADIO BRANCH TO HOST OCTOBER RAE COURSE

The East Rand Radio Branch will again offer a course leading to the Radio Amateur's Examination to be held in October 2012

The classes will start on 17 July 2012 at 18:00 (which will also be the registration) and every Tuesday evening there after and will be taking place at the clubhouse in Plantation road in Springs behind the Civic Centre

For any further info please don't hesitate to contact Judy, ZS6JDY, 079 730 2030 or email zs6jdy@vodamail.co.za.

COMPETITION NEWS

SARL TOPBAND QSO PARTY RESULTS

7 logs were received. There were about 56 stations on the air during the 4 days of the contest. More statistics and the full results will be published in HF Happenings.

Results are: 1st - Lukas Holtzhausen - ZS6LH - 232 points 2nd - Phillip van Tonder - ZS6PVT - 155 points 3rd - Johan van Zijl - ZS4DZ - 153 points

Congratulations to Lukas and the runners up.

Thanks to all who submitted their logs.

HF PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the week's expected solar activity will be at moderate levels. Behemoth sunspot AR1520 unleased an X-class flare on July 12th. The sunspot still harbours enough energy for another X-class explosion.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 119.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. 10 m openings will be more frequent due to the higher solar activity.

Please visit www.spaceweather.co.za for further information

DIARY OF EVENTS 15 July - IARU HF Winter Championship closes today at 12:00 UTC. 21July - Do pre-booking for the Radio Technology in Action Symposium next Saturday in Durban till Thursday 19 July. Request program from rta@sarl.org.za. 21 July - SARL QRP Winter competition on the air from 12:00 to 15:00 UTC on Saturday. 22 July - The Boland Amateur Radio Club 40 metre sprint phone contest from 15:00 - 18:00 CAT.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by Dick, ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Johan ZS4SS, and edited by George Honiball, ZS6NE.

Thank you for listening. 73. /EX

Lifelong Passion for Ham Radio Still Burns at 92:

Posted: 13 Jul 2012 05:00 PM PDT
http://www.eham.net/articles/28631

For the Depression-era farm boy fascinated with science, research was relegated to pondering the occasional lightning strike or puddles dappled with tractor oil. Yet Paul Herman vowed to climb from his Pennsylvania roots to answer life's nagging questions. "I found things interesting that, it seemed to me, the other kids didn't pay attention to," he recalled. "I imagined that I might be different from other kids." The towering radio antenna outside his Clintonville home today is evidence that the 92-year-old still is different, and still is searching the airwaves for information. He's one of about 703,000 ham-radio operators nationwide, according to the Connecticut-based National Association for Amateur Radio. "There are more operators in the country than ever before," said association spokesman Allen Pitts. "And it is growing." Those aren't Facebook numbers, but they're evidence that one of the oldest forms of electronic communication isn't ready to die just yet.

//
Solar Storm from Massive Flare Headed Toward Earth This Weekend:

Posted: 13 Jul 2012 05:00 PM PDT
http://www.eham.net/articles/28630

On Thursday, the sun unleashed a massive x-class solar flare that hurled a cloud of highly charged particles toward our planet at nearly 3 million miles per hour. This solar flare is expected to impact the Earth's magnetic field early on Saturday morning, according to NOAA Space Weather scientists. The impacts could last through the weekend as well, but the storm is part of the sun's normal 11-year cycle of solar activity, which is supposed to reach peak storminess in 2013, before decreasing once again. The latest update from the NOAA SWPC reads as follows: "The latest model run now indicates the CME associated with yesterday's R3 (Strong) Radio Blackout event will impact the earth's magnetic field around 9:00 a.m. EDT (1300 UTC) on Saturday, July 14. SWPC is forecasting category G1 (Minor) Geomagnetic Storm activity then, with a chance of G2 (Moderate) levels at times through July 15. The S1 (Minor) Solar Radiation Storm persists just above event threshold. Region 1520 has decayed in the past 12 hours, but is still potentially eruptive." Scientists have said this will be a minor event, but are still taking some precautions and have notified power grid

operators, airlines, and other potentially impacted parties. In the most severe cases, solar flares can disrupt power grids causing blackouts, damage satellites, and disrupt GPS signals and radio communications, although nothing that severe is expected this weekend.

//
Propagation Forecast Bulletin #28 de K7RA:

Posted: 13 Jul 2012 04:45 PM PDT
http://www.eham.net/articles/28629

Solar activity rose moderately this week. Average daily sunspot numbers were up nearly 3 points to 120.9, and average daily solar flux rose over 28 points to 166.8. There was quite a bit of geomagnetic activity, the most happening on July 9, when the mid-latitude A index reached 29, planetary A index was 30, and Alaska's college A index was 60. That day I stopped in to visit K7SS on my way back from a trip to Oregon, and a check of the bands showed HF conditions were quite difficult.

RAC Bulletin 2012-037E - Deputy Director Appointed for the Midwest Region
2012-07-14

Radio Amateurs of Canada Midwest Region Director, Derek Hay, VE4HAY,
is pleased to appoint Allan Grant, VA4AJG, as Deputy Director for the
Region.

The Midwest regional includes all the VE4 and VE5 call sign area of
Manitoba and Saskatchewan. Each Director of RAC is authorized to
appoint one Deputy Director from among RAC members residing in their
region to serve at the pleasure of the Director. Deputy Directors may
attend all RAC Board meetings and teleconferences as observers at
their own expense. In the event that a Director is unable to attend a
Board meeting, that Director may authorize his or her Deputy Director
to attend and vote the Director's proxy on any matter before the Board.

Allan Grant, VA4AJG, has been a certified Amateur Radio operator for
only a short time having obtained his certificate of proficiency in
November 2011, but he has stepped forward with great enthusiasm.
Allan's background is in the Information Technology area and, in
particular, Voice Over Internet Protocol (VOIP) communications for the
last eight years.

Did hams contribute to invention of the WWW?

Posted: 14 Jul 2012 10:44 AM PDT
http://forums.qrz.com/showthread.php?353973-Did-hams-contribute-to-invention-of-the-WWW&goto=newpost

Dear all,

I'm a journalist for public radio (NPR/BBC, etc.). I'm looking for clues
on the role that hams played in the invention of the world wide web?
Digital protocol, infrastructure design, etc. If you know of living hams
who were involved in the invention of "packet" protocol or anything else
that led to the launch of the WWW, I'd like to hear from you! Ryan [dot] W
[dot] Noyes [at] gmail.com.

Thanks for your time. I look forward to hearing from you. DEADLINE is
early August, 2012.

My best,

Ryan

ps: ARRL public affairs is assisting as well.

Special event 7T50I * 50th anniversary of the Algerian independence *

Posted: 14 Jul 2012 06:11 PM PDT
http://forums.qrz.com/showthread.php?354013-Special-event-7T50I-*-50th-anniversary-of-the-Algerian-independence-*&goto=newpost

50th anniversary of the Algerian independence

QSL 7T50I.jpg

Rules of the contest

For the first time:

For the first time, Algerian 7T prefix will be used by Algerian radio hams. Definition:

The contest for the 50th anniversary of the independence of Algeria is an outstanding manifestation of ARA the Algerian radio society.

To obtain the Diploma you must total 50 points.

Goal:

Allow OM's and SWL's from Algeria and outside to obtain a diploma and a special QSL card for the event.

Objective:

To inform the world about that particular event.

Participation:

All Amateur radio, radio clubs and SWL can participate in the contest on all modes and all HF bands allowed.

Dates and times:

From July 05 2012 at 00:00 pm UTC to December 31, 2012 at 00:00 pm UTC.

Valid Contacts:

The same station can be contacted once per band. Correspondents must exchange their respective reports.

Points:

-Official Station (R.C Algiers) 7T50I = 10 points.

-Radio Club Station from East and South East area (RC Bou-Saada)
7W50I= 05 points.

-Radio Club Station from the south zone (RC Laghouat) 7V50I and
7U50I=05 points.

-Radio Club Station from the West and South West area (RC Mostaganem)
7Y50I= 05 points.

-Ordinary 7X stations: 03 points.

Participation Fees:

The cost of the diploma is 10 U.S. Dollars or 05 Euros. (Costs of
printing and delivering)

Penalties:

-QSO with a nonexistent 7X call sign.

-Absence of the QSO on the 7X logs.

-For an incomplete call sign the contact will be cancelled.

Getting the diploma:

The station that has obtained 50 points can ask for a diploma.

Conditions of participation:

By entering this competition, the competitor agrees to respect its
rules, the common rules and the courtesy in use between ham radio
operators.

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, CONWAY REEF (Update). Members of the World-Wide DX Group will be active as 3D2C from Conway Reef between September 24th and October 5th. Their primary objective is to provide as many DXers as possible with a "new one" with this rare DXCC entity and, as a secondary objective, to give as many band-slots as possible. They would like to focus on European contacts which is the most difficult area to work especially during those periods when propagation is possible, so they ask that JA and North America to stand-buy during those periods. Activity will be on 160-2 meters using CW, SSB, RTTY, SSTV and PSK31. See OPDX.1045 for suggested frequencies. Currently, the Multi-national team consists of 15 operators: Hrane/YT1AD (Leader), Alex/UA4HOX (Co-Leader), Paul/N6PSE (PR & Co-Leader), Dave/AH6HY, David/WD5COV, Vasily/RW4NW, Alan/K6SRZ (Team Physician), Alan/AD6E, Sergej/RZ3FW, Craig/K9CT, Stanislav/LZ1CG, George/N6NKT, Alexander/RW3RN, Peter/PY5CC and Mike/K6MKF. QSL Manager is YT1AD. There will be an OQRS available for direct and Bureau QSL cards. They expect to upload their logs to ClubLog on a daily basis. PLEASE NOTE: They are seeking support from Foundations, Clubs and individuals for this DXpedition. Details are available at:
http://www.yt1ad.info/3d2c/donors.html
For more details and updates, visit the 3D2C Web page at:
http://www.yt1ad.info/3d2c/index.html

CQ73, PORTUGAL. Operators Jos&#65533;/CT1EHX, T&#65533;-Z&#65533;/CT1GFK, Gon&#65533;alo (AL)/CT1GPQ,
Miguel (Mike)/CT1IUA, Anderson/CT2IUK, Lili/CT2KAL and Pedro/CR7ABW, will be active as CQ73I (Charlie Quebec Seven Three India) between July 16-22th. Activity is to commemorate the 31st International Motorbike Faro. Look for operations on 80/40/30/20/17/15/12/10/6 meters using CW, SSB, and RTTY. QSL via CT1EHX.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
9X0PY &#65533; Rwanda; Operation for: December 24, 2011 through January 7, 2012
S21YD &#65533; Bangladesh; Operations for: 1994, 1995, 1998, and 1999

If you've had any of these operations rejected please send an E-mail to bmoore@arrl.org to be put on the list for an update. (When responding please include the Reference number on your credit slip to help expedite retrieval. (This number can be found in the upper right hand portion)). PLEASE Note. Bill states,"Due to heavy E-mail, I may not be able to reply all messages. Please see your LoTW account to confirm the update or, check your numbers on the daily listing at:
http://www.arrl.org/dxcc-standings "

DXPEDITION VIDEOS OF THE WEEK. With more and more DXpeditions putting their videos on YouTube and other Web services, we decided to list them (possibly) each week. For this week's listings:

2011 - MU/PA9M Guernsey: http://www.youtube.com/watch?v=qNOwB7xZg
2011 - 4W6A Atauro Island (Timor Leste) DXpedition:
http://www.youtube.com/watch?v=C8o__1x7o
http://www.youtube.com/watch?v=IHDCZiwG8
http://www.youtube.com/watch?v=7mtztXsuY
http://www.youtube.com/watch?v=hlX1rwA1k
2009 - K5N Dxpediiton to Rare Grid EL58:
http://www.youtube.com/watch?v=gdlAZXPfc (Part 1)
http://www.youtube.com/watch?v=At6RrQEjc (Part 2)
http://www.youtube.com/watch?vRv2qgzH9Nw (Part 3)

If you have a DXpedition 'video' available on the Web and would like to have it listed in the OPDX, PLEASE send the URL to use and we will publish it.

HC, ECUADOR. Dr. Rick, NE8Z/HC1MD, will once again be active from here between July 21-31st. He plans to activate the following areas with the following callsigns:
HC1MD - Cumbaya (CW + RTTY) HC1MD/HC3 - Loja (CW)
HC1MD/HC1 - Mt. Cayambe (CW) HC1MD/HC5 - Cuenca (CW)
Activity will be on 40-10 meters operating CW, SSB and RTTY, using a TS-50s/AT-50 with a Carolina Windom (40-10m) antenna from Cumbaya. From all other areas he will operate portable using a OutBacker (40-10m) antenna. QSL via K8LJG. View the HC/Ecuador and HC8/Galapagos DX-Diplomas at: http://webpages.charter.net/ne8z

IOTA NEWS.....
AS-137. Members of the Shanghai DX Club will be active as BY4DX/5 from Shengsi Island between July 27-29th. Activity will include an entry in the RSGB IOTA Contest (July 28-29th). Operators mentioned are Xuhui/BD4CQ, Zhang/BD4DYH, Ming/BD4FM, Tony/BG4GMA, Siqing/BG4HRM, Colin/BH4ACQ and Feng/ON6WFO. QSL via BD4HF, by the Bureau or direct.

AS-147. Taka, JA8COE, will once again be active as homecall/8 from Yagishiri Island (WFF JAFF-034 WLOTA 2512) between July 27-29th. Activity will include the RSGB IOTA Contest (July 28-29th). QSL via his home callsign, direct or by the Bureau.

AS-190. (New IOTA) A team of Saudi operators will activate Al-Dhahrah Island as 7Z7AB possibly between October 1-15th. Operators mentioned are Abdul/7Z1CQ, Suli/7Z1SJ, Abdullah/HZ1AR, Bader/HZ1BF, Abdullah/HZ1BW, Abdul/HZ1DG, Firas/HZ1FS, Hani/HZ1HN, Mohamad/HZ1MD and Nhaw/HZ1TL. More details and a Web page will be forthcoming. See their logo on QRZ.com.

EU-034. Operators Andres/ES1AN, Harald/ES1LS, Arvo/ES1QV, Toivo/ES2DJ, Juri/ES2EZ, Toivo/ES2RR and Mati/ES2QN will be active as ES0U from Saaremaa Island, Estonia, during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/Low-Power entry. QSL via ES2DJ or by the Bureau.

EU-045. Alessio, IZ0UIM, will be once again active as IB0/IZ0IUM from Ventotene Island (IIA LT-011) between July 18-22nd. He will also possibly be active from Santo Stefano Island (also EU-045, IIA LT-010) during his time there. Activity will be on 80-10 meters SSB only using a FT-1000 w/100 watts into a multi-band dipole. QSL via direct, LoTW or eQSL. Alessio will also upload his log to ClubLog during his DXpedition.

EU-066. Victor, UA1OEJ, will be active as UA1OEJ/P from Solovetsky Islands between July 22-31th. Activity will be on the HF bands using SSB and the Digital modes. QSL via his home callsign.

EU-083. Look for 19 members of the ARI La Spezia, lead by Jul/I1SAF, to be active as IP1T from Isola del Tino (IFF IFF-218, IIA SP-002, MIA MI-114, ITA ITA-058, WLOTA 0645) during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/1-Stn/Low-Power entry. Opertaors mentioned are I1SAF, I1ANP, I1HBY, IZ1CLA, IZ1BZV, IZ1JOE, IZ1MHY, IZ1MHX, IW1PDP, IZ1NES, IZ1OSS, IZ1ELP, IK8XVA, IZ1JUP, IZ1REW, IZ1RWC, IZ1MHL, IZ1TRG, IZ1MHQ and IZ5JLF (ex- IZ1JLF). Activity will be on 80-10 meters using low power, with antennas: Windom (80-10m) and a vertical 1/4 wave on 40 meters. QSL via IZ5JLF, direct or by the Bureau (preferred).

EU-093. Spanish operators from the Asociaci&#65533;n Cultural Radioaficionados Costa Blanca, URE Dos Hermanas and Adriatic DX Team will be active as ED5K from Tabarca Island (ARLHS SPA-136, DIE E-006) during the RSGB IOTA Contest (July 28-29th). Outside the contest operators will use ED5RKB. Activity will be on 160-2 meters using CW, SSB, RTTY and PSK31 with three stations on the air. During the contest operators will be on the air on the non-contest bands. Operators menitoned are Juanjo/EA1EN, Israel/EA1HVY, Juan Carlos/EA2RC, Antonio/EA2VE, Tony/EA5CRC, Fernando/EA5FX, Juan/EA5FHK, Tony/EA5HJO, Eugene/EA5HPX/UT2XD, Ivan/EA5IDH, Javi/EA5KM, Paco/EA7HHV, Antonio/EA7IQM, Luis-Enrique/EB5ESV, Mario/EB5BXK, Manolo/EB7ABJ, Alfonso/EC7AKV, Antonio/EC7JA, and for Logistics Josemi/EA5EEO. QSL via EA5RKB, direct or by the Bureau. Vist their Web page at: http://acracb.org/tabarca

EU-136. Jozef, OM5AW, will be active as 9A/OM5AW from Krk Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/All-Band/ SSB-Mode/Assisted/Low-Power/12HRS entry. QSL via OM2FY.

EU-144. Members of the Italian Sezione ARI of Cosenza will be active as ID8/IQ8CS from Dino Island (IIA CS-002) during the upcoming RSGB IOTA Contest (July 28-29th) as a Multi-Op entry. Operators mentioned are Franco/IK8FKP, Francesco/IZ8EQF, Massimo/IZ8JBO, Costantino/IZ8EPX, Antonio/IK8UHA, Marco/IW8RMN, Antonio/ IW8PPZ, Emilio/I8SUE, Massimiliano/IZ8EPY, Pietro/IZ8FWN, Antonio/IW8ROL, Peppe/IZ8EBI, Renato/IZ8JCV, Pasquale/ IZ8IYX,

Francesco/IZ8JFA, Gianluigi/IZ8EWB and Rocco/IK8ERL. QSL via the Bureau. Visit the club's Web page at: http://www.aricosenza.it

EU-146. Operators Louis/PA0LCE, Arsene/ON4FE, Lieven/ON4PQ, Kurt/ON5UT, Joel/ON6JM, Eddy/ON7PO, Pat/ON7PQ and Walter/ON8LW will be active as PF4C from Schouwen Duiveland, Netherlands, during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/All-Band/ Low-Power/Mixed-Mode entry. QSL via ON4ON.

EU-172. Joergen, OZ0J, will be active as 5Q2T from Fyn Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/All-Band/ 24-Hrs/Mixed-Mode entry. QSL via OZ0J.

EU-179. Members of the Beer Lovers International Radio Club, the Dnepropetrovsk Radio Club and Tavria Radio Club will be active from the Kalanchakskiye Islands between July 24-30th. The group plans to operate on CW, SSB and RTTY, and use the callsign UT7E/p during the RSGB IOTA Contest (July 28-29th). QSL UT7E/p via UT7EZZ, and all others via their home callsigns.

NA-128. Operators Robin/VE2DRO, Claude/VE2ZOS, Rock/VE2TCQ and Jean-Pierre/VA2SG will be active as VE2DRO from Coudres Island during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/ Mixed-Mode entry. Activity will be on 40/20/15/10 meters using CW and SSB. QSL via VE2DRO (SASE). Look for them on APRS: VE2DRO-7 and VA2SG-7.

OC-130. Bodo, DF8DX, will be active as DU8/DF8DX from Mindanao Island (WLOTA 2803) between July 26th and August 10th. Activity will also include an entry in the RSGB IOTA Contest (July 28-29th). If time permits, Bodo will activate other IOTAs in DU after the contest. QSL via DF8DX, direct or by the Bureau. Log will be uploaded to LoTW.

OC-150. Members of the Organisasi Amatir Radio Indonesia (ORARI) will be active as YB9IOTA from Gili Trawangan Island in the Nusa Tenggara Barat Province during the RSGB IOTA Contest (July 28-29th) as a Multi-Op entry. Operators mentioned are Bimbo/ YB3MM, Joppy/YB8XM, Kadek/YB9BU, Tjok/YB9BZ, Adi/YB9GV, Kardi/ YB9KA, Adhianto/YC0OIL, Santika/YC9HIU and Ferdiy/YC9MKF. QSL via YB9BU direct only.

SA-037. POSTPONED! Members of the Grupo DX Caracas, who were expected to activate La Blanquilla Island between July 11-16th, this past week, have announced that their operation was postponed until August (dates to be announced). There was no reason given for postponement.

J6, ST. LUCIA. Bill, K9HZ, will once again be active as J68HZ from his villa at Labrelotte Bay, Castries, St. Lucia (NA-108, WLOTA L-1336) between August 1-18th. Activity is usually on 80/40/20 meters using CW and SSB. Suggested frequencies are:

CW - 3550, 7050 and 14050 kHz
SSB - 3770, 7155 and 14155 kHz
He also suggests to watch 40 or 20 meters between 1600-2400z daily. Bill will also be using his K3 radio and YP3 portable beam for the trip! QSL via his home callsign. ADDED NOTE: Bill, states, "I just counted up my QSL cards and found I am 5 states short of a WAS. I've probably worked them all but just don't have cards. I'll be looking for the following states for confirmed QSL cards next trip: Alaska, Nevada, North Dakota, South Carolina, and Vermont. If you have contacted me from one of these states previously, please remember to QSL. THANKS!"

N2, UNITED STATES (LH Op). The Old Barney ARC will be operating from the Barnegat Lighthouse (Old Barney) (ARLHS Lighthouse # USA-039) on August 4th (rain date August 5th) from about 1300-2100z. Other reference numbers are IOTA NA-111 (Long Beach Island, NJ) and USI NJ-001S. Operation will be mostly 20 and 40 meters SSB. QSL via N2OB.

NQ2, UNITED STATES. Jaime, WP3A, will once again be active as NQ2A during the IARU HF World Championship (July 14-15th) from Brooksville, FL. He will be active from here until July 22nd. QSL via NP3O direct or by the LoTW.

OFFICERS FOR 2012-2013. On Monday, April 2nd (ed. I know it is a little late... Old age is setting in [the mind] and I'm a busy guy!), the members of Northern Ohio DX Association (NODXA) re-elected and elected (*) the following to serve as officers between May 2012 and April 2013:
President: Tedd Mirgliotta, KB8NW
Vice President: Dwaine Modock, K8ME
Secretary (*): Glenn Williams, AF8C
Treasurer: Mary Michaelis, N8DMM
Newsletter Editor: David Autry, WD8IOU
For more information about NODXA, check out the club's Web site at:
http://www.nodxa.org
Also, as of July 6th, NODXA is now on FaceBook (TNX to Brain, K3USC) at:
http://www.facebook.com/NorthernOhioDxAssociation

9K CALLSIGNS ON CLUGLOG'S OQRS. Hamad, 9K2HN, informs that he has enabled the OQRS service on Clublog.org for the following callsigns he manages: 9K0A, 9K2F (AS-118), 9K2HN/P (AS-118), 9K2USA, 9K47NLD, 9K5HN and 9K9X. He also mentioned, "I will not be adding my own call to the above list because I still enjoy collecting qsl cards."

MALPELO UPDATE. QSL Manager Bob, N2OO, reports, "if you worked HK1MW, HK1N, HK1T or HK6F in January 2012, then you really worked MALPELO. These four men were the advance team setting up the gear for the HK0NA DXpedition. During that time, they operated using their home calls without using a portable identifier. These QSOs count for Malpelo! Special photo QSLs have been printed and are now available via N2OO. Go to <http://df3cb.com/oqrs/n2oo/> for OQRS (direct and bureau) or <www.qsl.net/n2oo/history/qsl-n2oo.htm> for direct mail information, etc."

QSL RECEIVED VIA LoTW: 1A0C, 4Z5MU, 9A2UZ, 9M2TO, 9M0L, AB1JM, AE5P, BD5WW, CR6K, CT1HFS, DL0CS, E75MC, ED5WW, EI9KC, G3OFA, GI4DOH, GM0OAA, K6RV, KH2L, KM0O, KP4ED, LX1AX, MJ0ASP, N4KG, N4NX, N6NH, RI1ANF, RU6AT, TX1B, UA2FR, UR3IFD, UW2M, UX1VT, UZ0U, VY0/AH6EZ, W2SE, WB4DCM and WS7V

QSLS RECEIVED VIA MAIL: 3C6A, 6O0CW, 9L0W, A52AB, A35YZ, AH8A, C31VM, D44BS, E51EWP, E51M, FO5QB, FY5PO, GW4UDG/P, GW0VSW, KW6GM, LX1NO, LY2PX, RI1ANF, SU9VB, SV2ASP/A, TO3X, VK2KM and WP3DZ

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

P29, PAPUA NEW GUINEA. Drew, K9QV, is now currently active as P29VAC from Port Moresby. However, Drew informed OPDX on Friday that he may

be in PNG for only a few more days (specific date was given). He also states, "I have been checking into the Southern Cross DX net on 14.238.5 MHz at 1030z when I am able. Operations have mainly been on 20m. Common modes are SSB, CW, JT-65." According to QRZ.com, he is using a KX3 w/10 watts into a Buddistick vertical. QSL via K9QV, direct or eQSL.

P4, ARUB. "The Daily DX" reports that Jack/W6NF and his XYL Shelley/ K7MKL will be on holiday in Aruba at the P49Y rental station between August 15-21st, and be active as P40NF and P40S, respectively. Shelley plans to be in the SARTG RTTY Contest. Outside of the contest, both operators will be casually active. Jack will be mostly on 20/15/10 meters CW, and possibly 6 meters if they find an antenna. Listen to operator's instructions for QSL info.

P5, NORTH KOREA (Update). If you missed the special bulletin (OPDX.1069.1) on Rick, K6VVA, explaining/addressing "some of the assumptions, specu- lations and inaccurate" which is being passed/posted around on various places, go to: http://www.papays.com/opdx1069.1.html
The letter is also available in PDF format at:
http://www.k6vva.com/p5/p5infoupdates.html

R1, EUROPEAN RUSSIA. Members of the AFARU (Armed Forces Amateur Radio Union) will be active as R100WWS from any areas of Russia between August 10-18th. Activity is to celebrate the 100th anniversary of the Military Air Forces of Russia (formed on August 12, 1912). Operations will be on all bands and modes. QSL via RV3YR.

T6, AFGHANISTAN. Croatian operators and members of the Croatian unit of the ISAF, Maj/9A7TJ and Vlado/9A3QM, will be active as T6TJ and T6VT, respectively, situated in camp Marmal in Mazar e Sharif City (Balkh province), until the end of September. Emir, 9A6AA, informs OPDX that he helped obtain their licenses through the Chief ISAF Spectrum Manage- ment Bureau of ISAF Headquarters which took several months to obtain and received on July 11th. Activity will be holiday style (but they are not on holiday) with operation mainly on SSB and the Digital modes. Maj, T6TJ, will operate mainly on the Digital mode using a FT2000, and Vlado, T6VT, will operate mainly SSB with a FT-857. They will be using wire antennas. QSL both operators via 9A6AA. For more updated info, pictures and logs see: http://www.inet.hr/9a6aa

T8, PALAU. Shuji, JA1FMN, will be active as T88FK from Babeldaob Island (OC-009) between July 17-19th. Activity will be on the HF bands and 6 meters using SSB, FM and PSK31. Operations will be mainly on 17 meters and on 15 meters (PSK31 and SSB). If propagation is good, look for operations on 6 meters SSB and 10 meters FM. QSL via his home callsign, by the Bureau or direct to: Shuji Yamanishi, 72-83-203 Toyoshiki Kashiwa- city, Chiba 277-0863 Japan.

TX0, AUSTRAL ISLANDS (IOTA Op). Philippe, FO4BM, will be active as TX0HF from the following French Polynesia IOTAs which count for the Austral Islands for DXCC:
OC-152 • Tubuai Island; Now through July 21st

OC-050 - Rurutu Island; July 21-23rd
Activity will probably be on 20/15/10/6 meters SSB. QSL via F4FJH.

V8, BRUNEI (Update to OPDX.1064). Members of the Gemilang Amamteur Radio Club (GEMILANG Radio) and the Mediterraneo DX Club will team-up and sponsor/plan another DXpedition, this time to Brunei (OC-088). The multi-national team (90% of the team operated during the 9N7MD DXpedition) will be active as V84SMD between November 11-23rd. Activity will be on 160-10 meters, including the 30/17/12 meter bands, using CW, SSB and RTTY. They plan to have 15 to 18 operators with 4 to 5 stations on the air 24 hours. The group has now activated a survey on band/mode needs on their Web page at: http://www.mdxc.org/v84smd/brunei-survey
QSL via IK2VUC, direct, by the Bureau or the OQRS. Logs will be uploaded to LoTW 4-5 months after the activity. The V84SMD Web page is now online at: http://www.mdxc.org/v84smd

VK9L, LORD HOWE ISLAND. Operators Seppo/OH1VR and Henri/OH3JR will be active as VK9/homecall from Lord Howe Island (OC-004) between November 17-27th. Activity will be on 160-6 meters using CW, SSB and RTTY. Also, they will both participate in the CQWW DX CW Contest (November 24-25th) as two Single-Op/Single-Band (bands not provide) entry. QSL via their home callsigns ONLY direct (SAE + IRC or 2 USDs).

VP9, BERMUDA. Kyle, WA4PGN, informs OPDX that he will be on his honeymoon with his wife Pam on Bermuda (NA-005) between July 13-22nd. He states, "I will operate as time permits during the IARU HF Championships (July 14-15th), CQWW VHF Contest (July 21-22th) and the North American RTTY QSO Party (July 21-22nd). Especially looking for contacts on 6 meters." QSL VP9/WA4PGM direct to his home callsign with SASE or SAE and return postage. QSL VP9I (DX club callsign) to N1HRA. See: http://vp9ge.com/vp9i.htm

WEB PAGE ACTIVATED. Natig, 4J5T, informs OPDX readers that the members of the "Safari" DX-activators club have activated the following Web page to get you familiar with their expeditions, on-air activities, to learn some special issues linked to opportunity for DXing in Azerbaijan. Please visit and comment on their Web page at: http://safari.16mb.com/wordpress

XE, MEXICO (Grids On The Birds). David, XE3DX, will be a on a family vacation between July 16-20th, but plans to activate some grid squares on SO-50 and AO-27 only. He will be active on most of the day passes, and plans to operate from EK48, EK49, EK69, EL50, EL51, EL61 and EL60, in the Campeche, Yucatan and Quintana Roo States. He will return home between July 30th-August 4th. QSL direct or by LoTW (preferred).

ZL9, CAMPBELL ISLAND (Update). Members of the Hellenic Amateur Radio Association of Australia announced that they have received a landing permit from the NZ Dept. of Conservation for ZL9HR Campbell Island (OC-037) DXpedition in November. The dates are now offical and the operation will take place between November 28th and December 9th, 2012. The ZL9 Campbell Island (NZ) is Number 15 on the current DXCC most wanted list. The ZL9HR DXpedition team is Tommy/VK2IR (Team Leader), John/VK3YP

(Co-Leader), Les/W2LK, Gene/K5GS, Dave/K3EL, Glenn/KE4KY, Jacques/ZL3CW,
Pista/HA5AO, Don/VE7DS and John/9M6XRO. The official Web site is at:
http://www.zl9hr.com

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 15th July 2012

Terry Stevens G8DKS - SK

It has been announced that the RSGB VHF Manager Terry Stevens G8DKS died suddenly on Sunday, July 8th. Only 2 weeks ago Terry was representing the Society at meetings in Friedrichshafen. We extend our sincerest sympathy to his family and friends. May he rest in peace.

This year Dublin Bus celebrates its 25th Birthday.

To celebrate the event a Special Event Station EI25DB will be aired between 1st July 2012 and 30th June 2013. The station will be operated by current and former employees of Dublin Bus led by Declan EI9HQ and Pete EI4GZB. QSLs to Declan EI9HQ or on LOTW or HamLog.eu

---

Volvo Ocean Race (EI12VOR)

Galway Radio Experimenters Club have just completed a successful week long series of activities in conjunction with the finale of the Round the World Volvo Ocean Race. Portable activites were carried out from the Scout Camp located at South Park, Claddagh, which was part of the overall site. During the week scouts were introduced to the wonders of the hobby. Short talks and demonstrations were given on topics which included, propagation, conctruction, communications methods, morse code, as well as other aspects of the hobby. Scouts showed a great interest in all aspects of the hobby and were very pleased to have any questions answered in a very down to earth and practical manner. Indeed the speed that some took to learning morse was a joy to behold. Scouts from the Galway region as well as all over the country were in attendance and listed their visit to the "The Shack" as one of the most enjoyable. And so popular was the experience that we had several who made repeat visits. Many thanks to the many visiting amateurs who visited us on site.

Joyce Country Challenge

Saturday the 21st of July sees GREC providing AREN assistance to the Joyce Country Challenge, a mountain walk held in the Finney region of South Mayo/ North Galway area. The walk is over a mountainous region, and requires the positioning of operators in stratigec locations along the route. In the region of two hundred walkers are expected for this event.

Inishbofin

Saturday the 21st of July is rather a busy day in the calendar of GREC as it is also the date on which we embark on our week long, annual dxpedition to the Island of Inishbofin. Keep an ear out for EJ4GRC over the week. As usual all bands and many modes will be operated.

North Cork Radio Club

After a fun day in the Mountains, North Cork Radio Group is now gearing up for their August events, and this month is going to be a top month for activations by NCRG. No less than 3 field days are planned, making these events no. 7, 8 and 9 for NCRG in 2012.

Wednesday 8-August: a UNIQUE activation; Spike Island on the Air - CASHOTA reference: EI019/C

Saturday 18-August: Blackrock Castle Observatory -CASHOTA reference: EI009/C

Sunday 19-August: Roches Point Lighthouse - ILLW reference: EI0010

Events are always free to attend, and we welcome all visitors at Blackrock Castle and Roches Point Lighthouse. If anyone would like to come along, work our station and join the fun... let us know!! We hope to see you or work you from those exciting locations!

The Spike Island activation, although still free, is confined to NCRG members only - this due to restrictions of the location, but we really hope to work you from "Irelands Alcatraz"!

Bushvalley Amateur Radio Club

Bushvalley Amateur Radio Club from Dervock, Co. Antrim, will be running a Special Event Station on Saturday 21st July 2012 in conjunction with the Kennedy Kane McArthur Marathon celebrations. The call sign used will be GB0KKM. Dervcock-born Ken McArthur was the winner of the Marathon at the 1912 Olympics in Stockholm; more details on Kennedy Kane McArthur can be found at www.bit.ly/LRrK3T

DX News

Peter ON8ZZ and his two sons ON3NT and ON3JA will be on the Channel Islands from 16 - 26 July. They will operate from Guernsey as MU/OT9Z

until 20 July with side-trips to Sark on 17 July, Alderney on 18 July and Herm on 19 July. This will be followed by an operation from Jersey from 20 - 26 July using MJ/OT9Z. Finally they will travel to the French Island of Chausey, IOTA EU-039, where they will sign F/OT9Z. While on Chausey they will team up with the TM7T group to take part in the IOTA Contest on 28/29 July.

Bob W5UQ and Bill W5SJ will be QRV from the Caribbean island of Montserrat as VP2MUQ and VP2MSJ respectively from 17 - 24 July. They will focus on 30, 17 and 12m mainly CW. QSLs for both stations go via W5JAY.

Miquelon Island IOTA NA-032 will be activated by Yuri VE3DZ and Victor VA2WDQ from 20 - 31 July. They will use the calls FP/VE3DZ and FP/VA2WDQ. During the IOTA Contest they will operate as TO2U.

As part of the 50th Anniversary of Independence celebrations in Algeria several special stations are active until the end of this year. Prefix hunters will have the opportunity to work 7U50I, 7V50I, 7W50I and 7Y50I. Details of a special award in connection with this event can be found on QRZ.COM

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Hams: We're Good in a Disaster -- UK Radio Society Boss:

Posted: 14 Jul 2012 05:12 PM PDT
http://www.eham.net/articles/28632

Bearded radio fans also NASA's go-to guys for controlling Mars rovers: They look unassuming, but these quiet types murmuring strings of numbers and letters into their transceivers are manning back-up comms for the world, the communication system most likely to survive an apocalyptic event. These are the people who maintain the kit we fall back on when masts jam, cables break and global comms fail. "In disasters they rely on us," said Carlos Eavis of the National Radio Society, at the opening of the National Radio centre yesterday. "In 9/11, all the mobile masts were on the Twin Towers, but the radio signals still worked. "When the tsunami struck we were the first people to be able to report it and to get information in and out. We can provide the back-up and support in an emergency, because amateur radio requires no infrastructure." Amateur radio fans are also the people NASA turn to when they want to work out how to remotely control a truck on Mars, or need help picking up signals that are outside of NASA's Deep Space Network. NASA use amateur radio as a one-stop shop for research for questions like how to work out remote control [for] a vehicle on Venus or connect to such-and-such a satellite. Because of the breadth of knowledge and understanding of the spectrum, we can answer questions like that. Amateur radio types can also chat to the astronauts, as there's a ham radio centre on the International Space Station. Closer to home, UK emergency services have asked Raynet, which organises and trains radio amateurs, to provide emergency radio connectivity when satellite, mobile and fixed line comms fail.

GB2RS NEWS

Sunday 15th July 2012

The news headlines:

* Government Minister opens RSGB National Radio Centre

* Terry Stevens, G8DKS, Silent Key

* Optical Morse code in space

On Wednesday 11 July, Ed Vaizey, Minister for Culture, Communications and the Creative Industries at the Department of Culture, Media and Sport officially opened the National Radio Centre at Bletchley Park, Milton Keynes. After a tour of the new building and unveiling a plaque in the entrance, Ed Vaizey, MP said, "The National Radio Centre will do an enormous amount to spread the knowledge about the history of radio and its continuing importance in the 21st century." Joining the RSGB to celebrate the opening of the NRC were many high profile visitors, including Ole Garpestad, LA2RR, Vice-President of the IARU and Dave Sumner, K1ZZ, CEO & Secretary of the ARRL. Many of the NRC's valued sponsors were represented, as were those who work hard to demonstrate and showcase the NRC to the public. The National Radio Centre is open Thursdays, Saturdays and Sundays from 11am to 4.30pm. More details, and photographs of the event, can be found on the website, www.nationalradiocentre.com.

It is with great sadness that the RSGB has learned of the death of Terry Stevens, G8DKS, RSGB VHF Manager. Only two weeks ago Terry was representing the Society at meetings in Friedrichshafen. Our thoughts are with his family at this time. Meanwhile, David Butler, G4ASR has offered to step into the role until a permanent VHF Manager can be appointed.

The amateur radio CubeSat FITSAT-1 will carry an optical communications experiment that aims to write Morse Code across the night sky using high intensity LEDs. It launches to the ISS on 21 July, from where it will be deployed in September. For more information see www.uk.amsat.org/2037.

Guernsey RAYNET group is taking part in the Worked All Britain event following the Olympic torch using GP7WAB today, Sunday 15 July. Planned operation will be from 0800 until 2255UTC on all HF bands plus 6m, 2m and 70cm as conditions allow. As Jersey ARS are also taking part on the same day, it's expected that many beams will be pointing south and the

groups are hoping for better band conditions than of late. Further details from Tom, 2U0TKB on 07781 405083.

Several operations have been approved for DXCC credit. These include the 2012 operations 3C0E from Annobon, 3C6A from Equatorial Guinea, 5X1RO from Uganda and XW4XR from Laos. Also approved are the 2011 J25DXA and 2010 J28RO operations from Djibouti. If you've had any of these operations rejected in a recent DXCC submission, please send an email to bmoore@arrl.org to be put on the list for an update.

UK amateurs may be interested to learn that there have been changes to the UK card checkers for the ARRL DXCC Award. Ian, G0KRL has retired as the G postal checker after 12 years. A huge vote of thanks is owed to Ian for his sterling service. He remains on the field checkers list for any local customers. G5LP is taking over as the G postal checker and his contact details are on the RSGB website. There is no change for the other UK areas; GM3YTS is still the postal checker. 160m contacts and deleted entities may now be Field checked. For the 160m cards the checker must be on the 160m DXCC list. In the UK, G5LP, G4BWP, GM3YTS are qualified to check 160m cards. DXCC has introduced an online application form and its use is requested by anyone who has access to it. Any questions may be sent to G4BWP via email to fredch@homeshack.freeserve.co.uk or to the postal checker by standard mail, enclosing an SAE for a reply. Check out the RSGB website at www.rsgb.org/committees/spectrumforum/details-of-hf-awards.php.

Copyright © RSGB 2012. Not for public release before Monday 16 July 2012 except as a GB2RS broadcast. And now for the details of rallies and events for the coming week

Today, 15 July, the McMichael Rally and Boot Sale takes place at Reading Rugby Club, just off the A4 east of Reading. There is free car parking and the gates open at 9.30am. Admission is £2. There will be trade stands, special interest groups and a car boot area. More details from Pete, G8FRC on 01189 695 697.

QRP in the Country takes place today, Sunday 15 July, at Upton Bridge Farm, Long Sutton, Langport, Somerset TA10 9NJ, regardless of the weather. Organiser Tim Walford says the cattle sheds have been cleaned and it will be indoors if the weather stays bad. The farm gate opens at 10am. Don't forget to bring your entries for the Ten Part Receiver Challenge, he adds.

There are no details of rallies taking place next weekend. On 29 July, the Horncastle Summer Rally and the Blind Veterans UK Radio and Computer Rally are scheduled to take place.

Now for the news of special events

Riviera Amateur Radio Club will be operating a portable station from Brixham Breakwater on Thursday 19 and Friday 20 July in support of RNLI Torbay's Lifeboat Week 2012. The club callsign MX0RIV will be active on

HF and VHF. Up-to-date frequencies are on the club website, www.rivieraarc.org.uk.

The RSGB team in the IARU contest that ends today, 15 July, is using GO2HQ. This is in advance of the general validity of O prefix NoVs, which commence at 0000BST on 21 July.

F5SKW and several other French radio amateurs will be on the air throughout today, 15 July, as TM70TRS or TM70TE from the 3rd floor of the Eiffel Tower, Paris. This activity is to commemorate the 70th anniversary of the French Army Signal Corps. The operation will use CW, SSB and RTTY on the HF and VHF bands. A special QSL card will be available. QSL via the F6KHX Amateur Radio Club or F5OGL, direct or via the REF QSL Bureau.

GB2VET, celebrating the Army, Navy and Air Force Reunion's 10 anniversary, will be operational from 27 to 29 July from East Park in the city of Hull. Plans are to operate all available bands using both World War 2 and modern gear. Modes will include D-Star on VHF and UHF. There will also be a display of vintage equipment as well.

GB4GBO will be on the air celebrating the London Olympic and Paralympic Games. Operated by the Sands Contest Group at various times between 21 July and 10 September, the group hope to work many stations.

And now the DX news compiled from 425 DX News and other sources

The St Paul Island CY9M operation will be on the air from 26 July to 1 August. This rare island is located approximately 14 miles northeast of the northern tip of Cape Breton Island, Nova Scotia, Canada. QSL via M0URX.

Special event callsign 3G90AA will be in use on all bands and modes until 31 July to celebrate the 90th anniversary of the Radio Club of Chile. QSL via CE3AA.

Copyright © RSGB 2012. Not for public release before Monday 16 July 2012 except as a GB2RS broadcast. Heinz, DL4AO/P is active from Fehmarn Island, EU-128, until 20 July. He plans to operate CW, RTTY, PSK and JT65A on 30, 20, 17, 15 and 12 metres. QSL via his home callsign, the bureau is preferred.

Frank, DL1FT is active holiday style as ES0FTZ from Saaremaa Island, EU-034, until 19 July. His preferred bands are 40 and 20 metres. QSL via DL1FT, Logbook of The World and eQSL.

Now the contest news

The 2012 IARU HF World Championships takes place this weekend, 14 and 15 July, ending at 1200UTC today. The objective of this contest is to contact as many other amateurs around the world as possible, especially IARU Member Society HQ stations, using the 160, 80, 40, 20, 15 and 10 metre bands, on phone and or CW. The UK HQ station will be active and looking for as many QSOs as possible on as many HF contesting bands and

modes as possible with as many people as possible. This includes UK stations. They will be using a very special callsign for the event, GO2HQ, which should get them noticed. The exchange is signal report and ITU zone, which for the UK is 27. As in previous years, there are awards for individuals and clubs who work the UK HQ station. The rules are at www.gr2hq.com.

On 17 July the UHF UK Activity Contest takes place from 1900 to 2130UTC. Using all modes on the 1.3GHz band, the exchange is signal report, serial number and locator.

On 19 July it's the data leg of the 80m club championships running from 1900 to 2030UTC. The exchange is the usual signal report and serial number.

Sunday 22nd sees the Low Power Contest taking place. There are two power categories, 10W and 3W, and sections for fixed and portable stations. That makes four categories, and a trophy is awarded to the winner of each. Running from 0900 to 1600UTC on the 3.5 and 7MHz bands, the exchange is signal report, serial number and power.

The 70MHz Trophy Contest on Sunday 22nd is one that has increased in popularity, especially now that more countries have access to the band. Last year there was a record number of entries. Running from 1000 to 1600UTC and using all modes, the exchange is signal report, serial number, locator and postcode.

And now the solar factual data for the period from Friday the 6th to Thursday the 12th of July, compiled by Neil Clarke, G0CAS on Friday the 13th of July.

As one large sunspot group rotated out of view on the 6th, another rotated into view on the 7th. The departing region produced an X1 class solar flare on the 6th and a number of M class solar flares every day until it disappeared. The new region also produced the occasional M class solar flare and, on the 12th, an X1 solar flare. This was accompanied by a large coronal mass ejection that is heading our way. Solar flux levels increased from 158 units on the 6th to 178 by the 8th, levels then declined to 162 by the 11th. The average was 167 units. The 90 day solar flux average on the 12th was 127 units, that's six units up on last week. X-ray flux levels declined from C2.4 units on the 6th to B7 by the 12th. The average was C1.1 units. Geomagnetic activity started at unsettled levels due to a coronal hole disturbance on the 6th. The only quiet day was the 7th, with an Ap index of 8 units, but by the next day a series of coronal mass ejections arrived from the solar flare activity that occurred several days earlier. This lasted for the rest of the period. The 9th was the most disturbed day, with an Ap index of 38 units. The average was Ap 16 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 370 and 560 kilometres per second. Particle densities were moderate to high until the 11th and then declined to low until the end of the period. Bz varied between minus 9 and plus 10 nanoTeslas on the most disturbed

day, the 9th. The Bz remained negative for almost all of the 9th, and it was for this reason that the Ap figure

Copyright © RSGB 2012. Not for public release before Monday 16 July 2012 except as a GB2RS broadcast. was so high. 50MHz and 70MHz Es propagation continued on most days. Radio aurora was reported on 50 and 144MHz on several days, the best of which was the 9th, when stations in southern England reported contacts during the afternoon and early evening.

And finally the solar forecast. This week the quiet side of the Sun is expected to be rotating into view. There will however be a large sunspot group visible, which could be capable of producing the occasional M class solar flare. Solar flux levels are expected to decline and by next weekend be around the 120 mark. Geomagnetic activity is expected to be at quiet levels, however, if an Earthward directed coronal mass ejection takes place then activity would increase. MUFs during daylight hours at equal latitudes should be around 23MHz for the south and 20MHz for the north. Darkness hour lows should be about 14MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate will be around 28MHz. The optimum working frequency with a 90 per cent success rate will be about 22MHz. The best time to try this path will be between 1400 and 2200 hours. Sporadic-E is expected most days on the lower VHF bands. The chance of an opening taking place on 144MHz is now becoming less.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. Wythall Radio Club is holding club net on 145.225MHz today and next Sunday, and there's a free 'n' easy evening at the club on Tuesday. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications is holding a club net on Monday from 7pm, on 144.165 USB, vertical polarisation. On Wednesday there is a M3+M6 club net on GB3FR from 7.30pm, and on Friday there is a club net on GB3FR from 8pm. For more information contact the FELCC Information Line on 07554 362 020.

On Monday 16 July Lincoln Short-Wave Club LSWC is holding a committee meeting on Monday. On Tuesday they are taking part in the 1.3GHz UK Activity Contest from the shack and on Wednesday there's a formal meeting at the BSA Club at 20.15. There's a club net on 145.375MHz from 8pm on Thursday, and Saturday morning sees the surgery in the shack and a visit to RAF Scampton. For more information contact Pam Rose, G4STO, on 01427 788 356.

South Birmingham Radio Society is holding a committee meeting on Monday. Tuesday sees revision in case of exam re- sits, and on Friday it's shack and aerial work. Contact Don, on 01214 581 603.

On Monday 16 July Welland Valley Amateur Radio Society is holding a DF hunt in Welland Valley on Monday, then on Thursday they are taking part in the 80m CC DATA contest. On Friday the club starts operating its Olympic special event station, which will be active until 12 August. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

Now we return to the traditional listing in date order. On Monday 16 July Gloucester Amateur Radio & Electronics Society is having a newcomers night and informal evening. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 16 July Aldridge & Barr Beacon Amateur Radio Club is having a talk on the use of meters and ATUs. Details from Albert, G0KFS, on 01922 614 169.

On Tuesday 17 July Derby & District Amateur Radio Society is holding a video show. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 17 July Loughborough & District Amateur Radio Club is holding a barbecue, with members to bring their own food to cook. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 18 July Midland Amateur Radio Society is running a barbecue with other refreshments and holding training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 18 July Telford & District Amateur Radio Society is holding debriefings on NFD and the DXpedition. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 19 July Cheltenham Amateur Radio Association is having a talk on the 40m SDR project by Steve, G4HFT. Details from Derek Thom, G3NKS, on 01242 241 099.

On Friday 20 July Coventry Amateur Radio Society is holding the 3rd round of the 2m DF Trophy. Contact John, G8SEQ, on 07958 777 363.

Copyright © RSGB 2012. Not for public release before Monday 16 July 2012 except as a GB2RS broadcast.

NEWS FOR THE NORTH OF ENGLAND We start with clubs that have several events this week. Sheffield Amateur Radio Club is holding its annual fox hunt on Monday, then taking part in the RSGB 80m Data Contest on

Thursday from club station G3RCM. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

Wakefield & District Radio Society continues its Intermediate and Advanced courses from 13:30 on Monday. Thursday sees a committee meeting and on the air evening from the Club Shack. Contact Ken, G8FSO, on 07900 563 117.

On Wednesday 18 July Hornsea Amateur Radio Club is holding a fox hunt on Wednesday, and taking part in the 80m Data Club Contest on Thursday. Next Sunday, 22 July, they are taking part in the Low Power Contest. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

Now we return to the traditional listing in date order. On Tuesday 17 July Otley Amateur Radio Society is having a technical topics evening and holding a Morse class. Details from Paul, 2E0PAK, on 07768 996 370.

On Tuesday 17 July Stockport Radio Society is having a talk on aerials for the urbanite by Tom, M0DCG. More information from Nigel Roscoe, on 07973 312 699.

On Wednesday 18 July Denby Dale Radio Club is having a club night and holding a committee meeting. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 18 July Goole Radio and Electronics Society is having a social evening. Contact Ken, G6YYN, on 01757 638 539.

On Thursday 19 July South Manchester Radio and Computer Club has a homebrew show and tell evening. Details from Ron, G3SVW, on 01619 693 999.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND Aberdeen Amateur Radio Society is closed on Thursday 19 July, but next Sunday they will be taking part in the RSGB Low Power Contest on 80m and 40m CW from Walker Park, Aberdeen. Contact Fred Gordon, MM0ODL, on 01975 651 365.

Ayr Amateur Radio Group is on its summer recess until 5 September.

Wigtownshire Amateur Radio Club is closed on Thursday 19 July. Instead, on Sunday 22 July they are holding a barbecue as part of their receiver testing and antenna workshop event. Contact Ellis Gaston, GM0HPK, on 07979 692 580.

On Tuesday 17 July Livingston & District Amateur Radio Society is having Morse code practice. Details from Norman, GM1CNH, on 07740 946 192.

At 2pm on Wednesday 18 July Glenrothes & District Radio Club is visiting the Museum of Communications at Burntisland. Details from Laurie, MM0LJA, via email to mm0ljasecgc@btinternet.com.

On Friday 20 July West of Scotland ARS is having a club night. Contact Sam, GM4BGS, on 07771 554 035.

Copyright © RSGB 2012. Not for public release before Monday 16 July 2012 except as a GB2RS broadcast.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week. Chesham & District Amateur Radio Society is at the McMichael Rally & Boot Sale today. Wednesday sees a demonstration of data modes, including RTTY & PSK31, by G0VFW. More details from Terry, G0VFW, on 01442 831 491.

Norfolk Amateur Radio Club is holding its West Runton get-together today. Wednesday sees the club's Trophy Fox hunt, and on Thursday they are taking part in the RSGB 80m Club Championship, Data. Details from Chris Danby, G0DWV, on 01603 898 678.

Farnborough & District Radio Society is running a Top Band net on 1.995MHz from 8 to 9pm on Monday. On Wednesday there's a slow CW Net on 3.570MHz between 1 and 2pm. Friday sees an 80m CW net from 1 to 2pm on 3.750MHz, then a 2m net from 8 to 9pm. Contact Neville, G3SPD, on 01252 404 816.

Horndean & District Amateur Radio Club is taking part in the WAB Follow the Torch event on Monday from WAB square SU60. Thursday sees a show-and-tell session where members bring along an amateur radio-related item that they are prepared to talk about. On Saturday they commence their weekend event at the South Downs Wood Fair at Queen Elizabeth Country Park near Petersfield. Contact Stuart, G0FYX, on 02392 472 846.

On Tuesday 17 July Radio Society of Harrow is having a social at Rayners Lane on Tuesday, Next Sunday they will be operating GX3EFX/P at Old Redding. More information from Linda, G7RJL, on 02083 868 586.

Worthing & District Amateur Radio Club is staging its annual fox hunt on Wednesday, then taking part in the 80m Club Championship Data contest on Thursday. Contact John, G8FMJ, on 01273 593 232.

Bredhurst Receiving and Transmitting Society is having a club night with CW practice on Thursday. Friday sees the club operating GX4WAB for Follow the Torch. Details from Charles, G4VSZ, on 07982 244 788.

Now we return to the traditional listing in date order. On Sunday 15 July Loughton & Epping Forest Amateur Radio Society is operating GB0IS at Theydon Bois Donkey Derby. Contact Marc Litchman, G0TOC, on 02085 021 645.

On Sunday 15 July Reading & District Amateur Radio Club is running the McMichael Radio Rally, Reading Rugby Club, Sonning. Details from Pete, G8FRC, on 01189 695 697.

On Monday 16 July Braintree & District Amateur Radio Society is holding an evening DF hunt. For more information contact John, M5AJB, on 01787 460 947.

On Monday 16 July Burnham Beeches Radio Club is holding its VHF contest. Contact Dave, G4XDU, on 01628 625 720.

On Monday 16 July Surrey Radio Contact Club is having a natter and fix-it night. Contact John, G3MCX, on 02086 883 322.

On Tuesday 17 July Bromley & District Amateur Radio Society is having a talk on new amateurs operating by G8MNY & G8ITB. Details from Andy, G4WGZ, on 01689 878 089.

On Tuesday 17 July Chelmsford Amateur Radio Society is having a club net night from 8.30pm. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 17 July Stevenage & District Amateur Radio Society is having a talk and demo of the Slim Jim antenna. Details from Martin Juhe, M0XJP, on 07973 793 770.

Copyright © RSGB 2012. Not for public release before Monday 16 July 2012 except as a GB2RS broadcast. On Tuesday 17 July Verulam Amateur Radio Club is having a visit and talk by RSGB Regional Manager Alison, G8ROG on the latest RSGB developments, and by Larry, G4OXY on his 4m/6m J pole project. Contact Ralph, G1BSZ, on 01923 265 572.

On Wednesday 18 July Brede Steam Amateur Radio Society is taking part in the WAB Follow the Torch event from the shack as GX4WAB, and holding a barbecue in the evening. For more information contact Steve, on 01424 720 815.

On Wednesday 18 July Hastings Electronics and Radio Club is taking part in the WAB Follow the Torch event in WAB square TQ80. Details from Gordon, on 01424 431 909.

On Thursday 19 July Colchester Radio Amateurs are taking part in a club Scrapheap Challenge with Matt, 2E0XIS. More information from Kevan, 2E0WMG, on 07766 543 784.

On Thursday 19 July Cray Valley Radio Society is making its final preparations for the 2012L Olympic special event station, with the discussion led by Bob, M0MCV. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday 19 July Hilderstone Radio and Electronics Club is taking part in the WAB Follow the Torch event as the route passes through Thanet. Contact Chrissie Turner, by email to hilderstoneclub@gmail.com.

On Thursday 19 July Shefford & District Amateur Radio Society is planning to visit to the RSGB National Radio Centre at Bletchley Park. Details from John Burnett, M6JBU, on 07860 804 793.

On Thursday 19 July Sutton & Cheam Radio Society is having a talk on early TV receivers by Stephen Niechcial. Details from Darren, M0PRV, on 07525 753 702.

On Thursday 19 July Vange Amateur Radio Society is having a talk. Contact Steve, G0KVZ, on 01268 552 606.

On Friday 20 July Mid-Sussex Amateur Radio Society is holding the Chairman's barbecue, please note Cyprus Hall is closed that evening. More details from Rob, 2E0RJA on 01444 232129,

On Saturday 21 July Crystal Palace Radio and Electronics Club commences its Foundation course. Contact Bob, G3OOU, on 01737 552 170.

On Saturday 21 July Wey Valley Amateur Radio Group has an Introduction to Data Modes by Andrew Vine, M0GJH. Details on the web at www.weyvalleyarg.org.uk.

On Sunday 22 July Newbury & District Amateur Radio Society is taking part in the low power contest. Contact Rob, G4LMW, on 01635 862 737.

NEWS FOR THE SOUTH WEST We start with clubs that have several events this week. Today, South Bristol Amateur Radio Club is at QRP in the Country. On Thursday they will be trying to contact the Lundy DXpedition, which returns on Saturday. Details from Andrew Jenner, G7KNA, on 07838 695 471.

Exeter Amateur Radio Society has its 80m net on Monday at 19.45, the 2m net on Tuesday at 19.45 and the 4m net on Thursday at 19.00. Contact Nick, 2E0NRJ, on 01363 775 756.

Now we return to the traditional listing in date order. On Monday 16 July Appledore & District Amateur Radio Club is having a talk by Mike, G3PGA on compatibility issues between solar panel systems and amateur radio. Contact Brian Jewell, M0BRB, on 01237 473.

On Monday 16 July Riviera Amateur Radio Club is holding a portable RV, with MX0RIV on the air. Details from Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

Copyright © RSGB 2012. Not for public release before Monday 16 July 2012 except as a GB2RS broadcast. On Monday 16 July Weston Super Mare Radio Society is having a talk on radio signal decoding. Details from Paul, G3SDH, on 01761 221 206.

On Wednesday 18 July Trowbridge & District Amateur Radio Club is having a natter night. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 19 July Cornish Radio Amateur Club is holding a workshop evening. Details from Steve, G7VOH, on 01209 844 939.

On Thursday 19 July Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317 750.

On Thursday 19 July Yeovil Amateur Radio Club is having a talk on radio transceivers in photography by M0WOB. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 20 July Torbay Amateur Radio Society is having a natter night and holding an 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Monday 16 July Dragon Amateur Radio Club is holding an IOTA contest planning meeting. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Tuesday 17 July Carmarthen Amateur Radio Society is having an open night. Contact Lloyd, 2W0LLT, on 01239 711 297.

On Tuesday 17 July Wrexham Amateur Radio Society is holding a junk sale. Details from Carl Morris, MW0TBB, by email to tydraig@wrexham-ars.co.uk.

On Thursday 19 July Porthmadog and District Amateur radio society invites all local and visiting radio amateurs to a DVD presentation and talk by the Welsh Air Ambulance, Caernarfon division, at 19.30 for 20.00. The club meets at Madoc Yacht Club, Pen-y-Cei, Porthmadog LL49 9AY. More information from Bob, MW0RHD, on 07971 770 381.

Digital QST

Dear ARRL Member,June 2012 QST - Digital Edition
<http://www.nxtbook.com/nxtbooks/arrl/qst_201208/>

The digital edition of August /QST/ is available now! Go to this link
and start reading: August 2012 /QST/
<http://www.nxtbook.com/nxtbooks/arrl/qst_201208/>

The August 2012 Issue...

* A look under the hood of the transceiver that finished first in the
third Homebrew Challenge
* New energy: It's not dad's power system anymore
* Treat antenna tuners with respect and they'll perform well for
years. Conversely...
* Chasing birds while backpacking
* ...and much more!

Digital-Only Features...

* The state of DX: *The complete 2011 edition of the DXCC Yearbook*
* Video overview of two MFJ automatic antenna tuners and the ICOM
ID-31A transceiver
* An expanded version of an article on remote radio control

Every issue of /QST/ is filled with the news and features you need to
keep active in Amateur Radio. After you read through it, visit the
Digital /QST/ Feedback Form
<http://www.arrl.org/digital-qst-feedback-form> and tell us what you
enjoyed!

73,

Steve Ford, WB8IMY
Editor

What is a digital edition?
The digital edition of /QST/ is a web-based edition of the journal...a
way to read and interact with the current issue of /QST/ anytime,
anywhere. It simulates the look and feel of our printed version,
complete with page flipping, indexing and easy ways to move around to

get to the content you want. You can choose to read it online, or download the entire issue to your laptop. Each issue includes unique, digital-edition-only content such as video, audio features and extra content. Members can also access the digital archive for access to previous issues.

How do I access the digital edition?
Members must have a valid ARRL website login to access this benefit. You can always find a link to the current digital edition and archives at www.arrl.org/qst <http://www.arrl.org/qst>.

To login or register, go to www.arrl.org/myarrl <http://www.arrl.org/myarrl>.

Forgot password? Go to www.arrl.org/forgot-password <http://www.arrl.org/forgot-password> to reset your password.

Not a member? Join today <http://www.arrl.org/join/QDF> and get access to the current digital edition, now.

Need help? Visit the digital edition help page <http://www.arrl.org/digital-qst-faq> for frequently asked questions. Need more help? Contact Member Services by telephone 860-594-0200 or 888-277-5289 (US only) or email circulation@arrl.org <mailto:circulation@arrl.org>.

Go Green. Go Digital-Only.
You can choose to opt-out* of the mailed, print edition of /QST/ at any time. Complete our online opt-out form <http://www.arrl.org/QST-print-edition-opt-out-form>. Due to the lead time required to prepare /QST/ for mailing, you may receive one last printed issue.
* Disclaimer: Choosing to opt-out of the print edition of /QST/ is voluntary and will not result in a refund or reduction of ARRL membership dues. Any savings will be used to extend the ARRL's reach in the areas of public service, education, advocacy, technology and membership.

About this email
You are subscribed to receive monthly notification of the digital edition of /QST/. If you have an ARRL website user account, you can manage all of your e-mail preferences at www.arrl.org/myarrl <http://www.arrl.org/myarrl>.

#
Highlights of Solar and Geomagnetic Activity
09 - 15 July 2012

Solar activity ranged from low to high levels due to activity from a
complex of closely spaced regions in the southern hemisphere. These
spotted groups were made up of Regions 1519 (S15, L=107, class/area
Hsx/120 on 05 July), 1520 (S16, L=86, class/area Fkc/1460 on 12
July), and 1521 (S21, L=96, class/area Eki/300 on 12 July). Region
1520 grew into a large Fkc spot group with a Beta-Gamma-Delta
magnetic configuration with over 1300 millionths in area by 09 July
and continued to remain large and magnetically complex as it rotated
across the visible disk. Region 1520 produced M1 flares at 09/2307
UTC and 10/0514 UTC, an M2/1f flare at 10/0627 UTC, and a long
duration X1/2b flare at 12/1649 UTC. Associated with the X1/2b flare
were Type II (1268 km/s) and Type IV radio emissions along with an
800 sfu Tenflare and a geoeffective CME with an estimated
plane-of-sky speed of 1453 km/s. Region 1521 produced an M1/1f flare
at 14/0458 UTC. Region 1521 continued to grow through the period
into an Eki spot group with 300 millionths of area and a Beta-gamma
magnetic classification.

A greater than 10 MeV proton event at geosynchronous orbit began at
09/0130 UTC, reached a maximum of 19 pfu at 09/0430 UTC and ended at
09/1445 UTC. This event was likely associated with the 08 July M6/1n
flare at 08/1632 UTC from Region 1515 (S18, L=206, class/area
Fhc/900 on 06 July). A second greater than 10 MeV proton event began
at 12/1835 UTC, reached a maximum of 96 pfu at 12/2225 UTC, and
ended at 15/0200 UTC. This event was associated with the X1/2b flare
at 12/1649 UTC from Region 1520.

The greater than 2 MeV electron flux at geosynchronous orbit was at
moderate levels on 09 and 15 July, but reached high levels 10
through 14 July.

Geomagnetic field activity was at unsettled to minor storm levels,
on 09 July, with high latitude major storm intervals due to residual
```

CME effects likely associated with the 04 July M1 event. July 10 began with an isolated period of active levels and decreased to quiet to unsettled levels for the remainder of the day. On 11 and 12 July, activity was mostly quiet to unsettled with an isolated active period with high latitude intervals of minor to major storm levels. Quiet conditions were observed from 13 July till late on 14 July when a CME associated with the 12 July X1/2b flare arrived. At 14/1728 UTC, a shock was observed at the ACE spacecraft followed by a sudden impulse (27 nT) at the Boulder magnetometer at 14/1811 UTC. Solar wind speed at the ACE spacecraft increased from approximately 350 km/s to 630 km/s while the Bz component of the interplanetary magnetic field (IMF) went south to around -12 nT. At around 15/0600 UTC, solar wind speed was around 600 km/s while the IMF Bz went south around -16 nT and stayed steadily southward through the end of the period. The geomagnetic field responded with active to major storm levels while minor to severe storm conditions were observed at high latitudes through the end of the summary period.

Forecast of Solar and Geomagnetic Activity
16 July - 11 August 2012

Solar activity is expected to be at low to moderate levels through 18 July when Region 1520 is due to rotate off the West limb. Very low to low conditions are expected from 19 July through 20 July. Low to moderate conditions are expected from 21 July through the end of the period as old Regions 1515 and 1520 are due to return on 21 July and 01 August respectively.

There is a slight chance for a greater than 10 MeV proton event at geosynchronous orbit until Region 1520 departs the visible disk on 18 July and again from 21 July through 11 August as old Regions 1515 and 1520 return.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels from 16 - 22 July, 24 - 27 July, and 03 - 11 August. High levels are expected on 23 July and again on 28 July - 02 August due to recurrent coronal hole effects.

Geomagnetic field activity is expected to begin the period with minor to major storm periods due to the continued influence of the 12 July CME. Conditions will gradually return to quiet to active levels by the end of the day on 16 July. Mostly quiet to unsettled conditions are expected from17 - 21 July. On 22 - 23 July a coronal hole high speed stream is expected to become geoeffective causing mostly unsettled conditions. Quiet to unsettled conditions will prevail from 24 - 26 July. On 27 July, a co-rotating interaction region followed by a recurrent coronal hole high speed stream is expected to become geoeffective. Active to minor storm conditions are expected on 27 July while unsettled to active conditions are expected on 28 - 29 July. Conditions are expected to return to quiet to unsettled levels on 30 July through the end of the forecast period.

K4C - Puerto Rico Constitution Day Special Event

Posted: 16 Jul 2012 08:18 AM PDT
http://forums.qrz.com/showthread.php?354211-K4C-Puerto-Rico-Constitution-Day-Special-Event&goto=newpost

Special event K4C to commemorate the 60th anniversary of the Constitution of the Commonwealth of Puerto Rico.

The Movimiento Radioaficionados de Puerto Rico (MRPR) ☐ WP4NPC, will hold on July 25, 2012, the special event K4C, marking the 60th anniversary of the Constitution of the Commonwealth of Puerto Rico (la Constitucion del Estado Libre Asociado de Puerto Rico). The purpose of the activity is to commemorate this important date for Puerto Ricans and make it known around the world, through amateur radio, the recognition of one of the best written constitutions in the world.

The activity will take place on the campus of the National Park Julio Enrique Monagas of the Municipality of Bayamón from 10:00 am (1400 UTC). We will be operating in the HF bands between 10 & 40 meters, and locally on the chain of repeaters of the MRPR.

Repeaters:

Aguada ☐ 147.230 T-107.2

Bayamón ☐ 447.350 T-100.0

Canovanas ☐ 146.710 T-94.8

Corozal ☐ 146.670 T-94.8

Maricao ☐ 147.070 T-146.2

Maricao ☐ 447.800 T-136.5

Naranjito ☐ 147.230 T-127.3

Villalba ☐ 146.710 T-88.5

There will be a QSL card for this occasion via WP4NPC

Anyone interested in participating as an operator can communicate with:

Dennis-KP3CB

(787) 366-5465

Tired of ebay seller fees?? Check out ehamfest.com

Posted: 15 Jul 2012 08:31 PM PDT
http://forums.qrz.com/showthread.php?354176-Tired-of-ebay-seller-fees-Check-out-ehamfest-com&goto=newpost

W5TXR Electronic Labs in New Braunfels, Texas is putting together the
ultimate auction style website for hams and SWL's ONLY!

The informational website is www.ehamfest.com

we are looking for feedback and ideas for our up and coming super website!

At this time we are evaluating auction (bidding) database software to run
our website that will be similar to that other web site.

The big difference is we will be limiting our site to amateur radio related
equipment and SWL related equipment.

ehamfest.com is for Worldwide hams by American hams. Sellers will only pay
a small flat rate pecentage. We will not nickle and dime you to death with
BS fees!

Thanks - M.A. Lacy -W5TXR

Radio Man, 95, Keeps Mind Sharp with On-Air Friends:

Posted: 15 Jul 2012 05:03 PM PDT
http://www.eham.net/articles/28633

There's a room in Dave Goggio's home in Bartlett where with the twist of a dial he can talk to people all over the world, a fact documented by a map with hundreds of multi-colored thumb tacks implanted on places like Antarctica, Russia and all across the U.S. From north to south and east to west fellow ham radio operators have heard: "Four-O-G-G, whisky-4, Oscar-Go-Go, Memphis, Tennessee, named Dave." Welcome to the world of this amazing man, a human version of the Energizer battery TV commercial rabbit. He celebrated his 95th birthday on June 22 by going to Baltimore to watch his beloved Orioles play the Washington Nationals. Goggio was born on June 22, 1917, the same year Walt Disney graduated from high school, President Woodrow Wilson asked Congress to declare war against Germany, the Raggedy Ann doll was invented and Boys Town was founded west of Omaha. We're talking about someone who bowls twice a week, plays bridge every Tuesday, does a mile three times a week on the treadmill, didn't have a sniffle last winter, has never taken a flu shot and spends countless hours talking to folks all over the world as a member of the American Radio Relay League, the national association for Amateur Radio in the U.S.

RAC Bulletin 2012-038E - Ottawa based technically qualified (land
mobile radio systems) volunteer needed
2012-07-17

As a member of the Canadian Interoperability Technology Interest
Group, CITIG, we have been invited to appoint a volunteer to sit on
the 700Mhz definition working group. This group will sit at the table
with Public Safety Canada, government agencies and the private
business sector to develop the 700Mhz Emergency Communications
program. It is anticipated that 2 or three Ottawa meetings will be
necessary as well as occasional teleconferences. If you possess skills
and interest in this area, and would like to be considered for this
position, please drop me a note.

UP COMMING EVENT!

September 29,2012 Special event station with the callsign N3E .

Operators will be members of the Pottstown Area Amateur Radio Club.We
will also have an information table to answers questions, about The
Amateur Radio Service.

The location is Pottstown,Pa. Municiple Airport. The event is
Community day at the airport . The request for the station, is from the
local chapter of the EAA ,Chapter 1250. It is to show support for the "
Young Eagles Rally ". This is a yearly event . We plan to operate 20 meters
and 40 meters all modes . But using one mode at a time .We will have just
one HF transmitter for this event . We will try to stay with in the general
class frequency'S on 40 and 20 meters.

We are planning on operation from 10:00 am untill 3:00 pm from
Pottstown Municipal Airport,Pottstown ,Pa.

For a cerficate please send "9 x 11-1/2 "with postage and your
address on the envolope.To Ed McCoy ,286 Hopewell Road ,Elverson,PA. 19520.

New release of LOG4OM

Posted: 17 Jul 2012 06:08 AM PDT
http://forums.qrz.com/showthread.php?354324-New-release-of-LOG4OM&goto=newpost

The latest version of LOG4OM has now been released here
http://www.pisto.it/wordpress/log4om-en/

Here are the release notes for fixes and new features implemented since the
last

Beta release

Two new features were added..

1. Added Browser tab to main screen and cluster window buttons now provide a

lookup facility in this browser with either QRZ.com or HamQTH

2. User now has a facility to send DX Spots directly from input screen

These issues were fixed.....

CAT - Rig control from the QSO Info (F1) window changes cluster mode

CAT - Cat selection "Cat will switch to Digital" does not work

CAT - CAT control via OmniRig with ICOM7410: Cluster spot sets for digital

either CW-R or RTTY-R

Cluster - Persistency of cluster settings not saved

Cluster - Cluster Tab F9 settings not persistant.

Cluster - Digital mode causes cluster filter in main screen to change to SSB

portion of the band

Cluster - Cluster log on commands for VE7CC require user defines option

External Services - Default country data base not up to date

Import / Export - ADIF export and import not handling correctly

(county)

Import / Export - Export of Adif from Alpha 2 prior to import to problems .

Import / Export - Import of ADIF with QSO's above 6 meters fails

Import / Export - ADIF import text file not saved

Import / Export - FLdigi ADIF import problem

Import / Export - QSL sent date incorrect

Import / Export - ADIF import fields missing

Label printing - Label print not working, causes system to hang, then exception

error and crash

Statistics and Awards - Report Printing layout problem

User Interface - Integrated browser page

User Interface - Call and country identity with slash calls incorrect

User Interface - Need to add a TEN TEN input field to the archive manager edit

screeen.

User Interface - Multiple database backups deleted

User Interface - After new adif import from previous version, freqs are not

correct

User Interface - Reorder selections in alphabetical order

User Interface - Log4OM cluster window the "connection" run script logon issue

User Interface - Resent QSO display has no State field display

User Interface -No 10-10 number field in the Recent QSO window

User Interface -Backup file names need to identify database

User Interface -Trying to add country in settings causes exception error

User Interface - Date and time format different in different windows

User Interface - TEN TEN is now in the configuration windows but really no way

to add to data base

User Interface - Comments field needs expanding and changing to uper and lower

case

User Interface - Frequency display standardisation between input window and

recent QSO window

User Interface - Bulk deleting not possible

User Interface - Log Display missing after ADIF import into MySQL

We have five very minor issues to resolve before we start our program of adding new features.

Our policy is everything stops if a bug is identified and untill that bug is resolved we will not progress a new feature, this way we keep right on top of any user issues.

AMSAT NEWS SERVICE

ANS-197

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor@amsat.org

In this edition:

* 2012 AMSAT Space Symposium & Annual General Meeting Comes to Orlando

* AMSAT-UK Monitoring UK Space Agency Reform of the Outer Space Act

* Successful ARISS School Contacts Reported

* Cuba to Alaska Contact Successful via FO-29

* Official Opening of the RSGB National Radio Centre

* NASA TV to Cover Three Hams Docking at ISS

* Five CubeSats Ready for July 21 JAXA HTV-3 Launch

* HORYU-2 Telemetry Resumes Operation

* 50th Anniversary of Telstar-1

2012 AMSAT Space Symposium & Annual General Meeting Comes to Orlando

AMSAT announces the 2012 AMSAT Space Symposium will be held on Friday, October 26th through Sunday, October 28th. The Symposium weekend will feature:

Space Symposium with Amateur Satellite PresentationsOperating Techniques, News, & Plans from the Amateur Satellite WorldBoard of Directors Meeting open to AMSAT membersMeet Board Members and OfficersAnnual General Membership MeetingAnnual Banquet-Keynote Speaker and Door Prizes

CALL FOR PAPERS

This is the second call for papers for the 2012 AMSAT Annual Meeting and Space Symposium to be held in Orlando, Florida on the weekend of October 26-28, 2012 at the Holiday Inn, Orlando Airport Hotel.

Proposals for papers, symposium presentations and poster presentations are invited on any topic of interest to the amateur satellite community:

Papers for publication in the ProceedingsSymposium PresentationsPoster PresentationsEquipment and Operating Demonstrations

We request a tentative title of your presentation as soon as possible, with final copy to be submitted by October 1 for inclusion in the printed proceedings.

Abstracts and papers should be sent to Dan Schultz, N8FGV, at n8fgv at amsat.org.

SYMPOSIUM SCHEDULE

To help you plan your trip to Orlando the 2012 Symposium Committee has posted a high-level schedule of the weekend's events.

Thursday 25 October 2012

AMSAT Board of Directors Meeting 8am - 9pm

Friday 26 October 2012

AMSAT Board of Directors Meeting 8am - Noon

Trips to SkyCraft 9am - Noon

AMSAT Symposium 1pm - 5pm

Saturday 27 October 2012

Symposium 8am - 3pm

AMSAT General Meeting 3:30pm

AMSAT Banquet 6:30pm - 10pm

Sunday 28 October 2012

7:30am AMSAT Area Coordinator's Breakfast

Local trip of Interest TBD

Monday 29 October 2012

Special trip to Kennedy Space Center 8am-6pm The trip will include a round trip bus from the hotel and entrance to the Space Center. The cost will be about $100. This is a wonderful experience for those that haven't been and for those that have been multiple times. We need to get an idea of how many will participate to select the correct bus. Contact Martha if interested

Watch the AMSAT Symposium Web Pages for the latest information.

[ANS thanks the 2012 Symposium Committee and 2012 Syposium Proceedings Editor Dan Schultz, N8FGV for the above information]

AMSAT-UK Monitoring UK Space Agency Reform of the Outer Space Act

A posting on the UK Space Agency Web Site, announced, "Reform of the Outer Space Act 1986: Consultation". Graham Shirville, G3VZV commented, "Whilst they only relate to UK legislation, both the Consultation Document and the Impact Assessment Document cover a lot of interesting ground, technical, legal and statistical. Well worth a review in my opinion. These proposals make the Space Act more 'cubesat friendly'"

Both of these documents can be accessed on the UK Space Agency web.

The AMSAT-UK web summarizes the scope of the new Consultation: This is in response to the Government Growth Review published in March 2011, in which the Government set out its wish to reform the Outer Space Act 1986 by introducing an upper limit on liability for UK operators.

The Outer Space Act covers all UK satellites irrespective of size, from tiny low cost educational CubeSats up to large commercial £500 million satellites.

The key aspects of the consultation are the proposals to waive the capped liability and insurance requirement for in-orbit operation of any satellite that meets the criteria of a CubeSat and to remove the requirement for unlimited indemnity from satellite operators.

The existing Outer Space Act imposes heavy additional costs (>£50,000 per annum) on those wishing to launch small educational CubeSats. The additional costs act as a major deterrent and to-date no such UK CubeSat has been launched.

Graham concludes, "Rest assured that AMSAT-UK will be responding!" More news will be posted as available. The UK Space Agency says that responses are due by August 31, 2012.

[ANS thanks Graham Shirville, G3VZV and AMSAT-UK for the above information]

Successful ARISS School Contacts Reported

Nunavik Youth Connect With ISS

On July 4, youth attending the Cirqiniq Summer Camp in Kuujjuaq, Quebec (Nunavik), Canada spoke with on-orbit astronaut Joe Acaba, KE5DAR via an ARISS contact. Telebridge station K6DUE in Greenbelt, Maryland provided the radio connection.

The contact was held in conjunction with a circus camp being offered to youth, ages 13 to 17, in Nunavik that was led by a group of instructors affiliated with Cirque du Soleil®. The campers learned tight-wire walking, aerial acrobatics and juggling among other skills and ended the session with a parade and community show. This year's theme was "Planets and the Universe." Local media covered the event.

STEM High School Aerospace Scholars, Houston, TX Connect With ISS

An ARISS school contact with participants at Women in STEM High School Aerospace Scholars, Houston, TX was successfully completed on July 10. The contact was a telebridge between NA1SS and W6SRJ.

The group of high school juniors were participating in a summer program called WISH, an acronym for Women in STEM High School Aerospace Scholars. The students were selected from responses to a national invitation to attend multiple robust lessons for six days at Johnson Space Center in Houston. The young women attended briefings, and engaged in competitive hands-on engineering activities related to space exploration and research.

The ARISS contact was incorporated into the learning activities early in the week while learning about space communication and wireless technology.

A video of the contact has been posted on-line.

The NASA Press release about the Women in STEM High School Aerospace Scholars program can be viewed on-line.

[ANS thanks the ARISS Status Report and NASA for the above information]

Cuba to Alaska Contact Successful via FO-29

Hector Martinez, CO6CBF in Cuba reported a successful satellite contact Dale Pelzer, KL7R in Alaska via the FO-29 satellite. Cuban amateurs cannot operate on AO-7 mode B so FO-29 is their only opportunity for long range contacts.

Hector says the first 10 attempts via SSB were unsuccessful. Dale drove around 4 miles from his home to a nearby hill, many times very late at night. On Sunday, July 8 at 1920 UTC the two stations finally connected via CW.

Dale's equipment includes a Yaesu FT-817 (only 5W semi-duplex) and ARROW antenna with preamplifier. Hector's equipment is mostly a homebrew setup, 10 elements yagi on 2m and 18 elements yagi for 70cm with a homebrew preamplifier.

Hector will continue to look for new grids and long-range contacts via satellite. He invites interested stations to contact him via e-mail: co6cbf@frcuba.co.cu

[ANS thanks and congratulates Hector Martinez CO6CBF and Dale Pelzer KL7R for the above information]

Official Opening of the RSGB National Radio Centre

Wednesday, July 11, saw the official opening of the RSGB's National Radio Centre (NRC) at Bletchley Park in Milton Keynes.

The opening and unveiling of the plaque was undertaken by Mr. Ed Vaizey, MP. Mr Vaizey is the Minister for Culture, Communications and the Creative Industries and, as such, has overall responsibility for OFCOM. He stated that he fully supported the aim of the Centre in being able to enthuse and inspire children to become the engineers of the future.

Attendees included many of the sponsors together with Iain Standen, the Chief Executive of the Bletchley Park Trust plus, from overseas, Dave Sumner K1ZZ, CEO of the ARRL and Ole Garpestad, LA2RR IARU Vice-President.

AMSAT-UK have supported the creation of this valuable educational outreach resource at Bletchley Park and have arranged for the provision and installation of a set of fully steerable VHF and UHF satellite antenna arrays. It is hoped that it may be possible to use the NRC as the FUNcube-1 Mission Control Centre during the Launch and Early Operations Phase (LEOP) of the mission later this year.

National Radio Centre http://www.nationalradiocentre.com/

Pictures of opening http://www.uk.amsat.org/8841

[ANS thanks Trevor, M5AKA; RSGB, and AMSAT-UK for the above information]

NASA TV to Cover Three Hams Docking at ISS

NASA Flight Engineer Sunita Williams, KD5PLB, along with Russian cosmonaut Yuri Malenchenko, RK3DUP, and Japan Aerospace Exploration Agency astronaut Akihiko Hoshide, KE5DNI were launched aboard a Soyuz TMA-05M spacecraft from the Baikonur Cosmodrome in Kazakhstan at 0240 UTC, July 15.

The three ham crew will arrive at the ISS on July 16, joining NASA Flight Engineer Joe Acaba, KE5DAR, and two Russian cosmonauts: Expedition 32 Commander Gennady Padalka, RN3DT, and Flight Engineer Sergei Revin, RN3BS.

NASA TV□s scheduled coverage of the docking is as follows:

Monday, July 16

11:15 PM CDT (0415 UTC, July 17) -- Expedition 32/33 Soyuz TMA-05M docking coverage begins (docking at 11:38 PM [0438 UTC, July 17]), followed by post-docking news conference from Mission Control in Korolev, Russia.

Tuesday, July 17

2:00 AM CDT (0700 UTC) -- Expedition 32/33 Soyuz TMA-05M hatch opening and welcoming ceremony coverage begins (ceremony scheduled for 2:25 AM [0725 UTC]).

NASA TV can be viewed on-line at: http://www.nasa.gov/ntv

[ANS thanks NASA for the above information]

Five CubeSats Ready for July 21 JAXA HTV-3 Launch

Five cubesats are scheduled to be launched on July 21 aboard the JAXA HTV-3 supply mission to the ISS. The satellites have been integrated with the J-SSOD small satellite deployer. The J-SSOD deployer will be integrated to the Japanese Experiment Module, also known as Kibo. They will be deployed with the Kibo robotic arm planned for the September, 2012 timeframe.

The five CubeSats on this mission include:

+ Raiko

http://www.astro.mech.tohoku.ac.jp/RAIKO/ (Japanese)

2U cubesat, photography, Ku-band beacon

+ We Wish

http://www.meisei.co.jp/news/2011/0617_622.html

Infrared camera for environmental studies

+ FITSat 1

http://www.fit.ac.jp/~tanaka/fitsat.shtml

High-speed data test, high power LED visual tracking

CW Beacon 437.250 MHz,

FM Data 437.445 MHz,

High speed data 5840.00 MHz.

+ F-1 Vietnam Student CubeSat

On-board camera for earth observation mission

VX-3R1, 437.485 MHz FM downlink:

o Solar cell power only, operates in sunlight only

o Output power: max 0.3W, half-wave dipole antenna

o Morse code beacon (10 chars) using PWM CW every 30 seconds

VX-3R2, 145.980 MHz FM downlink:

o Rechargeable battery, operates in dark and sunlight

o Output power: max 1.0W, half-wave dipole antenna

o AFSK 1200bps, half duplex, one AX.25 packet every 30 seconds

+ TechEdSat

http://ncasst.org/techedsat.html

http://www.uk.amsat.org/5018

Downlink on 437.465 MHz

[ANS thanks the CubeSat teams, AMSAT-UK, and Mineo Wakita JE9PEL for the above information]

HORYU-2 Telemetry Resumes Operation

On Tuesday, July 3, the amateur radio satellite HORYU-2 (call sign JG6YBW) recovered from a problem with stuck telemetry on its 437.375 MHz telemetry downlink. The HORYU-2 Blog indicates the team are now attempting to take pictures using the on-board camera. Read the KIT HORYU Blog in Google English: http://tinyurl.com/HORYU-Blog

The free KIT HORYU-2 telemetry software can be downloaded from:

http://kitsat.ele.kyutech.ac.jp/Docu...h_english.html

A HORYU-2 online WebSDR receiver can be found at:

http://sdr.opt.ro:8901/

HORYU-2 CW Telemetry Decoder by DK3WN:

http://tinyurl.com/SatSoftwareDK3WN/

HORYU-2, built by students from the Kyushu Institute of Technology, was launched by JAXA from Tanegashima Space Center on May 18 with the Observation Mission □SHIZUKU□ (GCOM-W1). The SHIZUKU observation images acquired by AMSR2 have been released. See:
http://www.jaxa.jp/press/2012/07/201...shizuku_e.html

[ANS thanks the HORYU-2 Team for the above information]

50th Anniversary of Telstar-1

Recently amateur radio satellite operators have commemorated the 50th anniversary of the launch of the first two amateur radio satellites: OSCAR-1 on December 12, 1961 and OSCAR-2 on June 2, 1962. Amateur radio was in space just four years after Sputnik-1, the first satellite was put in orbit.

This past week, fifty years ago, on July 10, 1962 the first commercial communications satellite, Telstar-1, was launched. Two days into its mission, it relayed the world's first transatlantic television signal, from

Andover Earth Station, Maine, to the Pleumeur-Bodou Telecom Center, Brittany, France.

The satellite was spin-stabilized to maintain its desired orientation in space. Power to its onboard equipment was provided by a solar array, in conjunction with a battery back-up system. During the course of its operational lifespan, Telstar 1 facilitated over 400 telephone, telegraph, facsimile and television transmissions. It operated until November 1962, when its on-board electronics failed due to the effects of radiation.

SpaceMart.com has published an article of Telstar's 50th anniversary

[ANS thanks AMSAT, Project OSCAR, and SpaceMart.com for the above information]

Satellite Shorts From All Over

Look in the August 2012 issue of QST magazine for a satellite article, "Backpacking With Satellites", on page 65 by David Palmer, KB5WIA. Dave covers lots of portable satellite operating advice, portable equipment selection, trek planning, and includes several interesting photosListen for Patrick, WD9EWK/VA7EWK on VO-52 at 0200 UTC July 17 during his on-air satellite demonstration at the Tri-City Amateur Radio Association meeting in Goodyear, Arizona. Additional demostration opportunities that evening may occur on SO-50 at 0300 UTC and one more VO-52 pass at 0335 UTC. All demonstration plans are dependent on the weather. Patrick will try to update the AMSAT-BB with the demonstration plans on Monday afternoon, as well as his Twitter feed @WD9EWK (use http://twitter.com/wd9ewk if you aren't on Twitter directly to view this feed).Listen for David, XE3DX operating on SO-50 and AO-27 between July 16 - 20 from EK48, EK49, EK69, EL50, EL51, EL61 and EL60 in Campeche, Yucatan and Quintana Roo States in Mexico. He can be reached via e-mail at xe3dx@amsat.orgListen for Norm, N3YKF operating from Peru. His trip begins on July 22. He says he has received the customs documents to bring amateur radio equipment. He plans to drive the Panamerica Sur from Lima to Nazca, Peru, activating grid squares along the way.Watch a video on the Vimeo site Grand Finale 2010-11, by McLean Fahnestock showing all 135 launches of the space shuttle program at once.To help you sound like the smartest ham on the band here are some videos that explain CERN's discovery of a Higgs-like particle:

See: http://www.spaceref.com/news/viewsr.html?pid=41338Sometime this summer, Austrian skydiver Felix Baumgartner will leap from the edge of space, attempting to not only break the sound barrier with his body, but also break the record for the longest freefall from nearly 37km altitude. View a video simulation at: http://www.youtube.com/watch?feature...&v=VCqnQq86fkYThe next Hudson Valley Satcom net date will be on Thursday July 19 at 8PM EDT (UTC-4 UTC) on the 146.97 MHz MBARC Repeater (PL 100). This net is also available on echolink on the N2EYH-L node if you would like to join via this route. (Stu, WA2BSS)

[ANS thanks everyone for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information. And with that, please keep in mind the discussion during Field Day setup when one ham was admiring the new tent being erected at an operating position. The owner remarked on the great deal he got

on the purchase of the tent getting it at half price. The ham said, "Yes, it is a great deal!" The owner noted it was the year of his discount tent. (Apologies to Richard The Third and Willy Shakespeare.)

Wouxun Dual Band Mobile announcement ($325 with free UV2D)

Posted: 15 Jul 2012 09:00 PM PDT
http://forums.qrz.com/showthread.php?354179-Wouxun-Dual-Band-Mobile-announcement-(-325-with-free-UV2D)&goto=newpost

Hello,

Im sure most of you got the memo in your email from Ed Griffin (Wouxun.us or Import Communications) but if not, heres the news:

Quote:

Dear Customer,

Here is the latest news on Chinese dual-band mobile radios.

Wouxun Dual Band Mobile - KG-UV920R

On June 21 I was informed that Wouxun would supply a small number of these radios to selected dealers (max of 10). At that time they also quoted a dealer costs that I thought was outrageous. The dealer costs was almost what I have always considered the retail price would be. In an email I told them sternly that with any dealer markup at all, the radio would not sell in the US and I would decline to purchase samples.

Wouxun response was that when full production began, the dealer costs would be lower. Since I've invested hundreds of thousands of dollars building a market for this company over the past few years, I decided I would not let others bring this radio to market before I did. I reluctantly placed an order for 10 radios, figuring I would sell them at costs, to get them to market.

After my order was shipped, Wouxun informed me that these sample radios must NOT be sold for less than $320-$330. They went on to say "If we found you or your dealer's end price was lower this range without our permission in advance, then we will stop supplying this model to you."

For the past two years, I've repeatedly told Wouxun that this radio must sell for no more than $250-$275 for it to be competitive with the big three Japanese companies. It appears this advice has fallen on deaf ears.

These pre-production radios lack some of the features the full-production radios will have. These will not be FCC Certified for Part 90 use. They will have narrow band capability but will not have the 2.5 kHz tuning step required for Part 90 radios beginning in 2013. The frequency range will be RX:136-174 & 350-480 and TX: 136-174 & 400-480. They did not indicate if any wide-band receive, such as 118 MHz AM, would be available on these pre-production models.

Although these radios may lack some of the bells and whistles we've expected, I imagine they will still be good dual band radios for the ham market. BUT, I still don't feel they are worth $325.

Wouxun says I can't sell these for less than $325. They did not say that I can not include a FREE HT with the purchase. (Rest assured, they will raise holy crap about it, but I'm used to that) So here's my plan. I will place the limited number I have on sale for $350 and include a free KG-UV2D HT in the deal. I'll profit nothing at this but we'll see what happens.

Frankly, this sounds like a good deal to me, with the free HT (credit to Mr. Griffin) but as someone who has waited for a good long while and then gave up for a Yaesu I think this is pretty foul of Wouxun to do to it's distributor.

I apologize if this thread is off topic and if it was placed in the wrong sub-forum.

I thought some of you might like to know.

Respectfully,

KF5KVE

I hope he

What's Going on with The Sun & HF?

Posted: 15 Jul 2012 10:51 AM PDT
http://forums.qrz.com/showthread.php?354083-What-s-Going-on-with-The-Sun-amp-HF&goto=newpost

I was first licensed in 2001 & subsequently took & passed my General in either late 2002 or early 2003 (passing the 5 wpm code test was required); I can't remember exactly & that really isn't important. I was able then in

2003 to take advantage of Sun Spot Cycle 23. I remember being able to communicate with stations world-wide easily. Now that we're "into" Sun Spot Cycle 24, I had more fun at the bottom of Cycle 23 than I'm having now! It seems that there are 4 or more days per week in which 40, 30, 20, 18, 15, 12 & 10 meters are closed down because of a CME or something. The rest of the days of the week aren't much better. Obviously we can't do anything about it; but it is indeed frustrating to look forward to communicating on HF and the bands are closed down. Perhaps I should get a "FaceBook" page or a "UTube" page. At least they work, don't require a lot of sophisticated electronic equipment, don't need outside antennas and above all else seem to be free! Perhaps in this age of "instant communications" one reason why many young people aren't interested in Amateur Radio is because it is so unpredictable and unreliable when compared to email, Twitter, FaceBook & Utube. I hope it gets better SOON!
73, Ken - KG4LLQ

AHMEDABAD: If all goes well for the Gujarat Science City officials, the institute will establish amateur radio contact with International Space Station (ISS) where Indian-American astronaut Sunita Williams will be stationed for four months. The state students might be able to talk to Williams directly about her experience. The science city officials have initiated communication with National Aeronautics and Space Administration (NASA) authorities for the project.

//
ACMA: The Band 420-430 MHz to be Withdrawn from Amateurs on 1 January 2013:

Posted: 16 Jul 2012 05:19 PM PDT
http://www.eham.net/articles/28636

The ACMA has advised the WIA that the 420 to 430 MHz segment of the 70 cm amateur band will be withdrawn as a secondary allocation at least for general amateur use from 1st January 2013. Internationally, in all three Regions, the band 420 - 430 MHz is allocated to fixed and mobile primary and radiolocation secondary, with a footnote allocating the band on a secondary basis to amateur only in the USA, Jamaica, the Philippines and Australia. Use of the band in Australia has been restricted to Advanced licensees and further restricted by various exclusion zones in NSW, the ACT, and the Jervis Bay area, Sydney, Perth and Melbourne. In April 2008 the WIA reported on the public consultation by the ACMA as part of its review of the band 403 - 520 MHz. From the outset it was obvious that the amateur band 420 - 450 MHz would be affected. Fairly early on, the bands 430 - 450 MHz was announced to be "out of scope" for the review. However, the ACMA has indicated that segment 440-450 MHz may be used on a temporary basis by displaced land mobile services until they are relocated during a transition phase. In September 2008 the WIA reported on the release of the submissions received by the ACMA, and in June 2010 the WIA further reported on the ACMA's announcements. An examination of the WIA 70 Cm Band Plan shows that the segment 420 - 430 MHz is largely "Restricted". The band 420 - 430 MHz is allocated in Australia to radiolocation and mobile as primary. That primary mobile use is by government networks supporting essential and emergency networks for police, fire and ambulance. That use commenced in 1999, and since 2009 the Council of Australian Governments has supported

the interoperability and harmonisation of those services. The only real problem that the withdrawal of this segment creates for amateurs is that there are a number of repeater link assignments that will need to be moved by 1st January 2013. There are some 34 licensees affected, mainly clubs, involving at least 73 separate assignments.

//
Outdated Code Hinders Growth of Amateur Radio:

Posted: 16 Jul 2012 05:16 PM PDT
http://www.eham.net/articles/28635

Nigel Hoyow, president of the Jamaica Amateur Radio Association (JARA), has stated that there was a deficiency in young amateur radio operators (ham) due to the fact that the current system operates under Morse code, a method which is long outdated. Hoyow made the comment at a handing over ceremony at the Office of Disaster Preparedness and Emergency Management in Kingston on Thursday. The Canadian International Development Agency and the Canada Caribbean Disaster Risk Management Fund made the donation of telecommunications equipment to JARA. "It goes without saying that the old operators are phasing out, youngsters such as the ones from the physics department at the University of the West Indies (UWI) are technologically advanced and hence require more recent systems. Many of these young operators have migrated to other countries such as Canada and the United States due to the Morse code, it is stifling our growth," he told The Gleaner. Morse code is a requirement from the Spectrum Management Agency (SMA) to receive the training to attain an amateur training licence. "Youngsters that are in the physics department at UWI, and even sixth-form students are having difficulties in an attaining amateur radio licence because of Morse code being a requirement. It is no longer being used in radio communication throughout the world," he added. The SMA regulates amateur radio operation in Jamaica and issues a licence to anyone who sits the exam. Morse code is a requirement for this exam. Gerald Burton, operations manager of JARA, said the SMA had sent a request to the Ministry of Commerce, Science and Technology to remove the Morse Code Act from being a requirement to attain the amateur radio licence. It was sent in 2005 and since then there has been no response. When contacted, Minister Phillip Paulwell said he was not aware of the request and would seek more information.

//
Colorado 14er Event -- August 5, 2012:

Posted: 16 Jul 2012 05:21 PM PDT
http://www.eham.net/articles/28634

Amateur Radio operators from around Colorado will be climbing many of Colorado's 14,000-foot mountains to set up amateur radio stations in an effort to communicate with other radio amateurs across the state and around the world. Join in on the fun on the Sunday of the first full weekend in August and see how many of the mountaintop stations you can contact. The prime operating hours are from approximately 9 AM to noon local time (1500

to 1800 UTC), but activity may occur at other times during the day.

1275. The ARRL Contest Update for July 18, 2012

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

July 18, 2012

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- When Is 6+2 Not 8? In the CQ WW VHF Contest!
- Wish I Was a Tiny Island - IOTA Contest
- New Edition of the Super Check Partials
- Grid Pirates in June VHF Contest
- Cycle 24 Update by K9LA
- WRTC-2014 Team Selection Update
- Coax Construction - Learn the Ropes!
- From Filters through Stubs
- Skimmertime

NEW HF OPERATORS - THINGS TO DO

The IOTA Contest has some rule changes this year to bring the focus
back to - what else? - working islands! If you can operate from one, so
much the better, but if not this is a great way to start IOTA chasing
and maybe add a DXCC entity to your totals, too!

BULLETINS

Your editor is taking a short vacation so this edition is a bit
attenuated from its usual volume. The newsletter will return to
'normal' in subsequent editions.

BUSTED QSOS

The DMC RTTY Contest was listed last weekend due to out-of-date web
information - it's this weekend! Contest sponsors - please update your
websites well in advance of the contest.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Jul 21-22
```

- North American QSO Party RTTY
- NAQCC Monthly QRP Sprint--CW (19 Jul)
- 144 MHz Digital EME Championship
- DMC RTTY Contest
- Feld-Hell Ten Meter Sprint
- CQ WW VHF Contest
- RSBG Low Power Contest--CW

Jul 28-29

- Run For the Bacon (23 Jul)
- IOTA Contest
- MARAC US Counties QSO Party
- New Jersey QSO Party
- Flight of the Bumblebees--CW

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Bob WA1Z has released another version of the Super Check Partial <http://supercheckpartial.com/> database files effective on July 11th, 2012. He requests you send Cabrillo-formatted logs for input to the database files to logs@supercheckpartial.com. Logs from any contest within the last 24 months are always appreciated.

We have an anniversary to celebrate as Tim K3LR relayed the following, "NASA Telstar <http://en.wikipedia.org/wiki/Telstar> was launched by NASA on July 10, 1962, from Cape Canaveral, Fla., and was the first privately sponsored space-faring mission. Two days later, it relayed the world's first transatlantic television signal, from Andover Earth Station, Maine, to the Pleumeur-Bodou Telecom Center, Brittany, France. Developed by Bell Telephone Laboratories for AT&T, Telstar was the world's first active communications satellite and the world's first commercial payload in space. It demonstrated the feasibility of transmitting information via satellite, gained experience in satellite tracking and studied the effect of Van Allen radiation belts on satellite design. The satellite was spin-stabilized to maintain its desired orientation in space. Power to its onboard equipment was provided by a solar array, in conjunction with a battery back-up system." The Telstar rounded shape still virtually defines 'satellite' in the public's imagination even today.

Web Site of the Week - Have a look at an article <http://www.k8gp.net/contests/june-vhf-2012> Andy K1RA wrote covering the Grid Pirates Contest Group operation in this past June VHF contest. The web site was down due to the intense storms in the east last week but is back up now.

WORD TO THE WISE

Check the rules (contest and licensing) before you go on a contest DXpedition. Most people might not know this but a US General class license, which has HF privileges, doesn't always give you the same privileges in a CEPT country. Many of the countries in the Caribbean are CEPT countries. Say, for example, you went to PJ2 to operate ARRL

DX Contest. If you operate on HF and you have a General class license, you are breaking the reciprocal licensing rules. When the privileges authorized by the FCC license grant are Advanced or Amateur Extra Class operator privileges, the U.S. citizen is granted CEPT Radio Amateur License privileges, in accordance with CEPT Recommendation T/R 61-01 (as amended). When the privileges authorized by the FCC license grant are General Class operator privileges, the U.S. citizen is granted CEPT Novice Radio Amateur License privileges, in accordance with ECC Recommendation (05)06 (as amended). Both recommendations are available online <http://www.ero.dk/>. (Thanks, Jeff KU8E)

==> SIGHTS AND SOUNDS

The next Potomac Valley Radio Club <http://www.pvrc.org/> webinar is "Update on Cycle 24 and More" to be held on July 18 and again on July 21. K9LA's August 2009 PVRC webinar discussed solar minimum between Cycle 23 and 24, and the early status of Cycle 24. This new webinar will review our recent solar minimum, review Cycle 24's present status, and discuss propagation in relation to the progress of Cycle 24. Two other topics to be discussed will be the effect of trees on HF and MF propagation, and the best height for your antenna. See the PVRC website for free pre-registration or to view archived presentation. (Thanks, Ken K4ZW)

==> RESULTS AND RECORDS

WRTC-2014 Team Selection Director, Dan K1TO, reports that, "The latest official published contest results that qualify for WRTC 2014 are now posted <http://www.wrtc2014.org/qualifying/qualification-standings> on the WRTC 2014 website. 27 qualifying events are now included, roughly one-half of the 55 total events. 36 qualifying events have now taken place, which means that you still have 19 more events in which to operate and move up in the standings!"

Indiana QSO Party results <http://www.hdxcc.org/inqp/scores.php> are now online and plaques will be awarded later this summer. (Thanks, Mel KJ9C)

Champ E21EIC reports on the latest HS/E2 prefix assignments - the HS prefixes are nearly gone. Watch for more interesting E22 through E29 prefixes to hit the airwaves including the 42 new licensees that will get HF permissions. Foreign hams licensed in Thailand will still be assigned HS0Zxx call signs.

OPERATING TIP

If you are working with a new operator following Field Day, now is the time to help them learn good habits. One of the first lessons should be - no extra verbiage. Just give the minimum exchange in the right order without rushing! There's no better opportunity to start trimming the excess baggage of "Please copy..." and "You are..." and repeating the exchange. Start 'em out right!

==> TECHNICAL TOPICS AND INFORMATION

Tom W8JI recommends a couple of documents about the effect of coax construction, illustrated in this West Penn Wire paper <http://www.westpenn-wpw.com/pdfs/coax_construction.pdf>, on mechanical robustness - not something considered by most hams. "Although the test frequency and method is not described, this [Commscope paper <http://docs.commscope.com/Public/Coax101.pdf>] shows the difference between quad shield and single foil and braid is 7 dB before 10,000 flexes and 13 dB after 10,000 flexes."

From the ARRL Propagation Bulletin <http://www.arrl.org/w1aw-bulletins-archive-propagation> ARLP013, "Q-up Now" has a fascinating new set of real-time propagation tools <http://www.q-upnow.com/> developed by a team associated with the Utah State University Space Weather Center <http://spaceweather.usu.edu/>. They use a real-time model of the ionosphere called GAIM (GlobalAssimilation of Ionospheric Measurements) which is updated every 15minutes with 10,000 global TEC (Total Electron Content) measurementsto simulate the F layers. Then they use the ABBYNormal Model <http://gcmd.nasa.gov/records/abbyNormal.html> for the D and E layers, and the two models are combined to give a complete representation of the global ionosphere. Using the HF Availability feature you can model real-time propagation for the frequency of your choice, including 160 meters, between any two points and beyond out to the antipodes.

DIY Equipment Labeling was the headline for an ARRL E-Letter <http://www.arrl.org/ares-el/> story in the July 11 issue. "Here is an interesting DIY project for labeling your equipment with tape. This tape should be fairly permanent if you use pop rivets to fasten it to something. Seems like it would make a good equipment ID for when you have to take expensive stuff into the field (emergency exercises, Field Day, or actual emergencies). And several locals swear by E-6000 glue as an alternative for application of the labels. --Rick Herndon, K5FNI, Mathis, Texas; Life Member, ARRL; Official Emergency Station"

On the first day of Field Day, my true love gave to me... Here's a packing list for the WRTC-2014 "test flight" during last weekend's IARU HF contest. They put fifteen stations on the air, WRTC-style - checking things out a couple of years in advance! From reports, the stations worked well and what issues did arise were and are manageable - good job!

- 15 tents
- 15 camping toilets
- 15 privacy shelters for the toilets
- 15 tilt-bases
- 15 sets of derrick poles (1 ea, 12', 8', and a 4-foot splice piece)
- 45 34 x 34 inch folding tables
- 30 folding chairs
- 15 Honda eu2000i generators with 150 foot extension cords in the boxes

- 15 external 3.2 gallon extended-run gas tanks
- 15 dipole hangers (6-foot piece of angle stock with Ubolts to fit
R25)
- 15 guy rod bundles (6x4 ft steel rods)
- 15 tribanders, wrapped in plastic sheets (next year, something
better)
- 15 booms for the tribanders, with boom-element hardware already
installed
- 15 bundles of bamboo stakes to hold the CAUTION tape
- 15 Rope and Wire Kits (each has about 500 feet of rope, cut to
specific lengths, and color-coded; 150 feet of LMR400 with connectors,
- 2 x 150 feet of LMR240 with reducers and connectors; two dipoles;
- 500-foot spool of twine for tying off the dipoles; a 34' steel
lifting cable; bag of derrick hardware; and a 2x4 with one end cut on a
45-degree angle to help align the guy rods and whack the 25G sections
together or apart, as needed; ground connection hardware kit; big spool
of CAUTION tape)
- 15 derrick winches
- 30 ground rods
- 15 Station Kits (lamp, fan, fire extinguisher, first aid kit, bug
spray, toilet paper, hand cleaner, outlet strip)

Multiply all that by four and you have some idea of the scope of the
full WRTC effort coming up in 2014. Clubs and other groups have helped
make this possible through the tent sponsorship program
<http://www.wrtc2014.org/sponsors/tent-sponsors/>. I have to go lie
down now after just thinking about all of it.

The wind can mis-align an antenna
<http://www.designnews.com/author.asp?section_id=1368&doc_id=245312&cid=Newsletter+-+Sherl
ock+Ohms&dfpPParams=ind_184,bid_272,aid_245312&dfpLayout=blog>
- who knew? Just about every ham with a beam and a rotator knows...but
this fact of life has to be learned sometime!

Technical Web Site of the Week - An interesting and extended discussion
took place over the past week on the CQ-Contest reflector
<http://lists.contesting.com/mailman/listinfo/cq-contest> regarding
bandpass filters, stubs, coupling between antennas, and receiver
front-end protection. So many topics were being covered that
summarizing them here just wouldn't do it justice. Browse to the
searchable archives
<http://lists.contesting.com/archives/html/CQ-Contest/> and look for
the "Bandpass filter" thread.

==> CONVERSATION

A little summertime ditty is provided for you to hum while chasing
all the DX stations through their "packet pileups". Don't forget to
QNY!

73, Ward N0AX

Skimmertime

Miscopied from Ira Gershwin's "Summertime" by Dr Beldar

Skimmertime,
And the loggin' is easy
Bands are jumpin'
And the mult total's high

Your band map's full,
The decoders are cookin'
One click for an instant
Q S Y

One of these openings,
You're gonna be calling
Bounce your signals off
Layers up in the sky

And in that opening,
The skimmers will spot you
C Q ing on twenty
Standing by...

==> CONTESTS

18 July through 31 July

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

North American QSO Party RTTY--Digital, from Jul 21, 1800Z to Jul 22, 0600Z. Bands (MHz): 3.5-28. Exchange: Name and S/P/C. Logs due: 14 days. Rules <http://ncjweb.com/naqprules.php>

NAQCC Monthly QRP Sprint--CW, from Jul 19, 0030Z to Jul 19, 0230Z. Bands (MHz): 3.5-14. Monthly on 2nd Tuesday or 3rd Wednesday local time (alternating). Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

DMC RTTY Contest--Digital, from Jul 21, 1200Z to Jul 22, 1200Z. Bands (MHz): 3.5-28. Exchange: RST and serial. Logs due: Aug 15. Rules <http://www.digital-modes-club.org/>

Feld-Hell Ten Meter Sprint--Digital, from Jul 21, 1600Z to Jul 21, 1800Z. Bands (MHz): 28. Monthly on 3rd Saturday. Exchange: RST, S/P/C, Feld-Hell member nr. Logs due: 7 days. Rules <http://sites.google.com/site/feldhellclub>

RSBG Low Power Contest--CW, from Jul 22, 0900Z - multiple operating periods. Bands (MHz): 3.5-7. Exchange: RST, serial, power. Logs due: Jul 30. Rules <http://www.rsgbcc.org/>

Run For the Bacon--CW, from Jul 23, 0100Z, see website. Bands (MHz): 1.8-28. Monthly on 3rd Sunday night (local). Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.org/>

IOTA Contest--Phone,CW, from Jul 28, 1200Z to Jul 29, 1200Z. Bands (MHz): 3.5-28. Exchange: RS(T), serial, IOTA number if island. Logs due: 3 weeks. Rules <http://www.rsgbcc.org/>

MARAC US Counties QSO Party--Phone,CW, from Jul 28, 1400Z - multiple operating periods. Bands (MHz): 3.5-28. CW - 50 kHz above band edge; SSB - 1.85, 3.85, 7.25, 14.27, 21.4, 28.4, 50.135, 146.53. Exchange: RS(T), state and county, or "DX". Logs due: Aug 31. Rules <http://www.marac.org/>

New Jersey QSO Party--Phone,CW, from Jul 28, 1600Z to Jul 29, 1600Z. Bands (MHz): 3.5-28, 50,144. Exchange: Serial and NJ county or S/P or "DX". Logs due: Aug 15. Rules <http://www.njqp.hamshack.info/>

Flight of the Bumblebees--CW, from Jul 29, 1700Z to Jul 29, 2100Z. Bands (MHz): 7-28. Exchange: RST, S/P/C, Bumblebee nr or power. Logs due: Aug 12. Rules <http://adventure-radio.org/>

VHF+ CONTESTS

144 MHz Digital EME Championship--Digital, from Jul 21, 0000Z to Jul 22, 2400Z. Bands (MHz): 144. Exchange: TMO or RST and R. Logs due: 14 days. Rules <http://www.dubus.org/>

CQ WW VHF Contest--Phone,CW,Digital, from Jul 21, 1800Z to Jul 22, 2100Z. Bands (MHz): 50,144. Exchange: 4-char grid square. Logs due: Sep 1. Rules <http://www.cqww-vhf.com/>

New Jersey QSO Party--Phone,CW, from Jul 28, 1600Z to Jul 29, 1600Z. Bands (MHz): 3.5-28, 50,144. Exchange: Serial and NJ county or S/P or "DX". Logs due: Aug 15. Rules <http://www.njqp.hamshack.info/>

==> LOG DUE DATES

18 July through 31 July

- July 18 - West Virginia QSO Party
<http://www.qsl.net/wvsarc/wvqp/wvqp.html>
- July 18 - RSGB 80m Club Championship, SSB
<http://www.rsgbcc.org/hf/rules/2012/r80mcc.shtml>
- July 21 - PODXS 070 Club 40m Firecracker Sprint

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2012-07-18
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** HOLIDAY TIME **

As well as yourself, several of our editors are on holiday and so
it might be not possible to have all functions and mails answered
in the normal and short time as you know a responce from our Team.
Please be so kind an be patient - as well we do need holiday!!!

** Possible services unavailable! **

Please be informed that on July 19th some services at MMMonVHF
might be not working properly or be unavailable due to scheduled
maintenance of a supporting server! Sorry for this inconvenience!

Multi-OP single transmitter Question for 2012 IARU HF Competition

Posted: 13 Jul 2012 05:51 PM PDT
http://forums.qrz.com/showthread.php?353880-Multi-OP-single-transmitter-Question-for-2012-IARU-HF-Competition&goto=newpost

Hey Forum,

My dad (KD0OYC) and myself (KD0OYE) want to take part in this weekends IARU HF competition in the Multi-Operator Single Transmitter category but I have a few questions. Do we each use our own callsign when we operate or do we decide on one of our callsigns to use for the whole competition? Also how does the logging of contacts work for multi-op single transmitter?

Any help would be great! We've never worked Multi-Op before so if you could steer us in the right direction that would be great!!!

Thanks in Advance,

KD0OYE

NXDN specification released

Posted: 18 Jul 2012 03:05 AM PDT
http://forums.qrz.com/showthread.php?354454-NXDN-specification-released&goto=newpost

NXDN☐ specification released

The technical specification for NXDN☐, a FDMA
digital voice technology supported by ICOM and Kenwood, is being opened to
the public domain.

For the past 5 years both ICOM and Kenwood have been
producing VHF/UHF mobiles, handhelds and repeaters to the NXDN☐ standard.
The equipment has a transmitted bandwidth of 4.0 kHz and is typically used
in 6.25 kHz channel spacing systems.

The specification is currently available in response to an
email request but the NXDN☐ Forum indicates it will be available for
direct download later in the year.

The NXDN☐ press release reads:

The Chair of the NXDN☐ Forum announced that the Forum
Steering Committee will open the NXDN technical standards to the industry
public.

Interested companies can obtain the information for the NXDN
technical standards by following the instructions on the NXDN Forum web
site http://www.nxdn-forum.com/instructions/

NXDN Digital products are deployed throughout the world in
hundreds of thousands of professional radio applications. As NXDN☐s
popularity continues to grow it will easily become the primary next
generation narrowband two-way radio digital protocol and increase demand
in the market for products from multiple vendors. To accelerate the spread
of NXDN and to expand on the opportunities it provides, the NXDN Steering
Committee has agreed to open the technical specification to the public
domain.

The NXDN Forum will continue to accept new members after
opening the technical specifications and will govern the NXDN
specification and related interoperability testing and certification.

Hams Link St. Martin Cane Field to the Rest of the World:

Posted: 17 Jul 2012 05:00 PM PDT
http://www.eham.net/articles/28638

St. Martinville -- On the weekend of June 23 and 24, the local area amateur radio club once again participated in the annual ham radio contest sponsored by ARRL, the national association for Amateur Radio. The local ham radio club, known as the Louisiana Cane Field Contest Club, joined approximately 35,000 operators from all corners throughout the North American continent contesting to see who could make the most contacts in a 24 hour period. Over the past year, the news has been full of reports of ham radio operators providing critical communications during unexpected emergencies in towns across America including the California wildfires, winter storms, tornadoes and other events world-wide. When trouble is brewing, Amateur Radio's people are often the first to provide rescuers with critical information and communications.

Going /AM: An Interview With PH9HB

Posted: 09 Jul 2012 12:17 AM PDT
http://forums.qrz.com/showthread.php?353261-Going-AM-An-Interview-With-PH9HB&goto=newpost

Hi folks,

just wanted to let you know about my last piece for DXCoffee.com, which I
hope will reveal as interesting as it's been writing it!

It's about Jerry van der Goot, an airline captain who operates /AM during
some of his flights. You probably have noticed PH9HB/AM on the cluster.

Here is the interview with him in English:

http://www.dxcoffee.com/eng/2012/07/...r-radio-cloud/

And here in Italian:

http://www.dxcoffee.com/ita/2012/07/...ano-dal-cielo/

Thanks a lot for your attention and vy 73,

Chris

Big Solar Storm Hits Earth HF black Out Wide Spread across the HF bands

Posted: 08 Jul 2012 10:07 AM PDT
http://forums.qrz.com/showthread.php?353169-Big-Solar-Storm-Hits-Earth-HF-black-Out-Wide-Spread-across-the-HF-bands&goto=newpost

Extent of blackout of HF (high frequency) radio communication dependent
upon current X-ray Flux intensity.

Sunspot 1515 which is now about to rotate onto the western limb produced a
strong M6.9 Solar Flare at 16:32 UTC Sunday afternoon. Because of the
Sunspots location, any potential CME would be directed mostly away from
Earth. More updates to follow.

Space Weather Message Code: ALTXMF

Movie of the CME LINK

Serial Number: 176

Issue Time: 2012 Jul 08 1631 UTC

ALERT: X-Ray Flux exceeded M5

Threshold Reached: 2012 Jul 08 1630 UTC

NOAA Scale: R2 - Moderate

Potential Impacts: Area of impact centered on sub-solar point on the sunlit
side of Earth. Extent of blackout of HF (high frequency) radio
communication dependent upon current X-ray Flux intensity. For real-time
information on affected area and expected duration please see
http://www.solarham.net/index.htm

Webinar - Update on Cycle 24 And More

Posted: 08 Jul 2012 03:42 AM PDT
http://forums.qrz.com/showthread.php?353121-Webinar-Update-on-Cycle-24-And-More&goto=newpost

Carl Luetzelschwab, K9LA, in an August 2009 PVRC Webinar discussed the
solar minimum between Cycle 23 and 24, and the early status of Cycle 24.
His July 2012 Webinar will review our recent solar minimum, review Cycle
24's present status, and discuss propagation in relation to the progress of
Cycle 24. Two other topics to be discussed will be the effect of trees on
HF and MF propagation, and the best height for your antenna.

The presentation will be held on two dates.

Date: Wednesday, July 18

Time: 9 PM EDT (Thursday, July 19 - 01:00 UTC)

Registration (free): https://www2.gotomeeting.com/register/606121362

Date: Saturday, July 21

Time: 19:00 UTC (3 PM EDT)

Registration (free): https://www2.gotomeeting.com/register/699956578

RFinder - The Worldwide Repeater Directory (WWRD) now supports AvMap G5/G6 APRS

Posted: 06 Jul 2012 08:14 PM PDT
http://forums.qrz.com/showthread.php?352968-RFinder-The-Worldwide-Repeater-Directory-(WWRD)-now-supports-AvMap-G5-G6-APRS&goto=newpost

Press Release

07/06/2012

From the QTH of W2CYK

For immediate release

RFinder - The Worldwide Repeater Directory (WWRD) now has a new user interface! AvMap G5/G6 APRS, the GPS for Amateur Radio Operators.

We are pleased to announce that RFinder support AvMap Points of Interest. This means you can pre-populate your GPS device with repeater data on your route, and see machines on the map or in a listing with connection details such as frequency, shift, PL, etc. Just go to http://web.rfinder.net, put in your location and radius. Choose AVMap and click export. Then import the resulting file into AvMap GeoSat software on Windows or Mac and write it to your device.

The WWRD Supporting AvMap is just another step of making The World Wide Repeater Directory, it's third party applications such as RT Systems and CHIRP and of course the RFinder family of programs on iPhone, Android and www, Ham Radio's one-stop-shop for repeater data, no matter what the technology used for repeating radio signals. No matter what computing device you use to look up repeater data anywhere on earth. AvMap APRS GPS was the next logical place for The World Wide Repeater Directory to be.

RFinder is available in the Apple App Store for iPhone and Android, the web version can be found at http://www.rfinder.net.

RT Systems radio programming software for Window is WWRD enabled and can be found at http://www.rtsystemsinc.com

CHIRP is open source software and is WWRD enabled and can be found at http://chirp.danplanet.com

AvMap information can be found at http://www.avmap.us/products/terr/geosat_6_aprs-664/introduction

http://forums.qrz.com/showthread.php?352859-Amateur-Radio-Newsline-Report-1821--July-6-2012&goto=newpost

Amateur Radio Newsline☐ Report 1821 ☐ July 6 2012

Please note that this is an extended Amateur Radio Newsline bulletin and contains three breaks. Newscast begins following the tone.

(Single beep here)

Amateur Radio Newsline report number 1821 with a release date of July 6, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio responds as a severe weather outbreak hits the Mid-West and Mid-Atlantic U-S; a new D-X record is set using the ageing Amsat Oscar 7 satellite; a big tower victory in Nevada and Erin King, AK4JG is named the 2012 Amateur Radio Newsline Young Ham of the Year. Find out the details are on Amateur Radio Newsline☐ report number 1821 coming your way right now.

RESCUE RADIO: HAM RADIO RESPONDS AS WINDSTORM HITS MID WEST AND MID ATLANTIC STATES

The governors of several states have declared emergencies as temperatures rose in the aftermath of powerful storms that swept through the mid-Atlantic region Friday night, July 29th. The storm did damage from Indiana to New Jersey, although the bulk of its destruction was felt in West Virginia, Washington and suburban Virginia and Maryland. Amateur Radio Newsline☐s Fred Vobbe, W8HDU, begins our coverage of this severe weather outbreak and whats known about the ham radio response thus far:

Unique Activation: The "Irish Alcatraz" on the Air - Wed-8-August

Posted: 19 Jul 2012 04:00 AM PDT
http://forums.qrz.com/showthread.php?354600-Unique-Activation-The-quot-Irish-Alcatraz-quot-on-the-Air-Wed-8-August&goto=newpost

The "Irish Alcatraz" on the Air

On Wednesday 8-August from 10AM till 4PM (UTC) the North Cork Radio Group (www.ei1nc.com) will activate Spike Island, a Unique First Time Activation!

Spike Island was significant in the French intervention following the Glorious Revolution, and was later purchased by the British government in 1779 □ becoming the site of Fort Westmoreland. (Named for John Fane, then Lord Lieutenant of Ireland.)

Later a prison and convict depot, it was used to house "convicts" prior to penal transportation. It gained a reputation as "Ireland's Alcatraz". It remained in use as a garrison and prison through the Irish War of Independence, when IRA prisoners were held there. Richard Barrett was among those detained there, but escaped during the truce of 1921.

Following the Anglo-Irish Treaty, the island remained as one of the Treaty Ports, and was only handed back to the Free State in 1938. Upon its handover to the Irish state, the island's installations were renamed Fort Mitchel (after John Mitchel, nationalist activist and political journalist).

More info on Spike Island:
http://en.wikipedia.org/wiki/Spike_Island,_County_Cork

The NCRG will have 3 SSB stations:

40m - 7.170 +/- QRM

20m - 14.270 +/- QRM

15m - 21.270 +/- QRM

Follow the NCRG on Twitter and Facebook:

Updates on actual frequencies and operators can be followed on the day itself: http://twitter.com/ei1nc

The Twitter page will automatically post to Facebook:
http://www.facebook.com/ei1nc

If you like to join the discussion, request join our FB-page:
https://www.facebook.com/#!/groups/ei1nc/

QSL cards:

A special QSL card will be used, design will be from pictures taken on the day of activation

If you like to see sample QSL cards of past activations, and for more information on the North Cork Radio Group, please visit
http://www.ei1nc.com/Events.htm

QSL cards will be 100% returned, please see the EI1NC QRZ page for QSL details.

Spike Island activation references:

CASHOTA : EI019/C (www.cashota.co.uk / www.cashota-ireland.org)

IOTA : EU-115 (Mainland Ireland)

Special Event W7C

Posted: 18 Jul 2012 11:51 PM PDT
http://forums.qrz.com/showthread.php?354586-Special-Event-W7C&goto=newpost

W7C will be used July 22 thru 29 2012, 48 year anniversary for our net:

The Western Country Cousin 75 meter net is having annual Camp out and picnic in Rio Vista CA Saturday July 28, 2012. Rio Vista is located 31 miles South of Sacramento CA on the Sacramento River. The event will be at the Sandy Beach park. The park has RV spaces adjoining.

Breakfast and Dinner will be served for all attendees. You do not have to be a member or Amateur to join us in the festivities. We are a social net and welcome all.

More information is located on our web site: http://www.wccnet.us/

Our club call, W6CCN is good on QRZ.com with Google map pin pointing exact location. Just go to QRZ, look up W6CCN, click on detail, a expandable map will come up. If you click on satellite view, an actual picture of picnic location shows up.

Hope to see you all there. We will also be using Special Event call W7C during the week. A raffle will be held on Saturday for a Yaesu VX7 tri band radio, a 2 meter 440 hand held, a ships clock replica, some antennas, more.

73, N5SWE

==> + 2012 SECOND MEETING OF THE ARRL BOARD OF DIRECTORS SET FOR JULY
20-21, AGENDA ANNOUNCED

ARRL policy is made by its Board of Directors. The 15 voting members
of the Board are the Directors who are elected by the ARRL members in
their respective divisions. The Board meets in January and July,
usually in the Hartford area. ARRL members also elect Vice Directors
who may attend the meetings. ARRL Directors and Vice Directors are
volunteers who work hard to represent the ARRL in their divisions, to
represent the members who elect them on policy issues and to conduct
the committee work that is so important to good decision-making. The
Board will be meeting for its 2012 Second Meeting July 20-21; the
meeting will be preceded by meetings of the Administration and Finance
Committee and the Programs and Services Committee. Read more here

```

set-for-july-20-21-agenda-announced>.

==> + AMATEUR RADIO IN SPACE: ASTRONAUT DON PETTIT, KD5MDT, CHATS WITH ARRL

NASA Astronaut Don Pettit, KD5MDT, sat down with ARRL News Editor S. Khrystyne Keane, K1SFA, on Thursday, July 12, for a one-on-one interview about ham radio and life on the International Space Station (ISS). Pettit returned from the ISS on July 1 where he served as part of Expedition 31, spending 193 days in space. He first ventured into space in 2002 on the space shuttle Endeavour as part of Expedition 6, logging more than 161 days in space. In 2008, he was a part of the crew on STS-126, also on Endeavour. Pettit holds the distinction of spending 370 days in space, placing him fourth among US space fliers for the longest time in space. Read more here <http://www.arrl.org/news/astronaut-don-pettit-kd5mdt-chats-with-arrl>.

==> + DIGITAL EDITION OF AUGUST QST NOW AVAILABLE

The digital version of the August QST is now available <http://www.nxtbook.com/nxtbooks/arrl/qst_201208/> to ARRL members. The digital version includes many features not available in the print version, such as:

- The complete 2011 edition of The DXCC Yearboook
- Video overviews of two MFJ automatic antenna tuners and the ICOM ID-31A transceiver
- An expanded version of "Remote Radio Control Made Easy," by John Raydo, K0IZ

Every issue of QST is filled with the news and features you need to keep active in Amateur Radio. After you read through it, visit the Digital QST Feedback Form <http://www.arrl.org/digital-qst-feedback-form> and tell us what you enjoyed! QST is the official journal of the ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> + FCC NEWS: FCC DENIES ARIZONA HAM'S PETITION TO EXTEND PRB-1 TO PRIVATE CONTRACTS, SUCH AS CC&RS

In January 2012, Leonard Umina, W7CCE, of Gilbert, Arizona, filed a Petition for Rulemaking, asking the FCC to "expand its policy of limited preemption of state and local regulations governing amateur station facilities to preempt private land use regulations such as covenants, conditions, and restrictions (CC&Rs) and rental agreements that limit amateur licensees' ability to deploy antennas." On July 16, the FCC notified Umina that it had denied his Petition. Read more here <http://www.arrl.org/news/fcc-denies-arizona-ham-s-em-petition-em-to-extend-prb-1-to-private-contracts-such-as-cc-rs>.

==> + FCC NEWS: FCC FINES ALASKA MAN FOR INTERFERING WITH AIR TRAFFIC USING CB RADIO

On July 17, the FCC announced that it had issued a Notice of Apparent Liability for Forfeiture and Order in the amount of $12,500 to Glenn S. Yamada, of Kenai, Alaska. Yamada is accused of "apparently willfully and repeatedly violat[ing] Section 301 of the Communications Act of 1934, as amended, and Sections 95.409(a) and 95.411(a)(1) and (b) of the FCC Rules by operating his CB radio without requisite Commission authorization." In January 2012, the FCC received a complaint regarding interference to an authorized user in the aeronautical band -- a safety of life service -- on 21.964 MHz. According to the FCC, the complaint "Concerned a male subject talking and interfering with the control and monitoring of air traffic over the North Atlantic." The FCC's High Frequency Direction Finding Center (HFDFC) monitored the frequency over the next few days, and on January 31, "observed a subject matching the details of the compliant transmitting on the frequency 21.965 MHz." The HFDFC noted that the subject was using the call "1600 Alaska," that the actual operating frequency was 27.025 (CB channel 6) and that the transmissions were coming from Kenai. Read more here <http://www.arrl.org/news/fcc-fines-alaska-man-for-interfering-with-air-traffic-using-cb-radio>.

==> + W1AW: W1AW'S ECHOLINK AND IRLP NODES TEMPORARILY SUSPENDED

Recent upgrades <http://www.arrl.org/news/disruptions-possible-as-arrl-reconfigures-internet-services> to the ARRL's Internet system has caused access to both the W1AW EchoLink Conference Server W1AWBDCT and W1AW's IRLP Node 4292 <http://www.arrl.org/echolink-irlp> to be temporarily suspended. Access to both W1AW systems can be expected by month's end. We apologize for the inconvenience.

==> SOLAR UPDATE

Tad "The total eclipse of the Sun <http://www.youtube.com/watch?v=mQZmCJUSC6g>" Cook, K7RA, reports: In last week's Solar Update <http://www.arrl.org/news/the-k7ra-solar-update-226>, I reported a blast of energy from a solar flare headed our way, with a predicted arrival of Saturday, July 14. The CME hit at 1800 UTC, and had a huge effect on propagation and geomagnetic indices. The next day, the planetary A index was 60, the mid latitude A index was 39 and the high latitude college A index was 88. Conditions haven't been this disturbed since March 9, 2012, when the mid-latitude A index was 57, planetary A index was 67 and the college A index was 107. All other indices were lower, with the weekly average of daily sunspot numbers down more than 16 points to 104.7, while the average daily solar flux was down 25 points to 141.8. The latest prediction from NOAA/USAF has solar flux at 100 on July 19, 95 on July 18-22, back to 100 on July 23, 105 on July 24-25, then 125 and 150 on July 26-27, and 165 on July 28-August 2. The

predicted planetary A index is 5 on July 19-21, then 12 and 8 on July 22-23, 5 on July 24-26, then 25 on July 27, 20 on July 28-29, 10 on July 30-31, 15 on August 1-2, 10 on August 3-4, 8 on August 5, and back down to 5 on August 6-22. Look for more on the ARRL website on Friday, July 20. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Carly Simon's You're So Vain <http://en.wikipedia.org/wiki/You%27re_so_vain>.

==> TAPR ACCEPTING ORDERS FOR HERMES SDR TRANSCEIVER

Tucson Amateur Packet Radio (TAPR <http://www.tapr.org/>) is now accepting orders for the Hermes software-defined transceiver. Hermes is part of the non-profit openHPSDR project. Spanning 50 kHz-55 MHz, the Hermes transceiver <http://openhpsdr.org/wiki/index.php?title=HERMES> includes a direct down-conversion receiver, a direct up-conversion 500-mW transmitter and a gigabit Ethernet interface -- all on one board. Also on board is an RF-quiet switch-mode power supply, allowing Hermes to run from a single 13.8 V dc source. The transceiver is completely assembled and tested. The price of the Hermes transceiver is $895 for TAPR members; the price for non-members is $940. The order page <http://tapr.org/kits_hermes.html> will close Wednesday July 25. TAPR states that there will be only one production run of Hermes boards and that they will build only the number necessary to fulfill orders received on or before the July 25 cutoff. Estimated delivery is October 15.

==> THIS WEEK IN RADIOSPORT

This week:

- July 20 -- NCCC Sprint
- July 21 -- Russian Radio Team Championship; Feld Hell Sprint
- July 21-22 -- North American QSO Party (RTTY); DMC RTTY Contest; CQ Worldwide VHF Contest
- July 22 -- RSGB Low Power Contest
- July 25 -- SKCC Sprint
- July 25-26 -- CWops Mini-CWT Test

Next week:

- July 27 -- NCCC Sprint
- July 28-29 -- New Jersey QSO Party; RSGB IOTA Contest
- July 29 -- ARS Flight of the Bumblebees

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- July 20-22 -- ARRL Montana State Convention
<http://www.arrl.org/hamfests/montana-state-convention-78th-glacier-waterton-international-hamfest>,
East Glacier, Montana
- July 26-28 -- Central States VHF Society Conference

//
Second Meeting of the ARRL Board of Directors Set for July 20-21:

Posted: 19 Jul 2012 07:22 AM PDT
http://www.eham.net/articles/28645

ARRL policy is made by its Board of Directors. The 15 voting members of the Board are the Directors who are elected by the ARRL members in their respective divisions. The Board meets in January and July, usually in the Hartford area. ARRL members also elect Vice Directors who may attend the meetings.

//
Astronaut Don Pettit, KD5MDT, Chats with ARRL:

Posted: 19 Jul 2012 07:19 AM PDT
http://www.eham.net/articles/28644

NASA Astronaut Don Pettit, KD5MDT, sat down with ARRL News Editor S. Khrystyne Keane, K1SFA, on Thursday, July 12, for a one-on-one interview about ham radio and life on the International Space Station (ISS). Pettit returned from the ISS on July 1 where he served as part of Expedition 31, spending 193 days in space.

//
FCC Denies Arizona Ham's Petition to Extend PRB-1 to Private Contracts:

Posted: 19 Jul 2012 07:23 AM PDT
http://www.eham.net/articles/28643

In January 2012, Leonard Umina, W7CCE, of Gilbert, Arizona, filed a Petition for Rulemaking, asking the FCC to "expand its policy of limited preemption of state and local regulations governing amateur station facilities to preempt private land use regulations such as covenants, conditions, and restrictions and rental agreements that limit amateur licensees' ability to deploy antennas."

//
FCC Fines Alaska Man for Interfering with Air Traffic Using a CB:

Posted: 19 Jul 2012 07:18 AM PDT
http://www.eham.net/articles/28642

On July 17, the FCC announced that it had issued a Notice of Apparent Liability for Forfeiture and Order in the amount of $12,500 to Glenn S. Yamada, of Kenai, Alaska. Yamada is accused of "apparently willfully and repeatedly violat[ing] Section 301 of the Communications Act of 1934, as amended, and Sections 95.409(a) and 95.411(a)(1) and (b) of the FCC Rules by operating his CB radio without requisite Commission authorization."

//
W1AW's EchoLink and IRLP Nodes Temporarily Suspended:

Posted: 19 Jul 2012 07:24 AM PDT
http://www.eham.net/articles/28641

Recent upgrades to the ARRL's Internet system has caused access to both the W1AW
EchoLink Conference Server W1AWBDCT and W1AW's IRLP Node 4292 to be temporarily suspended. Access
to both W1AW systems can be expected by month's end. We apologize for the inconvenience.

//
TAPR Accepting Orders for Hermes SDR Transceiver:

Posted: 19 Jul 2012 07:22 AM PDT
http://www.eham.net/articles/28640

Tucson Amateur Packet Radio (TAPR) is now
accepting orders for the Hermes software-defined transceiver. Hermes is part of the non-profit openHPSDR project. Spanning 50 kHz-55 MHz, the includes a direct down-conversion receiver, a direct up-conversion 500-mW transmitter and a gigabit Ethernet interface -- all on one board. Also on board is an RF-quiet switch-mode power supply, allowing Hermes to run from a single 13.8 V dc source. The transceiver is completely assembled and tested.

//
The First Annual Antenna On the Air Party:

Posted: 19 Jul 2012 07:21 AM PDT
http://www.eham.net/articles/28639

Purpose: to get as many hams on the air as possible that weekend, and help hams know about different antennas, and hear how they get out, so they can put up one just like it. I want us hams demonstrating our antennas, so other hams, can put up better antennas if they hear one they like.

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

CT, PORTUGAL
The special event station CQ73I operates in SSB/CW/RTTY on 80m-6m
on the occasion of the 31st International Motorcycle Rally in Faro
until July 22. QSL via CT1EHX.

EA, SPAIN
To celebrate the win of the 14th UEFA European Football Championship
Spanish hams are allowed to use these special prefixes until July 31:
EA may be replaced by AO, EB by AM, and EC may be replaced by AN.

F, FRANCE
The op's F5SKJ, F6FAI, F4EJW, F4ELJ, F0GWK and F0GXK are planning to
visit the lighthouse in the bay of Morlaix on Noire Island and want
to work as TM9LF on July 21/22. QSL via F0GWK (office only) and eQSL.

FJ, ST BARTHELEMY, NA-146
Ludovic,HB9EOU, and Andre,HB9CVC, will hand out a few IOTA points
from St. Barthelemy (NA-146) signing TO2D between Jul 22 and Aug 4.
They work in SSB and RTTY from 40m-6m. QSL via HB9EOU.
See also: http://st-barth.hb9eme.ch

FO/A, AUSTRAL ISLANDS
Philippe,FO4BM, is planning an holiday style operation as TX0HF from
the Austral Islands. His destination islands are Tubuai (OC-152) and
Rurutu (OC-050), with expected activity in SSB on 20m running 100 watts
into a dipole. He is standby to get on an airplane to these islands.
QSL via F4FJH, unfortunately only direct.

FP, ST PIERRE AND MIQUELON
Yuri,VE3DZ, and Victor,VA2WDQ/VA2WA, will be active as FP/VE3DZ and
FP/VA2WA from Miquelon (NA-032) from Jul 20-31. Listen for them in CW,
SSB and RTTY on 160m-6m and also in the CQWW VHF Contest (Jul 21/22)
and RSGB IOTA Contest (Jul 28/29) which they both plan to join as TO2U.

Their preferred frequencies are:
CW: 1824, 3524, 7024, 10114, 14024, 18074, 21024, 24894, 28024 kHz
SSB: 3790, 7060/7140, 14240, 18140, 21240, 24940, 28440 kHz
RTTY: 7041, 10142, 14084, 18104, 21084, 24914, 28080 kHz
6m: 50104 kHz (CW) and 50.115 kHz (SSB)
QSLs can be requested after the DXpedition via OQRS (bureau) or
via PayPal (direct). See: http://www.to2u.contestgroupduquebec.com

G, ENGLAND
On the occasion of the upcoming Olympic Games and Paralympic Games
British HAMs are allowed to use special prefixes between Jul 21 and
Sep 9. Single letter prefixes may be supplemented with the letter 'O'
and in double letter prefixes the second one is replaced by an 'O'.
For example:
M3aaa becomes MO3aaa
G3aaa becomes GO3aaa
GM3aaa becomes GO3aaa
2E0aaa becomes 2O0aaa
2M0aaa becomes 2O0aaa
GX3aaa becomes GO3aaa
See also: http://www.rsgb.org/news/articlelinks.php?id=0263

The special event station GB4TDF celebrates the 99th anniversary of the
Tour de France until Jul 23 operating from Hancocks Radio Hut (WAB SD67
Loc IO84rd), Low Bentham, Lancaster, Lancashire (EU-005, WLOTA 1841).
The OPs are Barrie,G1JYB, Stephany,G1LAT, and members of the "Sands
Contest Group". QSL via bureau, eQSL.

The "Riviera Amateur Radio Club" will be operating a portable station
from Brixham Breakwater (Loc IO80FJ, WAB SX95) on Jul 19/20 supporting
RNLI Torbay's Lifeboat Week 2012. The club callsign MX0RIV will be QRV
on all HF/VHF bands. QSL via bureau. See: http://www.rivieraarc.org.uk

GW, WALES
The special event callsign 2O12W (Two Oscar One Two Whiskey) will be
activated between Jul 21 and Sep 9 on all bands and modes from Barry
in Wales to celebrate the London 2012 Olympic and Paralympic Games.
QSL via GW1FKY. See also: http://www.2o12w.com

HC, ECUADOR
Rick,NE8Z/HC1MD, will once again be active from here from Jul 21-31.
He plans to activate these areas with the following callsigns:
HC1MD from Cumbaya (CW/RTTY), HC1MD/HC1 from Mount Cayambe (CW),
HC1MD/HC3 from Loja (CW) and HC1MD/HC5 from Cuenca (CW). Activity will
be in CW/SSB/RTTY on 40m-10m, using a TS-50s/AT-50 with a Carolina
Windom (40m-10m) antenna from Cumbaya. From all other areas he will
operate portable using an OutBacker antenna (40m-10m). QSL via K8LJG.
See also: http://webpages.charter.net/ne8z

KL7, ALASKA
Rick,K6VVA, activates several islands as K6VVA/KL7 from Jul 19-26:

Jul 19-21: Crescent Island (NA-172, USi new, 2nd North Western County)
together with Mike,K9AJ
Jul 23/24: Barter Island (NA-050, USi AK044S, 4th Central County)
Jul 25/26: Endeavor Island (aka Endicott, NA-004, USi AK046S,
2nd North Western County)
Rick prefers working mostly in CW on the high bands (30m-10m).
Note that this schedule is subject to change due to local weather.
QSL via N6AWD. See also: http://www.k6vva.com/iota/na172

OH, FINLAND
Henry,OH3JF, celebrates the achievement of his CQ county award with the special callsign OG3077F until Apr 3, 2017. He has succeeded in working all 3077 counties of the United States in CW since 1987. QSL via OH3JF.

OZ, DENMARK
In connection with the largest Scout Jamboree ever held in Denmark, a special event station with the callsign OZ12SJ will be very active from Holstebro running five stations on all bands from Jul 21-29. They also offer a license course and the option of actually taking a license test on site. The callsign is expected to be active in the DMC RTTY Contest, CQWW VHF Contest and the RSGB IOTA Contest. QSL via bureau.

SV, GREECE
Members of the Radio Amateur Association of Greece (RAAG), the National Technical University of Athens and DXPlus Hellenic Radio Amateur M.I. Team will activate the special callsign SX1GR from the "Sacred Rock of Acropolis of Athens" in CW/SSB/RTTY/PSK31 on all HF bands, 6m and 2m from July 18-22. The station will be active during the hours of museum operation. A special QSL award and special engraved QSL plaque will be available on request for any QSO. See QRZ.com for more details.

UA, EUROPEAN RUSSIA
Victor,UA1OEJ, will show up in SSB and digital modes signing UA1OEJ/p from the Solovetskiye Islands (EU-066) from Jul 22-31. QSL via UA1OEJ. See also: http://ra1ohx.ru

V3, BELIZE
Henry,W5HNS, Jay,K0BCN, and Marty,W5MRM, will hand out a few points as V31WH, V31MX and V31MO from Caye Caulker (NA-073) from Jul 23-31. They will work in CW and SSB on 40m-10m using a 40m dipole and a Hexbeam. They have not made a decision about PSK or RTTY yet since they have only one transceiver at their disposal. They will sign V31MX in the upcoming RSGB IOTA Contest. QSLs via homecalls, LoTW.

VP9, BERMUDA
Kyle,WA4PGM, will be on honeymoon with his wife Pam in Hamilton Parish, Bermuda (NA-005, Loc FM72PI) from Jul 13-22. Operating as time permits, using the call VP9/WA4PGM, during the IARU HF Championship (Jul 14/15), CQWW VHF Contest (Jul 21/22) and the North American RTTY QSO Party on Jul 21/22. QSL via homecall.

W, USA
The Montgomery County Amateur Radio Club (MARC) in Maryland will use
the special call W3M during its Fieldday operations on July 23/24. The
operation will take place from Davis Airport in northern Montgomery
County (FM19kf). See also: http://www.marcclub.org

YA, AFGHANISTAN
The Croatian HAMs Maj,9A7TJ, and Vlado,9A3QM, are members of the UN
ISAF forces. They are working as T6TJ and T6VT with wire antennas from
Camp Marmal in Mazar-e-Sharif until mid September. QSLs via 9A6AA.
See also: http://www.inet.hr/9a6aa

DXCC: Following operations were approved for DXCC credit:
9X0PY (Dec 24, 2011, until Jan 7, 2012)
S21YD (1994, 1995, 1998 and 1999)

WHQS Award: Once again the Polish amateur radio journal "MK QTC" sponsors
the W-HQ-S award for working at least ten HQ stations during the
IARU HF World Championship.
See also: http://suchacz.eu/viewpage.php?page_id=4

WRTC 2014: The stations of the WRTC 2014 were tested from several locations
during the IARU HF Championship. They joined the contest as K1GQ, K1RQ,
K1ZD, N2KW, N9NB, NI1L, W1HH, W1MA, W1MJ, W1SJ, W1UE, W1UJ and WB1Z.
More information about the WRTC can be found at http://www.wrtc2014.org

PH9HB/am, Amateur Radio from Cloud Nine: DXCoffee had an interesting
interview with Jerry, PH9HB.
http://www.dxcoffee.com/eng/2012/07/09/ph9hbam-amateur-radio-cloud/

on air as SV8/SV1CDY from Aegina Island (Loc KM17rs) is working mostly
on 6m (preferably 1600 UTC on 50.130-50.140 MHz) and of course during
the RSGB IOTA Contest at the last weekend of July. QSL via homecall.

EU-123, GM/MM, Shottish Coastal Islands: Iain,MM0TFU/p, operates from
Blackwaterfoot on the western side of Arran (IOSA CL01, SCOTIA CS14)
from Jul 19-28. He plans to join the RSGB IOTA Contest as well.
QSL via homecall (bureau/direct), LoTW preferred.

EU-178, ES0/8, Parnumaa County/Saaremaa County South group: Dominik,SQ7OXU,
and Jack,SP7DPJ, are undertaking an IOTA DXpedition to the island
Ruhnu (WLOTA 4244, Loc KO17PT) from Jul 23-30. They will work as ES0W
and also during the IOTA Contest. QSL via SP7DPJ.
See also: http://www.sp7dpj.com

EU-179, UR, Black Sea Coast group: Members of the "Beer Lovers Radio Club
International, Dnepropetrovsk Radio Club" and the "Tavria Radio Club"
(Alex,UR5GDX, Ivan,UR8GX, Nick,UR3GO, Leo,UT7CL, and Roman,UR3CJR) will
be QRV in CW, SSB and RTTY from Kalanchakskiye Island (UIA BS-008) from
Jul 24-30. They will join the IOTA Contest as UT7E/p.
QSLs for UT7E/p via UT7EZZ (bureau/direct), all others via homecalls.

EU-182, UR, Black Sea Coast group: UT9IO/p plans to become active in CW/SSB/
digital modes on the HF bands from Zmeinyi Island from Jul 21-29. He
plans to take part in the IOTA Contest as well. QSL via homecall.

NA-067, W4, North Carolina State East group: Jon,WB8YJF/4, will be QRV again
from Ocracoke Island (USi NC001S, WLOTA 0466) working in CW, RTTY and
SSB on 80m-10m from Jul 22-29 (incl. IOTA Contest). QSL via homecall.

Lighthouse activities

FP/VA2WA LH 1417 Jul 20-31
FP/VE3DZ LH 1417 Jul 20-31
TK12IOTA/p LH 0098 Jul 18
TO2D LH 1395 Jul 23-31

WFF activities

DLFF: The German club Elbe-Elster (Y43) plans to spend its fieldday in the
nature park "Niederlausitzer Heidelandschaft" (QTH Zeischa, DLFF-091)
from Jul 20-22. They will be QRV as DL0LIB/p and with their individual
homecalls/p on HF and VHF. See also: http://www.y43.info

FFF: Daniel,F8GAF, will be QRV from FFF-372 on Jul 22. QSL via F8GAF.

YVFF: YW2OM is the callsign of a DXpedition to the Sierra Nevada National
Park (YVFF-042, YVAO-01, YVMA-01-02). Their location will be the

"Observatorio Astronomico Nacional de Llano del Hato" in Merida from
Jul 19-24. Operation is planned to take place in SSB, CW and digi mode
on 2m-160m. QSL via YV5AJ (bureau/direct).

New DXCC entity Kosovo soon?

Almost four and a half years after obtaining its independence the Kosovo, former province of Serbia, shall receive its full sovereignty in September. This was decided by the International Steering Group, as the Austrian Foreign Minister Michael Spindelegger announced in Vienna last Monday. Accordingly, the group decided to end international supervision with immediate effect to support the independence of Kosovo. 25 countries are belonging to the International Steering Group, including Germany and most other EU countries, the United States and Turkey. The concept of "supervised independence" was invented by the former Finnish UN Special Envoy for Kosovo Martti Ahtisaari. The meeting of the group in Vienna was attended also by the Kosovo Prime Minister Hashim Thaci.

Many thanks for contributing to this issue of the DXNL are going to:

Amateur Radio Newsline(tm) Report 1823 - July 20 2012

Amateur Radio Newsline report number 1823 with a release date of July 20 2012 to follow in 5-4-3-2-1.

The following is a QST. The FCC turns down a request to extend PRB-1 to overturn deed restrictions, the ARRL says a White House Executive Order on telecommunications should not impact ham radio, proposed changes in British laws governing spacecraft could make microsat launches by UK hams possible and the FCC continues its crackdown on unlicensed broadcasters. Find out the details are on Amateur Radio Newsline(tm) report number 1823 coming your way right now.

(Billboard Cart Here)

RADIO LAW: FCC DENIES PETITION TO EXPAND PRB-1 TO COVER CC&R

Deed restrictions and other land use covenants that limit the antenna rights of many hams will remain in place for the time being. So says the FCC in its July 16th denial of a rule making request filed by Leonard Umina, W7CCE, of Gilbert, Arizona. One that sought to expand the policy of limited Federal preemption of state and local regulations governing amateur towers and antennas. Amateur Radio Newsline's Don Carlson, KQ6FM, has the latest:

--

In its denial, the FCC told Leonard Umina, W7CCE, that when it codified PRB-1 as Section 97.15(b) of the Amateur Service Rules back in 1985, the mandate to state and local municipalities were that they reasonably accommodate the antenna needs of ham radio operators. But at the same time the FCC purposely avoided extending this preemption to cover CC&Rs and other land use restrictions in deeds and bylaws that curb the installation of antennas and associated support structures.

When the matter was brought before it again in 2001 the Commission noted that its decision within the framework of PRB-1 to exclude CC&Rs from its preemption policy was based on the fundamental difference between state and local regulations as opposed to land use restrictions. The latter are considered as private contractual terms to which the purchaser of a property voluntarily agrees to. The FCC also concluded in its PRB-1 decision that there had not to date been a sufficient showing that CC&Rs prevent Amateur Radio operators from pursuing the basis and purpose of the Amateur Service.

Lastly, and perhaps most important, the FCC pointed out to W7CCE that should Congress see fit to enact a law mandating the expansion of its limited preemption policy to include more than state and local regulations, it would do all it could to expeditiously act to fulfill such an order. It noted that shortly after Umina filed his request that Congress enacted a directive regarding an investigation into the uses and capabilities of Amateur Radio Service communications in emergencies and disaster relief. This report will identify impediments to enhanced Amateur Radio Service communications and provide recommendations regarding the removal of such impediments. This could conceivably include unreasonable or unnecessary private land use restrictions on residential antenna installations.

In closing, the FCC noted its belief that it would be inappropriate and premature for the regulatory agency to consider modifying its policy until after Congress has an opportunity to review the report and decide whether to enact laws mandating the expansion of PRB-1 to include more than state and local regulations.

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, in Reno.

--

The order denying Umina's Rule Making request was signed by Scot Stone who is the Deputy Chief of the Mobility Division of the FCC's Wireless Telecommunications Bureau. As we go to air, its unknown if W7CCE plans to appeal the FCC pronouncement on his rule making request, or await the outcome of the current Congressional inquiry. You can read the complete text of the FCC decision on-line at tinyurl.com/no-ccr-overide. (FCC)

**

RADIO LAW: ARRL SAYS NEW EXECUTIVE ORDER POSES NO THREAT TO HAM RADIO

According to the ARRL, an executive order dealing with telecommunications poses no threat to the amateur radio service. Amateur Radio Newsline's Norm Seeley, KI7UP, reports:

--

On Friday, July 6th the White House released an Executive Order signed by President Obama that addresses the National Security and Emergency Preparedness communications functions of the federal government. Contrary to some concerns raised in a few amateur radio circles, the order does not appear to contain any threat to the Amateur service or its ability to continue support communications during times of emergency or disaster. It also poses no threat to hams for continued access to their spectrum.

Dan Henderson, N1ND, is the League's Regulatory Information Manager. He explained that the purpose of the new entity, which would be created within the Executive Branch by this Order, appears to be to plan for future National Security and Emergency Preparedness communications and

to insure survivability, hardness and interoperability. It will also develop a long-term strategic plan for National Security and Emergency Preparedness communications.

Henderson noted that based on the Amateur service's ongoing, positive working relationship with officials at the Department of Homeland Security's Office of Emergency Communications, it is hard to envision that any new management plan would not include Amateur Radio. N1ND says that nothing in this Order directly affects amateur radio's daily operations.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

N1ND says that a good summary of the content of the Order can be found online at tinyurl.com/new-communications-order. (ARRL)

**

HAM RADIO IN SPACE: PROPOSED LAW CHANGES COULD MAKE SPACE MORE FRIENDLY FOR UK HAM RADIO

Some good news for ham radio space enthusiasts in the UK. Proposed changes in laws governing satellites launched any United Kingdom entity could soon become friendlier. Amateur Radio Newsline's Bill Pasternak, WA6ITF, reports:

--

A posting on the United Kingdom's Space Agency Web Site has announced what is called the "Reform of the Outer Space Act 1986 Consultation". These are a pair of proposals that, if enacted as written, could make United Kingdom CubeSat launches more ham radio friendly.

The key aspects of the changes are the proposals to waive the capped liability and insurance requirement for in-orbit operation of any satellite that meets the criteria of a CubeSat. Also, to remove the requirement for unlimited indemnity from satellite operators.

The existing United Kingdom Outer Space Act imposes heavy additional costs up to £50,000 Pounds or $78,300 US dollars a year on those wishing to launch small educational CubeSats. That additional cost has acted as a major deterrent and to date no such UK CubeSat has been launched.

The United Kingdom Outer Space Act covers all UK satellites irrespective of size. This, from tiny low cost educational CubeSats up to large commercial satellites that cost 10's of millions of dollars to manufacture and launch.

The UK Space Agency says that responses to the Consultations are due by August 31st.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, watching the skies from outside the Newsroom in Los Angeles.

--

By the way, a Consultation in the United Kingdom is very similar to a Notice of Proposed Rule Making here in the United States. (G3VZV, AMSAT-UK)

**

HAM RADIO IN SPACE: NEW ASTRO-HAMS ARRIVE AT THE ISS AS PART OF THE EXPEDITION 32 CREW

Three ham radio space fliers arrived safely at the International Space Station early Tuesday, July 17th. This, for a four-month stay while also bringing the orbiting outpost back to its full crew complement of six. Amateur Radio Newsline's Bruce Tennantt, K6PZW, reports:

--

The Soyuz space capsule carrying NASA astronaut Sunita Williams, KD5PLB; Russian cosmonaut Yuri Malenchenko, RK3DUP and Japanese space explorer Aki Hoshide, KE5DNI, docked with the station at 12:51 a.m. Eastern Daulight Time on Tuesday, July 17th . This following a two-day flight from Baikonur Cosmodrome in Kazakhstan.

At docking time, the Soyuz spacecraft and space station were at an altitude of 251 miles over North-Eastern Kazakhstan. The Soyuz parked itself at an Earth facing docking port on the station's Russian built Rassvet module. After the hatches were opened between the Soyuz and ISS, Williams, Malenchenko and Hoshide moved to the ISS and joined their fellow Expedition 32 crew members Sergei Revin; Gennady Padalka, RN3DT and Joseph Acaba, KE5DAR.

Padalka, Revin and Acaba have had the space station to themselves since July 1st. That's when three previous crew members returned to Earth and brought the station's previous Expedition 31 to a close.

Padalka, Revin and Acaba return to Earth in mid-September. When that happens, Sunita Williams, KD5PLB, become the commander of the I-S-S team. She, Malenchenko and Hoshide are scheduled to depart the station on November 12th.

For the Amateur Radio Newsline, I'n Bruce Tennant, K6PZW, in Los Angeles.

--

As an aside, this latest group crew members arrived at the International Space Station exactly 37 years to the day after the world's first truly international spacecraft meeting took place on-orbit. That was the famed docking between a NASA Apollo spacecraft and a Russian Soviet Soyuz 19 capsule during the Apollo-Soyuz Test Project in 1975. Many believe that's what laid the groundwork that led

to the International Space Station that is on-orbit today. (Published news reports)

ENFORCEMENT: ANOTHER ALLEGED UNLICENSED BROADCASTER BUSTED

The FCC has issued a Notice of Apparent Liability in the amount of $10,000 to Florida resident Michael Gregory. This for his alleged operating an unlicensed radio station calling itself "Down South Radio 305" on 92.7 MHz in the city of Miami.

This saga began to unfold last March, That's when the FCC received a complaint that lead agents from the Miami office of the Enforcement Bureau to monitor for the station. They soon heard a person identify himself as "DJ Miami of 92.7 Heavy FM" and advertise the website www.whvy927.com. Agents tied Gregory to the site by finding his domain name registration as well as his photo online.

The agents then went out on a transmitter hunt and traced the source of the transmission to an antenna on the roof of a commercial building in Miami. Records showed no one was authorized to operation a station on 92.7 MHz, nor at that location.

While waiting in the lobby for the building owner, the agents actually met Gregory. He took them to his leased suite, admitted he ran the station, and turned off the transmitter. Now Gregory has 30 days to pay the proposed fine or to file an appeal. (FCC)

RADIO CRIME: MONTREAL STATION TORCHED AFTER CRITICIZING FORMER HAITIAN DICTATOR

A Haitian radio station in Montreal, Canada, has been hit by arsonists. This, after hosts criticized the country's former dictator.

CPAM 1610 AM was set ablaze following calls by show hosts for a criminal trial for Jean-Claude Duvalier, who returned to that nation last year.

CPAM's north-end administrative offices were partially destroyed and the studio suffered water damage, rendering it useless. A spokesperson for the Montreal fire department said the front window of CPAM 1610's studio was smashed and a fire lit near the broken glass at about 4 a.m.

Monday July 2nd. Another fire was started at the back of the second floor where the station's office is located, he said.

Engineers had the station back on the air about 10 hours after the attack from an alternate studio location. According to its management, CPAM is a beacon for the more than 100,000 Haitian expatriates in Montreal who form the largest such community in Canada. (Montr&#65533;al Gazette, B&C)

**

RADIO HAPPENINGS: ITALY CLOSING NATIONAL SOUND ARCHIVES

Italy is shutting down its famed National Sound Archives. This as a likely result of the continuing economic downturn that has hit many European nations.

On July 6th, a simple 12 line document was signed by the government to shut down the archive of priceless audio history dating back to the dawn of the machine recording. According to one source there are close to half a million recordings housed in the Italian archive.

The big concern now among preservationists is that unless another such museum such as the United States Library of Congress takes over the Italian archive, that it could wind up being sold off on the streets or on an on-line auction site, piece by piece. More is on-line at www.artsjournal.com (Arts Journal, Critical Distance Weblog)

**

HAM STUFF: NEW FREQUENCY CHART AVAILABLE FROM US GOVERNMENT BOOKSTORE

If you have ever had the yearning to own one of those nifty United States radio spectrum posters to hang on your wall, now is your chance to get one. Properly titled the United States Frequency Allocations: The Radio Spectrum Chart, the very latest edition is now available from U.S. Government Printing Office Book Store at a cost of $12. To order yours, take your web browser to tinyurl.com/big-frequency-map and follow the directions you will find there. (RW, E- News, others)

HAM HAPPENINGS: UK SPECIAL EVENTS STATIONS FOR THE 2012 OLYMPICS

As part of the celebration of the 2012 London Olympics and Paralympics, two flagship amateur radio stations will be active during the games.

The Cray Valley Radio Society will host England's Olympic celebration from the Royal Borough of Greenwich. This is home to many of London's events outside the main Olympic arena. The call-sign used at that location will be Two Oscar One Two Lima. A similar amateur radio celebration is happening in Barry, South Wales, where the call-sign will be Two Oscar One Two Whisky.

Both groups are looking to make as many contacts as possible worldwide during the Olympics. They will be on the air 24 hours a day, 7 days a week from Wednesday July 25th through Sunday September 9th. The London station will be open to the public from 10am to 4pm and the Welsh station from 10am to 5pm daily. Both are local times.

Commemorative QSLs will be available for both operations. QSL information is on-line at at www dot Two Oscar one two Lima dot com and www dot Two Oscar One Two Whisky.com. Both stations hope to contact you on the air. (Southgate)

**

HAM HAPPENINGS: K4C TO CELEBRATE THE CONSTITUTION OF THE COMMONWEALTH OF PUERTO RICO

Special Event station K4C will be on the air on July 25th to commemorate the 60th anniversary of the Constitution of the Commonwealth of Puerto Rico. According to the Movimiento Radioaficionados which is sponsoring the operation, the purpose of the activity is to commemorate this important date for citizens of Puerto Rico.

Operations will take place on the campus of the National Park Julio Enrique Monagas of the Municipality of Bayamon beginning at 1400 UTC. Activities will be on the 40 through 10 meter bands, and locally on the chain of repeaters operated by the club. QSL via WP4NPC. (KP3CB)

NAMES IN THE NEWS: AO-7 DISTANCE RECORD BROKEN AGAIN BY AC0RA AND OM3BD

July 4th saw AC0RA and OM3BD set yet another world distance record using ageing AMSAT-OSCAR-7 ham radio bird. This by breaking their own record set just 48 hours earlier.

The new distance record is 7903.55km comfortably exceeding the previous contact over a path of 7849km by 54.55 kilometers.

OM3BD was in Grid Square JN88mf. He says that AC0RA once again woke up early and this time drove 150 miles to grid EN41ad. They had a 30 second contact at 09:49 UTC to set their latest distance record.

Recordings, pictures, and further information are on-line at tinyurl.com/ao7-dx-record. (Southgate)

THE CHANGING OF THE GUARD: WRITER H. WALTER MAXWELL - S.K.

Famed writer M. Walter Maxwell, W2DU, passed away on July 3rd at his home in DeLand, Florida.

Known Better as Walt Maxwell. W2DU was best known in the amateur radio circles for his ground-breaking articles, "Another Look at Reflections." These were published in QST Magazine in a seven part series from 1973 to 1976,and explained in plain English concepts such as line loss, SWR, baluns and antenna tuners.

The articles were later compiled into a book, titled Reflections: Transmission Lines and Antennas, that included additional material on matching networks, antennas and the Smith Chart. It was first published by the ARRL in 1990 and went through several editions. Later editions

were published by CQ Communications.

W2DU is survived by his spouse, Jean Binkley Mayhew, three sons, William W. Maxwell of DeLand, Florida, Richard A. Maxwell of Marietta, Georgia, and John R. Maxwell of Gainesville, Florida, and one daughter, Susan M. Glasnapp of Delray Beach, Florida.

More details of his life and work are available on his website at www.w2du.com. At the time of his passing, Walt Maxwell, W2DU, was age 93. (ARRL, others)

CHANGING OF THE GUARD: FAMED HAWAII BEACON KEEPER PAUL LIEB, KH6HME-SK

Hawaii's weak signal legend, Paul Lieb , KH6HME, has also become a Silent Key. According to Gordon West, WN6NOA, who spoke to the family, Lieb was visiting his sister and other relatives on the U.S. mainland. Leib's sister told WB6NOA that on Sunday night July 15th, KH6HME had dinner with them, went to bed, and died peacefully in his sleep.

Paul Lieb, KH6HME, maintained four VHF and UHF propagations beacons atop the Mauna Loa volcano which were regularly received along the U-S west coast. This usually took place in July when troposphere conditions permitted. And it was not unusual for KH6HME to make the 3 hour drive to the 8200 foot site of the beacons to maintain them and get on the air himself to be a bit of rare VHF and UHF DX. West says that while they are currently on the air that the long term fate of beacons is unknown.

As we go to air, funeral arrangements for Paul Lieb, KH6HME, were pending. (N6CL, WB6NOA)

**

HAM RADIO IN SPACE: FITSAT-1 - A VISUAL MORSE CODE BIRD

Call this one visual Morse code from space. This with word that the FITSAT-1 ham radio cubesat will carry an optical communications experiment that aims to write in C-W across the night sky using super high intensity LED's as a lighting source.

FITSAT-1 will be carried to the International Space Station on July 21st from where it will be deployed sometime in September. For more information see www.uk.amsat.org/2037. (AMSAT UK)

**

WORLDBEAT: FRANCE WILL NOT PREEMPT DIGITAL RADIO FOR RFE

Digital radio may not come into being in France. According to the daily newspaper Les Echos, the French government has decided not to preempt digital radio frequencies for Radio France exclusive use.

In May, telecommunications regulator CSA received more than 178 applications for the cities of Paris, Marseille and Nice. It also announced plans to open a call for digital terrestrial licenses for France's next 20 biggest cities.

It appears as if the public service broadcaster, which has first right of refusal on frequencies, will thus not go digital, in line with certain private groups including RTL, NRJ and NextradioTV.

The French government is expected officially to announce its decision on this matter in the coming days. However, if reports are true, observers say that they doubt the digital system will be able to move forward in France. (RW)

**

WORLDBEAT: RF EXPERIENCED WITH CONTROL SYSTEM IN WESTERN SOUTH AFRICA

Interference problems are being experienced by radio amateurs in the Paarl and Stellenbosch Municipal areas of South Africa. That's where a load control system is currently being installed to switch a geyser off during peak hours.

According to the South African Radio League, this unit causes disturbances right through the High Frequency spectrum. Word is that South African telecommunications regulator ICASA has investigated the complaints and is currently having discussions with the Municipal officials and the South African Bureau of Standards regarding a fix. (SARL)

**

DXCC NEWS: RWANDA AND BANGLADESH APPROVED FOR DXCC CREDIT

Several more operations have been approved for DXCC credit. According to Bill Moore, NC1L, who is the ARRL Awards Branch Manager, these are the 9X0PY DXpedition to Rwanda that ran from December 24, 2011 through January 7, 2012. Also approved are the S21YD Bangladesh operations for 1994, 1995, 1998, and 1999. If you have had cards for any of these rejected in the past please contact Bill via e-mail to bmoore (at) arrl (dot) org to be put on the list for an update. (ARRL)

**

In DX, word that UA1OEJ will be active stroke P from Solovetsky Islands from July 22nd to the 31st. Operations will be on the HF bands using SSB and the Digital modes. QSL via his home callsign.

JA8COE will once again be active stroke 8 from Yagishiri Island between July 27th and the 29th. No word on what bands or modes will be used. QSL via his home callsign, direct or by the bureau.

A team of Saudi operators will activate Al-Dhahrah Island as 7Z7AB possibly between October 1st and the 15th. More details and a Web page will be forthcoming. Meantime keep an eye on their page on QRZ.com.

K9HZ will once again be active as J68HZ from his villa at Labrelotte Bay, St. Lucia. Listen out for him between August 1st and the 18th on 80, 40 and 20 meters using CW and SSB. QSL to KH9Z.

OH1VR and OH3JR will be operational stroke VK9 from Lord Howe Island between November 17th and the 27th. Activity will be on 160 through 6 meters using CW, SSB and RTTY. QSL only direct via their home callsigns with a self addressed envelope and an International Reply Coupon to cover return postage.

5B4AIF will be active as E51E from a villa in Tautu Village on Aitutaki Island between December 10th, 2012 and January 5th, 2013. QSL only via EB7DX.

Lastly, members of Russia's Armed Forces Amateur Radio Union will be on the air as R100WWS from many areas of that nation between August 10th and the 18th. This operation is to celebrate the 100th anniversary of the Military Air Forces of Russia which were formed on August 12, 1912. Activities will be on all bands and using all modes. QSL via RV3YR.

(Above from various DX news sources)

**

THAT FINAL ITEM: STOPPING COPPER THEFT IN ITS TRACKS

British Telecom is taking on copper cable thieves. Amateur Radio Newsline's Jim Damron, N8TMW, has the details:

--

A new tool has been unveiled in the United Kingdom to literally locate copper wire thefts as they are taking place.

Called the Rapid Assessment British Telecom Incident Tracker or RABIT, this computer based program has the ability to monitor all 120 million kilometers of cable on British Telecom's phone network.

RABIT is a real-time system based on a neural network that has been trained to sense the difference between a telecommunications cable being severed and a cable that has gradually failed. It does this by undertaking line tests and bandwidth measurements to home in on a telltale signature of a cable cut. This event data is then immediately plugged into an incident monitoring system which gives British Telecom's security staff a national view of trouble spots on its networks, including cyber attacks.

I'm Jim Damron, N8TMW, in Chareston, West Virginia, reporting.

--

The industrial scale theft of copper telecommunications cables is a massive world-wide problem. In the UK alone, cable worth £770 million pounds was stolen from overhead and buried telephone lines and railway signaling systems in 2011. (New Scientist)

ERIN KING, AK4JG, NAMED 2012 AMATEUR RADIO NEWSLINE☐

"YOUNG HAM OF THE YEAR"

(Santa Clarita, California) ☐ Erin King, AK4JG, a 17-year-old from Columbus, Georgia, who re-founded her high school's radio club and then lofted a ham radio-carrying balloon to over 90,000 feet, recovered the flight data and used it to produce a truly striking video of that flight, has been named as recipient of the 2012 Amateur Radio Newsline Young Ham of the Year Award.

Erin is the daughter of Paul, K4ETY, and Patricia King. She has two siblings: Brandon, age 16 and Rachel, age 15. Erin became a licensed radio amateur in 2009 and now holds an Extra Class license. She is a member of the ARRL, the Columbus Amateur Radio Club, and the Russell County Radio Club. She enjoys operating on local VHF and UHF repeaters as well as phone and digital modes on the High Frequency amateur radio bands. She is looking forward to mastering Morse Code as her next amateur radio challenge.

Erin became interested in amateur radio after joining a club at her high school dealing with robotics and then ham radio-equipped high-altitude balloon launches. This school group has participated in FIRST Robotics competitions, and Erin has twice been Team Lead for Programming. The club also launches several high-altitude balloon missions each year, in a program called DREAMS. They have flown various scientific experiments as part of these missions, in addition to planning, building, and integrating radios, Global Positioning System (GPS) units and TNCs to track and recover the balloons. To facilitate these activities, the group□s sponsor, Luther Richardson, KI4AOJ, has encouraged the students to obtain their amateur radio licenses.

A subset of this group, including Erin, has participated in the Massachusetts Institute of Technology's (MIT's) "InvenTeam" competition, designing and building a portable lightning detector and early warning system. In addition, Erin re-started the Columbus High School Radio Club and served as its president for the past two years. The club was active in the 1950s and '60s, and Erin's great-grandfather (the original K4ETY) was one of its mentors at that time. The new club obtained the callsign W4CHS (Columbus High School) and has been active on the air.

Erin's involvement with amateur radio and FIRST Robotics has helped fuel her interest in science and engineering. Last year, she applied for early admission to both Georgia Tech and MIT; she was accepted to both and will be attending MIT this fall.

Inside the shiny tube which contained Erin□s MIT acceptance letter was a note suggesting that the students □hack□ their tubes, meaning to do something cool with them, in a long-standing tradition of MIT hacks or stunts. Erin chose to send her tube to near-space.

Drawing on her ballooning experience, Erin planned, built, integrated, and tested a complete new tracking setup to fit into the very small shipping tube. The payload consisted of two GPS units, two custom-made antennas, one Argent Data OpenTracker+ kit (which Erin built), one handheld radio, and a fellow ham□s Byonics Pocket Tracker, a self-contained 100-milliwatt tracker/radio combination in an Altoids® tin. Erin also talked her mother into letting her use mom□s brand new GoPro Hero HD video camera.

With the assistance of a group of hams from the Columbus Amateur Radio club, Erin launched her balloon from Lumpkin, GA. A couple of hours later, she and the tracking team successfully recovered it, along with the complete HD video record of the flight. Erin took this video, as well as other photos and videos taken of the launch activities, and compiled it

into an 8-minute presentation, complete with background music. She posted it to YouTube, and put a link to it on the MIT hack-the-tube site (see). According to YouTube statistics, Erin☐s video has been viewed thus far in excess of 82,500 times.

This past May, Erin was invited to participate in no less than three forums and sessions at the 2012 Dayton Hamvention®. These included the 25th anniversary ☐Youth Forum,☐ the ☐Ham Radio Town Meeting☐ and an ☐ARRL Expo☐ presentation where her video was screened.

Award Ceremony

The 2012 Amateur Radio Newsline☐ "Young Ham of the Year Award" will be presented on Saturday, August 18th at the Huntsville Hamfest in Huntsville, Alabama. As the 2012 "Young Ham of the Year," Erin will receive -- courtesy of Yaesu USA -- an expense-paid trip to the Huntsville Hamfest, along with a gift of Yaesu brand ham radio equipment. CQ magazine will treat her to an expense-paid week at Spacecamp Huntsville, and will present Erin with a variety of CQ products. Amateur Radio Newsline☐ will provide Erin with a commemorative plaque at the award ceremony. Once again, the cost of year's plaque has been underwritten by Dave Bell (W6AQ), President of DBA Entertainment Inc., Hollywood, California. Heil Sound Ltd. will also be presenting Erin with a ham radio-related gift.

The presentation of the Young Ham of the Year Award has been a regular feature of the Huntsville Hamfest since 1993. This has been made possible through the generosity and kindness of the event's Planning Committee and the good offices of Huntsville Hamfest Association Vice President Charlie Emerson, N4OKL. (See http://www.hamfest.org)

This year's award ceremony will be hosted by Bill Pasternak, WA6ITF, and Don Wilbanks, AE5DW, of Amateur Radio Newsline☐, Rich Moseson, W2VU, of CQ Communications, and representatives of Yaesu USA and Heil Sound.

Award Program Background

The Amateur Radio Newsline☐ "Young Ham of the Year" award (formerly the Westlink Report Young Ham of the Year Award) has been presented annually since 1986 to a licensed radio amateur (ham) who is 18 years of age or younger and who has provided outstanding service to the nation, his/her community or the betterment of the state of the art in communications through the amateur radio hobby/service. A website with full information on the award program and background material is located at http://www.arnewsline.org/YHOTY.

Award Sponsors

The award program is sponsored by the Los Angeles, California-based Amateur Radio Newsline☐ with corporate support from Yaesu USA Corporation of Cypress, California, CQ Magazine of Hicksville, New York, and Heil Sound of Fairview Heights, Illinois.

Since 1976, Amateur Radio Newsline□ and its predecessor, the Westlink Radio Network, have been providing radio amateurs around the world with up-to-the-minute news at no cost to them. (See http://www.arnewsline.org)

The award's three major corporate underwriters are world leaders in their respective areas of Amateur Radio product support.

Yaesu USA, which has been a corporate underwriter since the inception of the award program in 1986, is considered the trailblazer in the design, manufacture and distribution of high quality amateur gear as well as commercial two-way, monitoring, marine and air-band communications equipment (See http://www.yaesu.com).

CQ magazine and its sister publications, CQ VHF, Popular Communications and WorldRadio Online, are published by CQ Communications, Inc., and are considered the trend-setting publications serving today□s modern radio amateur. (See http://www.cq-amateur-radio.com)

Heil Sound Ltd. Is considered as a world leader in the development and manufacture of new technology microphones and related audio products for professional sound reinforcement and amateur radio communications. (See http://www.heilsound.com)

The First Annual On The Air Antenna Party

Posted: 19 Jul 2012 10:09 AM PDT
http://forums.qrz.com/showthread.php?354636-The-First-Annual-On-The-Air-Antenna-Party&goto=newpost

This thread is posted on behalf of Trippy Brown, WD8OEP

The First Annual On The Air Antenna Party.

Sponsored by Trippy Brown, ac8s.

Starts: 2300Z, September 21

Ends: 0400Z, September 23

Bands: 160, 80, 40, 20, 15, 10, 6, and 2 meters

Modes: am, cw, fm, ssb.

Purpose: to get as many hams on the air as possible that weekend, and to allow hams to share information about different antennas. I want us hams demonstrating our antennas, so that others can hear how well other antennas work and make changes to their own if they hear something they like.

No matter how many contacts you are looking to make, don☐t sit this one out! Get on the air and have fun learning about and hearing new antennas, and let others learn about and hear the strength of your antenna!

Exchange: signal report, US state, Canadian province, or dx country, antenna being used, where it☐s located, for example, on a balcony, in an attic, how high up it is, and, how much power you☐re running.

An example exchange would be

☐you☐re 59 Alaska, running a long wire, in a backyard, up 10 feet, running 200 watts.☐

work once per band, once per mode.

Class, single station, single op, as many stations on as possible.

Power: must run 200 watts or less. Must run only from a fixed location, such as, your place of residence.

Logging: no logs need to be sent to me. Just take down any info about the other stations antenna that you need to know, such as what is given by the station.

The station can give as much info on the antenna as needed regarding how to build a similar antenna or where to find directions on doing so, as well as exchanging e-mail addresses, etc.

Improved reception for Brisbane's 4KQ

After a thorough trial, the Australian Communications and Media Authority has
decided to make permanent 'day/night switching' arrangements to improve
coverage of Brisbane's 4KQ.

Since 2007, 4KQ, which operates on AM frequency 693 kHz, has conducted
day/night transmitter power switching trials in Brisbane. These trials

have seen a significant improvement in the coverage of the 4KQ service into the Brisbane licence area.

The ACMA conducted public consultation on the proposal, released in January 2012, to vary the Licence Area Plan - Brisbane Radio - December 2000 (the Brisbane LAP). There was no evidence of problems with the day/night switching arrangements.

Day/night switching involves increasing the power of an AM transmitter during the day-time only. This takes advantage of the different ways that AM radio signals travel over distance, depending on whether it is day or night.

All 36 of CSIRO's Australian Square Kilometre Array Pathfinder (ASKAP) antennas have been assembled at the Murchison Radio-astronomy Observatory in VK6, Western Australia.

The antennas have been constructed by their manufacturer, the 54th Research Institute of China Electronics Technology Group Corporation with the assistance of CSIRO and local contractors.

After passing factory acceptance tests, the antennas were then disassembled and transported to the MRO, about 350 km northeast of Geraldton where they were then reassembled on site.

The assembly of all 36 antennas is an important milestone in the construction of ASKAP," said Ant Schinckel, CSIRO's ASKAP project director.

While all antennas have now been assembled at the MRO, finalisation of site acceptance testing for all the antennas is still due to take place over coming months.

Work to develop ASKAP's innovative phased array feed receivers or `radio cameras', and complex signal processing and computing systems, has also continued.

Essential infrastructure at the MRO, such as high-bandwidth optical fibre cable linking all the antennas to a new control building, is almost complete. ASKAP will be operational in 2013.

East Gippsland Amateur Radio Club would like to remind members of the up and coming AGM, the AGM will be held today, the 22nd of July at 1330 hrs. at the Bainsdale RSL Club crn of Princes hwy and forge creek road, Meals may be held from 1200 hrs., more information may be found at the club web site vk3egc.org , I'm Michael , Clubs Publicity Officer VK3HAU.

VK8

Hello this is Spud VK8ZWM from the Darwin Amateur Radio club.

Firstly our weekly gatherings on a Thursday morning between 10 and 12 at the clubrooms in sport's house waratah crescent Fannie Bay continue with a steady stream of members and visitors to the top end. Recently we saw the final alignment and testing of our 4 square array for 40 meters out on the oval opposite our clubrooms. Despite the local AM noise from the nearby transmit site the array lined up ok and tested ok much to terry and Gary's delight. We plan to use it in the RD soon, someone was heard talking about a steerable 20-meter array next mmmmm.

The next gathering of the Darwin Amateur Radio Club will be on the first of August at 7pm. The evening will start with a Special General Meeting to approve the constitutional amendments that the committee have pored over for several months and not put to the vote. We need at least 20 members there or by signed proxy vote for the amendments to pass.

Following will be a discussion about the clubs entry into the RD contest and the International Lighthouse weekend. Also up for discussion is the Swap Meet being held on the holiday Monday the 6th of August. Sellers arrive around 8am Doors open at 9am, tables $5.00 each BBQ lunch, The after lunch activity will be an auction of donated items. For further information or to book a table, contact Alan VK8AB.

That's it from me Spud VK8ZWM for now, remember keep an ear out for VK8DA in the RD especially on 40

VK5 AND MEDIA WATCH

The WIA News Broadcast can now be heard in the upper Spencer Gulf Region of South Australia on Community Radio, The Trax FM Mid North Radio and Electronics Group is part of the Trax FM Community Radio Station and they have worked with station management to organise the broadcasting of the WIA News on Tuesday nights at 7 o'clock central standard time. The broadcast can be heard across a wide area of South Australia including the regional centres of Port Pirie, Port Augusta, Whyalla, and all points in-between.

If you're in the area tune in to Trax FM 105.1. on Tuesday nights at 7pm.

I am David VK5DMC for the Trax FM Mid North Radio and Electronics Group Port Pirie.

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

Olympics to impact BBC Radio ?

An unconfirmed report indicates that the BBC will be suspending online radio listening for listeners abroad from July 27 until September 9.

It appears this may be to do with the online bandwidth the BBC will need to use for their coverage of the Olympic and Paralympic Games.

If true, the suspension could impact millions of people around the world who listen to BBC radio via the web.

DID YOU WORK THE 'MINE'?

9 A 22 MINE.

This was a Croatian WFF activation by members of Radio Clubs 'Karlovac' 'Duga Resa' and 'Croatian Flora Fauna' who activated the Special Forest Reserve (9AFF-061), on July 14th, located within a mined area of a mountain within the forest. (Plje�evica mountain.)

9A22MINE, remembered that some areas in Croatia have remained affected by landmines for 22 years.

QSL via 9A1MB.

A central Christchurch building will be demolished by implosion next month.

The Canterbury Earthquake Recovery Authority has approved the implosion of the 14-storey Radio Network House building in Worcester St, which was once the home of NewsTalkzb.

The building was deemed unsafe after the February 2011 earthquake.

This will be the first demolition by implosion in the city since the quake demolitions began. It will take place on Sunday, August 5.

Radio Academy solves audio editing challenge for visually impaired

Wits Radio Academy director Franz Kr�ger said being able to edit audio is very difficult when one cannot see the sound wave in the editing programme.

"Oddly, the one thing that's quite hard to do when you're blind is edit audio," he said. Before digital audio editing software, people would physically cut the tape with razors, and stick the correct sequence together with special splicing tape.

"You don't really need to see to do that because you use your ears and you feel the place on the recorder," Kr�ger explains. "But digital audio editing relies very heavily on the fact that you can see the wave form on the screen."

In his search for a solution, Kr�ger posted questions on the dilemma on an international radio studies list, and got in touch with blind people overseas who do sound editing. He was advised that Ferreira would be able to use digital audio editing software as everybody else does, when these programmes were linked with a programme called JAWS. JAWS, or Job Access With Speech, reads out whatever is on the computer screen for visually

impaired people.

Kr&#65533;ger said that although this is not a common problem in South Africa, the Wits Radio Academy will be able to assist aspiring sound engineers with visual problems. "We'll certainly make it known that we have some kind of solution to this, and if it's something we can offer to anybody or share with anybody, we're happy to do that."

(jounalism.co.za)

SPREADING THE LOAD

The Portuguese National Communications Authority (ANACOM) has been invited by the UK regulator OFCOM, to monitor the actions of the radio spectrum during the London Olympics games.

More information in Portuguese:

IARU voting on two potential members

The Federation of Radio Sport of Azerbaijan FRSA and St Vincent and the Grenadine Amateur Radio Club SVGARC are proposed for International Amateur Radio Union membership.

The FRSA based in Baku has 50 members and SVGARC with 21 members, have made their proposals through IARU Region 2.

In the IARU Calendar, Secretary Rod Stafford W6ROD reports the pair declare they can satisfy the requirements of the IARU Constitution and Bylaws.

They have been put to the vote by all IARU member societies who have until November 1 to cast a ballot.

Jim Linton, VK3PC says "despite a request, no proof has been provided that the former PNGARS of Papua New Guinea and BARTS in Burma or Myanmar still exist and have been withdrawn from membership."

==========

NEWS FROM ARNEWSLINE USA

THE GREAT INTERNET BLACKOUT A WHIMPER

The over-hyped Great Internet Blackout of 2012 came and went with little more than a whimper on Monday, July 9th. This, as the so-called "Doomsday" deadline passed with few reports of service outages.

At 12:01 a.m. Eastern Daylight Time the FBI shut down temporary servers it had set up to handle Web traffic for thousands of computers infected with a virus spread by a ring of cyber criminals that the bureau busted last year. Those using

the estimated 200,000 computers still infected with the virus were expected to lose their Internet connectivity after the servers were taken off line.

But like the Y-2-K fears some 12 years ago, this latest loss of service simply failed to materialize. According to the FBI, 41,800 of the 211,000 worldwide computers infected with the virus were in the United States, but U.S. Internet providers reported far fewer victims.

INVENTOR LEONARD KAHN EX- WB2SSP - S.K.

Communications inventor Leonard R. Kahn, the former WB2SSP, passed away on June 3rd in Florida.

Kahn is likely best remembered for his development of the Kahn-Hazeltine AM Stereo system that used independently modulated upper and lower sidebands. He was also the inventor of the CAM-D AM digital system. Kahn's AM stereo design was later revamped for monaural use and used in the Power-Side system, in which a decreased signal in one sideband is used to improve coverage and loudness. Power-Side became the basis for CAM-D, Compatible AM Digital, a digital system that is still used on several AM stations.

Leonard Kahn worked for RCA Labs for many years and turned out over 80 domestic and 100 foreign patents. As such, he is considered one of the five "fathers of the wireless industry."

KJ6CEY ARRESTED FOR ALLEGEDLY POINTING LASER AT FIRE ENGINE

Thirty-one year old Irene Levy, KJ6CEY, of San Jacinto, California, is in trouble with the law once again. This time after allegedly pointing a laser at a fire-fighter behind the wheel of a fire engine.

At around 3:45 a.m. on June 30th, officers from the San Jacinto Police Department responded to a call to assist CalFire. When officers arrived, the fire personnel claimed that Levy had shined a laser light at the driver of their engine while they were driving on East Main Street. Also that she had shined the laser at their driver several times earlier in the evening as well.

Levy was taken into custody and booked into the Larry Smith Correctional Facility charged with pointing a laser at a moving vehicle and violating the terms of her probation. At last

report she was being held in lieu of $25,000 bail.

You may recall back in May of 2010 when Levy used an amateur radio station to interfere with an emergency response dispatcher. In that case Levy was found guilty of jamming emergency radio frequencies by broadcasting threats. As part of her probation, she was ordered to complete a mental health program and stay out of trouble.

==========

RSGB

Optical Morse code in space

The amateur radio CubeSat FITSAT-1 will carry an optical communications experiment that aims to write Morse Code across the night sky using high intensity LEDs.

It launches to the ISS on 21st July, from where it will be deployed in September. For more information see www.uk.amsat.org/2037

Minister opens National Radio Centre

On Wednesday 11th July, Ed Vaizey, Minister for Culture, Communications and the Creative Industries, officially opened the National Radio Centre at Bletchley Park, Milton Keynes.

After a tour of the new building and unveiling a plaque in the entrance, Mr Vaizey said, "The National Radio Centre will do an enormous amount to spread the knowledge about the history of radio and its continuing importance in the 21st century."

Joining the RSGB to celebrate the opening of the NRC were many high profile visitors, including Ole Garpestad, LA2RR, Vice-President of the IARU and Dave Sumner, K1ZZ, CEO & Secretary of the ARRL. Many of the NRC's valued sponsors were represented, as were those who work hard to demonstrate and showcase the NRC to the public.

The National Radio Centre is open Thursdays, Saturdays and Sundays from 11.00 to 16.30. More details, and photographs of the event, can be found on the website, www.nationalradiocentre.com

==========

WEIRD AND WONDERFUL

I'd say that the July N.T.A.R.C. meeting in VK7 falls into this category.

Jason VK7ZJA presented the club with a presentation on Radio Direction Finding.

Jason is a senior field technician with Optus.

His talk covered his activity in recent years in locating and overcoming interference to the Optus mobile phone network in VK7. Jason's interference locating RDF activity takes him all over that State but it appears Hobart provides the lion's share of his challenges.

His account of a particularly difficult hunt, eventually tracked to a little used RF device in the ABC TV studios, had the club enthralled and finally in stitches when he explained the reason for its odd pattern of appearing late morning weekdays and with a tendency to show up more prominently Wednesday mornings.

It seems the device was located in a cupboard at the ABC and the interfering signal was temperature sensitive, which explained its appearance weekday mornings, once the central heating had kicked in.

The Wednesday preference apparently arose from the fact that a weekly meeting of 'Aunties' management took place in the room immediately behind the cupboard.

With all the hot air generated by their discussions it apparently increased the ambient temperature and triggered the device!

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2012

Hello, this is Alan, VK4SN, RD Contest Manager.

Remember to keep August 11th and 12th free for the RD contest.

This year, a new start and finish time of 0300z applies. That's
1PM eastern
Australian Time.

Everything you need can be found on the WIA RD Contest page.

Downloadable information includes full rules, a one page quick reference guide to the rules, an Excel log book, printable paper logs, and other relevant information.

Links to popular logging software is included.

Some notable changes to the rules are:

1. earlier start time

2. working your own state or territory is allowed

3. Introduction of a single op QRP section

4. Amalgamation of all bands

5 A static exchange instead of a sequential number exchange has been implemented.

If you wish to form a team, remember to email the contest manager with your selected team members . All info can be found in the rules.

Over the next couple of weeks I will discuss some of the changes
to the rules and talk about frequently asked questions.

Till next time, this is Alan, VK4SN

More on the RD, and Hunter Radio Group Contest team will be participating in
the upcoming RD contest at Luskintyre Airport, 252 Pywells Road Luskintyre,
Saturday the 11th August, starting at 1 .00 PM Eastern Standard Time.

The team ask that all members and friends of the group please come along
and help us make sure that the Hunter Region make a large impact on the
contest results.

There will be bunk house accommodation on a first come basis at reasonable
cost and we will have the normal Luskintyre Airport sausage sizzles over
the weekend.

There will also be tours of the Tiger Moth Museum which has been of great
interest to participants in past years.

We will need operators, log keepers, Chefs for the BBQ and anyone who wants
to take advantage of the camaraderie of this type of weekend and our
friendly group.

Please let us know, as soon as possible, if you are going to attend this
wonderful weekend.

For further information please contact Jamie Campbell, VK2YCJ or
Grahame O'Brien, VK2FA on 0418686397.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

A group of operators from Switzerland known as
the Radio 7 Team will be active from Rodrigues
Island as 3B9SP from between October 16th and 23.

Most operation will be on CW and SSB with some RTTY
and PSK 31.

Bands mentioned are all the HF frequencies plus 6 meters.

Logs will be uploaded to Logbook of the World but, within 6
months after the operation concludes. QSL via HB9ACA.

TWO OPERATIONS APPROVED FOR DXCC CREDIT

ARRL DXCC Manager Bill Moore, NC1L, reports that two operations --
the 9X0PY (Rwanda) operation (December 24, 2011-January 7, 2012) and
the S21YD (Bangladesh) operation (1994, 1995, 1998 and 1999) -- have
been approved for DXCC credit.

"If you have had these operations rejected in a recent application,
please send an e-mail bmoore@arrl.org to the ARRL DXCC Desk," Moore said.

"When responding, include the reference number on your credit slip
(found in the upper right hand portion) to help expedite retrieval.

Please note that due to heavy e-mail volume, you may not receive a reply.

Once updated, results will appear in Logbook of The World, as well as
online in the daily listings.

As part of the 50th Anniversary of Independence celebrations in Algeria
several special stations are active until the end of 2012.

Prefix hunters will have the opportunity to work 7U50I, 7V50I, 7W50I and
7Y50I.

Details of a special award in connection with this event can be found on
QRZ.COM

E I 25 D B Dublin Bus celebrates its 25th Birthday.

To celebrate the event a Special Event Station EI25DB will be aired
until 30th June 2013.

The station will be operated by current and former employees of Dublin Bus
led by Declan EI9HQ and Pete EI4GZB.

QSLs to Declan EI9HQ or on LOTW or HamLog.eu

Things are moving quickly on preparations for the Hellenic Amateur Radio
Association of Australia's ZL9HR DXpedition to Campbell Island
(650 km or 400 miles south of New Zealand in the Southern Ocean).

For those who hate all the hype of the Olympics, Campbell Island is the
furthest point on earth that you can stand on away from London, England!

The complete crew of 10 operators is now set (with some reserves in the
waiting list should a member have to cancel).

The operators are:
Tommy VK2IR,
John VK3YP,
Les W2LK,
Gene K5GS,
Don VE7DS,
Istvan HA5AO,
John 9M6XRO,
David K3EL,
Jacky ZL3CW,
& Tom KE4KY.

A list of equipment that will be taken is already on the web site and the first of the Yamaha generators is due to arrive in Sydney in the next few days. This along with some of the other equipment will be put to the test in this weekends "Trans-Tasman" 160m SSB contest that the HARAOA won last year and are eager to win again. Heavy workloads on the equipment will also occur in the 80m RTTY section of the same contest.

Keen DX-ers who may be looking to get ZL9 on a particular band and mode to move towards a DXCC or other award, should go to the survey on the website at ZL9HR.com and vote for which bands and modes they would like to hear ZL9HR operating on!

Please keep monitoring ZL9HR.com for all updates as the preparations keep progressing. The first of the sponsors are coming in but more of that in my next news update so -..

73 From ED VK2ARE, Australian Publicity Officer for ZL9HR and member of the Hellenic Amateur Radio Association of Australia

Sun 29 July - TOWSA Maggie Island Swim

A great day out on the water (with the only position available on land already taken) playing with radios to the sound of Migaloo the Whale and a hundred marathon swimmers thrashing across Cleveland Bay.

Townsville club will handle comms on VHF, with some UHF comms with clubbies and aircraft.

7am start to match up with ship crews with swimming starting 11am.

It is also highly recommended that operators attend the Race Briefing at the Castle Hill PCYC - corner Hugh and Harold Streets West End on Saturday 28 July starting 1pm.

Contact theTARCinc. on "the RAT" repeater after QNEWS.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

Ecuador, heading into space

A DNEPR rocket currently slated to launch from Yasny in November should carry 17 Amateur Radio satellites plus an innovative educational satellite NEE-01 Pegasus from Ecuador.

The NEE-01 Pegasus engineering team was led by Cmdr. Ronnie Nader, Ecuador's first astronaut. The tiny 1U CubeSat (10cm cube) has a large fold-out solar array, a world first, and carries a 902 MHz 720p HD TV transmitter, another world first, that will send video of the Earth to school students in Ecuador.

Among the 17 amateur radio satellites planned for the same launch will be three carrying linear transponders for SSB/CW communications, they are

FUNcube-1, Delfi-n3Xt and TURKSAT-3USAT.

WW SPECIAL INTEREST GROUPS --- RADIO AMATEUR YOUNG TIMERS
A Youth Net meets Saturdays at 0100 UTC on IRLP Reflector #2.
Young Hams Net 3.590 - 7:30pm Victorian time.

Move over Raspberry Pi, give kids a Radio Ham Pi

UK Government Minister Ed Vaizey MP is reported in The Register as calling for schoolchildren to be given simple radio kits to build so they can learn basic electronics.

Speaking at the opening of the Radio Society of Great Britain's National Radio Centre Ed Vaizey said "It would be great to get amateur radio kits in schools like we have with the Raspberry Pi."

Read the Register article at
http://www.theregister.co.uk/2012/07/12/national_radio_centre_cheap_radio_kit/

WW SPECIAL INTEREST GROUPS --- ILLW

Australia is the ILLW front-runner

In the lead on 50 registrations for next month's International Lighthouse and Lightship Weekend is Australia, followed closely by the USA on 48 and Germany with 44.

The Saint Tudwal?s Lighthouse in North Wales is the 300th entry. A group from the Strumble Head Contest Group GC0OBS will activate the lighthouse on a small archipelago lying south of Abersoch.

The white light and shorter range red flash navigation device was built in 1877 of stone after the island group was bought by Trinity House, the main lighthouse authority for England, Wales, the Channel Islands and Gibraltar.

The registrations so far are come from more than 30 countries made by clubs, groups and individuals.

The main objective of the fun weekend on August 18 and 19 is to promote public awareness of lighthouses and lightships, their need for preservation and restoration, and to give amateur radio some publicity.

To enter a lighthouse or lightship for the weekend visit the website illw.net that includes this year's registrations, guidelines, statistics and a lot more.

(Jim Linton VK3PC)

A group from the Adelaide Hills Amateur Radio Society will be travelling to Cape Willoughby at the eastern end of Kangaroo Island, to operate over the Lighthouse and Lightship weekend, August 18th and 19th.

A special call VI5CW has been allocated. Operation will be on 80, 40 and 20 metres phone, as well as 2metres and 70cm. A special QSL card has been produced for the weekend.

Operators are Paul VK5PAS, Hans VK5YX, Lesley VK5LOL, Mark VK5VW, Sasi VK5SN and Aysha VK5FASH and David VK5KC, with support from Spouses.

Google VI5CW for more information.

We look forward to a contact with you.

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News. Each item will only be broadcast once, if you want a couple of mentions, please submit different slants to keep your event 'fresh'.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

Propagation Forecast Bulletin #29 de K7RA:

Posted: 20 Jul 2012 07:53 AM PDT
http://www.eham.net/articles/28652

In last week's bulletin ARLP028 we reported a blast of energy from a solar flare headed our way, predicted arrival on Saturday, July 14. The CME hit at 1800 UTC, and had a huge effect on propagation and geomagnetic indices. The next day the planetary A index was 60, mid latitude A index was 39, and the high latitude college A index was 88. Conditions haven't been that upset since March 9, 2012, when the mid-latitude A index was 57, planetary A index was 67, and the college A index was 107.

From Bermuda to the Moon and Back:

Posted: 19 Jul 2012 05:24 PM PDT
http://www.eham.net/articles/28650

Werner and Dithmar Davde the real excitement begins when the sun goes down. The HAM Radio enthusiasts have travelled to the Island to shoot radio waves at the moon in an attempt to talk with people around the world. While HAM Radio has been around for decades, the method and equipment the German trio are using is still relatively new and Daude claimed they were the first to try it in Bermuda. When asked why they decided to come all the way to Bermuda to use their antennae, Daude replied: "It's a hobby. This type of equipment, using HAM Radio has never been activated in Bermuda; we are the first to do it." The antennae take approximately five hours to set up and are made from fibreglass and aluminium. These antennae transmit three frequencies: a 2m band, a 70cm band and a 23cm band. The men adjust the antennae for 15 minutes to follow the moon as it moves across the sky, all the while transmitting these frequencies to its surface. When the frequencies bounce off of the surface of the moon, they can be detected by people with similar equipment, who send their messages back. After

receiving a permit from the Department of Telecommunications, Cargmel, Werner, and Davde brought the kits containing the antennae to Bermuda and set up camp.

Gus Grissom Special Event Station TODAY

Gus Grissom Day is in honor of Virgil I "Gus" Grissom a native of Lawrence County, who died along with fellow astronauts Ed White and Roger Chaffee in the tragic Apollo 1 pre-launch test accident on January 27, 1967. The 2012 Gus Grissom Day Special Event will be TODAY Saturday July 21st. The Hoosier Hills Ham Club is operating using the callsign W9GUS from 14:00 - 20:00 UTC on 20 meters between 14250 kHz & 14270 kHz, and on 40 meters between 7250 kHz & 7270 kHz. (+/- QRM) We are operating from outside the Grissom Memorial just inside the entrance to Spring Mill State Park in Mitchell, IN . This is also an INPOTA (Indiana Parks on the Air) activation. (http://inpota.com) Please visit our main website (http://www.w9qyq.org) for Gus Grissom Day Special Event QSL Information.

MEMORIAL DAY I1BAY QRP

The QRP Mountain Club, in collaboration with the ARI Sanremo, organizes

the Memorial Day Trophy I1BAY QRP. The aim is to keep alive the memory of Attilio

I1BAY, the great protagonist of the National and International QRP activities,

which he held with great tenacity and passion in both fixed and mobile

station SOTA, 2002 to 2009 in Italy. "in the air since 1948", as is often repeated in his

numerous technical articles, winner for several years in Watts per Mile Table HF

(then visible in www.radioavventura.it site), continued with enthusiasm his QRP

activities in the mountains, until shortly before his disappearance, the

'December 8, 2009. Recall that for the activation of a Peak Watts x Mile, which are listed

available at www.wattxmiglio.it, is allowed to reach the top just means "human", on

foot or by bicycle, and that power is only allowed from batteries or solar

panels, the work is done outdoors or in tents (It is strictly forbidden to

operate from a shelter), and that the maximum permissible power is 5 Watts.

These rules

are clearly specified in the appropriate section of the site www.wattxmiglio.it

PARTICIPANTS:

All Member OM

duly authorized, Italians and foreigners . TIME: First weekend of

September, approximately over time ranging from 14 UTC on Saturday at 14 UTC on

Sunday. For

2012, the date is' 1 and 2 September. BANDS: HF: 7-14-21-28 MHz and WARC bands - VHF-UHF:

50/144/432 MHz Ways and CATEGORIES CW, SSB, Digital modes Two Unique Categories:

Fixed Station QRP and QRP portable station Each station can operate

on all bands and all the ways you want, send log HF and VHF-UHF separated.

POWER QRP

5 Watts Max /

Portable QRP Station 10 Watt Max / Fixed Station QRP CIME activated: All Peaks WattxMiglio, as

references to the regional site WattxMiglio (www.wattxmiglio.it) in addition to

peaks not yet referenced, but reflect the characteristics required by Regulation

wxm. In this

case the Log should provide a brief description of it and navigate to it,

besides the name of the peak, as found on various topographies or specialized

Internet sites. SCORING: The same station can be connected only once for each mode and frequency

range: Fixed

Stations: One point per kilometer = QRB, regardless of frequency or mode in use.

Portable

Stations: The rule QRB / Wattage (Watts divided QRB) via Excel Spreadsheet

downloadable from the site. stations participating in portable acquire

automatically the score in the ranking of the Diploma WattxMiglio.
QUALIFICATIONS:

All Portable

QRP stations (operating wxm referenced by peaks), which will receive Fixed
that

will send the log via the Internet by the Mountain Club and QRP by ARI
Sanremo a

Certificate of participation. The winners, HF and VHF Portable QRP Station
of

category, will receive two trophies from both the Mountain by Section QRP
Club

of San Remo. LOGS: For writing the log, the participants will use the
laptop specific

program downloadable from website WattxMiglio, while those who participate
from

home, always QRP HF in both V-UHF, she must submit a log, separate HF and

VHF-UHF, using one of the many programs available online. For those who
will work

HF, remember to ask the landlord for the same or it will be impossible to

complete the log. Although the V-UHF, the application of this finding is
common practice

during the QSO. Logs must be sent in electronic form at: hf@wattxmiglio.it
by the end of

September 2012.

SARL NEWS - SUNDAY 22 JULY 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on "Amateur Radio Today" and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 MHz FM from Pretoria with relays on 7 066 and 3 695 kHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

SARL PRESIDENT SAYS RADIO AMATEURS CAN CONTRIBUTE TO CREATING A KNOWLEDGE ECONOMY

NEXT RTA PRESENTATION IN GAUTENG

UK SPECIAL EVENTS STATIONS FOR THE 2012 OLYMPICS

NEW ASTRO-HAMS ARRIVE AT THE ISS AS PART OF THE EXPEDITION 32 CREW

You are listening to ZS6SRL. Stay tuned for more details on these items and other important and interesting items.

SARL PRESIDENT SAYS RADIO AMATEURS CAN CONTRIBUTE TO CREATING A KNOWLEDGE ECONOMY

Speaking at the Radio Technology in Action Symposium in Durban yesterday the SARL President said that Research and Development (R&D) promotes the growth of knowledge-intensive activity. "There is a clear connection between R&D intensity and competitiveness. One of the goals for South Africa is to enhance the country's knowledge-generation capacity in order to produce world-class research and turn some advanced findings into innovative products and processes."

Amateur radio is blessed with a large slice of the radio spectrum, much larger than what many believe the amateur radio service should have. But balanced against this is that radio amateurs have a history of pioneering new developments. "Exposure to amateur radio has turned many young people to taking up careers in the technology industry. Many have excelled and made major contributions. I am reminded of Jack Kirby who

received the Nobel Prize in 2000 for his development of the integrated circuit. In his Nobel lecture entitled "Turning potential into reality" he related how he became interested in electronics and technology", ZS1YT said.

"Radio Amateurs experiment a lot but they have one major problem, they do not share it by giving talks at club meetings, by writing articles for Radio ZS or other professional publications. In our world there are a number of interesting projects that we can work on while having fun."

In his presentation he highlighted propagation research opportunities on 160 metres, 5 MHz after ICASA has allocated spectrum, on 600 metres and in 137 KHz bands.

NEXT RTA IN GAUTENG

The next RTA will be held in Gauteng at the national Amateur Radio centre on Saturday 18 August 2012. Pre-booking will open on Tuesday. Get details on www.sarl.org.za, select RTA from the left hand column.

HAVE FUN WITH THE BOLAND SPRINT TODAY

The Boland Amateur Radio Club is holding its 40 metre sprint phone contest today, Sunday 22 July from 15:00 - 18:00 CAT. This is a fun activity to promote contacts on 40 metres between radio amateurs in Southern African countries. It is also an ideal opportunity for Mobile stations, Field stations and RaDAR stations to participate. In this contest only wire or mobile antennas may be used and a maximum output of 100 watt. The following frequencies may be used 7060 - 7100 and 7135 -7200 kHz. Only three [3] contacts per frequency are allowed before you have to change frequency. You may only return to a previously used frequency after five [5] contacts. A fun challenge.

Only Excell logsheets will be accepted and can be sent to zs1bak@bark.org.za or by post to BARK, P.O. Box 273, Strand, 7139.

Full details can be found on page 60 the contest manual on www.sarl.org.za. (URL on for printed version www.sarl.org.za/public/contests/SARL_2012_Contest_Manual_issue_10.pdf).

UK SPECIAL EVENT STATIONS FOR THE 2012 OLYMPICS

Southgate reports that as part of the celebration of the 2012 London Olympics and Paralympics, two flagship amateur radio stations will be active during the games.

The Cray Valley Radio Society will host England's Olympic celebration from the Royal Borough of Greenwich. This is home to many of London's events outside the main Olympic arena. The call-sign used at that location will be Two Oscar One Two Lima. A similar amateur radio celebration is happening in Barry, South Wales, where the call-sign will be Two Oscar One Two Whisky.

Both groups are looking to make as many contacts as possible worldwide during the Olympics. They will be on the air 24 hours a day, 7 days a week from Wednesday July 25 through Sunday September 9. The London station will be open to the public from 10:00 to 16:00 and the Welsh station from 10:00 to 17:00 UTC daily.

Commemorative QSLs will be available for both operations. QSL information is on-line at www dot Two Oscar one two Lima dot com and www dot Two Oscar One Two Whisky.com. Both stations are eager to make contact.

NEW ASTRO-AMATEURS ARRIVE AT THE ISS AS PART OF THE EXPEDITION 32 CREW

Three amateur radio space fliers arrived safely at the International Space Station early Tuesday, 17 July. This, for a four-month stay while also bringing the orbiting outpost back to its full crew complement of six.

The Soyuz space capsule carrying NASA astronaut Sunita Williams, KD5PLB; Russian cosmonaut Yuri Malenchenko, RK3DUP, and Japanese space explorer Aki Hoshide, KE5DNI, docked with the station on Tuesday, July 17 . This following a two-day flight from Baikonur Cosmodrome in Kazakhstan.

At docking time, the Soyuz spacecraft and space station were at an altitude of 251 miles over North-Eastern Kazakhstan. The Soyuz parked itself at an Earth facing docking port on the station's Russian built Rassvet module. After the hatches were opened between the Soyuz and ISS, Williams, Malenchenko and Hoshide moved to the ISS and joined their fellow Expedition 32 crew members Sergei Revin; Gennady Padalka, RN3DT, and Joseph Acaba, KE5DAR.

Padalka, Revin and Acaba have had the space station to themselves since July 1st. That's when three previous crew members returned to Earth and brought the station's previous Expedition 31 to a close.

PRETORIA AMATEUR RADIO CLUB FLEA MARKET

The Pretoria amateur Radio Club will be hosting their winter flea market on Saturday 28 July at PMC in Keuning street, Silverton. For more information, or to book a table, phone Almero, ZS6LDP on 083 938 8955 or e-mail him to almero@up.ac.za,

HF PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the week's expected solar activity will be at low levels. None of the Earth-facing sunspots are posing a threat for strong solar flares.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 65.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. 10 m openings will be less frequent due to the lower solar activity.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

22 July - Boland Amateur Radio Station 40 metre sprint from 15:00 to 18:00 CAT. 25 July - 2012 Olympic Games special event amateur radio stations on the air.. 28- July - Pretoria Amateur Radio Club Winter flea market, for more information contact Almero ZS6LDP, his cellphone number is 083 938 8955. 18 August - RTA in Gauteng at the National Amateur Radio Centrum.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by Dick, ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Johan, ZS4SS, and edited by George Honiball, ZS6NE.

Thank you for listening. 73.

/EX

Ham Radio Operators Stay Tuned In:

Posted: 20 Jul 2012 05:10 PM PDT
http://www.eham.net/articles/28654

Whether it's ravaging floods, raging fire or a devastating earthquake, vital information will be passed along to emergency personnel and the public when amateur radio operators power up their communication system. In Sonoma Valley, there is a group of dedicated volunteers at the ready. Within three hours of an emergency, they are trained to find a radio signal and start transmitting news of rescue operations, evacuations, damaged roadways, and status of food, water and medical supplies, among other information. The Valley of the Moon Amateur Radio Club (VOMARC) has about 50 local members, all licensed by the Federal Communications Commission to operate high, ultra high and very high frequency radios (including Morse code) to assist in disasters. "The idea of emergency preparedness is that in a disaster, ham radio operators would be your communication," Jones said. The more prepared they are, he said, the better the chances of providing life-saving information.

Video: Huge Sunspot Fires Off Intense Solar Flare:

Posted: 20 Jul 2012 05:10 PM PDT
http://www.eham.net/articles/28653

A gigantic sunspot unleashed an intense solar flare early Thursday (July 19), though the solar storm shouldn't pose any serious problems to us here on Earth, scientists say. The flare erupted from a sunspot known as AR 1520 at 1:13 a.m. EDT (0513 GMT) Thursday and peaked about 45 minutes later. The outburst qualifies as an M7.7-class solar flare, meaning it's a bit weaker than the sun's most powerful blast, X-class flares. The sun storm also produced a coronal mass ejection (CME), a huge eruption of solar plasma that can streak through space at speeds of 3 million mph (5 million kph) or more. CMEs that hit Earth can wreak havoc, spawning geomagnetic storms that can disrupt GPS signals, radio communications and power grids.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

IARU voting on two potential members

The Federation of Radio Sport of Azerbaijan FRSA and St
Vincent and the Grenadine Amateur Radio Club SVGARC are proposed for
International Amateur Radio Union membership.

The FRSA based in Baku has 50 members and SVGARC with 21
members, have made their proposals through IARU Region 2.

In the IARU Calendar, Secretary Rod Stafford W6ROD reports the pair
declare they can satisfy the requirements of the IARU Constitution and
Bylaws.

They have been put to the vote by all IARU member societies who have until
November 1 to cast a ballot.

Meanwhile despite a request, no proof has been provided that the former
PNGARS of Papua New Guinea and BARTS in Burma or Myanmar still exist and
have been withdrawn from membership.

AMSAT NEWS SERVICE

ANS-204

ANS is a free, weekly, news and information service of AMSAT North America,
The Radio Amateur Satellite Corporation. ANS reports on the activities of a
worldwide group of Amateur Radio operators who share an active interest in
designing, building, launching and communicating through analog and digital
Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor@amsat.org

ANS-204 AMSAT News Service Weekly Bulletins

AMSAT News Service Bulletin 204.01

From AMSAT HQ SILVER SPRING, MD.

July 22, 2012

To All RADIO AMATEURS

BID: $ANS-204.01

UK Olympics Special Events Satellite Operations Commence This Week

With the "London 2012 Olympics" official opening taking place during the next week, this is a reminder of the previously posted information about the "Amateur Radio Flagship Event Stations" that will be operating beginning Wednesday July 25 until the Games close on September 9.

The London station 2O12L (two-oscar-one-two-London) and the station in Wales (two-oscar-one-two-Wales) will be operating on amateur HF and VHF/UHF bands during the event.

The Barry Amateur Radio Society in Wales, subject to operator availability and suitable passes, will endeavor to make contacts via the amateur radio satellites as well of course as the HF bands.

The London area has a restriction imposed on VHF/UHF activation which will limit personal operations on the satellites. Outside the restricted zone however there maybe other amateur radio operators who may be active, not as "flagship stations" but using a personal or club call sign under a notice of variation.

Barry Amateur Radio Society in Wales looks forward to making as many contacts as possible for this rare opportunity. We take this as an opportunity to wish all those participating in the Olympic Games and amateur radio operators world wide "Good Luck".

[ANS thanks Ken Eaton, GW1FKY and the Barry Amateur Radio Society, Wales, UK for the above information]

AMSAT Board of Directors 2012 Ballots in the Mail

Ballots for the 2012 AMSAT-NA Board of Directors election have been mailed to all members. Also included is biographical information about each of the candidates.

Select no more than three of the six listed candidates (in alphabetitcal order):

Tom Clark, K3IOSteve Coy, K8UDMark Hammond, N8MHLou McFadin, W5DIDGould Smith, WA4SXMPatrick E. Stoddard, WD9EWK

The 3 candidates receiving the most votes will become directors serving 2 year terms. The 2 receiving the next highest number of votes will be seated as alternates for 1 year terms.

You must mail your ballot back to be received at the AMSAT-NA Office no later than the close of business on September 15, 2012:

AMSAT

850 Sligo Avenue, #600

Silver Spring, MD 20910

[ANS thanks AMSAT Corporate Secretary Alan Biddle, WA4SCA for the above information]

AMSAT Commemorative Shirt Available for the Symposium

AMSAT offers you the chance to have the coolest ham shirt of the year as we announce the special commemorative shirt for the 2012 Symposium. The polo shirt is ultramarine blue, silk touch 5-ounce 65/35 poly/cotton pique fabric (ask the XYL what this means) in men's and ladies' styles.

The men's shirt is available in sizes XS to 6X, with a pocket on the left side:

XS - XL ... $202X - 3X ... $234X - 6X ... $28

The ladies' shirt is available in sizes XS to 6X, no pocket:

XS - XL ... $182X - 3X ... $214X - 6X ... $26

The Symposium logo (AMSAT Fox) is embroidered on the left side of the men's and ladies' shirts. You can optionally add up to 2 lines of your callsign/name embroidered on the right side of the shirt for $5 per shirt.

Shirts must be ordered by mail with the order form sent with the AMSAT ballots.

[ANS thanks the AMSAT Office for the above information]

AMSAT and ARISS Support Moon Day 2012 at Dallas Love Field Air Museum

Moon Day 2012 was held on July 21 at the Frontiers of Flight Museum at Love Field in Dallas, Texas to commemorate Neil Armstrong's walk on the moon. The event featured space exhibits, demonstrations and other space activities. AMSAT and ARISS were represented as they showed amateur radio satellites including a model of the Fox-1 satellite. This was an opportunity to promote the ARISS program also.

The purpose of Moon Day is to celebrate this astounding achievement of humankind by bringing together local and national organizations into one place where the public can walk and talk with the people and the groups who are on the frontlines of space exploration, along with space and astronomy

advocates, hobbyists, and educators.

More information about the event was posted at:

http://nightsky.jpl.nasa.gov/event-v...Event_ID=37613

The Frontiers of Flight Museum web page can be found at:

http://www.flightmuseum.com/

You can re-live the Apollo 11 launch on July 16, 1969 with this video:

http://www.youtube.com/watch?v=-CAN2...layer_embedded

[ANS thanks AMSAT and ARISS for the above information]

Three Hams Arrive + Three Hams Aboard = Six Hams Aboard ISS

Three hams arrived at the International Space Station on July 17 when the Soyuz TMA-05M spacecraft docked and the hatches opened on the 37th anniversary of the Apollo-Soyuz docking.

Expedition 32 crew members NASA astronaut Suni Williams KD5PLB, cosmonaut Yury Malenchenko RK3DUP and Japanese astronaut Aki Hoshide KE5DNI joined with Expedition 31's NASA astronaut Joe Acaba KE5DAR and cosmonauts Gennady Padalka RN3DT and Sergei Revin RN3BS to bring the crew complement up to six.

Video of the hatch opening, welcome aboard, and the press conference from the ISS have been posted at: http://tinyurl.com/Soyuz-Arrival (UniverseToday.com)

Padalka, Acaba and Revin will be on board until September 17th, and the newest crew will stay until November 12, 2012.

[ANS thanks NASA and UniverseToday.com for the above information]

NASA JPL Explore Mars: Curiosity 3-D Interactive Experience

NASA's Jet Propulsion Laboratory in Pasadena, California invites you to prepare for the arrival of the Mars Science Laboratory rover Curiosity on August 6. JPL has developed a new 3-D interactive experience which will allow you to follow along with Curiosity's discoveries on Mars.

The beta version of "Explore Mars: Curiosity", a new 3-D interactive experience is available online at NASA.gov.

When you first access this site you will be asked to download the Unity application which loads seamlessly with your web browser. Once started you will receive high-resolution terrain maps of Gale Crater, Curiosity's landing site, collected from Mars orbiters. A 3-D "virtual rover" version of Curiosity will follow the path of the real rover as it makes discoveries.

JPL advises interested Mars fans to download the Unity game environment and test drive the rover early to reduce potential download delays as global interest peaks during the August landing events.

Also available on the JPL Mars Science Laboratory web site is the Mars Rover Landing immersive experience for the Xbox 360. You will able to take control of your own spacecraft using Kinect and face the extreme challenges of landing a rover on Mars. More details are available on the web site.

MarsDaily.com has a related article: http://tinyurl.com/MarsDaily

[ANS thanks NASA JPL and MarsDaily.com for the above information]

Satellite Shorts From All Over

+ Listen for special event station N8M operating from the Henry Ford/Greenfield Village (Detroit) Maker Faire July 28-29. They will be operating on all bands, all modes including satellite and 6 meters. Satellite operation will be active on all modes on as many passes as possible. QSL info can be located on the Ford Amateur Radio League website. (via John, N8NWA)+ Listen for Canadian special event station CG3B operating from FN03 on the satellites. The special event commemorates 200 years of friendship between Canada and the US (after the War of 1812). More information is posted on the callsign page on QRZ.com. You can QSL via VE3FOI and your QSL will be mailed to you a special issue 1812 Canadian stamp. The event is sponsored by the Niagara Peninsula Amateur Radio Club (via John, K8YSE)+ The ARRL posted audio and video of the July 12 interview with ARRL News Editor S. Khrystyne Keane K1SFA and Astronaut Don Pettit, KD5MDT. The video and transcript is posted on the ARRL web.+ The August QST Magazine features activities by amateur satellite operators. On page 20 you will find coverage of the SSTV contact via ARISSat-1 by Farrell Winder, W8ZCF, and Jeff Winder, KB8VCO. On page 63 "Long Haul Radio" discusses amateur radio operation from an 18-wheeler including mention of packet via ISS by John McLendon, AB8JL. Bob Bruninga, WB4APR, well known to satellite operators, has an article on page 41, "Rethinking Electrical Power for the Ham."+ As a friendly reminder, we are approaching the deadline for article submissions for the next issue of the AMSAT Journal. Please finish your articles and submit them to journal@amsat.org by July 23.+ Watch the inspirational video, The Audacity to Dream on-line. The description reads, "Making its debut at the TEDxISU (International Space University) event on July 6, the video above is an inspirational call-to-arms for anyone who's ever looked to the stars and dreamed of a day when the sky was, in fact, not the limit.+ A new schedule was uploaded to AO-27 on July 4th. Users of the Java AO-27 Satellite Schedule Lister should make sure that you have downloaded the latest data files. (George, KA3HSW)

[ANS thanks everyone for the above information]

ARISS Status - 16 July 2012

1. Upcoming School Contact

ESA Space Camp, which is being held at St. Columba□s College, Whitechurch, Dublin, Ireland, has been scheduled for an Amateur Radio on the International Space Station (ARISS) contact on Sunday, July 22 at 17:25 UTC via telebridge station W6SRJ in California. The ARISS contact is part of an educational program of which some activities are based around André Kuipers□ mission, Spaceship Earth. Children at the camp will have 2 weeks

of space education covering the themes of Climate, Biodiversity and the Human Body as well as Earth Observation and the Solar System. The children will also receive lessons about how tocommunicate with the crew on the ISS from a ham radio expert.

2. ARISS Contact with Women in STEM

An Amateur Radio on the International Space Station (ARISS) contact was held with Women in STEM High School Aerospace Scholars in Houston, Texas on Tuesday, July 10 via telebridge station W6SRJ in California. The high school girls came from across the U.S. to participate in the program which provided them the opportunity to plan a space exploration mission and to learn from women that work at NASA. Joe Acaba, KE5DAR on ISS answered 23 questions during the Q&A session. Approximately 150 students and guests were present for the event. Video is available (YouTube.com)

3. Expedition 30/31Crew Scheduled for Debrief

Astronauts Don Pettit and André Kuipers (Expedition 30/31) will take part in a debrief session to give feedback on the ARISS program. The debrief is currently scheduled for August 15.

[ANS thanks Carol, KB3LKI, for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information.

//
ADIF2KML version 2.1.0 - New version available for free download

Posted: 21 Jul 2012 02:49 AM PDT
http://forums.qrz.com/showthread.php?354821-ADIF2KML-version-2-1-0-New-version-available-for-free-download&goto=newpost

There is a new release of my freeware ADIF2KML now V2.1.0 on my website www.QSL.net/zl3dw ADIF2KML takes your ham log in ADIF format, (it must include Maidenhead Grids), and plots the QSOs on to Google Earth(TM) Just like putting pins in a map, but smarter! The new version adds coloured pins rather than just yellow, more filters for bands and modes, and you can now change the size of the pins and the callsign label. The KML software will not work if you don't have grids recorded in your log, so it is really only useful to digital mode ops, EME ops and VHF / Microwave DX ops.

Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5Z, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY9, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FO/a, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J5, J6, J8, JA, JD/o, JT, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OZ, P2, P4, PA, PY, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV5, SV9, T2, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TT, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2M, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2O12, ENGLAND (Update - Special Event Amateur Radio Station for the London 2012 Olympic and Paralympic Games). Publicity Liaison Officer John Warburton, G4IRN, sent out the following "Press Release #5" on

July 16t: "As a celebration of the London Olympic and Paralympic Games, two flagship amateur radio stations will be active during the Games as part of the Cultural Olympiad.
The Cray Valley Radio Society is to host England's celebration from the Royal Borough of Greenwich, home to many of London's events outside the main Olympic arena. The call-sign used will be 2O12L (two Oscar one two Lima).
A similar amateur radio celebration is happening in Barry, south Wales, where the call-sign will be 2O12W (two Oscar one two whisky).
Both teams are looking to make as many contacts as possible throughout the world during the Games, particularly with countries participating in the Games. They will be operating 24/7 from Wednesday 25th July until Sunday 9th September and will be open to the public from Thursday 26th July. The London station will be open from 10am to 4pm and the Welsh station from 10am to 5pm daily.
Commemorative QSLs will be available for both stations, QSL details are on the web site. It is hoped that Clublog and LOTW uploads will be made during the event.
For more information about the stations, their locations, operating frequencies etc., their web-sites can be found at <www.2o12l.com> and <www.2o12w.com>."

3B8, MAURITIUS. Alex, IW5ELA, will be active as 3B8/IW5ELA from hotel "Le Cannonier" between September 6-12th. Alex is part of a honeymoon trip with his wife Michela that will take him through Corsica, Mongolia, Finland and now Africa, so activity will be holiday style on the bands 20/17/15/12 meters using CW and SSB. He will use a FT857 with 100w into a vertical and operate mainly CW. QSL via his home callsign, direct or by the Bureau. Visit his special Web page at:
http//: honeymoonafrica2012.jimdo.com

5R, MADAGASCAR (IOTA Op!). Moise, F4EZG, will once again be active as 5R8VE, but this time from Nosy Alanana (AF-090) in the Tamatave region between September 1-3rd. Activity will only be on 20 and 15 meters. QSL via F4EZG.

9A, CROATIA. Zik, DK8ZZ/VE3ZIK/YT3ZZ, will be once again be active as 9A/VE3ZIK from Croatia between June 24th and August 18th. This time he will be focused on 6m, WFF and IOCA (Island of Croatia Award) activity. Prior to RSGB IOTA Contest (July 28-29th), he will be active from Zirje Island (EU-170 & CI-151). QSL via DK8ZZ, by the Bureau or LoTW.

9H, MALTA. Ignacio, EA2BD, will be active as 9H3BD until July 30th. Activity will be QRP on 20 meters using CW and SSB. QSL via his home callsign.

9M, SPRATLY ISLANDS. Operators John/9M6XRO and Steve/9M6DXX will be active as 9M4SLL from Pulau Layang Layang, Spratly Islands (AS-051) between August 7-13th. Activity will be on all bands from 80-10 meters using CW, SSB and RTTY, using two stations with linear amplifiers to vertical antennas on the edge of the ocean. Spratly Islands are ranked 29th in the current The DX Magazine ‘100 Most Needed Countries’ survey

(world-wide, mixed modes), up from number 32 last year. The QSL Manager for 9M4SLL is Tim Beaumont, M0URX. QSL direct with SAE + 2 USDs or 1 new IRC, OQRS (see <http://m0urx.com/oqrs>) or via the RSGB bureau (all bureau cards MUST be marked "via M0URX"). Logs will be uploaded to LoTW as soon as possible after the end of the operation (within a few days), but there will be NO online log during the DXpedition itself. If you are not certain of any QSO you are welcome to work them again for an 'insurance' contact. 9M6XRO and 9M6DXX would like to thank the Malaysian Prime Minister's Department National Security Council for granting the operating permission from Layang-Layang Island. They would also like to thank Amid Drajak, 9W6ABD, of the MCMC licensing office in Kota Kinabalu for issuing the 9M4SLL licence, as well as the President of the Borneo Amateur Radio Club, Hamid, 9W6MID, and Rahim, 9M6RHM, for their help in obtaining the licence. Pekka, OH2YY, was of great help with the initial planning of the trip. Finally, thanks go to Vicky Lee of the Layang Layang Island Resort for her help in making this operation possible. (Note for users of computer logging programs: The 9M4 prefix is issued to special event stations that may be anywhere on Malaysian territory; this includes the DXCC entities of West Malaysia, East Malaysia or, as in this case, Malaysian islands in the Spratly group.)

A2, BOTSWANA. Arnold, WB6OJB, will be active as A25JB from Botswana between July 24-31st. Activity will be on HF bands, 40-10 meters using mostly SSB with some CW. QSL direct to his home callsign.

CG3, CANADA (Special Event). Members of the Niagara Peninsula Amateur Radio Club (NPARC, VE3VM) will be active as CG3B until the end of the month of July. Activity is to celebrate the 200th Bi-Centennial of Friendship between Canada and the United States of America. Operations has been on 80-6 meters, CW, SSB and the satellites. Frequencies are available on QRZ.com. QSL Manager is VE3FOI. All contacts will receive QSL via Bureau system.

CR3/CT9, MADEIRA ISLANDS. German operators from the RRDXA will be active once again as CR3L during the CQWW DX RTTY Contest (September 29-30th) as a Multi-? entry. This team has won the 2009, 2010 and 2011 competition from their QTH in Santana (Northern part of the island). The crew is still looking for one or more good contest operators on this mode. The length of stay on Madeira is one week. Communication: English and German languages. If interested please contact Hans, DL1YFF at: dl1yff@gmx.de
More information is available on Han's Web page at: http://www.dl1yff.de
Also info on the Crew's Web site at: http://www.CR3L.de
QSL via DJ6QT. Operators will probably be active as CT9/homecall before and after the contest.

CY9, ST. PAUL ISLAND (Update). The CY9M St. Paul Island DXpedition is expected to be active this week between July 26th and August 1st. The team of five operators will have six Elecraft K3 transceivers, four amplifiers, three Hex Beams and a number of other antennas. They will be active on all bands between 160-6 meters using CW, SSB and the Digital modes. Suggested frequencies are:

CW - 1826.5, 3526, 7026, 10106, 14026, 18076, 21026, 24896 and 28026 kHz
SSB - 3793, 7185, 14215, 18160, 21295, 24950 and 28485 kHz
RTTY - 7035, 10145, 18105, 21090, 24925 and 28090 kHz
6m - 50105/CW and 50105/SSB
All contacts will be verified via LoTW after their activity, and for those who want paper QSLs, Tim Beaumont, M0URX, will be the QSL Manager. The log will be available through ClubLog.

The following was posted on their Web page Wednesday, July 18th: "With under week to go before the CY9M team leave their respective homes for the journey to St. Paul Island, we are happy to report all radio equipment has arrived safely to Nova Scotia and now in secure storage. Additional items such as generators will be collected as we travel to Bay St Lawrence, NS. QRV date of July 26th is unchanged. Look for some of the team to sign VE1/home call on July 25th. See you in the pileups!"

PRESS RELEASE #4 (Dated July 20th) - RSGB IOTA Contest Participation (July 28-29th): "The CY9M team will participate in the IOTA contest next weekend giving both DXCC and IOTA hunters the chance to confirm NA-094.
Our contest operation will be limited to 20 meters only – please do not ask for a contest exchange on other bands.
We will operate both SSB and CW modes throughout the contest.
The contest log will be merged with the regular DX operation, so there is no need to work us twice. Your contest contact will be valid for DXCC.
The CY9M QSL card will be used for confirmation and the log will be uploaded to LoTW. Contest log will be submitted to the RSGB IOTA Committee.
CY9M St Paul Island Expedition starts next week, visit our website at <www.cy9m.com>. If you like to help out, please go to <www.cy9m.com/donor>."

TOPBAND NEWS - CY9M on Topband next week. Bj–rn, SM0MDG/SE0X, posted the following on the TopBand Mailing List on July 21st [edited]: "Greetings,
This Tuesday I am boarding my flight with destination Halifax, Nova Scotia, to be part of the 10 man team going to CY9 St Paul Island this week. I have gotten several requests from my Topband friends, so I thought I'd hand out some brief information about our operation here.
CY9M will be active on Topband during the few dark hours we have available to us. We will use a top loaded vertical based on the 18 meter Spiderbeam pole with elevated radials.
Depending on WX, we have zoomed in on two possible landing sites, one where we will have more space for antennas (Atlantic Cove) and the other will have less space but better takeoff in more directions (North Island).
For, RX we have prepared both for pennants and beverages and will use what possible depending on location. We will use K3 radios and Acom 1011 amplifiers and DXE RX preamps.
A special thanks to the topbanders who contributed to offset our costs, including the support from TBDXC to help offset the costs for shipping an Acom amplifier to be used for topband.
Main operators on topband will be N2WB/"Wild Bill", AB5EB/Mike and me

(SM0MDG/Bj&#65533;rn).
Our activity on Topband will most likely commence in the evening of
August 26, and we are schedule to leave St Paul August 1st, so the last
night will be July 31st. And as always, dates and times are dependent on
weather and sea conditions.
Also worth mentioning is that we will have a dedicated 6 meter station
with main operator VE3EN, "Solarham" Kevin."

Remember, the following media pages are available for this operation at:
Website: http://www.cy9m.com/
Twitter: https://twitter.com/#!/CY9M
Facebook: http://www.facebook.com/CY9M.2012

D6, COMOROS (Update to OPDX.1067/Web Page Change). It was announced this
past week that the D64K DXpedition to Ngazidja (Grande Comore), Comoros
Islands (IOTA AF-007), which will be active between August 8-20th, has
changed their Web page. The following was sent out: "Due to continuing
problems with our web platform, we decided to migrate to a new system.
Our new web address is: http://www.d64k.net
The old .com website will no longer be updated, and every post will be
published only on the new site. For real-time news, our twitter account
remains unchanged: @d64k
If you need to contact us, our E-mail support is: support@d64k.net
We apologize in advance for any confusion that will be created, and we
thank you for understanding.....Cu on the air!"

DXPEDITION VIDEOS OF THE WEEK. With more and more DXpeditions putting
their videos on YouTube and other Web services, we decided to list them
(possibly) each week. For this week's listings:
2010 - 3B8/IZ4AKS & 3B9/IZ4AKS DXpedition:
http://www.youtube.com/watch?v&#65533;MCCZu_V3Y
2008 - TX5C Clipperton Island DXpedition:
http://www.youtube.com/watch?v&#65533;SaZTkDYIQ (Part 1)
http://www.youtube.com/watch?v&#65533;Fd65zZwwo (Part 2)
2002 - K1B Baker Island: http://www.youtube.com/watch?v&#65533;jAMvTwA4E
1990 - 1S0XV Spratly Island (w/Romeo, UB5JRR):
http://www.youtube.com/watch?v&#65533;A6_5lf08w

If you have a DXpedition 'video' available on the Web and would like to
have it listed in the OPDX, PLEASE send the URL to use and we will publish
it.

EF8, CANARY ISLANDS (Cancelled/Rescheduled). Luis, EA8AY, has cancelled
his activity as EF8X from Tenerife Island (IOTA AF-004, DIE S-012, WLOTA
1276, EAA TF) during the RSGB IOTA Contest. He has been invited to go with
a Multi-Op station in other island. However, Luis has announced that he
will be active in the CQWW DX CW Contest (November 24-25th) as a Single-
Op/All-Band entry. QSL via W2GR.

EF8, CANARY ISLANDS. Operators Manuel/EA8ZS, Marino/EA8DP, Jesus/EA8RY,
Tony/EA8AKN, Domingo/EA8CST, Severo/EA8NL, Dunia/EA8MT (YL), Felipe/NP4Z
and Luis/EA8AY will be active as EF8U from Gran Canaria Island (AF-004)

during the RSGB IOTA Contest (July 28-29th) as a Multi-Op entry. QSL via EA8URL. Visit: http://www.ea8url.com

FK, NEW CALEDONIA. Tsuyoshi, JJ2NYT, will be active as FK/JJ2NYT from Grande Terre (OC-032) between July 29th and August 2nd. Activity will be active on 40-10 meters using CW, SSB and RTTY. QSL via his home callsign.

IOTA (EUROPEAN) ACTIVATION. Operator Giacomo "JACK", IZ3DBA, will be on a holiday style IOTA DXpedition to activate some islands from Sardinia and the Island of Corsica between July 22nd and August 17th. Here is his tentative schedule:
July 22-28th - La Maddalena Island (EU-041); callsign IM0/IZ3DBA
July 30th-August 5th - San Pietro Island (EU-165); callsign IM0/IZ3DBA
August 7-12th - Corsica Island (EU-014); callsign TK0/IZ3DBA
August 13-17th - Sardinia Island (EU-024); callsign IS0/IZ3DBA; Activity for WAIP AWARD - new province Ogliastra (OG), Medio-Campidano (MC) and Carbonia-Iglesias (CI).
His activity will be 80% on CW and 20% on SSB (NO DIGITAL MODE) using an ICOM IC-7400 w/100w into a vertical antenna HM (by Ampelio/IK3JBP).
QSL via his home callsign, by the Bureau, direct, eQSL and LoTW. See QRZ.com for details.

IOTA NEWS.....
AS-006. Paul, R2AD/W8AY, will be active as VR2/W8AY from Lamma Island, Hong Kong, between July 28-30th. Activity will be active on 80-10 meters using the CW and SSB modes, and a TS-480 into a GP antennas. He will be active in the RSGB IOTA Contest (July 28-29th). QSL via R2AD, direct or by the Bureau.

AS-099. Berkin, TA3J, will be active as TA3J/0 from Yassica Adasi (Yassica Island, WW Loc. KM38KJ) during the RSGB IOTA Contest (July 28-29th) as a Single-Op/DXpedition/SSB-Mode/12HRS/Low-Power entry. Activity will be on 80/40/20/15/10 meters. QSL via the TA3J QSL Service at:
<http://www.aydogmus.gen.tr/ta3j/qslservice.htm>, direct (only SASE and 1 IRC, no green stamps please) or by the Bureau. No eQSL. SWL QSL cards are OK. Twitter: @TA3J

AS-105. Operators Sungki/HL1IWD, Aves/DS2AGH, Harry/WX8C and Jussi-Pekka/OH6RX will be active as DS0DX/2 from Kanghwa Island during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/Multii-Mode/High-Power entry. QSL via HL1IWD.

AS-105. Kim "Tai", DS2NMJ, will be active as DS2NMJ/2 from Yonghung Island between August 12-13th. Activity will only be on 15 and 12 meters SSB. QSL via his home callsign, direct or by the Bureau; if possible, you want to use direct.

EU-004. Andrea, IZ2LSC, will be active as EA6/IZ2LSC from Menorca Island (WLOTA 2988, EAFF-061) between July 24-30th. Activity will be holiday style on the HF band 30-6 meters using CW,

SSB and the Digital modes. He will take part in the RSG IOTA Contest (July 28-29th). QSL vis his home callsign, by the Bureau, direct and LoTW. His logbook page is at:
http://www.timpy.it/ea6
To receive updates and news, follow him on twitter: @iz2lsc

EU-008. Members of the Cockenzie and Port Seton Amateur Radio Club (CPSARC) will once again operate from the Isle of Tiree (IOSA NH04, WAB NM04), the most westernly part of Scotland's Inner Hebridean Islands, during the RSGB IOTA (Islands on the Air) Contest which runs from 1200z, July 28th to 1200z, July 29th, using the club's special contest callsign GM2T. Look for pre-contest activity by the members signing as MM0CPS/P. This year's team consists of: Cambell/MM0DXC, Bob/GM4UYZ, John/ MM0JXI, Brian/M0RNR, Gary/MM0FZV, Cephas/ MM0INS, Robin/MM0VTV, MM0VPR, Geoff/MM5AHO, Steve/MM0GZA, Ellis/GM4GZW, Bob/GM4IKT, Brian/G3UJE. QSL GM2T via the Bureau, or their QSL Manager GM4UYZ, by the Bureau or direct. Also use LoTW and eQSL. Details are available at:
http://www.qrz.com/gm2t
For details about CPSARC, visit their revamped Web site at:
http://www.cpsarc.com
ADDED NOTE: This is the club's 14th anniversary on the island, and the team would like to express their gratitude to all the islanders who have looked after them over the years, but in particular to Elaine Hutchinson of Elephants End Restaurant (www.elephantsend.com) for her unrivalled support and hospitality over the last 14 years.

EU-030. Carten, OZ4CG, will be active from Bornholm Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/CW-Mode/Low-Power entry. QSL via his home callsign.

EU-054. Sal, IT9BXR, will once again be active as IF9/IT9BXR from Favignana Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/CW-Mode/24HRS/Low-Power entry. QSL via IT9BXR.

EU-073. Members of the IJ7A DX-Contest Group are pleased to announce their DXpedition to St. Peter Island, in the Cheradi Group, between July 26-29th. Activity will include the RSGB IOTA Contest (July 28-29th) as a Multi-Op entry. The team is composed of the following operators: Gianni/I7PHH, Davide/ IK4DCT, Vin/IK7IMO, Art/IK7JWY, Piero/IK7VJX, Roby/IK7XIV, Bartolo/IW7ECA and Luigi/IZ7PDX. QSL via IK7XIV. See their contest Web site for more details at <http://www.hamradioweb.org/forums/forumdisplay.php?fh>, or follow them on Twitter: @ik7imo_ij7a

EU-096. A group of operators will be active as OH10TA from Kustavi Island during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/Low-Power entry. Preparations are been done and antennas are being tested for the activation. They will also have

equipment for 6m. Locator is KP00PN. Kustavi Island is approx.
70km northwest from Turku City. QSL via OH1MN.

EU-096. Riku, OH2CI, will be active as OH2CI/P from Kustavi Island
during the RSGB IOTA Contest (July 28-29th) as a Single-Op/
CW-Mode/Low-Power entry.

EU-110. Operators Silvo/S50X, Krajcar/S52P, Vinko/S53F, Drgan/S55Z and
Franc/S56UGB will be active as 9A8ZRS from Sveti Ivan Island
(CI112) during the RSGB IOTA Contest (July 28-29th) as a Multi-
Single entry. The group will be on the island between July
24-30th, using 2 stations on HF and possibly 6/2m as well.
QSL via S57L. QSL will be sent automatically by the Bureau.

EU-124. Members of the Dragon Amateur Radio Club will be active as
GW4TTA/p from Holy Island (Anglesey) during the RSGB IOTA
Contest (July 28-29th) as a Multi-Op/Island entry. Operators
mentioned are Stewart/GW0ETF, John/GW3VVC, John/MW0BER and
possibly others. The team will use simple wires/verticals.
QSL via GW4TTA by the Bureau or LoTW.

EU-125. Operators Gaby/DF9TM and Frank/DL2SWW will be active as
OZ/homecall from R&#65533;m&#65533; Island during the RSGB IOTA Contest
(July 28-29th) as a Single-Op/12HRS/High-Power entries.
DF9TM will operate on SSB and DL2SWW will be on CW. QSL
via their home callsigns by the Bureau.

EU-129. A German group will be active as DM3X/p from Goermitz Island
during the RSGB IOTA Contest (July 28-29th) as a Multi-Op
entry. QSL via the Bureau.

EU-136. Kordic, 9A4KJ, will be active as 9A4KJ/p from Rab Island in
the Kvarner IOTA group during the RSGB IOTA Contest (July
28-29th) as a Single-Op/Mix-Mode/12HRS/Low-Power entry. He
is expected to be on the island between July 26-29th. Activity
will be on 80/40/20/15/10 meters using a Kenwood TS 140S into
a vertical, Inverted Vs and dipoles. QSL via his home callsign.

EU-140. Members of the OH5AD group and possibly others will be active
as OG5A from Kuorsalo Island during the RSGB IOTA Contest
(July 28-29th) as a Multi-Single entry. QSL via OH5AD.

EU-146. Operator Ron, ON6CQ, will be active as PA/ON6CQ from Schouwen
Duiveland, Netherlands, during the RSGB IOTA Contest (July
28-29th) as a Single-Op/SSB entry. QSL via ON6CQ, by the Bureau
(preferred) or LoTW.

EU-170. Operators Alen/9A3MA, Ivo/9A1AA, Zlatko/9A2EU, Rolando/9A3MR,
Rax/9A3BMR and Zik DK8ZZ/VE3ZIK/YT3ZZ will be once again be
active from Zirje Island (CI-151) but as 9A0D (first time using
this call) during the RSGB IOTA Contest (July 28-29th) as a
Multi-Op/Single-TX/DXPN/Low-Power entry. All QSOs will be
automatically confirmed via the Bureau. However, if you need

a direct QSL, please send it to DK8ZZ.

EU-170. A Hungarian team will go to Pasman Island (CI-085), Croatia,
this year again. The team will be active between July 24-31th,
from two villages - Tkon (JN73RW) and Kranj (JN73QW). Activity
will be on the HF bands and 6m, using CW, SSB and the Digital
modes. They will take part in the RSGB IOTA Contest (July
28-29th) too. Look for the following operators (w/QSL routes):
9A/HA7PL Operator Laci; via Bureau or direct
9A/HA6NL Operator Laci; eQSL, by the Bureau or direct
9A/HA6PS Operator Zsolt; via Bureau or direct
9A/HA6PJ Operator Jani; eQSL, by the Bureau or direct
9A/HA7JJS - Operator Sanyi; by the Bureau or direct

EU-172. Henning, OZ1BII, will be active as OU2I from Aro Island
during the RSGB IOTA Contest (July 28-29th) as a Single-Op/
Low-Power entry. QSL via his home callsign.

EU-174. Laci, HA0NAR, will be active as SW8LR from Thassos Island
during the RSGB IOTA Contest (July 28-29th) as a Single-Op/
CW-Mode entry. He will be on the island between July 25th
and August 1st. QSL via his home callsign.

EU-177. Matthias, DL3KUD, will be active as SM5/DL3KUD from K ttil
Island between July 27-29th. Activity will include the RSGB
IOTA Contest (July 28-29th) as a Single-Op/CW-Mode/24HRS/
Low-Power entry. QSL via his home callsign.

EU-178. Juri, ES5GP, will be active as ES5GP/8 from Kihnu Island
between July 25-30th. His activity will include the RSGB IOTA
Contest (July 28-29th) on all HF bands on SSB. QSL via his
home callsign.

EU-181. Operators Stan/LZ1GC, Dechko/LZ1QV, Boyko/LZ1QN, Boris/LZ2JR,
Nasko/LZ3YY, Lliam/LZ1CNN and possibly others will be active
as LZ0I from Sveti Ivan Island during the RSGB IOTA Contest
(July 28-29th) as a Multi-Single/DX/High-Power entry. QSL via
LZ0I (by the QRZ.com address) or by the Bureau to LZ1BJ.

NA-010. Alan, VE1AL, will be active from Cape Breton Island during
the RSGB IOTA Contest (July 28-29th) as a Single-Op/All-Band/
Low-Power entry. QSL via VE1AL.

NA-081. Operators John/VE1CDD, Barry/VE1TRI, Alan/VA1MM, Fraser/VE1WO,
Sheldon/VE1GPY and Greg/VY2MP will be active as VC1X from
Little Tancook Island during the RSGB IOTA Contest (July
28-29th) as a Multi-Op/Mixed-Mode/High-Power entry. QSL via
VE1CDD.

NA-091. Rob, VE7RSV, will once again be active as VE7RSV/P from
Broughton Island (CISA BC-026), located in the Broughton
Archipeligo just east of Port McNeil towards the Mainland,
during the RSGB IOTA Contest (July 28-29th) as a Single-Op/

SSB-Mode/24HRS/Low-Power entry. He usually uses a FT-857
with a G5RV antenna about 35 feet high. He prefers to QSL
direct or by the Bureau.

NA-137. Several members of the Long Island DX Society will be active
as N1LI from Long Island, ME, during the RSGB IOTA Contest
(July 28-29th) as a Multi-Op entry. QSL via N1LI.

NA-148. Scott, NE1RD, will be active as NE1RD/1 from Lovell Island
during the RSGB IOTA Contest (July 28-29th) as a Single-Op/
SSB-Mode/24HRS entry. QSL via his home callsign.

KP4, PUERTO RICO (Special Event). Members of the Movimiento Radioaficionados
de Puerto Rico will celebrate the 60th anniversary of the Constitution of
Puerto Rico with the special event callsign K4C on July 25th, from the
Julio Enrique Monagas National Park in Bayamon. They will operate from
10 to 40 meters SSB and their local net of repeaters from 1400z on. QSL
info is via WP4NPC.

M0, ENGLAND. Phil, G3SWH, will activate the special callsign M0RSE on CW
only on all bands over the weekend of 18th and 19th August, 2012. All QSOs
will be uploaded to LoTW immediately after the weekend. There will also be
an on-line log at <www.g3swh.org.uk/m0rse.html>. Special QSLs are available
via G3SWH, either via the OQRS facility at <www.g3swh.org.uk/decision.html>
(bureau or direct) or direct with SAE and adequate return postage or even
via the traditional bureau route.

NH8, SWAINS ISLAND (Press Release). The following press release was sent
out on July 16th [edited]: "Swains press release # 2 -- Craig/K9CT and
Joe/W8GEX are happy to report that preparations for the NH8S Swains
Island DXpedition are on schedule. The 20 man international team should
be on the island from September 4th, thru September 17th. Swains is # 31
most wanted worldwide. They will operate all bands with SSB, CW and RTTY.
A big thank you goes to John/N7CQQ and Paul/W8AEF for their time in
building and testing the SVDA's that will be used. Thanks also to Paul/W6XA
and Tom/N4XP for testing the radios, amps and laptops. All of the equipment

has been shipped to Arnie/N6HC in California for the upcoming departure via cargo ship later this week.
The QSLing will be handled by Joe/AA4NN with help from his XYL Margarett. Plans are to upload logs daily by satellite phone from the island to Clublog.
We are very grateful to our equipment sponsors, including: ICOM, Elecraft, VIbroplex, Innovantennas, DX Engineering, Heil Sound, Primus, Hi-Z Antennas, and The RF Connection. Also to Kimo, KH7U, for the 160m vertical, and George, W8UVZ, for the Battle Creek Special.
We have updated our Web site with pictures, operating information and links. Thanks to John, K6MM, for doing the webmaster duties.
There will be a great emphasis placed in working Europe where Swains is most needed. We will have several receiving antennas aimed that direction.
It will be very hot and humid, and mosquitoes should be plentiful, so please have patience with the operators. We ask that you listen to the operator instructions to ensure we are able to work as many stations as possible.
This tent and generator operation is a very expensive endeavor, and the group is most grateful for the foundations, clubs and individuals who have already contributed. For those that would like to donate, you may do so from our Web site at: http://www.nh8s.org
The skilled international crew that is looking forward to working you includes: 9V1FJ, AA4NN, DJ2VO, DL3DXX, K5AB, K9CS, K9CT, K9NW, KB8OCP, N2TU, N4HH, N6HC, NA6M, ND2T, SM5AQD, W4BUW, W6KK, W8GEX, W8TN and WB9Z."

ON85, BELGIUM (Special Event). Eric, ON4LN, President RCL, informs that the members of the Radio Club Leuven (RCL) will celebrate their 85th anniversary this year. They will be active using the special callsign ON85RCL from their RCL club shack and proudly. Activity begun on July 1st and will last until December 31st. Operations will be on all bands (6m if condx) and on various modes. For more info, see QRZ.com under ON85RCL or ON4CP.

OZ12, DENMARK (Special Event). In connection with the largest Scout and Guide Jamboree ever held in Denmark, a special event station with the callsign OZ12SJ will be - very - active during the period between July 21-29th from Holstebro. Five "Jamboree On The Air" stations will be active on all bands. The activity includes many different JOTA activities within Amateur Radio and is supported by EDR, Eksperimenterende Danske Radioamat&#65533;rer, and members will be helping to activate and demonstrate the hobby to the Scouts. The activity also includes a license course and the option of actually taking a license test on site. The callsign is expected to be active in the DMC RTTY Contest, CQWW VHF Contest and the RSGB IOTA Contest QSL via the Bureau.

PT0. ST. PETER AND ST. PAUL ROCKS (Update/Funds Needed). George, AA7JV, informs that his TX3A partner, Tomi, HA7RY, and himself have teamed up with the Brazilian Aruacaria group to activate St. Peter and St. Paul Rocks under the callsign PT0S. As you may know, the Brazilian Navy has placed a permanent ban on DXpeditions to the rocks. Due to the efforts

of Atilano, PY5EG, the Brazilian Navy made an exception and has given them permission to operate from the Rocks. This is a "once in a lifetime" opportunity to both activate the place and to prove to the navy that Amateur Radio is not incompatible with the operation of the scientific mission there. Although there have been some small operations from this entity, it remains high on the most wanted list because conditions on the rocks are tough and a lack of level space precludes a large and traditionally equipped operation. PY0S is No. 16 on Clublog's most wanted list. George mentions that although they will work all the HF bands, they do have a low band focus. This time they would like to take things one step further and make PY0S easily available on all bands to small and midsize stations (as well as the big ones). They intend to achieve that even on 160 meters. The need for large antennas for serious DX on 160m has discouraged many small urban amateurs from getting on that band, where they feel they can not compete with the big guns in the pile-ups. The proximity of PY0S to NA (and EU) creates a unique opportunity to activate a rare location that could be worked by modest stations from NA and Europe. They intend to make sure that this possibility is fulfilled. This will likely create a new level of excitement and increased activity on 160 meters. They have also developed a new beam antenna that will allow them to work very modest stations on 20, 15 and 10 meters. Additionally, led by PY5CC and PY2XB, they will also make a serious 6 meter effort. George states, "This will be a tough and costly mission for us. We will have to have a minimal environmental foot-print, while we want to make sure that we give this rare entity to as many hams as possible in the relatively short time frame available. We want to do our best, as we know that there may not be another DXpedition to this place for a long time. The team is looking for financial assistance for this very crucial DX-pedition. In the past, Tomi and George have covered all expense (less donations received) and used their own gear. They did not mind roughing it on some remote island without much support (and on the cheap). This time, however, they are working against serious obstacles that are proving to be costly to overcome. They can not fund this operation themselves. They hope that clubs/associations/individuals would be able to help them. They most certainly promise to work hard to make the entire HF DX com-munity, happy. Please remember that this DXpedition will take place in the late November to mid December 2012 time frame. The actual dates will depend on weather conditions and will be announced later on their Web site. An "Online QSL Request Service" (OQRS) will be set up on their Web site for both direct or Bureau QSLs. For direct cards via the mail, QSL via HA7RY (read details on the Web page). The log will be uploaded on LoTW, generally within 36 hours of the QSO taking place. For further information, please visit: http://pt0s.com

QSL CO8ZZ via DK1WI. Raul, CO8ZZ, was active this past weekend during the CQWW VHF Contest on 2 and 6 meters.

QSL RECEIVED VIA LoTW: 4Z5MU, 7O6T, 9A2UZ, 9M0L, AK4AT, BD4GNV, CO7WT, CT12EEK, DJ9UN, DL0CS, F6OWT, FP/KV1J, FR/F6KDF/T, HK0/N0STL, KL7AA, KP2MM, KP4RV, LZ7HQ, M0TRN, MJ0CFW, OZ1HDF, PJ7PT, PP5EG, PS2T, PY1VOY, RA7A, RI1ANF, RV3ACA, RV4CT, S50U, UA3DPM, UY2UQ, V31WW, VE1RGB, VE7IO, VE9HF, VK7ZX and WH7Z

QSLS RECEIVED VIA MAIL: 3D2AM (1990 Conway Reef; via YASME), 3D2YA, 4Z5MU, 6O0CW, 9L0W, 9M2AX, A5A, E51M, F4BKV/p, FK8CE, FK8DD, FP/NM7N, HS0ZIN, JR7ISY/JD1, KH2Y/KP1 (1993 Navassa; via OE1ZKC), LZ1JZ, MD/EB1BSV/p, OH6MM, OY1CT, TO3X, TX1B, V31IZ, VP9I, VR2XMT, XX9E and ZA1G

QSLS RECEIVED VIA THE BUREAU: 8J1RL, BV2A, BV100, E51YNB, FJ/OS1T, HB0/SP7VC, OH0/SP7VC, PJ4C, T32JB, VK100WIA and YB9/F4BKV

T6, AFGHANISTAN. Stefan, DL4ST, will be active as T6SS from from Mazar-e-Sharif until end of September. Activity will be a on the HF bands, but so far it has been mainly on 20 meters using CW, SSB and PSK31. QSL via his home callsign.

TP8, FRANCE. The "Council of Europe Radio Amateur Club" (CERAC - TP2CE) will be active as TP8CE during the RSGB IOTA Contest (July 28-29th). Operations will take place before the contest, starting July 27th, and are usually on all HF bands and modes, possibly the satellites. QSL via F5LGF. An online log search will be available at: http://www.tp2ce.eu

V6, MICRONESIA. Haru, JA1XGI will be active as V63XG from Yap Island (OC-012) between December 5-12th. Activity will probably be on 20-6 meters (especially 30/17/12m) using mainly CW, with some SSB and the Digital modes. QSL via JA1XGI, direct or by the Bureau. QSOs will be uploaded to LoTW. Look for updates and details at: http://ja1xgidxvacation.blogspot.com

V8, BRUNEI (Ops Needed). Gabriele Villa, I2VGW, team leader of the next DXpedition to Brunei, announced that they are looking for some CW operators for the upcoming V84SMD DXPedition, November 11-23rd. If interested, please contact by E-mail to Gabriele at: gabrielei2vgw@gmail.com

VP2V, BRITISH VIGRIN ISLANDS. Steven, AA7V, will once again be active as VP2V/homecall from Virgin Gorda (Tortola) between September 26th and October 1st. QSL via AA7V.

WILL KOSOVO BE OUR NEXT DXCC COUNTRY? Several sources are reporting that Kosovo, former province of Serbia, shall receive its full sovereignty in September, almost four and a half years after obtaining its independence. Stay tuned!

XP, GREENLAND. Henning, OZ1BII/OU2I, will be active as XP2I from club station XP1AB in Kangerlussuaq between September 13-17th. Activity will be CW only. QSL via his home callsign.

YB67, INDONESIA (Special Event). Look for members of the YB Land DX Club (YBDXC) to activate special event station YB67RI between 0000z August 10th and 2400z August 17th. Activity is to celebrate the 67th anniversary of the independence of Indonesia. Activity will be on all bands and modes. QSL via YB2DX direct or LoTW only. NO YB Bureau cards.

ARISS Contact from Dublin

ARISS (Amateur Radio on the International Space Station) offers an opportunity for students to experience the excitement of Amateur Radio by talking directly with crewmembers onboard the International Space Station. Teachers, parents and communities see, first hand, how Amateur Radio and crewmembers on ISS can energize youngsters' interest in science, technology and learning.

The European Space Agency has locations in several European countries. The annual summer space camp is an occasion when the children of staff employed at ESA get a chance to mix with each other in an environment which allows them to be immersed in space activities and cultural events. This year the 160 ESA campers will be in Dublin and the camp will feature an ARISS contact

The space talk will be a telebridge contact, facilitated by IRTS through the amateur radio ground station operated by W6SRJ, located in Santa Rosa, California.

The contact will also be broadcast on EchoLink AMSAT (node 101 377) and JK1ZRW (node 277 208) Conference servers, as well as on IRLP Discovery Reflector 9010.The event takes places today Sunday 22nd July at approximately 17.25UTC.

ARISS on Dundalk ARS Echolink Nodes

The ARISS contact will be transmitted via Dundalk Amateur Radio Society's two Echolink nodes EI2MOG (145.2125Mhz) and EI4FMG (70.350Mhz) live during the contact. If you are not within RF range of these nodes you may still listen to a live audio stream which is available via the Internet at www.ei7dar.com/ei2mog.html

---

South Eastern Amateur Radio Group

Congratulations to Dennis Drennan from South Eastern Amateur Radio Group on recently passing the theory examination and receiving his

licence. Dennis is now on the air from his home QTH in Kilkenny with the call-sign, EI2HSB.

SEARG Theory Classes are continuing every Wednesday night at 7 p.m. in the Roanmore Centre, Cleaboy Road, Waterford.

The next general meeting of SEARG will take place in the Roanmore Centre, Waterford at 8:30 p.m. on Monday the 30th of July - all are welcome to attend. Please note, this meeting is preceded by a committee meeting at 8 p.m. For latest information on the club, visit www.searg.com - you can also join the SEARG group on Facebook or follow the latest news from the club on Twitter.

IOTA Contest

The aim of the IOTA contest is to promote contacts between stations in qualifying IOTA island groups and the rest of the world and to encourage expeditions to IOTA islands. The contest happens 1200UTC Saturday 28th July to 1200UTC Sunday 29th July 2012 (the contest always takes place over the last FULL weekend of July).

Dundalk Amateur Radio Society EI7DAR

Radio theory classes will commence in the autumn. Anyone interested please email info at ei7dar dot com, leaving your name and contact details.

DX News

Ludo HB9EOU and Andre HB9CVC will be on the island of St Barthelemy from 22 July until 4 August. They will use the callsign TO2D. The IOTA reference is NA-146.

A multi-national team will be QRV from St Paul Island off the coast of Canada from 26 July until 1 August. St Paul Island is a separate entity for the DXCC Award and the callsign to be used is CY9M. They will be active on all bands 160 - 6m and the QSL Manager is M0URX.

Two Croatian amateurs are with the NATO-led troops in Afghanistan. They are Maj 9A7TJ and Vlado 9A3QM and can now be heard as T6TJ and T6VT respectively until the end of September. QSLs for both operators go via 9A6AA.

To celebrate their country winning the recent EURO-2012 Championship Spanish stations may use special prefixes until 31 July. EA stations may use the prefix AO, EB stations may use AM and EC stations may use AN.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to

both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Amateurs Assist Local Police, Fire:

Posted: 21 Jul 2012 05:46 PM PDT
http://www.eham.net/articles/28656

Being a member of the Amateur Radio Emergency Service, or ARES, is about helping out wherever and whenever we are needed. To keep in practice, the Wood County Amateur Radio Emergency Service had 14 members support the Wisconsin Rapids police and fire departments during the Independence Day celebration in downtown Wisconsin Rapids. Even though it was uncomfortably hot and humid, operators were out to help find lost family members or phones. Hams were on the lookout for anyone who needed medical attention or to help spot trouble of any other sort. The police and ARES worked closely. The control station for ARES was manned by Ken Snyder, ARES emergency coordinator for Wood County. Sitting across from him was a Wood County dispatcher. When an amateur reported a problem, it quickly was relayed so that officers could arrive before an incident could have a chance to become a real problem. "The communication and information helps those making decisions make the right decisions," said Wisconsin Rapids firefighter Justin Pluess, regarding the ARES team being right there in the command center. "I see the radio operators as a valuable resource in the event of a natural disaster or any large scale incident.

GB2RS NEWS

Sunday 22nd July 2012

The news headlines:

* Still time to get your O callsign

* Changes to IOTA Rules

* Latest news on transatlantic 2m beacon

It's not too late for UK amateurs to apply for the special prefix to celebrate the London 2012 Olympics and Paralympic Games. The Notice of Variation application can be found on the RSGB website at www.rsgb.org/olympics. The special callsigns run until 2359BST on 9 September. The letter O, Oscar, will be added to calls, or replace the regional identifier.

The IOTA Contest takes place on 28 and 29 July and there are some important rules changes for participants. The scoring for Island-World and World-World QSOs has changed, to increase the importance of working island stations. The World Multi-op category has been discontinued. A QSY rule for Island Multi-Op stations has been introduced, because some entrants have been operating with more than one multiplier station. Finally, low power expedition entrants are now allowed to use any antenna. The 2012 rules are on the Contest Committee section of the RSGB website. All operators are asked to please be careful to use contest preferred band segments, as penalties will be applied to stations who do not observe these limits.

Over in the USA, Brian, WA1ZMS, is making the final preparations to ship the GB3WGI 144MHz transatlantic beacon transmitter over to Northern Ireland. Thanks to the kind donation of antenna parts and clamps from G4CQM at Powabeam Antennas, beacon keeper Gordon, GI6ATZ, is in the process of building the antenna system for the beacon, and installing the emergency shutdown system. It is hoped to have the beacon up and running before the year end.

Because of an increase in applications for digital gateways in the 2m band, a number of changes have been proposed to the channels used. A Litmus Test consultation exercise was carried out by the RSGB, and an amended bandplan has now been published on the RSGB website. The opportunity was also taken to correct an error in the 4m bandplan.

Following the success of the QSO party to mark the Queen's Diamond Jubilee, the Society is running a similar event to commemorate the Olympics. The object is to work as many special United Kingdom O callsign amateur stations as possible, ie callsigns beginning with GO, MO and 2O. In keeping with the previous style of event, people are asked to log the name of the distant operator. Hopefully, other information will be exchanged also, such as the sender's chosen name, a real signal report, the sender's location and station equipment data. Participation in the Olympic QSO Party is open to licensed radio amateurs in the UK and overseas. Full details are in August's RadCom, on page seven.

An incorrect phone number was printed on page 44 of the August RadCom, in the Transmit-Receive Sequencer article. The correct telephone number is 01234 832 700, not as printed. The editorial team apologises for this error.

Copyright © RSGB 2012. Not for public release before Monday 23 July 2012 except as a GB2RS broadcast. And now for the details of rallies and events for the coming week

We have no details of any rallies taking place this weekend.

On 29 July, the Horncastle Summer Rally takes place at the Horncastle Youth Centre, Willow Road, Horncastle, Lincolnshire LN9 6DZ. Doors open at 10.30am and admission is £1.50. Tables are £5 and anyone interested should contact Tony, G3ZPU on 01507 527 835.

Also on 29 July, the Blind Veterans UK Radio & Computer Rally will take place at St Dunstan's, Ovingdean, Brighton BN2 7BS. Doors open at 10.30am and admission is £2. Tables are £10 and anyone interested should contact Eddie on 01273 300 772.

Now for the news of special events

As a celebration of the London Olympic and Paralympic Games, two flagship amateur radio stations will be active during the Games as part of the Cultural Olympiad. The Cray Valley Radio Society is to host England's celebration from the Royal Borough of Greenwich, using 2O12L, that's two Oscar one two Lima. A similar amateur radio celebration is happening in Barry, South Wales, where the callsign will be 2O12W, that's two Oscar one two whisky.

Both teams are looking to make as many contacts as possible throughout the UK, Europe and the world during the Games, particularly with countries participating in the Games. They will be operating 24/7 from Wednesday 25 July until Sunday 9 September, and will be open to the public from Thursday 26 July. The London station will be open from 10am to 4pm and the Welsh station from 10am to 5pm daily. Commemorative QSLs will be available for both stations. For more information about the stations, their locations, operating frequencies and QSL information, check out www.2o12l.com and www.2o12w.com.

South Tyneside Amateur radio club is operating from Marine Walk, Roker, Sunderland for RNLI Harbour Day on Sunday 29 July from 11am to 4pm. Using GB1SLB, operation will be on 10 to 40 metres. Details from Gerard, M3XYP, whose details are correct on QRZ.com.

The 2012 Olympic and Paralympic Games Football tournament in Manchester is being marked by two special event stations. GB2012MV will be operated by Warrington Amateur Radio Club from their club shack at Bell House Lane, Grappenhall, Warrington. South Manchester Radio and Computing Club will be operating GB2012MS from Trafford MV Rugby & Cricket Club, Finley Bank, Sale. The stations will be operating on HF, VHF and UHF. Transmissions start on 25 July, the start of the football tournament. They will end on 9 September, the closing ceremony of the Paralympics.

GB2012OSP is planned for operation from Fancy's Family Community Farm on Portland Heights. The station is being organised by Dave Aitch, G1OCN and has free public access and a good view of the sailing events. Details will be on QRZ.com.

South Essex Amateur Radio Society will be operating GB1HF close to the 5km Olympic mountain biking course at Hadleigh Farm in South Essex. The station is located opposite the venue at the bottom of Benfleet Downs and will be operated at various times and days on several bands and modes from 27 July to 28 August.

Copyright © RSGB 2012. Not for public release before Monday 23 July 2012 except as a GB2RS broadcast. And now the DX news compiled from 425 DX News and other sources

The CY9M DXpedition to St Paul Island, IOTA NA-094, will have six transceivers, four amplifiers and a wide range of antennas. They will be on the air from 26 July to 1 August using 160 to 6 metres, SSB, CW and digital modes. QSL via M0URX, direct or bureau, but preferably through his online QSL request service.

Bodo, DF8DX will be active as BW/DF8DX from Taiwan, IOTA AS-020, on 22 to 25 July. He will also be on the air as DU8/DF8DX from Mindanao Island, OC-130, from 26 July to 10 August. QSL via DF8DX, direct or via the bureau.

HB9EOU and HB9CVC will be active as TO2D from St Barthelemy, IOTA NA-146, from 22 July to 4 August. They will operate SSB and RTTY on 40 to 6 metres. QSL via HB9EOU.

VE3DZ and VA2WA will be active as FP/VE3DZ and FP/VA2WA from St. Pierre et Miquelon, NA-032, until 31 July. They will operate CW, SSB and RTTY with two stations on 160 to 6 metres. An online QSL request service for bureau and direct cards will be available after the expedition.

Rick, NE8Z will be active again from Ecuador until 31 July. He will be on the air on 40 to 10 metres as HC1MD from Cumbaya using CW and RTTY, HC1MD/HC1 from Mount Cayambe using CW, as HC1MD/HC3 from Loja again using CW only and as HC1MD/HC5 from Cuenca also using CW only. QSL via

K8LJG.

Now the contest news

Today, Sunday 22nd, sees the Low Power Contest taking place. There are two power categories, 10W and 3W, and sections for fixed and portable stations. That makes four categories, and a trophy is awarded to the winner of each. Running from 0900 to 1600UTC on the 3.5 and 7MHz bands, the exchange is signal report, serial number and power.

The 70MHz Trophy Contest also takes place toady, Sunday 22nd. Running from 1000 to 1600UTC and using all modes, the exchange is signal report, serial number, locator and postcode.

On Monday 23 July the SHF UK Activity Contest takes place on 2.3GHz and up from 1900 to 2130UTC. Using all modes the exchange is signal report, serial number and locator.

On Tuesday 24 July, from 1900 to 2130UTC, the 50MHz UK Activity Contest takes place. Using all modes the exchange is signal report, serial number and locator.

And now the solar factual data for the period from Friday the 13th to Thursday the 19th of July, compiled by Neil Clarke, G0CAS on Friday the 20th of July

The large sunspot group from last week continued to dominate the solar disc until it rotated out of view during the 18th. It produced several M class solar flares and then, on the 19th, produced a long duration M7 solar flare. Solar activity was low on the 13th and the 15th. Solar flux levels declined from 148 units on the 14th to 100 by the 19th. The average was 130 units. The 90 day solar flux average on the 19th was 128, that's seven units up on last week. X-ray flux levels peaked at C1 units on the 16th and the 17th but then declined to B5.8 by the 19th. The average was B8.2 units. In last week's report I mentioned the X1 solar flare that took place on the 12th and the associated coronal mass ejection that was heading our way. This arrived during the afternoon of the 14th. Initially, the storm was not too strong but during the early

Copyright © RSGB 2012. Not for public release before Monday 23 July 2012 except as a GB2RS broadcast. hours of the 15th activity increased. Bt, the total magnetic strength of the solar wind, was not that high, but what made the disturbance so strong was that the Bz remained southward for over 32 hours. The Ap index on the 15th was 86 units and 40 units on the next day. It was not until the 18th that activity returned to quiet levels. The average was Ap 25 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 320 kilometres per second to 720 by the 14th. Speeds then declined 370 kilometres per second by the end of the period. Particle densities were low at first but increased late on the 14th, peaking at 35 particles per cubic centimetre on the 15th. Bz varied between minus and plus 3 nanoTeslas on the quiet days and between minus 19 and plus 7 nanoTeslas

during the disturbance. Radio aurora began on the evening of the 14th and continued through to the early hours of the 17th. It peaked during the afternoons of the 15th and 16th, when it reached all parts of the UK. Contacts were reported on 50, 70, 144MHz and there were even one or two reports on 432MHz but not in the UK. However, some night-owls were treated to a rare red visual aurora display as far south as East Anglia. Es continued on 28, 50 and 70, including a strong 70MHz opening to the Canary Islands on the 18th.

And finally the solar forecast. This week the quiet side of the Sun is expected to be looking our way. However, activity could show signs of increasing towards next weekend. Solar activity is expected to be low but the occasional M class solar flare could take place and increase activity to moderate levels. Solar flux levels could be slightly below the 100 mark at first but could start to increase after midweek. Geomagnetic activity is expected to be mostly quiet but around midweek a weak disturbance could take place due to a small coronal hole. MUFs during daylight hours at equal latitudes should be around 22MHz for the south and 19MHz for the north. Darkness hour lows should be about 13MHz. Paths this week to India should have a maximum usable frequency with a 50 per cent success rate of around 21MHz. The optimum working frequency with a 90 per cent success rate will be about 16MHz. The best time to try this path will be between 1100 and 1700 hours. Sporadic-E should take place on most days.

And that's all for this week from the propagation team.

Copyright RSGB 2012. Not for public release before Monday 23 July 2012 except as a GB2RS broadcast.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. Wythall Radio Club is holding club net on 145.225MHz today and next Sunday. Monday sees a curry night at Monsoon, Wythall, and on Tuesday there's an internet night at the shack, led by G7DDN. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications is holding a club net on Monday from 7pm, on 144.165 USB, vertical polarisation. On Wednesday there is a M3+M6 club net on GB3FR from 7.30pm, and on Friday there is a club HF net on 3.748MHz from 8pm. For more information contact the FELCC Information Line on 07554 362 020.

South Birmingham Radio Society is cleaning and repairing the tower on Monday, then doing shack and aerial work on Friday. Contact Don, on 01214 581 603.

Lincoln Short-Wave Club is taking part in the 50MHz UK AC on Tuesday. There's a sausage and burger night at the BSA Club on Wednesday from 8pm that cost £2. Guests are welcome. Thursday sees a club net on 145.375MHz from 8pm, and Saturday morning sees the surgery in the shack, followed by participation in the IOTA contest. For more information contact Pam Rose, G4STO, on 01427 788 356.

Telford & District Amateur Radio Society is having a big barbecue on Wednesday to celebrate winning the RSGB Club of the Year contest. Saturday sees a visit to Wooferton radio transmitting station. Contact Mike, G3JKX, on 01952 299 677.

Now we return to the traditional listing in date order. On Monday 23 July Gloucester Amateur Radio & Electronics Society is visiting Courtyard Books by kind permission of Brian, G4ClB. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 23 July Stratford Upon Avon District Radio Society is holding its construction competition. Contact G0CHO, on 01608 664 488.

On Tuesday 24 July Derby & District Amateur Radio Society is having a technical talk. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 24 July Loughborough & District Amateur Radio Club is doing EME planning for 2m or 70cm. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 25 July Midland Amateur Radio Society is holding an open meeting, putting the shack on the air and holding training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 25 July South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550.

On Friday 27 July Coventry Amateur Radio Society is having a video night. Contact John, G8SEQ, on 07958 777 363.

Copyright © RSGB 2012. Not for public release before Monday 23 July 2012 except as a GB2RS broadcast.

NEWS FOR THE NORTH OF ENGLAND We start with clubs that have several events this week. Hornsea Amateur Radio Club is taking part in the Low Power Contest on Sunday. On Wednesday there's a briefing for the IOTA contest, and the IOTA contest weekend itself starts on Saturday at Bewholme. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

Wakefield & District Radio Society continues its Intermediate and Advanced courses from 13:30 on Monday. There is a barbecue at HQ on Thursday, with a charge of £1 per hot item in addition to the normal £1 subscription. On Saturday the Intermediate and Advanced courses

continue from 13:30. Contact Ken, G8FSO, on 07900 563 117.

Sheffield Amateur Radio Club is holding its grand summer junk sale on Monday. On Saturday the club commences its weekend event for the IOTA contest, operating as M3M or MM3M. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

Now we return to the traditional listing in date order. On Monday 23 July Angel of the North Amateur Radio Club is on the air and continues its Advanced course. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 23 July Bolton Wireless Club is having a talk on the work of the RNLI by Derek, G7LFC. For details, send an email to boltonwireless@gmail.com.

On Tuesday 24 July Morecambe Bay Amateur Radio Society is having a talk by Chris, M5XYZ on the children's charity event. Contact Sheila, on 07867 516 836.

On Tuesday 24 July Otley Amateur Radio Society is taking part in the 50MHz UKAC Contest and holding a Morse class. Details from Paul, 2E0PAK, on 07768 996 370.

On Wednesday 25 July Denby Dale Radio Club is on the air from 19.30 on 145.575MHz. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 25 July Goole Radio and Electronics Society is holding a barbecue. Contact Ken, G6YYN, on 01757 638 539.

On Thursday 26 July South Manchester Radio and Computer Club is having a PC clinic with Dave, G4UGM. Details from Ron, G3SVW, on 01619 693 999.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Sunday 22 July Aberdeen Amateur Radio Society is taking part in the RSGB Low Power Contest on 80m and 40m CW from Walker Park, Aberdeen. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Sunday 22 July Wigtownshire Amateur Radio Club is having a barbecue alongside receiver testing and an antenna workshop. Please note there will be no meeting on Thursday. Details from Ellis Gaston, GM0HPK, on 07979 692 580.

On Tuesday 24 July Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

Copyright © RSGB 2012. Not for public release before Monday 23 July 2012 except as a GB2RS broadcast. On Thursday 26 July Aberdeen Amateur Radio Society is holding a Morse class and is on the air. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Friday 27 July West of Scotland Amateur Radio Society is looking at the Raspberry PI computer with MM0YEQ. Details from Sam, GM4BGS, on 07771 554 035.

On Saturday 28 July Cockenzie & Port Seton Amateur Radio Club commences its weekend event for the RSGB IOTA Contest from the Island of Tiree. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week. Radio Society of Harrow is calling CQ GX3EFX/P from Old Redding today. On Wednesday they are taking part in the WAB Follow the Torch event as GX4WAB, then the club Summer Activity commences on Friday. More information from Linda, G7RJL, on 02083 868 586.

Farnborough & District Radio Society is running a Top Band net on 1.995MHz from 8 to 9pm on Monday. On Wednesday there is a maritime history talk on The Halifax Event. Friday sees an 80m CW net from 1 to 2pm on 3.750MHz, then a 2m net from 8 to 9pm. Details from Neville, G3SPD, on 01252 404 816.

Bredhurst Receiving and Transmitting Society is visiting the Essex Secret Nuclear Bunker on Tuesday. On Thursday there's a talk by G3YVF on amateur radio electronics, and Friday sees the start of operating GB2OLG from the remote shack. Details from Charles, G4VSZ, on 07982 244 788.

Now we return to the traditional listing in date order. On Sunday 22 July Newbury & District Amateur Radio Society is taking part in the Low Power contest. Contact Rob, G4LMW, on 01635 862 737.

On Tuesday 24 July Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 24 July Chelmsford Amateur Radio Society is holding a club net from 8.30pm. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 24 July Dorking & District Radio Society is transmitting from the Devil's Dyke. Contact Garth, G3NPC, on 01737 359 472.

On Tuesday 24 July Harwell Amateur Radio Society is having a shack activity night. Details from Malcolm, G8NRP, on 01235 524 844.

On Tuesday 24 July Stevenage & District Amateur Radio Society is having a briefing on the L/C meter club project. . Contact Martin Juhe M0XJP, on 07973 793 770.

On Wednesday 25 July Chesham & District Amateur Radio Society is on the air with a 2m net via GB3VA & GB3AL. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 25 July Darenth Valley Radio Society is having a natter night, with radio on the air. Bob, M0RAW, 01322 663804, to m0raw-bob@talktalk.net

On Wednesday 25 July Hastings Electronics and Radio Club is having a talk and demo of covert radios by John Elgar- Whinney at the Taplin centre. Details from Gordon, on 01424 431 909.

On Wednesday 25 July Norfolk Amateur Radio Club is having a talk on the Secret Listeners by Paul, G3SEM. Details from Chris Danby, G0DWV, on 01603 898 678.

Copyright © RSGB 2012. Not for public release before Monday 23 July 2012 except as a GB2RS broadcast. On Wednesday 25 July Worthing & District Amateur Radio Club is planning for Fire Brigade open day, plus a talk by Phil, G4UDU, entitled 2 weeks, 6 countries and a radio show. Contact John, G8FMJ, on 01273 593 232.

On Thursday 26 July Bittern DX Group is meeting at Pinewood Park Leisure Club. Details from Linda, G0AJJ, on 01692 404 154.

On Thursday 26 July Edgware & District Radio Society is on the air with equipment provided by Eddie, M0HIE. More information from Mike, G4RNW, on 02089 500 658.

On Thursday 26 July Hilderstone Radio and Electronics Club is having a natter night and holding a planning meeting for the Wok event on 4 August. Contact Chrissie Turner, by email to hilderstoneclub@gmail.com.

On Thursday 26 July Horsham Amateur Radio Club is holding a fox hunt. Details are on the web at www.harc.org.uk.

On Thursday 26 July Huntingdonshire Amateur Radio Society is having an HF activity night. Contact David Leech, G7DIU, on 01480 431 333.

On Thursday 26 July Shefford & District Amateur Radio Society is holding a barbecue at Barry's field. Details from John Burnett, M6JBU, on 07860 804 793.

On Thursday 26 July Vange ARS is holding a natter night. Contact Steve, G0KVZ, on 01268 552 606.

On Friday 27 July Cambridge & District Amateur Radio Club is holding a junk sale. Contact Ron, G3KBR, on 01223 501 712.

On Friday 27 July Fort Purbrook Amateur Radio Club is having a natter night. Details from Mick Ponsford, M0GWD, on 02392 366 699.

On Friday 27 July Mid-Sussex Amateur Radio Society is having a radio night with equipment testing for SSB Field Day. Contact Rob, 2E0RJA, on 01444 232 129.

On Friday 27 July South Essex Amateur Radio Society commences operating special event station GB1HF for the Olympic Games. Operation will be at various times and days to 23 August. Details form Dave, G4UVJ, on 01268 697 978.

On Friday 27 July Wimbledon & District Amateur Radio Society starts its annual camp. Contact Andrew Maish, G4ADM, on 02083 353 434.

On Saturday 28 July Crystal Palace Radio and Electronics Club continues its Foundation course. Contact Bob, G3OOU, on 01737 552 170.

On Saturday 28 July Loughton & Epping Forest Amateur Radio Society is supporting Love Loughton day, coinciding with the first day of the London Olympics. Contact Marc Litchman, G0TOC, on 02085 021 645.

On Saturday 28 July Newbury & District Amateur Radio Society is taking part in the IOTA contest. Contact Rob, G4LMW, on 01635 862 737.

On Sunday 29 July Waterlooville Amateur Radio Club is having a talk on WW2 radar systems. Details from Rich, G4IBW, on 0772 225 002.

On Sunday 29 July Worthing & District Amateur Radio Club is at the Blind Veterans UK Radio Rally at St Dunstans. Contact John, G8FMJ, on 01273 593 232.

From the RSGB site:

"In view of all the restrictions associated with publicising the
Olympics, members have been asking what wording may they use on QSL
cards associated with the Olympic special prefixes. Through the RSGB the
Olympic Brand office has confirmed that the phrase;

"Amateur radio special event station to celebrate the London 2012
Olympic Games and Paralympic Games"

is quite acceptable to use on ordinary QSL cards such as those
associated with GOyxxx call and G2012xxx series."

Well, that's nice to know, but somehow, I don't think I'll be bothering.

Yes, but what has it got to do with Ham Radio?

And, whilst we are on the subject, what has the RSCB got to do with Ham
Radio?

```
:Product: Weekly Highlights and Forecasts
:Issued: 2012 Jul 23 1249 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
16 - 22 July 2012

Solar activity ranged from very low to high levels. Region 1520
(S16, L=86, class/area Fkc/1460 on 12 July) was responsible for most
of the flares during the week, including the largest. High activity
occurred on 19/0558 UTC when Region 1520 produced the largest flare
of the week, an M7 accompanied by Type II (estimated velocity 1110
km/s) and Type IV radio sweeps, a 1000 sfu Tenflare, and a
partial-halo CME. Activity was at moderate levels two days earlier
when Region 1520 produced a long-duration M1/1f flare and
partial-halo CME on 17/1715 UTC. The same region produced two days
of low activity, with a C7/Sf at 16/2003 UTC and a C4 flare at
18/2218 UTC. With the exception of one C1 flare at 21/2324 UTC from
Region 1526 (S18, L=266, class/area Bxo/10 on 21 July), very low
levels of activity persisted from the 20th through the remainder of
the week as Region 1520 rotated around the west limb.

A greater than 10 MeV proton event began at 17/1715 UTC, reached a
maximum flux of 136 pfu at 18/0600 UTC, and ended at 21/0310 UTC.
This event was associated with the long-duration M1/1f event on 17
July. The greater than 100 MeV proton flux showed a slight
enhancement late on 17 July.

The greater than 2 MeV electron flux at geosynchronous orbit was at
moderate levels on 16 July, increased to high levels 17-21 July, and
decreased to moderate levels on 22 July.

Geomagnetic field activity ranged from quiet to major storm levels.
Activity on 16 July began at major storm levels and decreased to
unsettled levels as the day passed. 17 July saw quiet to active
levels with a periods of minor to major storm levels at high
latitudes. The increased activity was attributed to lingering
effects from a CME which arrived late on 14 July. Quiet levels
followed on 18-19 July. Data from the ACE spacecraft suggested the
CME from 17 July swept past on the 20th, and the CME from 19 July
```

passed on the 21st. This brought quiet to unsettled conditions, with intervals of active to minor storm conditions at high latitudes, from the 20th through the end of the week.

Forecast of Solar and Geomagnetic Activity
23 July - 18 August 2012

Solar activity is expected to be at very low levels with a chance for C-class events until 29 July when activity is expected to increase to low levels due to the return of old Region 1522 (N11, L=099). The return of old Regions 1519 (S15, L=107) and 1520 are expected to bring moderate activity levels with a slight chance for X-class events, from 30 July through 13 August. Activity is expected to return to mostly low levels for the remainder of the period as Regions 1519 and 1520 depart.

A greater than 10 MeV proton event above 10 pfu is possible with a slight chance for major flare activity from 30 July to 13 August.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels on 23-27 July, 3-5 August, and 11-15 August. High levels are expected from 28 July to 2 August and on 6-10 August.

Geomagnetic field activity is expected to be at quiet to unsettled levels with isolated active periods for the first three days (23-25 July) as a coronal hole high speed (CH HSS) stream becomes geoeffective. Activity is expected to decrease to mostly quiet levels on 26-27 July, then increase to unsettled to active periods through 30 July as a recurrent negative polarity CH HSS becomes geoeffective. Quiet to unsettled conditions are then expected for the remainder of the forecast period.

http://forums.qrz.com/showthread.php?355045-Great-Texas-Balloon-Race-Special-Event-KI5UA-Jul-27-Jul-29-1400Z-2200Z&goto=newpost

July 27 - July 29 will see the Great Texas Balloon Race and National Hot
Air Balloon Finals. at Longview Texas.

The Longview/East Texas amateur Radio Club will be running the special
event station KI5UA from 1400Z - 2200Z on 14.250 and 7.250 Mhz SSB and CW
on 20 & 40M. A special certificate/QSL will be available by writing the
Longview/East Texas amateur Radio Club (LETARC) at PO Box 5613, Longview,
TX 75608 and enclosing an SASE. For an unfolded certificate send a 9 x 12
SASE and if you don't mind it being folded a #10 business SASE will do.

W4R - Sackets Harbor, NY War of 1812 Bicentennial

Posted: 22 Jul 2012 10:47 AM PDT
http://forums.qrz.com/showthread.php?354972-W4R-Sackets-Harbor-NY-War-of-1812-Bicentennial&goto=newpost

The Jefferson County Radio Amateur Club, Inc. will be operating as W4R July 22-23 & August 4-5 from Sackets Harbor, New York. Sackets Harbor was at one time a shipbuilding center for the United States Navy and the site of major military operations during the War of 1812. Although this is late notification regarding the July 22-23 operations the majority of our operations will be on the August 4-5 weekend. Those wishing to receive a 8.5x11 inch certificate commemorating their contact with W4R are asked to send a SASE. A $2 donation to assist the club with offsetting expenses associated with our special events is encouraged and greatly appreciated.

Operations will be on 10M, 15M, 20M & 40M dependant upon propagation and number of available operators.

Look forward to seeing you on the air!

Learning The In's And Out's Of Ham Radios:

Posted: 22 Jul 2012 06:56 PM PDT
http://www.eham.net/articles/28660

Twin Falls, Idaho (KMVT-TV) A local radio personality organized a seminar to teach people how to use Ham radios. Kelly Klaas who is known for being one of the voices on KLIX 1300, helped the attendees learn how to use these radios in the event of a disaster. The event took place at Loong Hing restaurant in Twin Falls. Klaas says the interest in these amateur radios is growing as there are more than 700,000 owners in this country alone. He adds they're great for meeting new friends, of course staying connected in times of disaster as well and a hobby. "The capabilities go way beyond your cell phone, a lot of the infrastructure be lost in the event of an emergency ham radio is able to always be there and go through no matter. it's kind of the ultimate communications device."

W6UX/P to Activate Anacapa Island NA-144 July 28-29

Posted: 23 Jul 2012 09:45 AM PDT
http://forums.qrz.com/showthread.php?355101-W6UX-P-to-Activate-Anacapa-Island-NA-144-July-28-29&goto=newpost

Anacapa Island (NA-144) will be activated as W6UX/P with a team of 6 operators during the IOTA contest. As far as we know, NA-144 has not been activated since we were there last year, so don't miss this chance to get this rare IOTA in your log! Anacapa also counts for ARLHS USA-012 and WLOTA-1300 lighthouses, US Island CA-002S, Flora-Fauna WFF KFF-014 and for Ventura County.

Team: W6UX, AE6RS, N6GP, KQ6ES, KR6J, KJ6REP

Bands: 40, 20, 15, 10, and possibly WARC (non-contest)

Modes: CW, Phone

Anticipated Operating Schedule:

0000z July 28 - 0600z July 28 (Station checks and non-contest QSOs)

1200z July 28 - 1200z July 29 (RSGB IOTA contest as W6UX/P)

1200z July 29 - 1400z July 29 (Battery power permitting, final non-contest QSOs)

This is a battery powered operation (1 "run" station, and 1 "multi" hunter station), and we will need to conserve power in order to make it all the way to Sunday. We plan to limit output to 50w unless absolutely necessary to boost QSO rates. We expect most of the action to be on 20 and 40, but with luck 15 will be open and we are bringing a Moxon for that band. All other antennas are PAR Endz-fed dipoles.

Contest QSOs are logged as "W6UX/P" and will be uploaded to LOTW and eQSL. To receive a special NA-144 card, QSL via W6UX. For all non-contest QSOs, QSL via home calls.

Thanks!

Jeff, W6UX

Apocalypse Boy and His Radio:

Posted: 23 Jul 2012 05:12 PM PDT
http://www.eham.net/articles/28664

Fourteen-year-old Tom K. Jose is your average ninth grader; except for the fact that he is on his way to create a record in amateur radio contacts. Till date, the young lad has made 1,000 contacts in 97 countries across the world. He even teaches Morse code and explains the fundamentals of communication engineering to fellow students at his school Rock Memorial Higher Secondary School.
What is so special about making 1,000 friends on amateur radio when more are possible on social networking sites online? "It is fundamentally wrong to compare amateur radio friends with those on Facebook. There is a certain intrigue and thrill in voice-to-voice conversations with new people in distant lands, very often those in non-English speaking countries," he explains.

Ham Senses Quakes, Draws Scientists:

Posted: 23 Jul 2012 05:11 PM PDT
http://www.eham.net/articles/28663

His physical disabilities stand apart when this ham radio enthusiast makes calculations and predictions about earthquakes somewhat accurately -- and the scientists at the premier Centre for Earth Science Studies are enthused. Sreemurukan Anthikkad, a 48-year-old Ham radio enthusiast, paralysed below waist due to polio while he was an infant, makes assessments that are "50 per cent" satisfactory, say CESS scientists like Dr John Mathai. "Sreemurukan alerts us when he identifies unusual changes in radio waves while talking without the support of boosters (repeaters). This, he feels, is indicative of quakes. This he did a day before several quakes in the last few months," says Dr John Mathai.

New radio system at sub base fouling up garage door openers

Posted: 23 Jul 2012 02:26 PM PDT
http://forums.qrz.com/showthread.php?355143-New-radio-system-at-sub-base-fouling-up-garage-door-openers&goto=newpost

Montville - Sondra Tuchman used to open her garage door from halfway down the block. Now she has to get out of her car, stand in front of the door and press the remote. Sometimes she gives up and just walks through a side door.

On Thursday, Tuchman and a neighbor in the Hillcrest senior retirement community collected the signatures of about 50 people in their Uncasville neighborhood who said their garage doors also weren't working.

Tuchman said a salesman from Overhead Door Company of Norwich, Inc. told her the company had received similar complaints from customers in Groton, New London, Waterford, Montville and Gales Ferry. The company referred questions about the problem to the corporate office, saying that its equipment was not defective.

Rather, a new radio system operating at the Naval Submarine Base in Groton may be to blame. Known as Enterprise Land Mobile Radio, the communications system is being used at most U.S. military installations to connect military personnel and civilian first responders over a wide area, and it "may interfere with nearby garage door openers in the surrounding community," said base spokesman Chris Zendan.

The base began using the system in July 2011. ELMR uses radio frequencies between 380 and 399.9 megahertz, which have been reserved for the Department of Defense since World War II for air and ground communications but have been underutilized until now.

Some radio-controlled garage door openers operate legally at very low power on the same frequencies but are not licensed to do so. Because they are unlicensed devices, the owner/operator has no right to protection from interference.

"In response to the increased needs of homeland security, the Department of Defense now must make more use of these frequencies to deploy new mobile radio systems on and around certain military bases," the Federal Communications Commission said in a public notice. "Some consumers near these bases may experience interference to their garage door openers that

can reduce operating range or cause the remote control to cease functioning."

Residents in communities near military bases across the country, from Eglin Air Force Base in Florida to the Marine Corps Base Quantico in Virginia and Naval Station Newport in Rhode Island, have reported jammed garage doors. The Providence Journal reported in May 2011 that a public relations consultant for Warwick's Overhead Door Co. said the company ordered replacement parts and will install them for free.

The commander of the Groton submarine base can't modify the system because of complaints from local residents or offer any compensation to those affected, Zendan said. The base has only heard from one other person complaining of a possible interference issue - in December 2011, he added.

Tuchman said she was told by Overhead Door Company she would have to pay about $300 to change her system to another frequency. A manager at the company told a reporter that replacing the equipment is "not our responsibility" because "it all has to do with homeland security."

Sheriff's colorado river station amateur radio association n6crs tests radios

Posted: 11 Jul 2012 08:56 AM PDT
http://forums.qrz.com/showthread.php?353578-Sheriff-s-colorado-river-station-amateur-radio-association-n6crs-tests-radios&goto=newpost

NEEDLES ☐ With 5,000 square miles of law enforcement and search and rescue responsibilities from the Nevada state line south about 70 miles to the Riverside County line and from the Colorado River east almost 90 miles, the San Bernardino County Sheriff☐s Department realized the need for a command post equipped with a variety of communication equipment able to communicate with allied law enforcement and public service agencies from remote locations.

Sheriff☐s deputies, search and rescue members, Needles Citizens on Patrol and professional staff from the department☐s Colorado River Station held emergency communications training from the CRS command post on June 23 at Jack Smith Park in Needles. Personnel tested their ability to set up the command post on a moment☐s notice and, under simulated emergency conditions using only emergency generator power, began communicating with other amateur radio operators nationwide as part of the annual American Radio Relay League Field Day event.

FOR IMMEDIATE RELEASE CONTACT: Ron Peterson, K0LMD

970-332-3338

k0lmd@yahoo.com

SPECIAL EVENT STATION "N0B" TO OPERATE DURING BEECHER ISLAND BATTLE

MEMORIAL CELEBRATION SEPT 14-16, 2012

Amateur radio special event station "N0B" will be operating from

the historic Beecher Island battlefield in Yuma County, Colorado

during the annual Beecher Island Battle Memorial Celebration the

weekend of September 14-15, 2012.

The event commemorates the 144th anniversary of the historic battle

between U.S. Calvary troops and Plains Indians fought September 16,

1868. Historic information may be found by an Internet search for

"Beecher Island battle" and at: www.wrayco.net/museum_beecher.html

Station manager Ron Peterson, K0LMD, of Wray, Colorado said the

station will operate on a primary frequency of 14268 Khz, with

backup at 7268 Khz depending on propagation characteristics. On

Friday, Sept. 14 he plans to be on the air from Noon to 5pm and

8pm to Midnight; Saturday, Sept. 15, as working schedule allows;

and Sunday, Sept. 16 from 8am-11am and from 3pm to 8pm. All times

local time: Mountain Daylight (UTC -6 hours). He will be assisted

by Bill Boas, KC0IZI of Wray. A certificate is planned for check-

ins and "county hunters" wishing one. SASE. A web page with this notice,

photos, and developing information is posted on the Internet at:

Special Thanks to "13 Colonies" Special Event Sponsors and Operators

Posted: 24 Jul 2012 03:40 AM PDT
http://forums.qrz.com/showthread.php?355200-Special-Thanks-to-quot-13-Colonies-quot-Special-Event-Sponsors-and-Operators&goto=newpost

Greetings All,

I'd like to express a special thanks to Mr Ken Villone, KU2US, and all of
the event sponsors and operators associated with the "13 Colonies" Special

Event over the 4th of July week.

When the weather threw a wrench into the middle of the event, many of our Amateur bretheren were put off-the-air. (I was not one of them, luckily, but I've 'been there') The bad weather, loss of power, etc, meant that many operators who might want to participate in this fun activity were going to lose that opportunity through no fault of their own.

But the 13 Colonies folks stepped up and, with no obligation to do so, extended the activity through the 7th of July (0400Z 08 July) to give everyone a chance to work them. THAT is sportsmanship and makes Amateur Radio the kind of environment that I like being associated with.

Kudos to all of the 13 Colonies crew! Thank-you for sacrificing your time and less-than-ideal propagation to make Amateur Radio more fun for the rest of us!

And to top it off, I have, as of yesterday (23 July 2012) already received my certificate back! If that's not some type of record, it ought to be!

Thank-you, Ladies and Gentlemen! It was a pleasure!

73

CAF Bomber B-29 FiFi On 14.263 MHz Today

Posted: 21 Jul 2012 09:15 AM PDT
http://forums.qrz.com/showthread.php?354846-CAF-Bomber-B-29-FiFi-On-14-263-MHz-Today&goto=newpost

Today the CAF B29 Bomber FiFi will be operating on or near 14.263 MHz while in

flight using vintage Collins AM gear that was installed recently by Collins

Retirees.

The anticipated flight will originate from CID Cedar Rapids, Iowa at around 1800

hours UTC.

in CW and SSB from Neuwerk (GIA N-012, WLOTA 2311) from Jul 26-30.
QSLs will be sent via GlobalQSL (via DL7AT) after their activity.

EU-129, DL/SP1, Usedom Island: Mike,DG5LAC/p, will be active from Usedom
(DLFF-075, WLOTA 1640, GIA O-13) on July 27-29. He will be QRV in SSB
on 80m-10m and will participate in the IOTA Contest. QSL via homecall.

The clubstation DL0KWH/p will be activated also from the island of
Usedom (DLFF-075, WLOTA 1640, GIA O-13) during the IOTA Contest.
QSL via DL0KWH.

A German group will be active as DM3X/p from Goermitz Island during
the RSGB IOTA Contest. QSL via DM3X (B).

Steven,DO6UL/p, will be active from Usedom between Jul 28 and Aug 10.
QSL via homecall.

EU-132, SP1, Szczecin/Koszalin Province group: Adam,DJ0IF, will sign SN0RX
from Wolin Island (SPIA SZ-002, WLOTA 4120) during the IOTA Contest.
QSL via SP8RX (bureau/direct).

EU-136, 9A, Kvarner group: Jozef,9A/OM5AW, is going to hit the airwaves from
Krk Island (ACIA IC-105, CIA-22, IOCA CI-046, MIA MC-185, WLOTA 1342).
Mario,9A/OM5MC, will join the contest only in SSB.
QSLs for both callsigns via OM2FY (bureau/direct).

Neven,9A5YY, will be QRV from Losinj Island running 100 watts in SSB
and CW QRV. QSL via 9A5YY (bureau/direct).

Another activity from EU-136 is planned by 9A4KJ/p from Rab Island.
QSL via homecall.

EU-137, SM7, Skane County group: Lars,SM6CUK, will once again be active as SA6G/7 from Ven Island (WLOTA 0780) from Jul 25-30. Activity will include an entry in the RSGB IOTA Contest. QSL via homecall.

EU-140, OH5, Etela-Suomi (Kymi) Province group: Members of the OH5AD group and possibly others will be active as OG5A from Kuorsalo Island during the IOTA Contest. QSL via OH5AD.

EU-144, I*8, Calabria/Basilicata Region group: Members of the section "ARI of Cosenza" will join the IOTA Contest as ID8/IQ8CS from Dino Island (IIA CS-002). QSL via IQ8CS (bureau/direct).
See also: http://www.aricosenza.it

EU-146, PA, Zuid Holland/Zeeland Province group: Louis,PA0LCE, Kurt,ON5UT, Arsene,ON4FE, Lieven,ON4PQ, Joel,ON6JM, Eddy,ON7PO, Pat,ON7PQ, and Walter,ON8LW, will be QRV as PF4C from Schouwen Duiveland (WLOTA 3089). QSL via ON4ON (bureau/direct).

Ronny,PA/ON6CQ, is also working in SSB from this island. QSL via ON6CQ.

EU-150, CT, Minho/Douro Litoral/Beira Litoral Province group: Members of the "Portuguese DX Group" (GPDX) will be QRV on the HF bands signing CT7/homecall from Insua (DIP MI-001, PIP NT-001, DCFP F-006, DCP CVC-046 and CVC-047, DMHP VC-017, VC-061, DFP FM-101, DMP 1602, DDFP CMN-12, Loc IN51nu) during July. They will join the IOTA Contest as CR6W. Look for some operators to stay a few days longer on Insua and activate the lighthouse (ARLHS POR-028, WLOTA 2869).
QSLs for CR6W via CS5DX (bureau/direct). All others via homecalls.
See also: http://www.to-mk.com/neu and http://gpdx.netpower.pt

EU-165, IM0, Sardinia's Coastal Islands: The second destination of the holiday trip of Jack,IZ3DBA, will be San Pietro. Listen for IM0/IZ3DBA working holiday style in CW and SSB on HF between Jul 30 and Aug 5.
QSL via IZ3DBA (bureau/direct).

EU-170, 9A, Dalmatia North group: Alen,9A3MA, Ivo,9A1AA, Zlatko,9A2EU, Rolando,9A3MR, Rax,9A3BMR, and Zik,DK8ZZ/VE3ZIK/YT3ZZ, will be QRV as 9A0D from Zirje Island (IOCA CI-151) in the IOTA Contest.
All QSOs will be confirmed via bureau automatically. Direct QSLs should be sent to DK8ZZ.

Laci,9A/HA6NL, Janos,9A/HA6PJ, Zsolti,9A/HA6PS, Sanyi,9A/HA7JJS, and 9A/HA7PL are working Pasman Island (ACIA IC-348, CIA-34, IOCA CI-085, MIA MC-291) in CW/SSB/digital modes on HF and 6m, incl. IOTA Contest.
QSLs via homecalls.

EU-172, OZ, Jylland East and Fyn group: Joergen, OZ0J, will be QRV as 5Q2T from Fyn (DIA FY-001, WLOTA 2690) in the IOTA Contest. QSL via OZ0J.

Henning,OZ1BII, will be active as OU2I from Aro Island during the RSGB IOTA Contest. QSL via homecall. See also: http://www.oz1bii.dk

EU-174, SV, Makedonia/Thraki Region group: HA0NAR will be QRV as SW8LR from Thassos Island between Jul 25 and Aug 1. He will work in CW/SSB/RTTY on

all HF bands plus 6m. QSL via homecall.

EU-177, SM5, Soodermanland/Ostergotland County group: Matt,DL3KUD, will be active as SM5/DL3KUD from Kaettiloe Island from July 27-29.
QSL via homecall.

EU-178, ES0,8, Parnumaa County/Saaremaa County South group: Juri,ES5GP/8, announced to be active as ES5GP/8 from Kihnu Island (WLOTA 0775) on Jul 25-30, including the IOTA Contest (SSB). QSL via homecall.

EU-181, LZ, Bulgaria group: LZ1CNN, LZ1GC, LZ1QN, LZ1QV, LZ2JR, LZ3YY and other OPs are signing LZ0I from Island Sveti Ivan (WLOTA 0121, ARLHS BUL-022) in the IOTA Contest. QSL via LZ1BJ (bureau/direct).

NA-010, VE1, Nova Scotia Province (Cape Breton Island) group: Alan,VE1AL, will be active from Cape Breton Island during the RSGB IOTA Contest.
QSL via VE1AL.

NA-029, VY2, Prince Edward Island: Operator Ken,K6LA, will operate from Prince Edward Island in Eastern Canada using the VY2TT superstation (Loc FN76vs, CISA PE-001) during the RSGB IOTA Contest (Jul 28-29).
QSL via K6LA.

NA-067, W4, North Carolina State East (Carteret to Currituck County) group: Nathan,N4YDU, will stay on Ocracoke Island (USi NC-001S, WLOTA 0466) from Jul 26 (2300 UTC) until Jul 29 (1200 UTC). Listen for W4O in the IOTA Contest. QSL only direct via N4YDU.

Sergej,K0KOC/p, is also working from Ocracoke Island (USi NC-001S, WLOTA 0466) using his Elecraft K3 (QRP 10 watts) in the digital modes JT65, PSK-31 and RTTY from Jul 26-30. QSL via K0KOC (bureau/direct).

NA-081, VE1 Nova Scotia Province East Group: John,VE1CDD, Barry,VE1TRI, Alan,VA1MM, Fraser,VE1WO, Sheldon,VE1GPY, and Greg,VY2MP, will show up as VC1X from Little Tancook Island in the IOTA Contest. QSL via VE1CDD.

NA-091, VE7, British Columbia Province South group: Robert,VE7RSV/p, is working in SSB from Brighton Island (CISA BC-026). QSL via homecall.

NA-092, W5, Texas State West (Cameron to Calhoun County) group: Jim,WD5IYT, plans to visit Mustang Island (USi TX-011S) during the IOTA Contest.
QSL direct via WD5IYT. The logs will be uploaded to the LoTW.

NA-126, VE1, Nova Scotia Province South group: Kevin,VE9MY, and Linda,VE9GLF will be active from John's Island (CISA NS-127) before, during and after the IOTA Contest. QSLs for both calls via VE9MY (see QRZ.com).
See also: http://www.qsl.net/ve9my

NA-128, VE2, Quebec Province (St Lawrence Waterway) group: Members of the "NA-128 Contest Group" activate the special callsign VX2I from the Ile Verte (CISA QC-015, LOC FN58, ARLHS CAN-244, WLOTA 1404, VRMS 004). Several stations will be active in CW, SSB, RTTY and PSK63 from the lighthouse keeper's quarters from Jul 26-29. One station is set up only for 6m. They will take part in the IOTA Contest as well.

QSL via VE2CQ. For more information check: http://www.qsl.net/na128cg
---
Another activity from this IOTA group is planned by Jean-Pierre,VA2SG,
Robin,VE2DRO, Claude,VE2ZOS, and Rock,VE2TCQ, signing VE2DRO in SSB and
CW from 40m-10m from Coudres Island (CISA QC009, WLOTA 2779).

NA-129, VE8, NWT (Banks Iceland) group: John,VE8EV/p, will activate
Banks Island (Loc CQ71, CISA NW-007) in the IOTA Contest.QSL via VE8EV.
See also: http://ve8ev.blogspot.com

NA-136, W1, Connecticut State group: Adam,W1ASB/p, attends the IOTA Contest
for 12 hours from Ram Island. QSL via W1ASB.

NA-137, W1, Maine State West (York to Knox County) group: Dave,N1EDU/p, is
spending his holidays on Bailey Island (USi ME-022S) and works in
holiday style on the HF bands until Jul 28. Dave will also try to
activate other islands in the Casco Bay. QSL via K1HRO (bureau/direct).

Several members of the Long Island DX Society will be active using the
N1LI contest station in Long Island/ME, during the RSGB IOTA Contest.
QSL via N1LI.

NA-139, W3, Maryland State East group: Stan,N2US/3, will activate the island
Assateague (WLOTA 4206, USi MD-001S) in the IOTA Contest. QSL via N2US.

NA-143, W5, Texas State East (Matagorda to Jefferson County) group:
Joe,K5KUA/p, is going to visit Galveston Island (USi TX-001S) again
from Jul 27-30. QSL via K5KUA.

Leslie,AD5WB, is resident on Galveston (USi TX-001S) and wants to join
the IOTA Contest this year. QSL via AD5WB. http://www.ad5wb.blogspot.de

NA-144, W6, California State South (Santa Barbara to LA County) group:
Jeff,W6UX, Rich,AE6RS, Steven,K6SGH, Kenan,KR6J, John,KQ6ES, and
Tim,N6GP, are planning a DXpedition to Anacapa Island (ARLHS USA-012,
WLOTA 1300, USi CA-002S, KFF-014). They will sign W6UX/p during the
IOTA Contest and homecalls/p before and after the contest. Since this
is a battery powered activity they will run only 50 watts.QSL via W6UX.

NA-148, W1 Massachusetts State North/New Hampshire Group: Scott,NE1RD, will
be active as NE1RD/1 from Lovell Island during the RSGB IOTA Contest.
QSL via homecall.

NA-150, KL7, Little Diomede Island: Yuri,N3QQ, and Tim,NL8F, might be active
as KL7RRC/p from Little Diomede Island (NA-150) on Jul 25-27. For
possible updates see http://ri0k.ru

OC-086, KH0, Northern Mariana Islands: Kirk,WE8A, visits Saipan (USi NI002S,
WLOTA 1333) from Jul 26-29. He will be QRV as WE8A/KH0 in SSB and CW
on 80m-6m with focus on the WARC bands. HIs preferred frequencies are:
CW: 10.106 MHz (+ up), 18.071 MHz (+ up) and 24.901 MHz (+ up).
SSB: 18.136 MHz and 24.936 MHz.
QSLs only direct to his address in Japan (see QRZ.com).

See also: http://blog.zaq.ne.jp/kirc/category/5

OC-130, DU8-9, Mindanao Island: After staying in Taiwan Bodo,DF8DX, will travel to Indonesia and stays on Mindanao (WLOTA 2803) from Jul until Aug 10. He will work as DU8/DF8DX on the HF bands and also in the IOTA Contest. If time permits, he will activate also other IOTA groups. QSL via DF8DX.

OC-142, VK4, Queensland State (South Coast) Centre group: VK4NM, VK4LAT and others will sign VK4NM from Fraser Island (WLOTA 2976, VKFF-216) from Jul 27-31. QSL via M0OXO (bureau/direct/L).

OC-150, YB, Tenggara Barat Islands: The "Organisasi Amatir Radio Indonesia" (ORARI) members Bimbo,YB3MM, Joppy,YB8XM, Kadek,YB9BU, Tjok,YB9BZ, Adi,YB9GV, Kardi,YB9KA, Adhianto,YC0OIL, Santika,YC9HIU, and Ferdiy,YC9MKF, will join the IOTA Contest as YB9IOTA from the island of Gili Trawangan. QSLs only direct via YB9BU.h
See also: http://www.mdxc.org/yb9iota

OC-227, VK4, Queensland State (Gulf of Carpentaria) South group: YL Lyn, VK4SWE, is resident on Sweers Island (Loc PH29TV) and has put up a big station meanwhile. She promised to join the IOTA Contest this year. QSL only direct or eQSL via homecall. More info and photos on QRZ.com.

SA-029, PY1, Rio de Janeiro State West group: Marcelo,PY1MT, Moreira,PU1MMZ, Mauricio,PU1SET, Jose,PY1MX, and Jair,PY1HS, will be QRV as ZV1M in CW and SSB on 80m-10m from Itacuruca Island (DIB RJ-08) from Jul 27-29. They plan to take part in the IOTA Contest as well. QSL via PY1MT.
See: http://www.casadoradioamador.blogspot.com

SA-047, PY5, Parana State group: The Perdigueiros Radio Team will be QRV as PR5D from Ilha do Mel (DIB PR-01, WLOTA 1435) from Jul 27-29. QSL only direct via PY5DC. Mehr info at: http://www.alcad.com.br/radio

NON IOTA: Chris,VE3CBK, plans to stay on Doe Island (CISA new One, Loc FN04xo) between Jul 28 and Aug 4. Listen for VE3CBK/p on or near the usual IOTA frequencies. QSL via homecall (bureau/direct).

WFF activities

URFF: EM0WFF (OP UX7MA) is working in SSB/CW on the usual WFF frequencies from the Priazovsky national park (URFF-049). QSL via UX7MA.

KFF: W3WFF/8 plans to work in CW and SSB on the HF bands from the Coopers Rock State Forest (KFF-630) between Jul 31 and Aug 3. QSL via N3GJ.

Many thanks for contributing to this issue of the DXNL are going to: Carl Smith (QRZ DX), 425DXNews, OPDX Bulletin, DF6EX (WIN-QSL), DH1PAL, DH5NBK, DJ5AV, DJ9ZB, DL1SBF, DL1THM, DL7MAE, F6AJA & Les Nouvelles DX, IZ2LSC, M0MDR, NG3K, VA3RJ, VE3ZIK and others.

Radio Revelry:

Posted: 24 Jul 2012 05:36 PM PDT
http://www.eham.net/articles/28669

Now before you think of smoked sausage, ham slices, or sausage patties with pancakes that is not the purpose of a Ham Fest. If you need an old radio transmitter, coaxial cable, antenna, or some other gadget, including a computer, then the Santa Rosa County Auditorium was the place to be Saturday. One individual even had an old police radar detector for the right price. But most of the old equipment needed the help of a guy like Mark Custracane. Why? Custracane has a hobby of selling old tubes like people use to find in their home stereos, television and other electrical equipment. Many amateur radio operators today still use the old style equipment because of the sound and quality of the transmitters and receivers.

//
Ham Radio Lives On:

Posted: 24 Jul 2012 05:34 PM PDT
http://www.eham.net/articles/28668

"There is a terrible rumor that ham radio is dead," said Kelly Klaas of the Magic Valley Amateur Radio Operators Club. The truth is, the activity is more popular than ever with more than 700,000 participants nationwide, he said Saturday during a seminar sponsored by Surviving in Style of Twin Falls. Eighteen people who have their Federal Communications Commission amateur radio license or are interested in getting one attended the event at Loong Hing Restaurant. Klaas, who has been licensed since 1966, emphasized the enjoyment that comes from talking with people from Alaska to Scotland. But he also pointed out that ham operators are a key communications link during emergencies because they can broadcast when other avenues are shut down. "In case of an emergency, your silly little iPhone is going to be a paperweight," Klaas said. Club officials said newcomers can get started for as little as $200. As involvement grows, most people sink more money into equipment, said Klaas, who admits he eats, sleeps and drinks ham radio. The Magic Valley club is a good place to learn the ropes. "If you have your license and want to get on the air, you will have an abundance of help," club member Jim Kennedy said.

WIANEWS WEEK COMMENCING JULY 29 2012.

WINTER VHF-UHF Field Day Results

Robotics Fun Day

WIA Queensland Club President's lunch

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JULY 29 2012.

GO CHANNEL O.

The 50 MHz Channel 0 transmissions in southern NSW were terminated last month.
It included the main transmitter at Mt. Ulandra and translators at Cooma and
Narooma.

This leaves the final transmission in the country which is the translator
located within Tamworth. It too will soon be a thing of the past

(vk2wi)

Robotics Fun Day

As part of Australian Engineering Week, Macquarie University is hosting an afternoon of robotics fun and learning.

Robot enthusiasts of all ages are welcome to join in the fun.

Sunday 5th of August, 2pm - 4pm Building E7B Internal Courtyard, Macquarie University, North Ryde, Sydney.

For more information follow the links under news and events at: www.science.mq.edu.au

(sourced to Richard VK2SKY)

Confidence of a record ILLW year

With nearly 340 registrations so far in the 15th annual International Lighthouse and Lightship Weekend in August, what will be the lucky 400th entry?

We have seen the Moritzburg light in Germany score the 100th followed by Point Fermin in the USA as 200th and St Tudwal?s lighthouse in Wales as the 300th.

Organisers of the fun event held on the third weekend of August are ready for the 400th registration and as it seeks to break last year's record of 470 from 55 countries.

Several nations are meeting their total at this time with a virtual flood of registrations in the final weeks.

To register online, read the guidelines, check on tallies or see the statistics, visit the website ILLW.NET

The International Lighthouse and Lightship Weekend will be held on August 18 and 19.

(Jim Linton VK3PC)

REDCLIFFE PIRATE

About 2 weeks ago several club members were addressed by a pirate station on the Redcliffe repeater. The station was using the call sign, VK4NFL. You will be pleased to know that the ACMA who have located the station and the matter is now in the hands of the Commonwealth legal authorities.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

21st of July saw the WIA Queensland Club President's lunch hosted by the Hervey Bay Amateur Radio Club.

We are now joined by QAC Member Don Wilschefski VK4BY.

"Michael Owen spoke about the WIA participation in the World Radio Conferences. It is very important to participate in the process leading to major international meetings to ensure amateur radio interests are protected. The WRC and other meetings are held in Geneva in Switzerland.

The issues discussed were:

Amateur allocation below 500kHz made at WRC - 12.

A proposal from Cuba at WRC- 12 for a secondary amateur allocation around 5.25 to 5.45 MHz is now on the agenda for the next WRC in 2015. This will be very difficult.

Threats to amateur bands from other proposals to WRC 15.

Michael Owen is seeking feedback from members on its commitment to representing the amateur service in work associated with the WRC.

Loss of 420-430 Mhz. From 1ts January 2013 this band segment will no longer be available at least for general amateur use. The main users at the moment are some 70 licensed repeater links, with 35 licensees. The WIA is coordinating the frequency changes. Only 3 other countries in the world have an amateur allocation in this segment.

ACMA. ACMA (Australian Communications and Media Authority) is very busy with 400Mhz frequency reallocations at the moment and delays are occurring with frequency approvals for repeaters etc. delays of 3 months are experienced.

As the Amateur LCD will require amendment to deal with the changes to the 420 430 MHz sub-band and the new allocation below 500 kHz, the WIA hoped that the power limit for advanced licensees could be changed at the same time, as the higher power trial had not revealed any real problems."

Those who take the local VK4 news, QNEWS, will hear much more of the President's Lunch when Don VK4BY re-joins for today's edition. Listen hear:- http://www.wiaq.org.au/ftp/vk4_qnews_32.mp3

Today Sunday 29 of July, the Homebrew Group will be holding their bi monthly technical meeting at Dural. This meeting will be after the Trash and Treasure, at 1pm.

At the meeting Mark Blackmore VK2XOF the Dural Engineer will be discussing switch mode power supplies. The talk will be about conversion of surplus switching power supplies to amateur use.

Everyone is invited and if you are new to the hobby, then get along and see how you can make your own equipment. If you are old to the hobby, then see what you have been missing.

1 pm at the transmitter site, 63 Quarry Road Dural.

Meetings with speakers introduced

The first quarterly meeting with a speaker is to be held by Amateur Radio Victoria in August.

The Tuesday nights of August 14 and November 13 have been chosen in addition to February 10 during the Centre Victoria RadioFest and the Annual General Meeting on May 14.

The speaker nights on the 3rd Tuesday of August and November start at 8pm, and the speaker session will follow to AGM in May, are held at 40g Victory Boulevard, Ashburton.

The first will be the popular Mark Tell who brings the very latest from the ACMA world of radio inspectors.

The varied work they do to track down interference, as well as ensure that all spectrum users are aware of the regulations.

Put it in your calendar now, Tuesday August 14 at 40g Victory Boulevard, Ashburton, 8pm for the Amateur Radio Victoria speaker night.

August Presentation - Homebrewing the Electrochemical Way!

Ever wanted to try your hand at Chemistry? Well, the August presentation may just be up your alley! Mike Harris formerly VK7ACQ was a Chemist in the dim dark past and has been doing some experimenting with homebrewing electrochemical apparatus.

Mike has homebrewed such a cell from a modified arc welder and other items to produce such a functioning cell.

This should be a fascinating presentation and one to warm your homebrewing hearts....HIHI.

When - 1 August 2012 from 7:30pm

Where - Queen's Domain Clubrooms.

VK8

Hello this is Spud VK8ZWM from the Darwin Amateur Radio club.

Firstly our weekly gatherings on a Thursday morning between 10 and 12 at the clubrooms in sport's house waratah crescent Fannie Bay continue with a steady stream of members and visitors to the top end.

The next gathering of the Darwin Amateur Radio Club will be on the first of August at 7pm. The evening will start with a Special General Meeting to approve the constitutional amendments that the committee have pored over for several months and not put to the vote. We need at least 20 members there or by signed proxy vote for the amendments to pass.

Following will be a discussion about the clubs entry into the RD contest and the International Lighthouse weekend. Also up for discussion is the Swap Meet being held on the holiday Monday the 6th of August. Sellers arrive around 8am Doors open at 9am, tables $5.00 each BBQ lunch, The after lunch activity will be an auction of donated items. For further information or to book a table, contact Alan VK8AB.

That's it from me Spud VK8ZWM for now, remember keep an ear out for VK8DA in the RD especially on 40

DISCUSSION POINT

What use is an f-call? (20120226 on July 22)

(Past editions of What use is an f-call can be found online at harg.org.au under F-troop.)

The joys of Amateur Radio involve the mystical ability of a piece of wire to resonate and transmit our voice or other data across the radio air-waves. It's a tricky business which involves the length of the wire, it's proximity to other objects and the difference in impedance between the wire and the radio. Having all the information in one place seems to be a challenge and each amateur you speak to has a whole set of personal experience which may or may not contradict the experience of the next amateur you speak with.

I just spent a very enjoyable hour and a half speaking with several other amateurs in a group discussion about the challenge one amateur was having with their multi-band HF antenna.

It goes a little like this:

You have a multi-band antenna and you pull it out of its packaging, only to find that you need to tune the thing. So you read the instructions which say that you should start with the shortest length, tune that, then work your way up. It even tells you how to set-up your antenna while you're doing this. Of course, nothing is ever that simple. Once you've tuned it, you climb on your roof, bolt the contraption in place and find that nothing is the same. Worse still, you really need to be in two places at the same time, at your antenna analyser on the ground and at your antenna on the roof.

Simple, you just get two people, only, the person on the roof and the aluminium antenna that got them there affect the antenna. So, you need an RF invisible person and a wooden ladder, or you just need more help, more calculations, or more patience.

So, now you've got this magic gadget pretty close, but you still have more hair to loose. The antenna rusts, conductivity changes, you name it.

This to me is what the thrill of Amateur Radio is all about, experimentation and learning, interacting with others and trying stuff. My recommendation if you're ever pulling out your hair, remember, Amateur Radio is older than you. There are many people around who have gone this path before, so don't re-invent the wheel, ask another amateur, you're likely to find someone who has done what you're trying and has solved the problem before.

I'm Onno VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

THERE'S A BUCK IN IT

Last week we made mention of the forthcoming August 5 implosion of the old NewsTalkZB Christchurch building, not occupied since the 2011 Quake

The contractor responsible for the implosion of Christchurch's Radio Network House has high hopes for large bids being placed for the rights to push the button.

The Trade Me auction has already reached over $6700, with the money raised going towards the rebuild of the Issac Theatre Royal.

Thai radio operators make their case at public hearing

More than a thousand representatives from broadcast radio stations in Thailand attended a NBTC public hearing about draft radio rules.

It is reported police intervened during the heated hearing.

The National Broadcasting and Telecommunications Commission (NBTC) say there are 7,000 registered radio operators in Thailand airing programmes on the AM and FM radio frequencies.

thaivisa.com/forum/topic/571418-radio-operators-make-their-case-at-nbtc-public-thailand/

New DXCC entity Kosovo soon?

Almost four and a half years after obtaining its independence the Kosovo, former province of Serbia, shall receive its full sovereignty in September.

This was decided by the International Steering Group, as the Austrian Foreign Minister Michael Spindelegger announced in Vienna last Monday.

Accordingly, the group decided to end international supervision with immediate effect to support the independence of Kosovo.

25 countries are belonging to the International Steering Group, including Germany and most other EU countries, the United States and Turkey.
The concept of "supervised independence" was invented by the former Finnish UN Special Envoy for Kosovo Martti Ahtisaari. The meeting of the group in Vienna was attended also by the Kosovo Prime Minister Hashim Thaci.

OPEN AND SHUT CASE

A radio signal being transmitted out of a USA submarine base is likely behind reports of garage doors failing to open and close in southeastern Connecticut, the U.S. Navy said.

The signal is part of the radio system used by the military to coordinate responses with civil emergency workers, said a spokesman for the submarine base.

Because garage door openers are unlicensed devices, they are not offered any protection from interference by licensed users in the same frequency band.

The problem, first reported by The Day of New London, is that the same frequency is used at very low levels by the manufacturers of garage door openers. The signals from remote controls to open or close the doors are blocked by the signal from the base.

HOT COPPER - WIRE LESS

Calgary police in Canada have created a special unit to target copper wire thieves as the number of thefts continues to rise.

Last month, the CBC was hit when $50,000 worth of copper wire was stolen from its transmitter site in southwest Calgary.

The price of the metal is rising and so are the number of thieves hoping to cash in. Offenders see the crime as extremely high reward, they can easily steal copper and turn it around for cash and they see it as low risk because, typically, in the past they have not been arrested and the courts have not looked at copper theft with the magnitude they do now."

Flooding hits Chinese capital

Heavy rain, described as the worst in the area in more than 60 years, hit Beijing last week reportedly killing 37 people.

The commercial communication was operating as normal in the urban area.

As part of their service to the community radio amateurs using VHF and UHF radios reported from the disaster areas, and participated in the actions to help people back home.

Beijing hosted the 2008 Olympic Games and more heavy rain is expected across parts of China.

The IARU society, Chinese Radio Sports Association CRSA, takes part in an annual disaster drill as it prepare for disasters.

(Jim Linton VK3PC, Chairman IARU Region 3 Disaster Communications Committee and Bin Fan B1HAM (text edition only))

==========

NEWS FROM ARNEWSLINE USA

STOPPING COPPER THEFT IN ITS TRACKS

British Telecom is taking on copper cable thieves.
Amateur Radio Newsline's Jim Damron, N8TMW, has the details:

A new tool has been unveiled in the United Kingdom to literally locate copper wire thefts as they are taking place.

Called the Rapid Assessment British Telecom Incident Tracker or RABIT, this computer based program has the ability to monitor all 120 million kilometres of cable on British Telecom's phone network.

RABIT is a real-time system based on a neural network that has been trained to sense the difference between a telecommunications cable being severed and a cable that has gradually failed. It does this by undertaking line tests and bandwidth measurements to home in on a

tell-tale signature of a cable cut. This event
data is then immediately plugged into an incident
monitoring system which gives British Telecom's
security staff a national view of trouble spots
on its networks, including cyber-attacks.

I'm Jim Damron, N8TMW, in Charleston, West Virginia, reporting.

The industrial scale theft of copper telecommunications cables is a massive world-wide problem. In the UK alone, cable worth £770 million pounds was stolen from overhead and buried telephone lines and railway signalling systems in 2011.

ARRL SAYS NEW EXECUTIVE ORDER POSES NO THREAT TO HAM RADIO

According to the ARRL, an executive order dealing with telecommunications
poses no threat to the amateur radio service.
Amateur Radio Newsline's Norm Seeley, KI7UP, reports:

On Friday, July 6th the White House released an
Executive Order signed by President Obama that
addresses the National Security and Emergency
Preparedness communications functions of the
federal government. Contrary to some concerns
raised in a few amateur radio circles, the order
does not appear to contain any threat to the
Amateur service or its ability to continue
support communications during times of emergency
or disaster. It also poses no threat to hams for
continued access to their spectrum.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, Scottsdale, Arizona.

N1ND says that a good summary of the content of the Order can be found at
tinyurl.com/new-communications-order

MONTREAL STATION TORCHED AFTER CRITICIZING FORMER HAITIAN DICTATOR

A Haitian radio station in Montreal, Canada, has
been hit by arsonists. This, after hosts
criticized the country's former dictator.

CPAM 1610 AM was set ablaze following calls by
show hosts for a criminal trial for Jean-Claude
Duvalier, who returned to that nation last year.

CPAM's north-end administrative offices were
partially destroyed and the studio suffered water
damage, rendering it useless. A spokesperson for
the Montreal fire department said the front
window of CPAM 1610's studio was smashed and a
fire lit near the broken glass at about 4 a.m.
Monday July 2nd. Another fire was started at the
back of the second floor where the station's office is located, he said.

Engineers had the station back on the air about
10 hours after the attack from an alternate
studio location. According to its management,
CPAM is a beacon for the more than 100,000
Haitian expatriates in Montreal who form the
largest such community in Canada.

ITALY CLOSING NATIONAL SOUND ARCHIVES

Italy is shutting down its famed National Sound Archives.
This as a likely result of the continuing economic downturn
that has hit many European nations.

On July 6th, a simple 12 line document was signed
by the government to shut down the archive of
priceless audio history dating back to the dawn
of the machine recording. According to one
source there are close to half a million
recordings housed in the Italian archive.

The big concern now among preservationists is
that unless another such museum such as the
United States Library of Congress takes over the
Italian archive, that it could wind up being sold
off on the streets or on an on-line auction site,
piece by piece. More is on-line at
www.artsjournal.com

MEET COLBY AND VISIT HIS CORNER

And finally this week the story of an inquisitive
pre-teen who has his first experience with ham
radio with a television camera watching and
recording the event. The young man's name is
Colby, he's 9 years old, and he is the star of a
new children's television series called Colby's
Corner that recently began airing on Christian
Television Network station WLCN in Summerville, South Carolina. .

The theme of the show is very simple. Its Colby
learning about various aspects of life by
experience as would any other youngster. Only
Colby is sharing his encounters with the kids who
watch on WLCN. And one of his recent trips took
him to a ham radio station operated by Vince Lombardo, K4AOC.

For those of you who are out of the coverage of
WLCN but would like to watch Colby learn about
ham radio from a real pro, that episode and all
of the others can be seen on line on YouTube. A
direct link to the one we have been describing is
tinyurl.com/colbys-ham-radio. The show also has
a website at www.colbyscornertv.com

I'M FELIX VK4FUQ AND AHEAD OF OPERATIONAL NEWS, AND FURTHER FROM OUR RD CONTEST MANAGER IT'S THE QNEWS WORK BENCH -- and a safety talk.

On Wednesday the 1st of August, the St. George Amateur Radio Society will be having another one of their monthly gatherings at Kyle Bay and it will feature a discussion about safety.

Amateur radio can be a dangerous hobby, not only high voltages and RF exposure, many amateurs involved in homebrewing or repairing their own equipment can be exposed to potentially dangerous chemicals, such as lead in solder and even PCB (Poly Chlorinated Bi-phenols) in old capacitors and transformers.

Other hazards involve falling off roofs and towers or having things fall on you and your family!

This discussion can alert you to the possible dangers and what strategies others have used to minimise the hazards so if you're in the area of the St George club pop along August One.

NOW SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Two Croatian amateurs are with the NATO-led troops in Afghanistan. They are Maj and Vlado and can now be heard as T6TJ and T6VT respectively until the end of September. QSLs for both operators go via 9 A 6 AA.

South Essex Amateur Radio Society will be operating GB 1 HF close to the Olympic mountain biking course at Hadleigh Farm in South Essex. The station will be operated at various times and days on several bands and modes from until 28th August.

VK SPRING VHF / UHF Field Day November 24-25

Now WINTER VHF-UHF Field Day Results

The WINTER Field Day results have been finalised. Full details are on the Field Day page on wia.org.au

One interesting feature is that this is the first Field Day where VK2 stations have won three sections - and it is also the first event in which VK3 stations have won NONE.

Congratulations to the section winners Matt Hetherington VK2DAG, Steven Harrison VK2XDE, the Sunshine Coast club VK4WIS, Keith Minchin VK5AKM, and Justin Lavery VK2CU. And congratulations to all.

It was good to see an increase in activity by Foundation licensees in the single operator sections. They will receive an extra "F Call Challenge" certificate.

John vk3km REMINDS ALL The next Field Day will be November 24/25.

RD CONTEST INFORMATION

Hello, this is Alan, VK4SN, RD Contest Manager.
Remember to keep
August 11th and 12th free for the RD contest.

This year, a new start and finish time of 0300z applies. That's 1PM
eastern Australian Time.

To clarify some questions I have received by email

Q1 Are separate logs required for HF and VHF?

A1 You may submit separate logs if you wish but all contacts can

be made on one continuous log. If you are using an all band
radio,
it is much easier this way.

Q2. What exchange is used by a club when operators come and go?

A2. If the number of years of the clubs longest licenced member is not known,
then use the longest licenced operator at the club at the start of the
contest. Once the number is decided
it is to be used as the exchange for
the entire contest.

Some have made comment about mandatory computer logging and supplying
cabrillo format outputs. This may be the case in
future years, but for now
paper logs are still accepted if
one does not have the know-how to use
computers or logging programs.

If you wish to form a team, remember to email the contest manager with your
selected team members . All info can be found in the rules.

Till next week, this is Alan, VK4SN

AWARDS

The awards programme has come together very well under the stewardship of
Bob Robinson VK3SX and shortly the new on-line database to replace the
excel spread sheets will enter testing phases - Robert VK3DN is putting the
finishing touches on this and it derives much of its flexibility from the
work previously done with the VK100WIA on-line log book.

The awards committee is seeking suitable candidates for card checkers.

Basically the requirements are similar to the ARRL card checker requirements
Currently we have Chris VK1GG, Laurie VK7ZE and Steve VK6IR

Ultimately we would like one in every state so if your state is not currently
covered please apply with your resume referring to the ARRL standards as a
reference.

Regards

Trent Sampson vk4ts@wia.org.au

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

The BLUE MOUNTAINS ARC repeater carries the AMSAT-VK monthly net from 8:30 PM the second Tuesday of each month, next event on the 14th of August.

Fifty years ago, an antenna in Maine, USA, transmitted a television signal up into space, where it was received by the Telstar satellite, launched earlier that month. Telstar retransmitted the signal to the other side of the Atlantic, allowing Europeans to view a live press conference by President John F. Kennedy. That broadcast was the public debut of Telstar, widely considered the beginning of an era in satellite communications that has revolutionized our world.

Telstar was, initially, a major technology accomplishment, demonstrating that a satellite could serve as a television (and other telecommunications) relay station.

WW SPECIAL INTEREST GROUPS --- ILLW

Central Coast Amateur Radio Club International Lighthouse and Lightship Weekend.

The Central Coast ARC is partnering with the Hellenic Amateur Radio Association of Australia to activate Newcastle's Nobbys Head Lighthouse in this year's event.

This is the second year that this lighthouse has been activated by the CCARC after a long period of no public access.

HOT 144 MHz MS & EME DX-PEDITION NEWS - Pse do use:
http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: OH ; Square: KP53-KP07-KP03 ; start 2012-07-09 **

Peter PA3BIY traveling through OH & SM with 2m station.
LATEST NEWS by Peter, dated 2012-07-25: We arrived yesterday in JP72pw. The QTH is
quite OK and so is the weather! We will stay here until Friday morning July 27th.

Activity is every morning, starting around 05z till +/- 09z. And may be some activity
in the evening as well. I will be on ON4KST for more details during my activity.
News by Peter, PA3BIY, dated 2012-07-17: Peter just send a note that he
might not be qrv from KP46 - NEWS by Peter, PA3BIY, dated 2012-07-15:
Due to a very great help of Jussi, OH6ZZ, Peter is ready again with
his setup! Tomorrow morning last day n KP53, then to KP45 or 46
(Kuusamo area). SOURCE: tnx to Peter, PA3BIY direct to MMMonVHF

** DXCC: OX ; Square: HP15 ; start 2012-07-28 **

OX3LX qrv from HP15EO on HF, 2m 4m and 6m Again this year I have
some work to do in HP15 so therefore I will be QRV when not at QRL
on 2m,4m and 6m. It will also be possible to find me on HF 1.8-30
MHz where I am QRV from NA-151. Main focus is 2m EME and 4m Es
Setup is: 4m/6m 100W 4 elm duoband. 2m 1KW M2-5WL 17 elm yagi with
manual elevation and azimut. QRG's will be decide when on site.
please find me on EU/NA ON4KST or JT65 EME chat
SOURCE: tnx to OZ1DJJ direct to MMMonVHF

** DXCC: SP ; Square: JO84 ; start 2012-08-05 **

Rolf, DK2ZF will be qrv from Holiday Place in JO84TH Holiday style -
most of the time will be fishing.. hopefully succesful ! But will
join the Perseids !!! No internet - its an isolated site - 70.200
with QSX 69.950/990 for DL
SOURCE: tnx to Rolf, DK2ZF, direct to MMMonVHF

** DXCC: EI ; Square: IO42 ; start 2012-08-09 **

EI9E/P - Perseid meteor shower from IO42SD - LATEST NEWS from EI8IQ,
dated 2012-07-12: EI9E/P - Perseid meteor shower from IO42SD
We hope to be QRV from the evening of the 9th to the afternoon of
the 13th from IO42.(Dates may vary). Will be on ON4KST when operation
starts. Equipment,QRG,s,Modes,Dates to be decided and when confirmed
will be updated here. QSL Direct or via Bureau. For direct QSLs please
send via EI8IQ with donation to cover return postage.
SOURCE: tnx to EI8IQ direct to MMMonVHF

** DXCC: LA: Norway ; square JP60 ; start 2012-08-11 **

LA9DFA will activate JP60bg again this year. Primary target will be 144MHz,
but if more operators go with me this time, perhaps we will do some 70MHz and 50MHz to.
Will go to JP60bg sometime between July 23 and 29 to setup antennas for 144MHz.
Will do some operating that day to test antennas and PA. Will announce this on
ON4KST chat in advance. It's weather depended. Will use 2x9el and a 250W on 144Mhz.
Frequency and mode will be announced on ON4KST chat. Will operate random and please follow
me on Shout for info about beamheadings, frequency and tx-periode and so on.
Found that the following hams do need JP60 on 144MHz:
DD3SP DF5NK DF6YL DG1VL DG9YIH DH6DAO DH6JL DJ6AG DK5DQ DK7BY DK7LFG DL0UL DL1RNW DL1SUZ

1347. Beecher Island special event station Sept 14-16, 2012

Newsgroup: rec.radio.amateur.misc
Date: 2012-07-26 14:49:02 UTC
From: wboas@nyx.net
Message-ID: <Pine.GSU.4.63.1207260844440.26422@nyx.nyx.net>
Source record: 2414

FOR IMMEDIATE RELEASE CONTACT: Ron Peterson, K0LMD
k0lmd@yahoo.com

SPECIAL EVENT STATION "N0B" TO OPERATE DURING BEECHER ISLAND BATTLE MEMORIAL CELEBRATION SEPT 14-16, 2012

Amateur radio special event station "N0B" will be operating from the historic Beecher Island battlefield in Yuma County, Colorado during the annual Beecher Island Battle Memorial Celebration the weekend of September 14-16, 2012.

The event commemorates the 144th anniversary of the historic battle between U.S. Calvary troops and Plains Indians fought September 16, 1868.

Station manager Ron Peterson, K0LMD, of Wray, Colorado said the station will operate on a primary frequency of 14268 Khz, with backup at 7268 Khz depending on propagation characteristics. On Friday, Sept. 14 he plans to be on the air from Noon to 5pm and 8pm to Midnight; Saturday, Sept. 15, as working schedule allows; and Sunday, Sept. 16 from 8am-11am and from 3pm to 8pm. All times local time: Mountain Daylight (UTC -6 hours). He will be assisted by Bill Boas, KC0IZI of Wray. A certificate is planned for check-ins and "county hunters" wishing one. SASE K0LMD, A web page with this notice, photos, and developing information is now posted on the Internet at: www.nyx.net/~wboas/beecher.html.

The Beecher Island battlefield is located 39.86N, 102.18W, grid square DM89vu - about 15 miles SSE of the city of Wray the county seat of Yuma County in Eastern Colorado. County hunters welcome.

Historic information about the battle may be found by an Internet search for "Beecher Island battle" and at:
www.wrayco.net/museum_beecher.html

==> + ARRL BOARD PLANS FOR 2014 CENTENNIAL CELEBRATION AT 2012 SECOND
MEETING

When the ARRL Board of Directors met for its 2012 Second Meeting
July 20-21 in Windsor, Connecticut, it did so with a full agenda.
Besides hearing and approving recommendations from its two standing
committees -- the Administration and Finance Committee and the Programs
and Services Committee -- the Board voted to hold the 2014 ARRL
National Convention July 17-20 in Hartford, Connecticut, the birthplace
of the League in 1914. Read more here
<http://www.arrl.org/news/arrl-board-plans-for-2014-centennial-celebration-at
-2012-second-meeting>.
```

==> + ARRL BOARD OF DIRECTORS NAMES AWARD RECIPIENTS AT 2012 SECOND MEETING

The ARRL Board of Directors named four ARRL award recipients at their July 20-21 meeting in Windsor, Connecticut: the 2011 Doug DeMaw, W1FB, Technical Excellence Award; the 2012 ARRL Technical Innovation Award; the 2012 Philip J. McGan Memorial Silver Antenna Award, and the 2012 Herb S. Brier Instructor of the Year Award. In addition, the Board named former ARRL West Gulf Division Director Thomas W. Comstock, N5TC, as Director Emeritus of the ARRL. Read more here <http://www.arrl.org/news/arrl-board-of-directors-names-award-recipients-at-2012-second-meeting>.

==> + END OF AN ERA: HEATHKIT DECLARES BANKRUPTCY, CLOSES FOR GOOD (AGAIN)

The July 19 edition of The Herald-Palladium -- a newspaper serving the communities of Benton Harbor and St Joseph, Michigan -- is reporting that Heathkit Education Company has declared bankruptcy and has officially closed its doors after defaulting on its lease. According to the paper, Heathkit employed more than 1800 people in its heyday after World War II. When it finally closed, its workforce totaled fewer than six people. This is the second time since 1992 that Heathkit Educational Services has shuttered its doors. In August 2011, Heathkit announced it was returning to the kit building business, and in September, that it would once again be manufacturing Amateur Radio kits. Read more here <http://www.arrl.org/news/heathkit-declares-bankruptcy-closes-for-good-again>.

==> ON THE AIR: THE BANDS HEAT UP FOR THE 2012 ARRL AUGUST UHF CONTEST

VHF/UHF weak-signal operators across North America are making final tests on their stations in preparation for the ARRL August UHF Contest, which is coming up over the weekend of August 4-5. According to ARRL Contest Branch Manager Sean Kutzko, KX9X, this contest will focus on 222 MHz and above. There will be lots of activity, and hopefully lots of propagation, too! "With much of the nation in the midst of a summer heat spike, high-pressure zones can begin to form in the atmosphere," Kutzko explained. "If they stick around long enough -- and are stable enough -- enhanced propagation can occur in the troposphere, extending the normal usable range of UHF+ frequencies from line-of-sight to several hundred miles. Several cloudless days with very little wind are signs that enhanced tropospheric enhancement could be coming your way."Read more here <http://www.arrl.org/news/the-bands-heat-up-for-the-2012-arrl-august-uhf-contest>.

==> + ON THE AIR: SPECIAL EVENT STATIONS IN LONDON AND WALES ON THE AIR FOR 2012 OLYMPIC AND PARALYMPIC GAMES

Two special event call signs were activated on Wednesday, July 25 to celebrate the London 2012 Olympic and Paralympic Games: 2O12L from

London, England and 2O12W from Barry, Wales. Both stations will be on the air for the duration of the Games -- July 25-August 12 -- and continuing through September 9. Organizers hope to make at least 80,000 contacts during the seven weeks that 2O12L and 2O12W are on the air. Read more here <http://www.arrl.org/news/special-event-stations-in-london-and-wales-on-the-air-for-2012-olympic-and-paralympic-games>.

==> + FCC NEWS: VANITY CALL SIGN FEE TO GO UP 80 CENTS

On July 20, the FCC announced that the cost of an Amateur Radio vanity call sign will increase 80 cents, from $14.20 to $15. The fee will increase 30 days after notice of the increase is published in the Federal Register; no date has yet been set for publication. Earlier this year, the FCC released a Notice of Proposed Rulemaking and Order, seeking to raise the fee for Amateur Radio vanity call signs. The vanity call sign fee has fluctuated over the 14 years of the current program -- from a low of $11.70 in 2007 to a high of $70 (as first proposed in the FCC's 1994 Report and Order). In FY 2012, the FCC expects to grant 14,300 vanity call signs, bringing in $214,500 from the vanity call sign program, and looks to recover a total of $339,844,000 in fees from all the Services that it regulates. Read more here <http://www.arrl.org/news/vanity-call-sign-fee-to-go-up-80-cents>.

==> ARRL RECOGNIZES: VIC POOR, W5SMM, RECEIVES ARRL PRESIDENT'S AWARD

On July 9, Victor (Vic) Poor, W5SMM, of Melbourne, Florida, was awarded the ARRL President's Award at the Platinum Coast Amateur Radio Society's (PCARS) monthly meeting that was attended by nearly 100 hams and non-hams, many from out of town. There have been only a handful of recipients of this prestigious award.

Poor -- an ARRL member -- developed an active interest in ham radio while still in high school and became W6JSO in 1951. He has also held the calls AH6AXV and K3NIO. He quickly developed an affinity for RTTY and later other digital modes of interest in Amateur Radio.

Poor has been instrumental in the development of many hardware and software innovations that are at the heart of modern day computing and communications technology, used both in Amateur Radio and in industry.

His early RTTY work focused on improving the designs of modulators, demodulators, and filters to improve the error rates achievable with RTTY in those days. This work continued into the development for schemes for simple message networking for amateur traffic before the availability of affordable PCs.

During the '70s and '80s, new digital technologies, including packet, AMTOR and lower-cost computers became available. These advances motivated Poor to further improve digital transmission networking techniques. This included APLINK, a robust automatic global store-and-forward system that led the ARRL to include the system for use in their National Traffic System (NTS).

With the advent of widely available Internet service and continued improvements in signal processing using PCs and dedicated signal processing chips, including PACTOR and WINMOR, in 1999 Poor organized a volunteer amateur development team to replace APLINK with a much more advanced amateur message forwarding system that integrates with the Internet and other mail systems, handles multiple destination addresses, and accepts data files of any format. The system is named Winlink 2000 (WL2K) and is maintained and managed by the Winlink Development Team (WDT). Poor remains the principal architect of the system. This system has blossomed today to a major amateur-supported emergency communications network used by ARES and many government agencies including MARS, federal, state, county and city agencies, and NGOs.

In his professional career Poor has been instrumental in the development of many products that we take for granted today. He credits his interest in ham radio as the driving force behind his success in the commercial arena.

The ARRL Board of Directors voted to create the President's Award in 2003. It is awarded to an ARRL member or members who "have shown long-term dedication to the goals and objectives of ARRL and Amateur Radio" and who have gone the extra mile to support individual League programs and goals. Nominations for the award come from ARRL directors and are approved by the ARRL President and the Executive Committee.

President Kay Craigie's accompanying letter stated, in part: "It is my pleasure and honor to confer upon you the ARRL President's Award....Your contributions to the development of digital communications systems in the Amateur Radio Service have significantly enhanced the ability of our radio service to provide assistance during disasters. Many other amateurs active in emergency communications attribute their own accomplishments to your mentoring....

"As a result of your long, distinguished career in Amateur Radio and communications technology, you have more than earned the appreciation that is represented by this award from the American Radio Relay League."

Steve Waterman, K4CJX, Assistant Director of the ARRL's Delta Division, summed up Poor's humility: "I could have added many more accomplishments to that list," said Steve. "The only thing Poor really wants to know about is if something doesn't work." -- Dan Fisher, AI4GK

==> SOLAR UPDATE

Tad "Lazing on a sunny afternoon <http://www.youtube.com/watch?v=1h1oRP7FfBw>" Cook, K7RA, reports: We currently seeing sunspot groups coming over our Sun's eastern horizon, but this week has been a quiet one, both in terms of sunspot and geomagnetic activity. The average daily sunspot numbers declined by 50 percent -- from 104.7 to 52.1 -- while the average daily solar flux was down nearly 45 points to 97.2. The latest solar flux forecast from

NOAA/USAF has flux values at 110 for July 26, 115 for July 27-28, then
120, 125 and 130 on July 29-31, 135 on August 1-2, 120 on August 3, 130
on August 4-6, 125 on August 7-8, down to 115 on August 9-11, and then
bottoming out around 90 on August 17. The predicted planetary A index
is 5 on July 26-27, then 15, 18, 15 and 10 on July 28-31, 5 on August
1-2, 10 on August 3-4, and 5 on August 5-18. There is the chance for
possible geomagnetic activity on August 19-20, raising the A index
values to 15 and 12, and then to 18 on August 24-25. Astronomy Magazine
has an article
<http://www.astronomy.com/%7E/link.aspx?_id=fd4b216b-fb6f-4a5e-9a60-f593af862
f38>
about a July 11 experiment in which a telescope was lifted by a
sounding rocket to take high definition photos of the Sun's corona at
extreme ultra-violet wavelengths. Look for more on the ARRL website on
Friday, July 27. For more information concerning radio propagation,
visit the ARRL Technical Information Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad
Cookism" is brought to you by The Kinks's Sunny Afternoon
<http://en.wikipedia.org/wiki/Sunny_Afternoon>.

==> THE 2011 DXCC YEARBOOK NOW AVAILABLE

The 2011 ARRL DXCC Yearbook is now available to all ARRL members as a
supplement to the August digital edition of QST
<http://www.nxtbook.com/nxtbooks/arrl/qst_201208/index.php?startid=91rr>.
A printed copy of the Yearbook is also available for purchase in the
ARRL Online Store <http://www.arrl.org/shop/The-DXCC-Yearbook-2011/>.

Contents include:

- The Year in Review by Carl Smith, N4AA
- PJ2/W5MPC, October 10-15, 2010 by Mike Corey, KI1U
- ST0R Story by Antonio Gonzalez, EA5RM/ST0R
- Clinton B. DeSoto Challenge standings
- 2011 DXCC Annual List

==> + W1AW: W1AW'S ECHOLINK AND IRLP NODES BACK IN SERVICE

With the recent upgrades
<http://www.arrl.org/news/disruptions-possible-as-arrl-reconfigures-internet-
services>
to the ARRL's Internet system completed, the W1AW EchoLink Conference
Server W1AWBDCT and W1AW's IRLP Node 4292
<http://www.arrl.org/echolink-irlp> are now back in service. Amateurs
are able to once again listen to code practice transmissions and
digital bulletins via the W1AW EchoLink Conference Server.

==> THIS WEEK IN RADIOSPORT

This week:

- July 27 -- NCCC Sprint
- July 28-29 -- New Jersey QSO Party; RSGB IOTA Contest

- July 29 -- ARS Flight of the Bumblebees

Next week:

- August 3 -- NCCC Sprint Ladder
- August 4 -- TARA Grid Dip Shindig; European HF Championship
- August 4-5 -- ARRL UHF Contest
<http://www.arrl.org/news/the-bands-heat-up-for-the-2012-arrl-august-uhf-cont
est>;
North American QSO Party (CW); 10-10 International Summer Contest (SSB)
- August 5 -- RSGB RoPoCo CW; SARL HF Phone Contest
- August 7 -- ARS Spartan Sprint
- August 8 -- NAQCC-EU Monthly Sprint
- August 8-9 -- CWops Mini-CWT Test

NZART Headquarters Infoline Issue 256

27 July 2012

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· HF Noise Measuring Campaign for NZ

· FMTAG Notes

· VHF-UHF-SHF-EHF Contest Committee

· IARU Region 3 July Newsletter

· Amateur Radio Lighthouse Society

· ZL9HR DXpedition to Campbell Island

· NZART Officer Vacancy

Debby says…Next week or early the following, you will receive your Break In. Included with this issue will be your 2013 subscription. Please check carefully before throwing away your wrapper that you has received this.

There are some members who have paid early, therefore confirm the expiry date of your subscription is 31/12/2012 before you forward a further payment.

I also have it on reasonable authority that Call Book will be produced with the October issue of Break In…so yes it is coming but not quite yet!

Talk soon…Debby ZL2DL

******

HF Noise Measuring Campaign for New Zealand:
I spotted an article within the latest RSGB Bulletin: July 2012, when mentioned a HF Noise Measuring Campaign. As we know all users of the HF bands in particular have issues with background noise. As I was reading this, I thought this could be quite useful to the whole of the New Zealand SWLers, and Radio Amateurs, as an interesting and worthwhile project, which clubs and associations could also participate in on a once a month basis.

We know that the ITU-R for instance ITU-R P.372 provides information on the background levels of radio-frequency noise in the frequency range from 0.1 Hz to 100 GHz. Which takes account of noise due to lightening, to man-made sources, to the galaxy and to the temperature of the lower atmosphere. The level of radio noise sets a limit to the performance of radio systems.

The aim is to not only provide those participating with the knowledge of their own circumstance as far as background noise levels are concerned, but to eventually provide the necessary agencies with sufficient evidence to that a more scientific campaign may be launched, if necessary.

The proposal is to get all participants to measure (at their own location or QTH), the background noise on the bands 1.8 MHz to 28 MHz once per month, for perhaps 2-3 years.
The requirement would be that the level (in S-points) be noted in a spread sheet (which will be supplied), and if the participants use an SDR receiver, the dBm figure as well.
A requirements would be that the same radio and aerial setup be used for the whole campaign.

Bob Knowles and I are planning on participating and collating the information from all participants on a regular basis.

If you wish to participate please contact ZL1GWE at MS@NZART.ORG.NZ and you will be supplied with a suitable spread sheet to complete.

You will be required to state whether you are using SSB or CW filters i.e. bandwidth for the measurements, and use the same aerial, and carry out the same measurements at the same time/day of the month to ensure consistency.

Or if you wish you can contact Gwyn Williams, G4FKH, OTHR, e-mail g4fkh@btinternet.com for further information directly.

Bob and I believe this is a worthwhile campaign, which could be also used to compare ITU-R figures background noise for New Zealand in reality and provide assistance to others potentially with interference issues, which could be passed on to the EMC Officer to assist participants.

FMTAG NOTES FOR HQ INFOLINE 256

CALL BOOK 2012/2013 BEACON, LINK AND REPEATER LISTINGS

FINAL REMINDER

At the beginning of June, FMTAG sent an email to all Branches (and NZART-affiliated groups), requesting that they check their Beacon, Link, Repeater (and their Trustees) listings for the 2012/2013 Call Book, and to reply to FMTAG.

Please contact FMTAG if the Branch has not received the email: fmtag@nzart.org.nz

As at the time of writing (Thursday the 26th of July) FMTAG has not received the list of Trustee callsigns from the following Branches:

20 Manawatu 33 Rotorua
37 Southland

55 Waitomo 56 Christchurch West 66
Auckland VHF

78 Far North 85 Mercury Bay
87 South Taranaki

The close-off for returns to FMTAG is the 31st of July. After that date, blank spaces will appear in Call Book.

Please help ensure that this Call Book is the most accurate ever.

PROPOSALS

ZL2VBO has applied for a 144.575 MHz Digipeater on Mount Burnett, located at TOPO50 BN24 696.26 013.69.

ZL3ADT has applied for a 50.040 MHz Beacon at Rolleston Railway station, located at TOPO50 BX23 503 737.

FINAL RECOMMENDATIONS TO NZART COUNCIL

These items were published in HQ Infoline 255. No adverse comments have been received.

Branch 30 Otago has applied to relocate its 830 repeater to Halfway Bush Road, located at TOPO50 CE17 010.08 178.44. An engineering investigation, in accordance with RSM PIB38, confirms that there will be no interference to other stations, and that the repeater can remain on 438.300 MHz.

Branch 30 Otago has applied to relocate its 625 link station to Halfway Bush Road, located at TOPO50 CE17 010.08 178.44. An engineering investigation, in accordance with RSM PIB38, confirms that there will be no interference to other stations, and that the link transmit frequency can remain on 146.250 MHz and its receive frequency on 146.850 MHz.

Branch 30 Otago has applied for a power increase of its 665 repeater at Highcliff, located at TOPO50 CE17 132.79 162.56. An engineering investigation, in accordance with RSM PIB38, confirms that there will be no interference to other stations, and that the repeater transmit frequency can remain on 146.650 MHz and its receive frequency on 146.050 MHz.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART website: http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

******

FROM THE VHF-UHF-SHF-EHF CONTEST COMMITTEE

THE NEXT CONTEST IS NEXT WEEKEND

The next contest is the Brass Monkey Contest, all bands 50 MHz and up, on Saturday the 4th and Sunday the 5th of August 2012. The operating times are: Saturday 1700 to 2300 NZST and Sunday 0700 to 1300 NZST.

The contest after that is the Microwave Contest, 921 MHz and up, on Saturday the 6th and Sunday the 7th of October 2011. The operating times are: Saturday 1700 to 2300 NZST and Sunday 0700 to 1300 NZST.

The Contest Rules are available at:
www.vhf.org.nz/VHF-UHF-SHF-ContestRules

All contest logs should be sent, to arrive within two weeks, to:
zl2wa@clear.net.nz

with Contest Log in the subject line, or by post to:

Contest Manager

HARAOA ZL9HR DXPedition

to Campbell Island (IOTA OC-037) November 28th. - December 9th.
2012.

Things are moving quickly on preparations for the Hellenic Amateur
Radio Association of Australia's ZL9HR DXpedition to Campbell Island
(650 km or 400 miles south of New Zealand in the Southern Ocean).

For those who hate all the hype of the Olympics, Campbell Island
is the furthest point on earth that you can stand on away from London,
England!

The complete crew of 10 operators is now set (with some reserves
in the waiting list should a member have to cancel).
The operators are:
Tommy VK2IR,
John VK3YP,
Les W2LK,
Gene K5GS,
Don VE7DS,
Istvan HA5AO,
John 9M6XRO,
David K3EL,
Jacky ZL3CW,
& Tom KE4KY.

A list of equipment that will be taken is already on the web site and the first of the Yamaha generators is due to arrive in Sydney in the next few days. This along with some of the other equipment will be put to the test in the upcoming “Trans-Tasman” 160m SSB contest that the HARAOA won last year and are eager to win again. Heavy workloads on the equipment will also occur in the 80m RTTY section of the same contest.

Keen DX-ers who may be looking to get ZL9 on a particular band and mode to move towards a DXCC or other award, should go to the survey on the website at ZL9HR.com and vote for which bands and modes they would like to hear ZL9HR operating on!

Please keep monitoring ZL9HR.com for all updates as the preparations keep progressing. The first of the sponsors are coming in but more of that in my next news update so …..
73 From ED VK2ARE, Australian Publicity Officer for ZL9HR and member of the Hellenic Amateur Radio Association of Australia.

******

NZART Officer Vacancy

NZART Council is calling for expressions of interest from NZART members for the following Officer Vacancy

Position: NZART VHF/UHF/SHF Records Coordinator

The VHF/UHF Records Coordinator is responsible to NZART Council for the coordination, maintenance and promotion of the New Zealand VHF/UHF/SHF records.

Description of the position

a.. NZART is a body that promotes Amateur Radio within New Zealand.
b.. The NZART VHF/UHF/SHF Records Coordinator is appointed by NZART Council to coordinate and to promote, the keeping of accurate records pertaining to performance of VHF/UHF/SHF activities and operating by NZ amateurs.
c.. The NZART VHF/UHF/SHF Records Coordinator reports to NZART Council through an appointed Liaison Councillor.
d.. Although referred to by VHF/UHF/SHF, the task may extend to other bands.
Duties of the position

To maintain, review and update when necessary, the established:

a.. VHF/UHF/SHF Records Lists,
b.. the VHF/UHF/SHF Record Claim Rules, and
c.. the Record Claim Form.
To receive completed Record Claim Forms submitted by radio amateurs, appropriately process to verify by making whatever enquiries may be necessary, and make the concluding decision to accept or to reject the claim.

a.. To amend the Records lists as appropriate.
b.. To promote active operating for records achievement among
New Zealand amateurs.
c.. To arrange for presentation trophies and certificates
relating to Records.
d.. To appoint assistants as necessary.
e.. To provide advice and guidance on Records issues.
f.. To liaise with overseas radio amateurs and other amateur
societies on Records matters.
g.. To write occasional entries for Break-In about Records.
h.. At time of dispute, to refer incidents involving Records
Claims and the Rules to NZART Council.
Work Experience

The NZART VHF/UHF/SHF Records Coordinator will be expected to
demonstrate competent performance in:

a.. Maintaining accurate and detailed records.
b.. Good written language skills for communication with members,
overseas societies, and articles for publication.
c.. The accurate measurement of distances and global positions,
recognise and understand the errors possible in GPS reports, in the
selection of map series and in grid references.
d.. A good working knowledge of all the measurement and
technical terms listed on the Claim Form.
Personal Skills

The NZART VHF/UHF/SHF Records Coordinator will require:

a.. Good person skills.
b.. An understanding of the requirements and issues involved in
Amateur Radio hill-top activity including possible interference to other
radio services.
c.. A good knowledge of Amateur Radio and the aims of IARU and
NZART.
d.. Competency in spread sheet and word processor applications
and with any specialised software appropriate to the position.
Applicants for this role can be located anywhere in New Zealand.
The ideal person for this role would have experience in the area of
VHF/UHF/SHF operating and/or contesting.

Officer Positions are voluntary; however operating expenses will
be refunded as per the NZART Policy on Officers Expenses.

Applications for this position will be accepted from interested
persons in writing with supporting documentation through the General
Secretary, NZART, PO Box 40525, Upper Hutt 5140.

This advertisement is authorised by NZART Council.

Amateur Radio Newsline(tm) Report 1824 - July 27 2012

Amateur Radio Newsline report number 1824 with a release date of July 27 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. The International Amateur Radio Union to vote on admitting two new members; Solar Cycle 24 heats up with a massive East coast VHF band opening; the London 2012 Olympics ham radio stations take to the air and four new ham radio CubeSats go skyward. Find out the details are on Amateur Radio Newsline(tm) report number 1824 coming your way right now.

(Billboard Cart Here)

**

HAM POLITICS: IARU VOTING ON TWO PROPOSED NEW MEMBERS

The International Amateur Radio Union could have two new members before years end. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, is here with the details:

--

The Federation of Radio Sport of Azerbaijan or FRSA and the St. Vincent & Grenadine Amateur Radio Club are being proposed for membership in the International Amateur Radio Union.

The FRSA based in Baku. It so far has 50 members. The St. Vincent & Grenadine Amateur Radio Club has 21 members. Both have made their proposals through IARU Region 2 for membership.

The International Amateur Radio Union Calendar notes that the groups have declared that they can satisfy the requirements of the IARU Constitution and Bylaws. As such, their proposed membership has been put up to the vote by all International Amateur Radio Union member societies who have until November 1st to cast a ballot.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, near Berwick, Pennsylvania.

--

Meantime, Jim Linton, VK3PC reports on two International Amateur Radio Union member certifications that have been rescinded. Linton says that despite a request, no proof has been provided that the former PNGARS of Papua New Guinea and BARTS in Burma or Myanmar still exist and have

been withdrawn from membership. (VK3PC)

**

VHF DX: BIG VHF OPENING ALONG THE EAST AND SOUTH CENTRAL USA

They are calling it one of the best VHF band openings since the late 1950's. This as hams along the Eastern seaboard and South-Central states report what appears to be both a tropospheric duct and some double-hop E layer skip that permitted QSO's from Vermont south to Tennessee and Texas on bands as high as 220 MHz on Tuesday, July 24th.

One interesting report came to us from Kevin Duplantis, W4KEV. He says that at about 5:30 pm EST in Knoxville, Tennessee that he was tuning around the FM broadcast band when he stopped on WRJK 106.7. That's when he heard a commercial that seemed out of place so he kept listening. It turned out that instead of WRJK he was hearing a station identifying as 106.7 the Wizard, Burlington, Vermont. After a number of fades happened and the Vermont station came back so strong that it totally wiping out the local Knoxville station that was only 15 miles away.

At that point W4KEV reports that he took to the 2 meter band where he made what he describes as a ton of contacts into the northeast and southeast and Canada. Some well over 1000 miles distant. He then switched to the 222 MHz band where he noted a definite E-skip opening that lasted a solid half hour. During this time he hears Canadian stations make contact with the lower parts of Alabama and Mississippi.

W4KEV hays that they do not get many tropo openings in his area so this was a thrill to say the least.

Meantime the dxworld.com Propagation Logger for 2 meters shows several likely record breaking contacts in sheer numbers if nothing else. By way of example, Mike Larsen, KC0CF in Stanhope, Iowa posted that he worked 32 stations from Florida to Virginia during the opening and his report was just one of many.

In all, it appears as if July 24th, 2012, is one that will go down in the VHF and UHF record books and operators world wide are hoping its only a precursor of what may be still soon to come in DX in the world above 50 MHz. (ARNewsline(tm), 2 Meter Prop Logger)

RADIOSPORTS: 2O12L AND 2O12W ON THE AIR TO COMMEMORATE THE LONDON OLYMPICS

The 2012 Summer Olympics are on the ham radio airwaves. On Wednesday, July 25th, two special event call signs were activated in the United Kingdom to celebrate the London 2012 Olympic and Paralympic Games.

As previously reported here on Newsline, 2O12L will operate from London, while 2O12W was to take to the ham bands from Barry in Wales.

Both stations will be on the air through August 12th for the games themselves and will continue operations through September 9th.

Updates on both operations will be available on the Twitter social networking site using the screen names of @2012L and @GW0ZANA respectively. Organizers hope to make 80,000 or more contacts during the time that 2O12L and 2O12W are on the air. (RSGB, Audio bite from YouTube)

**

BANDSHARING: THE AMERICAN UHF WOODPECKER STRIKES AGAIN

Its yakety-yak time on the 70 centimeter band near San Diego, California. This as a new radio system takes to the air on a military base. Amateur Radio Newsline's Bruce Tennent, K6PZW, has the rest of the story:

--

Southern California's Fallbrook Amateur Radio Club reports that it recently began receiving a random ticking interference superimposed over weak incoming signals on its 440.600 MHz repeater inputs channel. Club members have tentatively located the signal as originating at the nearby Marine Corps Camp Pendleton.

It now appears as if the base has deployed a number of Enhanced Position Location Reporting System radios, or EPLRS devices that use the entire 420 to 450 MHz band in a spread spectrum mode. As hams share the 420 to 450 MHz band with the U.S. Government, and the government has priority its likely that the Fallbrook ham community will likely have to live with the problem until such time as the devices are turned off, if that ever occurs.

Hams are secondary users in the 420 to 450 MHz band and must accept any and all interference from those designated as primary users. Also, the amateur community must not in any way interfere with the operations of those assigned as primary users. In this case the United States military.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

According to the Southgate News, it's believed that at least two dozen EPLRS systems are slated for deployment or are already deployed across the continental United States as well as in Alaska and on Hawaii. (CGC, Southgate)

**

RADIO REGULATION: VANITY CALL SIGN FEE TO INCREASE BY 80 CENTS

The price of a Vanity ham radio callsign is going up. On July 20th the FCC announced that the cost of a set of amateur radio vanity call letters will increase 80 cents to $15 for a 10 year license term. That works out to 8 cents a year for anyone applying for or renewing a Vanity ham radio call. The new fee goes into affect 30 days after notice of the increase is published in the Federal Register. As we go to air, that publication is still pending. (FCC)

**

RADIO REGULATION: FCC PROPOSES RE-EVALUATING ITS FEE SYSTEM

The FCC wants to overhaul its entire regulatory fee system and is asking for public input on that effort through MD Docket 08-65.

According to the agency, extensive changes have occurred in the communications marketplace since its current system for assessing and collecting regulatory fees for all of the entities it regulates was enacted in 1994. Commissioner Robert McDowell calls the reform long overdue, adding that the agency should update its fee structure to ensure that they are levied not only in a fiscally prudent manner, but in a nondiscriminatory and competitively neutral way.

Comments to MD Docket 08-65 are due 30 days after publication in the Federal Register. What impact such a re-evaluation might have on regulatory fees imposed on radio amateurs is impossible to assess at this time. (FCC, RW)

HAM RADIO IN SPACE: 4 CUBSATS TAKE THEIR FIRST STEPTS TOWARD ORBIT

Japan's HTV-3 cargo vessel carrying five satellites blasted off on an H-IIB rocket to the International Space Station in the early hours of Saturday, July 21st. Onboard were four amateur radio CubeSats, along with a scientific satellite known as Raiko. The ham radio birds are the F-1, We-Wish, FitSat-1 and TechEdSat CubeSats.

By way of background The F-1 CubeSat carries a pair of Yaesu VX-3R handheld transceivers to provide communications on 145.980 MHz and 437.485 MHz FM using AX.25 packet radio data.

FITSAT-1 is an optical communications experiment that as previously reported will attempt to write Morse Code across the night sky, although only when in range of Japan. It will also transmit CW on 437.250 MHz, FM AX.25 data on 437.445 MHz and high speed data on 5840.00 MHz.

We-Wish will transmit on 437.505 MHz FM AX.25 data while TechEdSat will transmit on 437.465 MHz and will also communicate via the Iridium and Orbcomm satellite phone networks. This is a first for a CubeSat.

The CubeSats will remain on the International Space Station until September. Thats when they will be deployed to orbit by Japan astronaut Akihiko Hoshide, KE5DNI, using the ISS robot arm. And we

will have more ham radio space related news later on in this week's Amateur Radio Newsline report. (AMSAT)

ENFORCEMENT: ALASKA CB OPERATOR ISSUED PROPOSED $12500 FINE

The FCC has issued a $12,500 Notice of Apparent Liability to Monetary Forfeiture to Glenn S. Yamada, of Kenai, Alaska. This based on allegations that he essentially operated his C-B station in a manner that interfered with international aviation traffic. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

This story goes back to last January. Thats when the FCC received a complaint regarding interference to an authorized user on 21.964 MHz in the aeronautical band. According to the regulatory agency, the problem concerned a male subject talking and interfering with the control and monitoring of air traffic over the North Atlantic.

The FCC's High Frequency Direction Finding Center was called into action. On January 31, its operators observed a subject matching the details of the compliant transmitting on 21.965 MHz using the call sign 1600 Alaska. Of even more interest, the actual operating frequency was 27.025 better known as CB channel 6. Direction finding techniques placed the transmissions were coming from Kenai, Alaska. Subsequently, an agent from the FCC's Enforcement Bureau in Anchorage used direction finding techniques and found the source of the interfering signal to be coming from the residence of one Glenn S. Yamada.

The agent, accompanied by an officer from the Kenai Police Department, inspected Yamada's station on February 6th. At that time the agent found a non-certificated CB transmitter and a linear amplifier as part of Yamada's CB station. During questioning, Yamada admitted to the agent that the linear amplifier was capable of generating a power output level of 200 watts. The agent observed that the transmitter and the linear amplifier were connected to a transmission cable and ultimately to the directional antenna in the back of Yamada's residence. Yamada told the agent that this was his hobby setup and that he had been operating it for the last several weeks using the made up call of 1600 Alaska.

Now, in its July 14th finding authorizing the proposed $12,500 fine, the FCC says that Yamada apparently willfully and repeatedly violated Section 301 of the Communications Act of 1934 and Sections 95.409(a) and 95.411(a)(1) and (b) of the FCC Rules. This by operating his CB radio without requisite Commission authorization. In simpler terms, it means that his station equipment was not FCC certified and he was running power in excess of the maximum allowed on the 11 meter band.

And when it issued the Notice of Apparent Liability, the regulatory agency also stated that given the public safety concerns of the violations that it was directed Yamada to submit a statement signed under penalty of perjury confirming whether he is still engaged in CB operations. If so, he is to state whether he is using a certified CB transmitter. Also, to certify that he has not attached any linear amplifiers to his CB station." Yamada must submit this statement to the FCC Office in Anchorage no later than August 17th. That's the same day when payment of the $12,500 Notice of Apparent Liability is also due.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

As is usual in these cases, Yamada was given the customary 30 days from issuance of the proposed fine to file an appeal. (FCC)

**

ENFORCEMENT: FCC PROPOSES A PAIR OF BROADCAST TOWER RELATED FINES

The FCC levied two unrelated fines for tower violations. In the first action, the agency says that Equity Communications, licensee of WCMC AM located in Wildwood, New Jersey failed to enclose its tower in a locked fence.

In issuing the proposed $17,000 fine, the FCC noted that during an inspection in 2011, agents with the Philadelphia Enforcement Bureau determined the tower was in a residential neighborhood but what it called the remnants of a fence would not restrict access to it. At a later date when they re-inspected, the agents found the fence in the same condition. As such, the FCC has proposed a the to fine for the ongoing infraction.

The other case involves JMK Communications, which was fined $7,000 for not having a locked fence around the four-tower array for WPWC AM in Dumfries, Virginia. The FCC says that during an inspection in 2011, the Enforcement Bureau agents found no fencing around the base of one structure and only partial fencing around the base of the other three. There was also no perimeter fence around the property, according to the commission.

In this matter the FCC has proposed a $7,000 fine. It has also directed the licensee to submit a sworn statement telling the commission the broadcaster is now in compliance with the tower

regulations.

Both companies were given the customary 30 days from the date the Notices of Apparent Liability were issued to pay or file a response. (FCC)

**

ENFORCEMENT: FCC LEVIES $55000 FINES TO UNLICENSED FLORIDA BROADCASTERS

The FCC issued a total of $55,000 in proposed fines to three men whom it says operated unlicensed broadcast station in the state of Florida. Amateur Radio Newsline's Bill Pasternak, WA6ITF, is here with more:

--

In the first two cases, the regulatory agency alleges that Michael Downer and Damian Allen operated an unauthorized station together on the FM broadcast band in the city of Pompano Beach. According to the FCC, it used direction finding techniques to trace a signal to an FM transmitting antenna located atop the storage room of a commercial property.

The property owner told agents he rented the space to Downer and Allen. The owner called Downer and handed the phone to an agent. Shortly thereafter the other renter, Damian Allen, came and removed the equipment.

Now its tike to pay the piper. While the base fine for operating an unauthorized station is $10,000 per person, the FCC proposed a $20,000 fine for Downer and Allen each. This is because the commission had previously issued several Notices of Unlicensed Operation to both men for operating unlicensed stations from other Florida locations. The FCC says that the fact that they continued operating constitutes a deliberate disregard for the commission's rules.

In the third case, the commission has proposed a $15,000 fine against McArthur Bussey. This for operating an unlicensed station on 89.1 MHz in the city of Fort Lauderdale.

In this matter the agents not only traced the signal to a residence leased by Bussey but also found a fan page on Facebook ad for the illegal station and a picture that matched Bussey's Florida driver's license photo. The domain name for a website: www.891radio.net, was found to be registered to Bussey's residence.

Bussey's fine was also over the $10,000 base amount because the Miami Office of the Enforcement Bureau had previously issued a Notice of Unlicensed Operation to him for operating an unlicensed station on the same frequency from a different Florida location.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

All three have the customary 30 days from the date the fines were proposed to pay them or to file appeals. (FCC)

**

HAM HAPPENINGS: PERMANENT AMATEUR STATION AT THE OLD BETHANY OHIO VOA RELAY STATION

Ohio's West Chester Amateur Radio Club has set up a working ham radio station at the closed down Voice of America relay station in Bethany Ohio. A temporary, single position has been activated in the VOA building. It is connected to a temporary trailer mounted beam antenna.

The Bethany site is located not far from Dayton Ohio. According to the club website, more funding is needed to complete the project. Information about this project can be found on-line at www.wc8voa.org. The history of the Voice of America Bethany Relay Station is at www.voamuseum.org. (KC9VZA)

**

HAM HAPPENINGS: EMCOMM EAST POSTPONED TO 2013

The EmComm East emergency communications conference will not be held in 2012. According to an announcement from the Board of Directors for Monroe County ARES which hosts the event, they have decided to postpone EmComm East until the fall 2013 due to circumstances beyond their control..

According to their news release the group is running into a fist-full of scheduling conflicts that are making it difficult to plan an emergency communications conference that is of the same quality as the past conferences that they have hosted in years past. This is because they have several competing events in the region that will significantly take away from normal attendance. Also their call for programs did not have enough responses to fill all of the slots needed for this year's conference.

Monroe County New York ARES says that it will be announcing its plans for 2013 early next January. If you have any questions, do not hesitate to contact them by e-mail to info (at) emcommeast (dot) org or simply keep an eye on www.emcommeast.org for updates. (Monroe County ARES Inc.)

CHANGING OF THE GUARD: LEGENDARY HAWAII VHF - UHF EXPERIMENTER LAID TO REST IN CALIFORNIA

Hawaii's legendary VHF/UHF experimenter Paul Lieb, KH6HME, has been laid to rest following a Catholic Mass on Saturday, July 21st. The service was attended by Lieb's family, friends, and several dozen ham radio operators. Many of the latter were members of California's San Bernardino Microwave Society of which Lieb was a long time member. A number of the radio amateurs drove many hours to attend the service.

According to his longtime friend Gordon West, WB6NOA, Lieb's ham radio activities played a major part in the memorial service. This included the front cover of a written remembrance program showing KH6HME at the Mona Loa beacon site door that was etched with visiting ham radio call signs. Below his name was his KH6HME call.

At the end of the Mass, each of the 6 candles surrounding Lieb were extinguished one-by-one. West says that this signified the end of an era when Paul would head for the 8200 foot site on the Mona Loa Volcano. From there he would switch from beacon mode to voice and CW , and complete the 2500 mile path on every VHF and UHF band from 6 meters up through 5 GHz .

KH6HME was buried at the Holy Sepulcher Cemetery in Orange, California. West says that the very last line of the memorial program read - and we quote: "He will never be forgotten, and his beacon will continue to delight and amaze us all. 73 Paul. "

As reported last week, Paul Lieb, KH6HME passed away on Sunday night July 15th while visiting his sister and other relatives on the U.S. mainland. (WB6NOA)

**

HAM RADIO IN SPACE: BAOFENG REPEATER TO THE EDGE OF SPACE

Spanish radio hams have used two low cost handheld FM transceivers to build a cross-band repeater which they then launched to the edge of space on a high altitude balloon. The radios used in the experiment were identified as Luther TL-44 but appear identical to the popular Baofeng UV-3R available on E-Bay from many online dealers world-wide at a cost of between $30 to $45 each.

The balloon flight lasted 2 hours 44 minutes during which 179 contacts were made. The furthest was over a distance of 670 km. You can read the entire story in electronically translated English at tinyurl.com/Baofeng-Repeater (G6UIM)

**

HAM RADIO IN SPACE: KE5DAR TO BE ON-ORBIT DJ AUGUST 3

NASA astronaut Joe Acaba, KE5DAR, will play Disk Jockey in space on Friday, August 3rd. That's when he will do a live remote from the International Space Station as a part of a two-hour music and talk show to be streamed over Internet station Third Rock Radio.

Third Rock Radio is calling this outing "The Joe Show." It describes it as a blend of science, technology, engineering and mathematics and art.

For those not aware, Third Rock Radio is a project of Houston, Texas radio veterans. It is produced under a NASA Space Act Agreement with RFC Media.

The "Joe Show" is mainly aimed at younger Americans. It can be heard as an audio stream at ThirdRockRadio.net with Acaba's appearance beginning at 4 p.m. Eastern time, as we said, on Friday, August 3rd. (Third Rock Radio)

**

ON THE AIR: HONEYMOON TRIP TO MARITIUS IN SEPTEMBER

On the air, Alex Landi, IW5ELA, says that he will be on the air stroke 3B8 from hotel Le Cannonier on Maritius between September 6th and the 12th. This as a part of an extended honeymoon trip with his wife Michela that will take them through Corsica, Mongolia, Finland and Africa. From Maritius his operation will be on 20, 17, 15 and 12 meters using CW and SSB. Because of the nature of this trip all operation is holiday style. QSL via his home callsign either direct or via the bureau. And less we forget, the couple does have a web page. You can visit it on-line at honeymoonafrica2012 (dot) jimdo (dot) com. (OPDX)

**

ON THE AIR: WORK PROGRESSES ON NEW TRANS-ATLANTIC 2 METER BEACON

A new trans-Atlantic 2 meter propagation beacon is well on its way to becoming a reality. RSGB news reader Jeremy Boot, G4NJH, has the latest:

--

Brian, WA1ZMS, is making the final preparations to ship the GB3WGI 144MHz transatlantic beacon transmitter over to Northern Ireland.

Thanks to the kind donation of antenna parts and clamps from G4CQM at Powabeam Antennas, beacon keeper Gordon, GI6ATZ, is in the process of building the antenna system for the beacon, and installing the emergency shutdown system. It is hoped to have the beacon up and running before the end of the year.

Im Jeramy Boot, G4NJH, in Nottingham.

--

Once the beacon is placed into service it will act as a marker to tell hams in the America's when a 2 meter path is open to the UK and possibly beyond. (GB2RS)

**

DX

In DX, F4EZG will be active between September 1st and the 3rd from Madagascar as 5R8VE. Operations will only be on 20 and 15 meters. QSL via F4EZG.

EA2BD will be active from Malta as 9H3BD until July 30th. His operations are low power on 20 meters using CW and SSB. QSL via his home EA2BD callsign.

WB6OJB is on the air from Botswana as A25JB through the end of July. He can be heard on 40 through 10 meters using mostly SSB with some CW. Again, QSL this station also direct to his WA6JOB home callsign.

JJ2NYT will be active as stroke FK from Grande Terre New Caladonia between July 29th and August 2nd. His operation will be on 40 through 10 meters using CW, SSB and RTTY. Like the last two, QSL this one also via his home callsign.

G3SWH will activate the special callsign M0RSE on CW only over the weekend of August 18th and 19th. As you might expect, this is a CW only operation with QSOs to be uploaded to Logbookof the World immediately after the weekend operation concludes. Special QSLs will be available via the bureau or direct with Self Addressed Envelope and adequate return postage or even via the traditional bureau route.

Lastly, members of the Gemilang Amamteur Radio Club and the Mediterraneo DX Club will team-up to sponsor a DXpedition to Brunei. The multi-national team will be on the air as V-84-S-M-D between November 11th and the 23rd. Operations will be on 160 through 10 meters, including the 30, 17 and 12 meter bands. Modes to be supported are CW, SSB and RTTY. QSL via IK2VUC, direct or via the bureau.

Above from various DX news sources

**

THAT FINAL ITEMS: WIND FARMS MAY CONTRIBUTE TO CLIMATE WARMING

And finally this week, word that's what some call green power might not be so green after all. Amateur Radio Newsline's Cheryl Lasek, K9BIK, reprts:

--

Research in the United States has shown that large wind turbine farms used to generate so-called green power might have a warming effect on the local climate, and there-by casting a shadow over the long-term sustainability of wind power.

Its been long believed that carbon dioxide and other greenhouse gases from burning fossil fuels contribute to the so-called global warming effect. Some scientists believe this could lead to the melting of glaciers, sea level rise, crop failure and other devastating effects. So in an effort to cut such emissions, many nations are moving towards cleaner energy sources such as wind power.

Now, researchers at the State University of New York at Albany have analyzed over the period 2003 to 2011 the satellite data of areas around large wind farms in Texas, where four of the world's largest farms are located,. The results, published in the journal Nature Climate Change, showed a warming trend of up to 0.72 degrees Celsius per decade in areas over the farms. This as compared with nearby regions without the farms.

The study attributed this warming primarily to wind farms. It says that the temperature change could be due to the effects of the energy expelled by farms and the movement and turbulence generated by turbine rotors. It concluded that these changes, if spatially large enough, may have noticeable impacts on local to regional weather and climate. That said, the researchers say that more studies are needed at different locations and for longer periods, before any firm conclusions could be drawn.

Previous research in 2010 by other U.S. scientists found wind farms could make the nights warmer and days cooler in their immediate vicinity, but those effects could be minimized by changing turbines rotor design or by building the farms in areas with high natural climatic turbulence.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

According to the Global Wind Energy Council in 2011 the world's wind farms had the capacity to produce 238 gigawatts of electricity at any one time. That was a 21 percent rise over 2010 and capacity and is expected to reach nearly 500 gigawatt by the end of 2016 as more, and bigger wind farms are built. More on this story is on-line at http://tinyurl.com/wind-farm-warming. (UK Telegraph, CS Monitor, Forbes, others)

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late RSGB IOTA Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the RSGB IOTA Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 21st-July, through Friday, 27th-July there were 212 countries active. Countries available: 3A, 3B8, 3D2, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5Z, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY9, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FO/a, FP, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OZ, P2, P4, PA, PJ2, PY, PZ, R1FJ, S2, S5, SM, SP, SU, SV, SV5, SV9, T7, TA, TF, TG, TI, TJ, TK, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2011 DXCC YEARBOOK NOW AVAILABLE ONLINE. The latest ARRL Letter (July 26th) reports: "The 2011 ARRL DXCC Yearbook is now available to all ARRL members as a supplement to the August digital edition of QST at" http://www.nxtbook.com/nxtbooks/arrl/qst_201208/index.php?startid=rr
A printed copy of the Yearbook is also available for purchase on the ARRL Online Store at: http://www.arrl.org/shop/The-DXCC-Yearbook-2011
The contents include:
- The Year in Review by Carl Smith, N4AA
- PJ2/W5MPC, October 10-15, 2010 by Mike Corey, KI1U
- ST0R Story by Antonio Gonzalez, EA5RM/ST0R
- Clinton B. DeSoto Challenge standings
- 2011 DXCC Annual List"

4S, SRI LANKA (IOTA Op). Members of Radio Society of Sri Lanka (RSSL) will be active as 4S7LGT from the Beruwala lighthouse (ILLW LK0002) on Barberyn Island (AS-171) during the International Lighthouse/Lightship Weekend (ILLW), August 18-19th. Activity will be on the HF bands using CW and SSB. QSL via Bureau. For more info, please visit: http://www.rssl.lk/photo-gallery/lighthouse-expedition

9M2, WEST MALAYSIA. Champ, E21EIC, will be active as 9M2/E21EIC during the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band entry. Look for activity before and after the contest. Champ is expected to be there between November 23-27th. QSL direct to E21EIC. JAs QSL via JR5XPG. NO eQSLs. Visit his Web page at: http://www.e21eic.net

A2, BOTSWANA (Update/Correction). Arnold, WB6OJB, will be active as A25JK (not A25JB) from the Lotsane Game and Safari Lodge in the extreme eastern part of Botswana between July 24-31st. He plans to be on the air every day. Activity will be on HF bands, 40-10 meters using mostly SSB with some CW. He will use an Icom 746PRO, an Expert 1K amplifier, a Tennadyne T6 antenna with a vertical Butternut HF2V for 40 and 80 meters. Arnold states, "My wife, Joan and I go to southern Africa almost every year. We have done some missionary work in the past and continue to bring medicines to the medical clinics in the the areas we visit." QSL direct to his home callsign. He states, "For QSL DX stations please send 2 stamps and a 4x6 envelope. For State side QSL please send stamped 4x6 envelope. My QSL cards are unique and slightly larger than regular QSL cards. State side donation would be appreciated because of the cost of the cards."

CY9, ST. PAUL ISLAND (Update). The CY9M St. Paul Island DXpedition is now active until August 1st. Activity will be on all bands between 160-6 meters using CW, SSB and the Digital modes. They announced on Tuesday: "Please note that CY9M will work SPLIT throughout the entire expedition (except during the IOTA contest)." Suggested frequencies are:
CW - 1826.5, 3526, 7026, 10106, 14026, 18076, 21026, 24896 and 28026 kHz
SSB - 3793, 7185, 14215, 18160, 21295, 24950 and 28485 kHz
RTTY - 7035, 10145, 18105, 21090, 24925 and 28090 kHz
6m - 50105/CW and 50105/SSB
All contacts will be verified via LoTW after their activity, and for those who want paper QSLs, Tim Beaumont, M0URX, will be the QSL Manager. The log will be available through ClubLog.

Remember, the following media pages are available for this operation at:
Website: http://www.cy9m.com/
Twitter: https://twitter.com/#!/CY9M
Facebook: http://www.facebook.com/CY9M.2012

DX MAGAZINE ARTICLE (Info Needed!). "Dee" Logan, W1HEO, is researching an article on the rising costs of DXpeditons for the DX Magazine, and would like to hear from DXpeditioners for their comments on how to cover the rising costs of DXpeditions. Specific areas of interest: examples of specific costs and reasons for their larger amounts, and suggestions for new sources or approaches to donations. Comments are requested within the next two weeks. Respond to W1HEO at: deverelogan@gmail.com

DXPEDITION VIDEOS OF THE WEEK. With more and more DXpeditions putting their videos on YouTube and other Web services, we decided to list them (possibly) each week. For this week's listings:
2011 - ZB2/VAI3TA Gibraltar DXpedition:
http://www.youtube.com/watch?v=ba3NvRTDk
2002 - VK9ML Mellish Reef DXpedition (Part 1-6, still looking for Part 7):
http://www.youtube.com/watch?v=LGfb-ojvw (Part 1)
http://www.youtube.com/watch?v=qG-8VmmoM (Part 2)
http://www.youtube.com/watch?v=mR2-TFf2I (Part 3)
http://www.youtube.com/watch?v=802VozQkM (Part 4)
http://www.youtube.com/watch?v=mJ0e0RjYs (Part 5)
http://www.youtube.com/watch?v=IYj0lf6M4 (Part 6)
1998 - Conway Reef DXpediton: http://www.youtube.com/watch?v=NAATqP2BM
1992 - Glorioso Island DXpedition (Operators DJ6SI, DJ8CR, DJ3OS and DG4FCD): http://www.youtube.com/watch?v=rBrgh55Ys
1980 - Glorioso Island DXpedition (Operators DJ6SI, DJ5RT, DJ7YQ, DJ3NG, DK9KX and DF3KX; formed the team of FR0DZ/G, FR0RZ/G, FR0CIW):
http://www.youtube.com/watch?v=jsdKysQQA
1980 - Juan De Nova Island DXpedition (Operators DJ6SI, DL8CM, DJ5RT, DL6PE and F6EXV; formed the team of FR0DZ/J, FR0RX/J, FR0CIW/J):
http://www.youtube.com/watch?vQ8CdkK87c

If you have a DXpedition 'video' available on the Web and would like to have it listed in the OPDX, PLEASE send the URL to use and we will publish it.

E2, THAILAND. Champ, E21EIC, will be active as E21EIC during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/Low-Power entry. QSL direct to E21EIC. JAs QSL via JR5XPG. NO eQSLs. Visit his Web page at: http://www.e21eic.net

IOTA NEWS.....
AS-008. Takeshi "TAKE", JI3DST, will be active as JI3DST/JI1 from Shikine Island (North Izu Island) between 0800z, July 27th and 0000z, July 30th. Activity during the RSGB IOTA Contest, Take will be signing JI3DST/1 (only). Operations will be on 40/30/20/17/15/12/10 meters using CW, SSB, FM, RTTY and PSK31. In case of heavy rain or other conditions, the operation

condition may vary, but he will be active during the IOTA
contest. QSL info for JI3DST/JI1 and JI3DST/1 is available
on QRZ.com.

AS-018. Operators Yuri/RA0FU, Vlad/RC0F and Igor/RU0FM will be active
as RU0FM from Sakhalin Island during the RSGB IOTA Contest
(July 28-29th) as a Multi-Op/Single-TX/High-Power entry. QSL
via RU0FM.

AS-074. Ian, 9M2FB, will be active from Pulau Ketam Island (Crab Island)
during the RSGB IOTA Contest (July 28-29th) as a Single-Op/
CW-Mode/24HRS entry. QSL via 9M2FB.

AS-099. Operators Nuri/TA3X, Can/TA3GO, Mehmet/TA3ATA and Selim/TA3TTT
will be active as TC0P from Celebi Island during the RSGB IOTA
Contest (July 28-29th) as a Multi-Op/Single-TX entry. QSL via
TA3X (see QRZ.com).

EU-014. Patrick, ON4HIL, will be active as TK/OT2A from the Island of
Corsica during the RSGB IOTA Contest (July 28-29th). He will
use a K3 into a G5RV. QSL via ON4HIL.

EU-025. Joe, IT9RZU, will be active from Sicily Island during the
RSGB IOTA Contest (July 28-29th) as a Single-Op/All-Band/
CW-Mode/Low-Power entry. QSL via his home callsign, by the
Bureau or LoTW.

EU-040. Operators Jorge/CT1BOL, Augusto/CT1BZG, Jose/CT1DSV, Joaquim/
CT1DZR, Antonio/CT1ENV, Joel/CT1HXB and Mino/CT1IZW will be
active as CR5B from Berlenga Grande Island during the RSGB
IOTA Contest (July 28-29th) as a Multi-Op/Island entry. QSL
via CT1BOL.

EU-042. Peter, DC1HPS, will be active as homecall/p from Pellworm
Island (DID N-23, WLOTA 1188) during the RSGB IOTA Contest
(July 28-29th). He will be there between July 27-29th. QSL
via his home callsign, by the Bureau or direct.

EU-047. By the time you read this, operator Dominik/DL5EBE, Ric/DL2VFR,
Klaus/DL7UXG and Friedrich/DL4BBH will be active as DM50IOTA
from Borkum Island for an early start just before the RSGB
IOTA Contest (July 28-29th). The group will be a Multi-Op/
High-Power entry. QSL via Bureau if you really need a direct
QSL go via DL2VFR. ADDED NOTE: This is the second German Island
group activated by DM50IOTA during the 50th IOTA Marathon.
DM50IOTA will activate all German IOTA during that time. If
you have worked DM50IOTA from all German IOTA by the end of
2013 you can apply for a special award.

EU-055. Operators Bj rn/LA6SFA, Morten/LA7XIA, Knut/LA9RY,
Gerald/LA0HK,
Vikingstad/LA9YGA and Nils/LA6IOA will be active as LN4C from
Bokn

Island during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/
24HRS entry. QSL via LA4C.

EU-064. Members of the Provins ARC will active as F9IE from Noirmoutier
Island during the RSGB IOTA Contest (July 28-29th) as a Multi-
Op/Island/Mixed-Mode/24HRS/Low-Power entry. QSL via F9IE, direct
or by the Bureau.

EU-066. Operators Vasily/RU3SD, Sergei/UA3SKV and R3S-367 (SWL) will
be active as RK3SWB/1 from Solovetskiy Island (possibly
Anzerskiy Island) during the RSGB IOTA Contest (July 28-29th)
as a Multi-Op entry. QSL via the Bureau or direct (QRZ.com).

EU-081. Antoine, F5RAB, will be active as F5RAB/P from Ile du Large
(DIFM MA-001, WLOTA L0060, DPLF PB-052, WW Loc IN99KL, DFCF50-
013 Fort de l'�le du large) during the RSGB IOTA Contest (July
28-29th) as a Single-Op/Mixed-Mode/24HRS/DXpedition/Low-Power
entry. He will use 100 watts into a dipole. QSL via his home
callsign. He mentions that access to the island is very re-
stricted, landing depends highly on the weather conditions
and is dangerous, so he is not sure he'll be on the air in
time for the contest.

EU-084. Mel, SM0MPV, will be active as SK0HS/0 (the H�sselby Strand's
Sea Scout group's callign) from Blido Island during the RSGB
IOTA Contest (July 28-29th) as a Single-Op/All-Band/SSB-Mode/
Low-Power entry. QSL via LoTW or by the Bureau.

EU-120. A small group of operators will be active as MX0LDG from Lundy
Island between October 11-16th. They will have 2 stations on
the air between 0600-0000 each day - the islands power closes
down at midnight each day. Activity will be on SSB and possibly
some Digital modes. The equipment will consist of a Elekraft
K3 and KPA500 amp, a Kenwood TS590s and Expert 1KW amp, and a
Icom IC706 as a backup radio. Antennas will be 2 G3XTQ Hex-
beams built by MW0JZE (see http://www.g3txq-hexbeam.com) and
a Vertical for 40m. Operators mentioned are John/M5JON (Team
Leader), Pete/M0ILT, Ant/MW0JZE and Chris/G1VDP. A special QSL
card will be available through the team's manager Tim, M0URX,
and all logs will be uploaded to LoTW and ClubLog. Please use
the OQRS on Tim's Web site <http://m0urx.com/oqrs/>. DO NOT
SEND CARDS FOR THIS ACTIVATION VIA THE BUREAU PLEASE USE OQRS.

EU-121. Gerard, EI5KF, will be active as EI5KF/P from Lohehort Battery,
Bere Island, during the RSGB IOTA Contest (July 28-29th) as a
Single-Op/12HRS/CW-Mode/Low-Power entry. QSL via EI5KF.

EU-123. Operators Tom/MM0BHX, Gordon/MM0GPZ, Iain/GM0OQV, Philip/
GM0LIR and Brian/GM0EGI will be active as GM0B from Isle of
Bute during the RSGB IOTA Contest (July 28-29th) as a Multi-Op
entry. QSL via MM0BHX.

EU-130. Operators Ivan/IV3CTS, Marijan/S56A and Goran/YT7AW will be active as IL3/IV3CTS from Grado Island during the RSGB IOTA Contest (July 28-29th) as a Multi-Single entry. QSL via the Bureau.

EU-136. Marcus, DL3NCI, will be active as 9A/DL3NCI from Losinj Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/CW-Mode/12HRS/QRP/Low-Power entry. He will be there • 2 days outside of the contest and operating holiday style. QSL via his home callsign.

EU-136. Neven, 9A5YY, will be active from Losinj Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/Mixed-Mode/12HRS/QRP/Low-Power entry. QSL via his home callsign.

EU-164. Operators Tom/DL2RMC and Heiko/DL1RTL will be active as TK/homecall from Piana Island during the RSGB IOTA Contest (July 28-29th) as Single-Ops/12HRS/CW-Mode entry. They will use a vertical antenna. Tom will run QRP, while Heiko runs Low-Power. QSL via their home callsigns.

EU-170. Matus, HA9MDN, will be active as 9A/HA9MDN from Vir Island between July 28th and August 4th. Activity will include the RSGB IOTA Contest (July 28-29th). Operations will be on SSB, RTTY and SSTV. QSL via HA9MDN, by the Bureau or eQSL.

EU-182. A Russian-Ukrainian team of nine operators will participate in the RSGB IOTA Contest (July 28-29th) as UT/UA3A from Ochakovsky Island (WFF: URFF-006, WW Grid: KN45TJ). Operators mentioned are Vlad/UA3A, George/RQ7M, R6LP, Vlad/RJ3FF, Liliya/RN3AQU, Andrei/UA3EDP, Mike/UA3EKG, Boris/UT7UT and Nikolay/UX0FF. Look for the operators outside of contest to sign UT/UA3A, UT/RQ7M, UT/R6LP, UT/RJ3FF, UT/RN3AQU, UT/UA3EDP, UT/UA3EKG, UT7UT/P and UX0FF/P. QSL UT/UA3A via UA3A, by the Bureau dor direct.

NA-026. Mike, N2GC, will be active from Long Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/CW-Mode entry. QSL via LoTW.

NA-031. John, NY6DX, will be active as NY6DX/1 from Block Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/12HRS/Low-Power. QSL via his homecall, LoTW or eQSL.

NA-046. Howard, K1VSJ, will be active from Martha's Vineyard during the RSGB IOTA Contest (July 28-29th) as a Single-Op/Mixed-Mode/Unassited/24HRS entry. QSL via his home callsign, direct or by the Bureau.

NA-059. Tim, NL8F, will be active from Unalaska Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op entry. QSL via K8NA.

NA-143. Members of the Cavalla Historical Society Radio Club will be active as N5BPS from Pelican Island, near Galveston, TX, during the RSGB IOTA Contest (July 28-29th). They will be operating from the radio room on board of USS Stewart at Seawolf Memorial Park. QSL via N5BPS - SASE appreciated.

SA-046. A group of Brazilian operators will be active as PX7C from Itamaraca Island, Brazil, during the RSGB IOTA Contest (July 28-29th) as a Multi-Single entry. Operators mentioned are Antonio/PY7OO, Benedito/PY7VI and Jim/PY7XC. QSL via PY7CRA.

J49, CRETE (IOTA Contest). Operators Manos/SV9JI, Dimis/SV9COL, John/SV9CJO, Georgios/SV9DJO, George/SV9GPV, Manolis/SV9IOI, Konstantinos/SV9OFS and Christo/LZ3FN will be active as J49A from Falaserna Beach, near Chania City the west part of Crete (EU-015) during the RSGB IOTA Contest (July 28-29th) as a Multi-Single entry. QSL via LoTW or direct to SV9GPV.

N8, UNITED STATES (Special Event). Look for special event station N8M operating from the Henry Ford/Greenfield Village (Detroit) Maker Faire, July 28-29th. Activity will be on all bands and modes, including the satellite and 6 meters. Satellite operations will be active on all modes on as many passes as possible. QSL via the info on the Ford Amateur Radio League Web site at: http://www.k8utt.org/index.htm

OJ0, MARKET REEF (Press Release - date July 23rd) [edited]: "A limited Market Reef (OJ0) activation during the IOTA Contest -- Next Friday morning on the 27th of July, a group consisting of G3TXF, G3XTT, SM0DZB and SM0W will attempt to land on Market Reef (OJ0), now from Sweden, with a small boat to activate the Reef during the IOTA contest as OJ0R, EU-053. During last winter the Lighthouse on the Reef lost all permanent antennas plus the wind generator, so the team will put up several vertical antennas and dipoles and run modest power.
The main goal for the team on this trip will be to prepare for a new permanent antenna installation that will be done later in August. SM0W will also collaborate with the Finnish Lighthouse Society to find a good permanent solution for the electricity for future activations. They will still try to keep at least one station open for the IOTA contest. The

team will try to leave the Reef early Monday morning on the 30th of July, says team leader Teemu, SM0W. QSL OJ0R via G3TXF. For more information see: http://www.qrz.com/db/oj0r/ "

S7, SEYCHELLES. Operators Luca/I5IHE (S79LC), Danio/I5OYY (S79YY) and Simone/IK5RUN (S79XX) will be active from Praslin Island (AF-024) between October 21st and November 4th. Activity will be holiday style on 80-10 meters using CW, SSB and RTTY. QSL S79LC via I5IHE direct only. QSL S79YY via I5OYY (direct + SASE and LoTW). QSL S79XX via IK5RUN (direct + SASE and LoTW).

T30, WESTERN KIRIBATI (Update). Alex, PY2WAS, sent the following press release (#2) on June 24th, with updated details on the upcoming T30PY/ T30SIX DXpedition to Tarawa Island (OC-017), Western Kiribati, between October 16-25th: "Preparation of antennas and gear progress successful. Between August 17-19th, the whole team will gather at PW2D contest station to test antennas and stations that will be used in the expedition. At this time each one will carry back home the items that will be transported as individual baggage in the airlines. Unfortunately, excess baggage is a main concern mainly within the Pacific island flights.
As previously announced the group is very committed to put a meaningful effort on Low Bands and Six meters.
We would like to thank clubs, companies and individuals for their donations and for making this Dxpedition possible. Donations will certainly

enhance our performance, enabling us to take better antennas and gears.
Our QSL policy has also been improved to better match people's needs.
Five different QSO confirmation possibilities are available including a
fast track for donors.
Details can be checked at: http://www.mdxc.org/t30py/ "

TO2, ST. BARTHELEMY (Update to OPDX.1068). Ludovic, HB9EOU, will be
active as TO2D from St. Barthelemy Island (NA-146) during the RSGB IOTA
Contest (July 28-29the) as a Single-Op/SSB-Mode/24HRS entry. QSL via
HB9EOU, direct or by the Bureau. He currently on the island with Andre,
HB9CVC, until August 4th. For more details and udates, visit:
http://st-barth.hb9eme.ch

TT8, CHAD. Members of the "Italian Dxpedition Team" will be active as
TT8TT from N'Djamena, Chad, during October 2012 (specific dates to be
announced). Activity will be on 160-6 meters using CW, SSB and RTTY.
Suggested frequencies are:
CW - 1823, 3530, 7025, 10113, 14050, 18069, 21050, 24891 and 28450 kHz
SSB - 3790, 7056, 7125, 14270, 18130, 21275, 24980 and 28450 kHz
RTTY - 7041, 10142, 14080, 18103, 21080, 24915 and 28080 kHz
6m - 50105/CW and 50105/SSB
Operators have not yet been announced, but the pilot station is IK7JWY.
QSL direct via I2YSB. QSL by the Bureau via IK2CIO. Logs will be posted
to LoTW within six months. A TT8TT survey (for needs), a log search and
an OQRS are all available on their Web page at: http://www.i2ysb.com
Official forum is at: http://bit.ly/NVQaav
Look for more details to be forthcoming.

V6, MICRONESIA. Masatuki, JH1DVG, will be active as V63JX from Pohnpei
Island (OC-010) between November 23-26th. Activity will be on 40/20/15/10
meters. QSL via his home callsign, direct or by the Bureau.

V8, BRUNEI (Update/Press Release). The follwing are edited excerpts from
a press release (#4) sent out on July 25th, by the "Mediterraneo DX Club":
"Great news from Brunei! Thanks to the efforts, made during the past weeks
by the V84SMD team, the Magic Band will come back. -- Members of a 18
multi-national DXpedition team organized to be active between November
11-23rd by the Italian Mediterraneo DX Club, has obtained a 50 MHz license
and will now be able to put up a dedicated antenna for this band!
This is a real great target reached by the team, and just as a reminder,
they will be active on all bands/modes, 24 hours per day because the six
meters band from V8 land has come back on air after a silence of more than
10 years! So, all of the team is very happy to give to the DX community
this great opportunity to work them on 6m. Once again the very motivated
and professional V84SMD guys are asking for support to help them in any
way -- even with small donations. Please, don't miss any updated news by
visiting (from time to time), the DXpedition official Web site at:
http://www.mdxc.org/v84smd "

VK0H, HEARD ISLAND (Update). Bob, KK6EK, Team Leader/Organizer of the
planned 2014 Cordell Expedition to Heard Island, has posted two documents
of interest for DXers to read on Heard Island Web page at:

the http://www.cordell.org/HD
Documents are:
1. The Preliminary Project Description for the 2014 Heard Island
Expedition (v. 3.7, PDF, 6 MB):

http://www.cordell.org/HD/HD_documents/HD2014/HIP_Project_Description_3.7X.
pdf
PLEASE NOTE: This document is revised often. They request that you do
not
distribute out-of-date versions.

2. The book VK0IR Heard Island, by KK6EK (1997, PDF files, various sizes,
entire book 100 MB):
http://www.cordell.org/HD/HD_documents/VK0IR/VK0IR_Book.PDF
(The book is available in parts -- see Web page)

Bob states on the Web page, "Currently we are elaborating the scientific
program for the expedition and adding to the list of candidates for the
team. We are pleased to have Jean-Michel Cousteau as Honorary Expedition
Leader and Joe Taylor N1JT (Nobel physics) as Honorary DXpedition Leader.
If you have interest in being involved in the project as a team member,
advisor, scientist, sponsor, or in any other capacity, we would welcome
your inquiry."

VP2V, BRITISH VIGRIN ISLANDS (Update). Steve, AA7V, will once again be
active as VP2V/homecall from Virgin Gorda (Tortola) between September
26th and October 1st. He mentions that he will be in the CQWW DX RTTY
Contest (September 29-30th), and probably won't take a keyer/paddles and
possibly a microphone. Steve states, "I will lug my Ameritron amp down
there and (hopefully) run 400w. I have a G5RV and an 80/40 trap dipole
which will both hang off the porch of one of those cliffside villas. If
any time, I will try 17 meter RTTY. Thank goodness no 160 in this contest."
QSL via AA7V direct or LoTW. NO BUREAU QSLS. ADDED NOTE: Also look for
Art/N3DXX and Steve/AA7V, to be going to Virgin Gorda, BVI, starting
Wednesday November 21st through (tentative) Monday December 3rd. They
will be in the CQWW DX CW Contest (November 24-25th) as a Multi-Single
entry and the ARRL 160m CW Contest (November 30th-December 2nd) with
N3DXX as a Single op (tentative) using the callsign VP2V/AA7V. They
will run high power/400w for both contests. Outside of the contests,
they will be on the WARC bands possibly, if time permits. QSL LoTW or
direct. NO BUREAU QSLS.

WAEDC CW CONTEST. Helmut, DF7ZS, WAEDC Manager, would like to remind
everyone that between 0000z Saturday, August 11th and 2359z Sunday,
August 12th, the next edition of the "Worked All Europe DX Contest CW"
is hitting the HF bands again! They would appreciate your participation
in this exciting event. Complete rules can be found here:
http://www.darc.de/referate/dx/contest/waedc/en/rules
For latest news and updates you can also join them on the WAEDC Facebook
group: https://www.facebook.com/groups/453972741287450/

W9I - Special Event - Ernie Pyle Island in Cunot Indiana

Posted: 26 Jul 2012 07:05 PM PDT
http://forums.qrz.com/showthread.php?355572-W9I-Special-Event-Ernie-Pyle-Island-in-Cunot-Indiana&goto=newpost

W9I will be on the air from August 3 through August 5, operating from Ernie Pyle Island in Cagles Mill Lake near Cunot Indiana in Owen County. Aug 3 marks the 112th birthday of Hoosier Journalist and WWII corespondent, Ernest Taylor Pyle. Ernie Pyle was known by every GI and his writing style and presentations brought the faraway battlefields to our homes. Ernie was like a member of the family and submitted his stories to over 300 publications. On April 18th, 1945, he made the greatest sacrifice when he was killed by a sniper on the Japanese island of "le Shema".

The W9I team will be working stations on HF, VHF, UHF, and DSTAR using CW, SSB, PACKET, and PSK31 modes. Ernie Pyle Island has been registered with the US Islands Award Program and the team will be trying to get it qualified that weekend. Qualification for the USi program requires 25 contacts, and at least two have to be from different DXCC entities.

See W9I here on qrz.com or visit the W9I page at KB9BVN.NET for more details.

QSL cards can be obtained for your contacts by sending a QSL and SASE to KB9BVN

N5BPS IOTA NA-143 Pelican Island this RSGB IOTA contest

Posted: 26 Jul 2012 11:52 AM PDT
http://forums.qrz.com/showthread.php?355523-N5BPS-IOTA-NA-143-Pelican-Island-this-RSGB-IOTA-contest&goto=newpost

Cavalla Historical Amateur Radio Society group will be operating N5BPS (the WWII original call of submarine Cavalla was NBPS) from the radio room of USS Destroyer Escort Stewart located on Pelican Island (NA 143) during the upcoming RSGB IOTA contest.

The group is actively working on restoration of WWII radio equipment on both ships - USS submarine Cavalla and USS DE Stewart located near Galveston TX in Seawolf Memorial park .

If you missed the boats during our recent events ☐ Museum Ships Weekend and Field Day - here is you chance again to stop by and say ahoy.

Operating from WWII veteran ships is a rare experience and all visitors are welcome to ☐come aboard☐ Stewart's air-conditioned radio room(!) to operate.

Tri-State Amateur Radio Association to Host 50th Annual Hamfest:

Posted: 26 Jul 2012 05:13 PM PDT
http://www.eham.net/articles/28688

The Tri-State Amateur Radio Association (TARA) will host the 50th Annual Hamfest in Huntington from 8:30 a.m.-1 p.m. Aug. 11, according to a news release from the organization. The event will be at a new location for it's golden anniversary at the Christ Temple Church complex. Hamfest was previously held at the Veterans Memorial Field House until it was demolished this year. The new location will offer unlimited free parking and a new, modern facility for the event.

//
Tiny Japanese Satellite Will Write Morse Code Messages in the Sky:

Posted: 26 Jul 2012 05:12 PM PDT
http://www.eham.net/articles/28687

The robotic Japanese cargo vessel now en route to the International Space Station is loaded with food, clothes, equipment -- and a set of tiny amateur radio satellites, including one that will write Morse code messages in the sky. Japan's unmanned H-2 Transfer Vehicle-3 launched July 20 and is slated to arrive at the station Friday (July 27). The ultrasmall satellites it's carrying, which are known as cubesats, will likely remain on the orbiting lab until September, when they'll be deployed by Japanese astronaut Akihiko Hoshide using the Kibo module's robotic arm.

//
Ulster County Radio Group Seeks to Use Tower on Town of Ulster Land:

Posted: 26 Jul 2012 05:10 PM PDT
http://www.eham.net/articles/28686

TOWN OF ULSTER, N.Y. -- The Town Board is reviewing a request from the Ulster County Radio Amateur Civil Emergency Service to use an abandoned radio tower at the town Highway Department site on East Chester Street Bypass. Town Highway Superintendent Frank Petramale said during a recent board meeting that the tower is not needed for municipal business. "There is a vacant tower that's attached to the rear of our salt shed that was put in by the fire department, Ulster Hose," Petramale said. "They have since stopped using that and moved their antenna and repeater up to Jockey Hill." The Ulster County Radio Amateur Civil Emergency Service, known as RACES,

said in a June 26 letter from member Matthew Bechtold that the group has been using a repeater on a building used by the Ulster County Health Department at 300 Flatbush Ave. in Kingston -- a building that county officials plan to sell. "We are local ham radio operators that provide backup communications during disasters when phone lines are down or overloaded, as on 9/11," Bechtold wrote in describing RACES. "We assisted the Red Cross, teaming up with them to provide emergency communications to get messages and supplies in and out of New York City. Also, during flooding in Sullivan County, we teamed up with the Red Cross and worked their emergency response vehicles to communicate where supplies and food were needed."

ARRL Board Plans for 2014 Centennial Celebration at 2012 Second Meeting:

Posted: 26 Jul 2012 03:07 PM PDT
http://www.eham.net/articles/28682

When the ARRL Board of Directors met for its 2012 Second Meeting July 20-21 in Windsor, Connecticut, it did so with a full agenda. Besides hearing and approving recommendations from its two standing committees -- the Administration and Finance Committee and the Programs and Services Committee -- the Board voted to hold the 2014 ARRL

National Convention July 17-20 in Hartford, Connecticut, the birthplace of the League in 1914.

//
ARRL Board of Directors Names Award Recipients at 2012 Second Meeting:

Posted: 26 Jul 2012 03:10 PM PDT
http://www.eham.net/articles/28681

The ARRL Board of Directors named four ARRL award recipients at their July 20-21 meeting in Windsor, Connecticut: the 2011 Doug DeMaw, W1FB, Technical Excellence Award; the 2012 ARRL Technical Innovation Award; the 2012 Philip J. McGan Memorial Silver Antenna Award, and the 2012 Herb S. Brier Instructor of the Year Award. In addition, the Board named former ARRL West Gulf Division Director Thomas W. Comstock, N5TC, as Director Emeritus of the ARRL.

The July 19 edition of The Herald-Palladium -- a newspaper serving the communities of Benton Harbor and St Joseph, Michigan -- is reporting that Heathkit Education Company has declared bankruptcy and has officially closed its doors after defaulting on its lease. According to the paper, Heathkit employed more than 1800 people in its heyday after World War II. When it finally closed, its workforce totaled fewer than six people.

The Bands Heat Up for the 2012 ARRL August UHF Contest:

Posted: 26 Jul 2012 03:05 PM PDT
http://www.eham.net/articles/28679

VHF/UHF weak-signal operators across North America are making final tests on their stations in preparation for the ARRL August UHF Contest, which is coming up over the weekend of August 4-5. According to ARRL Contest Branch Manager Sean Kutzko, KX9X, this contest will focus on 222 MHz and above. There will be lots of activity, and hopefully lots of propagation, too!

//
Special Event Stations in London and Wales On the Air for Olympic Games:

Posted: 26 Jul 2012 03:06 PM PDT
http://www.eham.net/articles/28678

Two special event call signs were activated on Wednesday, July 25 to celebrate the London 2012 Olympic and Paralympic Games: 2O12L from London, England and 2O12W from Barry, Wales. Both stations will be on the air for the duration of the Games -- July 25-August 12 -- and

continuing through September 9.

Vanity Call Sign Fee to Go Up 80 Cents:

Posted: 26 Jul 2012 03:11 PM PDT
http://www.eham.net/articles/28677

On July 20, the FCC announced that the cost of an Amateur Radio vanity call sign will increase 80 cents, from $14.20 to $15. The fee will increase 30 days after notice of the increase is published in the Federal Register; no date has yet been set for publication. Earlier this year, the FCC released a Notice of Proposed Rulemaking and Order, seeking to raise the fee for Amateur Radio vanity call signs.

Counterfeit Transistors eBay -- Beware!

Posted: 26 Jul 2012 03:04 PM PDT
http://www.eham.net/articles/28672

Recently I purchased RF transistors on eBay to service a TS-950 radio. I bought them from Yankee_Electronic, and eBay seller based in China. The part was 2SC1971. I am a longtime eBay seller/buyer and have never had issues. That qualified me as naive. The parts I bought have the collectors/emitters reversed, which makes a nice short-circuit for the

collector supply. Upon close inspection, I noticed that the silkscreening of the part number is over a "glossy" coat of paint, designed to obscure the old part number. I also bought some other devices from the same seller which do not work.

DXCC-EAST Convention - Frederick, MD - August 25, 2012 - Vendors, Speakers & Dinner

Posted: 25 Jul 2012 08:50 PM PDT
http://forums.qrz.com/showthread.php?355436-DXCC-EAST-Convention-Frederick-MD-August-25-2012-Vendors-Speakers-amp-Dinner&goto=newpost

Hello Fellow DXers and Contesters:

I look forward to see all that can make it to the 1st DXCC-East Convention in Frederick, Maryland on Saturday, August 25, 2012, 8:30 AM to 9:00 PM. We have a full day planned with great speakers, vendors, dinner and three Grand Prizes (IC-7600, FT-2000 and ACOM-1010) plus more.

Website: www.dxcceast.com

If you live in Maryland, Wash. DC, Virginia, West Virginia, Delaware and PA, you should not miss this event. No matter where you live, you are welcome to visit our wonderful state. It is our plan to make this event like the Visalia convention only on the east coast. Any money made from

this evening will be used to support DX related activities (i.e. dx-pedition donations, educations and training and youth development).

As of today, July 25 we have 113 confirmed people for the dinner (106) and general administration (7) with another 10 planning and we are awaiting money. Our goal is to have 160 for dinner and a total 175 - Please come join us in making this a successful event!

If you have 8 friends that want to book a table together for dinner, I provide 10% discount on dinner and general admin ticket. Go register your club members at www.dxcceast.com

Sincerely,

David Collingham - K3LP

Tiny satellites to write Morse code, visible in the night sky

Posted: 27 Jul 2012 08:59 AM PDT
http://forums.qrz.com/showthread.php?355628-Tiny-satellites-to-write-Morse-code-visible-in
-the-night-sky&goto=newpost

http://dvice.com/archives/2012/07/tiny-satellites.php

I just saw this at dvice.com and thought I would share.

"An unmanned Japanese cargo vessel headed for the International Space
Station (ISS) this week is carrying some unusual cargo. In addition to
regular supplies, the vehicle contains some tiny, cube-shaped satellites
that, when deployed, will write Morse codemessages visible in the night sky.

One of the mini satellites, known as cubesats, has the job of helping
researchers test optical communication techniques in satellites. The
cubesat will use LEDs to first twinkle like an artificial star and
eventually blink in Morse Code.

The cubesat is known as FITSAT-1 and was developed by Japan's Fukuoka
Institute of Technology (FIT). It weighs just under three pounds and
carries high output, 200 watt LEDs that will turn the cube into a flashing
Morse code beacon.

Project leader Takushi Tanaka, an FIT professor of computer science and
engineering discusses one of the most exciting elements of the project on
the FITSAT-1 website:

"These [Morse code flashes], we hope, will be observable by the unaided eye or with small binoculars," Tanaka says.

It is expected the FITSAT-1 will be deployed from the ISS on September 6, by Japanese astronaut Akihiko Hoshide, using the Kibo module's robotic arm. Once in orbit the FITSAT-1 will travel between 51.6 degrees south latitude and 51.6 degrees north latitude, according to researchers.

The orbit and orientation is important to the success of the project. The tiny satellite contains a neodymium magnet that will always point it to magnetic north. This way, when the satellite rises above the horizon it will be to the south of the FIT ground station.

The flashing lights and Morse code signals from the FITSAT-1 will be received by the FIT ground station telescope and photo-multiplier device linked to an antenna. The ground gear and the satellite's LEDs will be aligned so the ground will receive the main beams.

The FITSAT-1 project will conduct high-speed and optical communication experiments for three minutes as the satellite moves through orbit, to prove the viability of optical communication with satellites.

Tanaka's website has additional detailed information on the construction of the FITSAT-1, communication frequencies and what it will be transmitting during the testing.

Seeing the little satellite in action firsthand might be challenging, but even if we only get to see the sky's newest inhabitant work via video from Tanaka's lab, it's cool to know we can wish upon a whole new star!"

SARL NEWS - SUNDAY 29 JULY 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on "Amateur Radio Today" and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 MHz FM from Pretoria with relays on 7 066 and 3 695 kHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

SOLAR MAXIMUM PREDICTED NEXT YEAR NASA ASTRONAUT SPINS DISCS FROM SPACE THE ELECTRONIC COMMUNICATIONS AMENDMENT BILL - HOW WILL IT AFFECT AMATEUR RADIO? BOOK NOW FOR THE RTA IN GAUTENG ON 18 AUGUST

You are listening to ZS6SRL. Stay tuned for more details on these items and other important and interesting items.

SOLAR MAXIMUM PREDICTED NEXT YEAR

Forecasters say Solar Max is due in the year 2013. When it arrives, the peak of 11-year sunspot cycle will bring more solar flares, more coronal mass ejections, more geomagnetic storms and more auroras than experienced in quite some time. On the weekend of 14 July 2012, sky watchers around the world got a taste of things to come.

It was early Saturday evening in South Africa when a coronal mass ejection or "CME" crashed into Earth's magnetic field and triggered the most sustained display of auroras in years. For more than 36 hours, magnetic storms circled Earth's poles. Northern Lights spilled across the Canadian border into the United States as far south as California, Colorado, Kansas, and Arkansas. In the southern hemisphere, skies turned red over Tasmania and New Zealand, while the aurora australis pirouetted around the South Pole.

The source of the CME was giant sunspot AR1520, a seething nest of tangled magnetism more than 15 times wider than Earth itself. On July 12th, the sunspot's magnetic field erupted, producing an X-class solar flare and hurling a billion tons of electrified plasma toward our

planet.

Learn more about what happens on the sun and how it affects HF propagation. Attend the RTA on 18 August at the NARC.

NASA ASTRONAUT SPINS DISCS FROM SPACE

NASA astronaut Joe Acaba will host a two-hour special radio broadcast on the Internet radio station Third Rock Radio while aboard the International Space Station, 306 kilometres above Earth. "The Joe Show: New Rock from Space" will debut at 22:00 CAT on Friday 3 August.

Acaba, a fan of classic rock, will discuss his experiences aboard the orbiting laboratory while presenting new rock to listeners around the world. The Joe Show is a blend of science, technology, engineering, mathematics (STEM) and art. It highlights the latest technology, all within the context of "exploring new worlds of music."

"I'm excited to be the first astronaut to DJ from space on Third Rock Radio," Acaba said. "From the recordings launched aboard the Voyager spacecraft to the wakeup songs on shuttle missions, NASA and music have a long history together. As a former educator, I also appreciate the strong links between music and maths, one of the core STEM components that is so critical to my work as an astronaut."

To stream Third Rock Radio over the Internet, visit: www.thirdrockradio.net.

Share this information with a young person near you. They will enjoy the fun.

THE ELECTRONIC COMMUNICATIONS AMENDMENT BILL - HOW WILL IT AFFECT AMATEUR RADIO?

The Department of Communications is planning to create another body next to ICASA to take over spectrum management. One of the many changes proposed in the Electronic Communications Amendment Bill, 2012 is the establishment of a Spectrum Management Agency within the portfolio of the Minister of Communications with the overall responsibility for the country's spectrum as contemplated in the White paper on Broadcasting Policy, 1998.

The explanatory document addendumed to the bill states that the Minister of Communications acts as the custodian of the spectrum on behalf of the people of South Africa. It further states that the Minister represents South Africa in the ITU. This includes inter alia the allocation of the radio frequency spectrum to various radio communication services, like amateur radio. The minister is responsible under the new act, once implemented, for all international spectrum matters pertaining to South Africa, including Regional and sub-Regional spectrum planning, all cases concerning international harmful interference and international frequency coordination.

The SARL Council is currently studying the draft bill. A copy is available on www.sarl.org.za, follow the link from the home page. The document has 65 pages and is 3 Megs in size. Radio amateurs are invited to send comment to the SARL by 15 August Please address comments to secretary@sarl.org.za. The final date for comment to DOC is 30 August 2012.

BOOK NOW FOR THE RTA IN GAUTENG ON 18 AUGUST

Bookings have opened for the Radio Technology in Action Symposium to be held at the National Amateur Radio Centre on Saturday 18 August 2012. Full details of the symposium are available on line at www.sarl.org.za.

You can pre book and take part in an additional prize draw for the ARRL Book "Basic Antennas". If you like a programme to be sent to your inbox send an email to rta@sarl.org.za with RTA NARC in the subject line and a PDF copy will be mailed to you.

CLUB NEWS

Ordinary Members: Pine Pienaar, ZS6GST Ben Booysen, ZS6BTB Rian Vente,r ZS6RXY John Longland, ZS6AA

COMPETITION NEWS

IARU HF World Championships

This competition took place on the 14th to the 15th July. The SARL decided to enter a team for this contest using the new ZS9HQ callsign.

The CW team consisted of the following operators: Vidi La Grange, ZS1EL, Raoul Coetzee, ZS1REC, Allan Smith, ZS1AAX, Joop Hesp ,ZS6C, and Pierre van Deventer, ZS6A.

The SSB team of operators consisted of Nigel Burgess, ZR6NGB, Roy McKay, ZS6RLM, Noel Hammond, ZR6DX, Rikus Joubert, ZS6RIC, and Geoff Levey, ZS6GRL. The SSB team operated from the NARC, with the exception of Nigel, who operated from his home QTH.

In total 512 contacts were made which is made up of 141 SSB contacts and 371 CW contacts. In total 116 HQ stations were worked across the various bands. The comments that were received are that although the bands did not always play fair everyone who took part enjoyed the contest.

Many thanks to all the team members for their time and effort, it is appreciated by all the SARL members.

The SARL's premier contest will be run during the month of August. The SARL HF Contest consists of three parts - the SARL HF Phone Contest on Sunday 5 August, the SARL HF Digital Contest on Sunday 19 August and the SARL HF CW Contest on Sunday 26 August.

The aim of the SARL HF Contests is for participants to contact as many amateurs in Southern Africa as possible on 20, 40 and 80 metres using phone, digital modes and CW. There are a number of trophies to be won for participation in these contests. The trophies are handed out during the SARL Awards Dinner.

The SARL HF Phone contest will be run from 13:00 to 16:30 UTC [15:00 to 18:30 CAT] on Sunday 5 August with activity on 14 125 to 14 300 kHz; 7 060 to 7 100 and 7 130 to 7 200 kHz and 3 600 to 3 650 and 3 700 to 3 800 kHz.

Participation can be as a a) Single Operator Single Band; b) Single Operator All Band; c) Multi Operator Single Band or d) Multi Operator All Band. Individual competitors and club stations are encouraged to compete. The exchange is a RS report and a consecutive serial number starting at 001.

Each phone QSO counts 1 point. Count two points for each area (see below) on each band and count 2 points for each station contacted on all three bands.

The areas are - Area 1: ZS1 Western Cape; Area 2: ZS2 Eastern Cape; Area 3: ZS3 Northern Cape; Area 4: ZS4 Free State; Area 5: ZS5 KwaZulu-Natal; Area 6: ZS6 Gauteng, Mpumalanga; Limpopo and North West; Area 7: 3B8 Mauritius, 3DA Swaziland, 7P Lesotho, 7Q Malawi, C9 Mozambique, Z2 Zimbabwe, 5R Madagascar, FR Reunion Island and FH Mayotte and Area 8: 9J Zambia, A2 Botswana, D2 Angola, V5 Namibia, ZD9 Gough and Tristan da Cunha Islands, ZS7 Antarctica and ZS8 Marion Island. Contacts with stations outside these areas are allowed, QSO points may be claimed but no zone or three-bander points may be claimed.

Certificates are awarded to the first three places and the highest single band score in each contest. There is also a trophy for the highest combined score in three contests. Logs must be sent to the Bloemfontein ARC, Box 33211, Fichardt Park, 9317 or by e-mail to zs4bfn@netactive.co.za by Sunday 12 August.

HF PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the week's expected solar activity will be at low levels. None of the Earth-facing sunspots are posing a threat for strong solar flares.

For those who want to do their own frequency predictions, the expected effective sunspot number for the week will be around 55.

All the bands from 20 to 10 m will provide lots of DX fun with 20 m providing the best openings with 15 m not far behind. 10 m openings will be less frequent due to the lower solar activity.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

3 August - Astronaut Joe Acaba will host "The Joe Show: New Rock from Space". 6 August - SARL HF-competition, 13:00 to 16:30 UTC. 15 August - ELECTRONIC COMMUNICATIONS AMENDMENT BILL, last date to send comments to the SARL by email to secretary@sarl.org.za. 18 August - RTA in GAUTENG, pre-book now to also enter for an additional prize draw. 19 August - SARL HF digital competition. 26 August - SARL HF CW competition.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by Dick, ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Johan Steyn, ZS4SS, and edited by George Honiball, ZS6NE.

Thank you for listening. 73. /EX

Radio opportunities High Altitude Balloon Flight - August 4 Rantoul,IL

Posted: 28 Jul 2012 05:51 PM PDT
http://forums.qrz.com/showthread.php?355791-Radio-opportunities-High-Altitude-Balloon-Flight-August-4-Rantoul-IL&goto=newpost

Space Jam 6 in Rantoul, Illinois will feature new opportunities for radio signal relay and reception. These flights will be launched by the Boy Scouts under the supervision of the Balloon Assisted Stratospheric Experiements program of DePauw University.

There will be two flights launched at 7:45 CDT (12:45 UTC).

BASE 68: will carry dual radios operating with a net control operator on the call sign WB9SA. The transmit frequency will be 144.34 MHz. The receive frequency will be 446.025 MHz. The radios should reach an altitude of at least 120,000 feet. This system should be able to support long distance earth-balloon-earth contacts within a 400 mile radius circle of Rantoul around 10 am CDT. APRS data will be sent on 144.99 MHz (WB9SA-11 two times per minute at+20 and +50 secs) and 144.39 (WB9SA-12 once every other minute)

BASE 69: will carry ATV operating on 434.00 MHz with a horizontally polarized mini-wheel antenna. It will also carry a beacon operating in the 10 meter band at 28.222 MHz with CW and 110 Baud ASCII RTTY output on the minute. APRS data will be sent on 144.99 MHz (WB9SA-13 two times per minute at+10 and +40 secs) and 144.39 (WB9SA-12 once every other minute+ 30 sec) This flight should approach 100,000 feet for the maximum altitude.

Licence Examination

The next Amateur Station Licence Examination will be held on Thursday 4th October at 2 p.m. in the ComReg Offices in Dublin. Full details, including entry procedure, examination fee and how to pay the fee online are available by clicking on the Licence Exam button on the IRTS homepage at www.irts.ie Places for the examination are limited and will be allocated on a first come first served basis. The closing date for applications to sit this examination is Thursday, 20th September Please note that it is necessary to download the application form from the web page and forward the completed form and the appropriate fee in order to secure a place for the examination. If you pay the fee on line you must still complete and forward the application form.

North Cork Radio Club

After a fun day in the Mountains, North Cork Radio Group is now gearing up for their August events, and this month is going to be a top month for activations by NCRG. No less than 3 field days are planned, making these events no. 7, 8 and 9 for NCRG in 2012.

Wednesday 8-August: a UNIQUE activation; Spike Island on the Air - CASHOTA reference: EI019/C

Saturday 18-August: Blackrock Castle Observatory -CASHOTA reference: EI009/C

Sunday 19-August: Roches Point Lighthouse - ILLW reference: EI0010

Members of the North Cork Radio Group would like to congratulate Martin (EI8FFB) and Lorrae Evans on their marriage, 28-July. We wish them all the best for the future.

Tipperary Amateur Radio Group

The Tipperary Amateur Radio Group will hold a meeting on Wednesday next the 1st of August in Raheen House Hotel, Raheen Road, Clonmel at 8:30pm All are welcome.

Germany 9th Amateur Radio Fair AREB

On Saturday, 13 October 2012, the 9th amateur radio and electronics fair AREB takes place in the University of Technology, Dresden, Germany. Reservations for commercial and private sellers can be submitted until 10th August 2012. Payment will be made by invoice.

This year Dublin Bus celebrates its 25th Birthday.

To celebrate the event a Special Event Station EI25DB will be aired between 1st July 2012 and 30th June 2013. The station will be operated by current and former employees of Dublin Bus led by Declan EI9HQ and Pete EI4GZB. QSLs to Declan EI9HQ or on LOTW or HamLog.eu

---

Mid Ulster Amateur Radio Club

Just because we are on our summer break does not mean that the Club is not active. This week-end, July 28th and 29th, listen out for the Club call-sign MN0VFW, as several keen members will be active from Coney Island, a small wooded island on Lough Neagh, the largest inland waterway in the British Isles. While Coney does not qualify for IOTA, we hope to have some fun giving away points during the Islands contest. Our website www.muarc.com lists all the usual club info plus many photos of our activities.

DX News

Bill K9HZ will be QRV from St Lucia as J68HZ from 4 - 19 August. The IOTA reference is NA-108 and he will be active on all bands 40 - 6m. QSLs go via his home call.

Stefan DL4ST is in Afghanistan until the end of September. He is active as T6SS and so far has been worked mainly on 20m.

For those that missed the recent 9M0L DXpedition to Spratly Island there is another opportunity coming up to work this quite rare DXCC entity. From 7 - 13 August John 9M6XRO and Steve 9M6DXX will be active from Spratly using the callsign 9M4SLL. They will be on 80 - 10m using CW, SSB and RTTY. QSL manager is M0URX.

A multi-national group will activate the Comoros Islands from 8 - 20 August. The callsign will be D64K. QSL info is via IV3DSH and full details of the expedition can be found on <www.d64k.net>

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on

085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Ron Hendershot Keeps Festival On One Frequency:

Posted: 28 Jul 2012 05:21 PM PDT
http://www.eham.net/articles/28694

From his house on a ridge south of Faircrest Street SW, Ron Hendershot has his ear to the world. An antenna, towering 50 feet like a spindly aluminum pine tree, shoots his signal into the sky and channels invisible waves from around the planet to his cluster of radios. Hendershot has been a licensed amateur radio operator for more than 30 years and said he has contacted ham operators in roughly 250 countries and territories around the world. Come Hall of Fame time, Hendershot will tune his ear closer to home, as his radio room becomes home-base for the communication network that connects volunteers working the Timken Grand Parade. This is Hendershot's eighth year overseeing the dozens of ham operators strung along the parade route from downtown to 25th Street NW. The formal title is Net Control Operator. It means Hendershot coordinates communication between the parade marshals and organizers and provides a link to police and EMS services. He also keeps an eye out for storms.

# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
23 - 29 July 2012

Solar activity was at very low to high levels through the period.
The summary period began at very low to low levels from 23 - 26
July, with multiple low level C-class events observed. An increase
to moderate levels was observed on 27 July, as Region 1532 (S22, L=
183, class/area Fho/510 on 28 July) produced an M2/Sf x-ray event at
1726 UTC. Associated with this event were distinct radio frequency
bursts as well as a Type II (estimated shock speed of 2099 km/s) and
Type IV Radio sweeps, as well as a coronal mass ejection (CME).
After careful analysis, the associated CME was determined to not be
Earth directed. On 28 July, and increase to high levels was observed
as Region 1532 produced an M6/2n x-ray flare at 28/2056 UTC.
Associated with this event were both Type II (estimated shock speed
of 1387 km/s) and Type IV radio sweeps, discrete radio frequency
spikes, and a 370 sfu Tenflare. Imagery supported a CME liftoff with
this event, however due to the location of Region 1532, very little
effects are expected at Earth. On the last day of the forecast
period, 29 July, a return to moderate levels was observed, as Region
1532 produced an M2/1n x-ray event at 29/0622 UTC.

A greater than 10 MeV proton event at geosynchronous orbit began at
23/1545 UTC, reached a maximum flux of 12 pfu at 23/2145 UTC, and
ended at 24/1800 UTC. This event was due to flare activity from old
Region 1520 (S16, L=086) which was almost 40 degrees beyond the west
limb.

The greater than 2 MeV electron flux at geosynchronous orbit was at
high levels from 23 - 28 July. A decrease to moderate levels was
observed on 29 July.

Geomagnetic field activity was at mostly quiet to unsettled levels
throughout the summary period with isolated periods of minor storm
levels observed at high latitudes on 23, 24, and 28 July. Activity
on 23 July was at quiet to unsettled levels with solar wind speeds,
```

as measured by the ACE spacecraft, hovering around 450 km/s. On 24 July, solar wind speeds increased to almost 600 km/s, as a coronal hole high speed stream (CH HSS), became geoeffective. With these elevated solar winds, quiet to unsettled levels were observed with an isolated period at minor storm levels observed at high latitudes. As effects of the CH HSS waned, solar wind speeds declined and remained between 380 and 500 km/s for the remainder of the period. With solar wind speeds around nominal levels, mostly quiet to unsettled levels also prevailed through 29 July.

Forecast of Solar and Geomagnetic Activity
30 July - 25 August 2012

Solar activity is expected to be at low to moderate levels from 30 July - 15 August as Region 1532 and old Region 1520 (S16, L=086) rotate across the visible disk. A decrease to mostly low levels is expected from 16 - 23 August. As Region 1532 rotates back onto the visible disk on 23 August, an increase to low to moderate levels is expected for the remainder of the forecast period.

A greater than 10 MeV proton event at geosynchronous orbit is possible from 30 July - 18 August as Region 1532 and old Region 1520 traverse the visible disk.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels throughout the period since most of the coronal hole structures have dissipated.

Geomagnetic field activity is expected to be at predominantly quiet levels from 30 July - 19 August and 22 - 23 August. Quiet to unsettled levels are expected from 20 - 21 August and 24 - 25 August as weak CH HSS become geoeffective.

DxSpot 1.0.1 now available in the iTunes App Store

Posted: 28 Jul 2012 11:07 AM PDT
http://forums.qrz.com/showthread.php?355742-DxSpot-1-0-1-now-available-in-the-iTunes-App-Store&goto=newpost

Press Release

July 19, 2012

Contact: Bob Chandler, WB2ETR

FOR IMMEDIATE RELEASE

Green Creek Technology, LLC announced today the release of DxSpot version 1.0.1 for iPhone, iPad and iPod touch.

DxSpot is your mobile access into the Amateur Radio DX cluster network. With DxSpot you can connect to the DX cluster of your choice. The internal database supplies the connection parameters to over 300 DX clusters. Once connected enjoy formatted table views of DX spots, DXCC information, connected users, cluster announcements, colorized WWV propagation data, and keep current with the latest DX news.

Please note: This application is for licensed Amateur Radio operators. A valid amateur radio call sign is required. Please refer to http://www.GreenCreekTechnology.com/apps/DxSpot for more information.

Features include:

The DxSpot database contains the connection parameters for over 300 Internet DX ClustersConnection parameters can be customized to access new or private clustersAutomatic cluster logon including optional password entryTelnet access to the cluster consoleAbility to enter cluster commandsMonitors DX spots in real time creating formatted table displaysDisplay colorized WWV propagation dataDisplay users currently connected to the clusterDisplay cluster announcementsAutomatic QRZ.COM WEB page search by DX, spotter or User call signsDXCC entity display containing: DXCC country name, flag, DXCC prefix, entity number, continent, CQ / ITU zones, latitude/longitude and GMT time offsetDXCC entity displayable on the world mapDisplay DX news from the Ohio/Penn DX (OPDX) bulletin

Device Requirements:

iPhone, iPad and iPod TouchRequires IOS 3.2 or later1.2 MB

Pricing and Availability:

DxSpot is available worldwide exclusively through the iTunes App Store and priced at $3.99 (USD).

For more information, visit us online:

DxSpot: http://www.GreekCreeekTechnology.com

iTunes Download: http://itunes.apple.com/us/app/dxspo...6666?ls=1&mt=8

Conversation with an Astronaut:

Posted: 29 Jul 2012 05:01 PM PDT
http://www.eham.net/articles/28695

Amateur radio enthusiasts had a chance to have a conversation with Marc Garneau, the first Canadian astronaut. Amateur Radio Society president, Tom Newell talks about Garneau's accomplishments. "Dr. Garneau is kind of Canada's pride, being our first astronaut. He's also set kind of a road map with the Canadian Space Agency for future space development and flight for Canada. He's a pretty key person," he said. Garneau was selected out of about 4,300 people, has flown on three separate missions and served as president of the Canadian Space Agency from 2001 to 2006. Garneau appeared through video feed to the theatre room at the Lake of the Woods Discovery Centre.

DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

1S, SPRATLY ISLANDS, AS-051
John,9M6XRO, and Steve,9M6DXX, will be active with two stations and verticals from Pulau Layang Layang (Spratly Islands, AS-051) signing 9M4SLL in CW, SSB and RTTY on 80-10m from Aug 7-13. Note: 9M4 is issued to special event stations that may be anywhere on Malaysian territory. QSL via M0URX (OQRS), LoTW. See: http://m0urx.com/9m4sll

DL, GERMANY
The special event station DR50DTANGO (special DOK 50DT) celebrates the 50th anniversary of the district Swabia (T) until the end of the year.

G, ENGLAND, EU-005
The South Essex Amateur Radio Society will be operating the special event station GB1HF close to the 5 km Olympic mountain biking course at Hadleigh Farm in South Essex, England (WLOTA 1841) until Aug 23. QSL via G4RSE. See also: http://www.southessex-ars.co.uk
---
The Wimbledon & District ARS uses the special call GX3WIM during their summer camp until August 5. QSL via G4WYJ.

The Pontefract & District Amateur Radio Society (FISTS #14041) will be QRV as GB0YD from Yorkshire on Yorkshire Day (Aug 1). QSL via G0BPK.

The special event station GB2012RA has been issued to the Vintage Operating Group in Woolwich (WLOTA 1841, Loc IO91vl) for the period of the Olympic Shooting (July 28-Aug 5). QSL via bureau.

The special event station GB2012OSP (OSP stands for Olympic Sailing Portland) has free public access and a good view of the olympic sailing events from Portland Heights till Sep 9. QSL unfortunately only direct.

JW, BEAR ISLAND, EU-027
Erik,LA2US, is active as JW2US from Bear Island (EU-027) until Nov.
He operates mainly SSB with some CW on 40m-10m.
Only eQSL? This would be very disappointing for many DXers.

SP, POLAND
The special event station SN7PW remembers the uprising in Warsaw every
year from Aug 1 until Oct 2. QSL via SQ7GDS.

The scout station 3Z70ZK will be QRV from Aug 1 until Oct 28.
QSL via SP5ZRW.

TI, COSTA RICA
Bob,N6OPR, and Terry,N0TW, announced to be active as TI5/K6MQ on HF
from Tarimba from Aug 1-8. They want to take part in the Ten-Ten
Summer Phone QSO Party (Aug 4/5) also. QSL via N0TW.

UA1, EUROPEAN RUSSIA
The special event station R1812SM will be QRV from various battlefields
in the Smolensk region celebrating the 200th anniversary of the French
invasion in August. QSL via RV3LZ.

The special callsign R10RLHA will be used to celebrate the 10th jubilee
of the Russian LightHouses Award program. Expect activity from several
lighthouses in SSB and CW on 40m-10m during August. QSL via RA1QY.

VE, CANADA
The special event station XL31812 commemorates the Bicentennial of the
War of 1812 from Aug 3-5. The station will be QRV from Fort Amherstburg
(built in 1796, now Fort Malden) located in Amherstburg/Ontario.
QSL via VA3CSS.

The 34th annual Canal Days Marine Heritage Festival will be held in
Port Colborne located on the historic Welland Canal from Aug 3-6.
The festival features tall ships, boat cruises, marine museum displays,
a car show and several other attractions. The Niagara Peninsula Amateur
Radio Club (NPARC) is taking part in the festival by operating the
special event station VE3WCD (Welland Canal Days) on 7250, 14250,
21250 and 28250 kHz from Aug 4-5. QSL via bureau.
See also: http://www.nparc.on.ca/content/home

YO, ROMANIA
The special event station YQ0BIKE is working in CW, SSB and digital
until Aug 12 on the occasion of the "Cycling tour of Szeklerland".

ZA, ALBANIA
Tevfik,TA1HZ, hopes to become active as ZA1TC from Durres from Aug 1-7.
He plans to take part in the European HF Championship.QSL via homecall.

RTTY OPs wanted: The Rhein Ruhr DX Association (RRDXA) looks for more op's
for CR3L in the upcoming CQWW RTTY Contest on the last weekend of
September. Please contact Hans,DL1YFF, at dl1yff@gmx.de
See also: http://www.CR3L.de

CW OPs wanted: Gabriele,I2VGW, is looking for some CW operators for his
V84SMD DXpedition to Brunei (Nov 11-23).
Please contact him via e-mail to gabrielei2vgw@gmail.com

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Aug 4 European HF Championship
Aug 4/5 DARC UKW Summer Fieldday
Aug 4/5 North American QSO Party

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
EU-001, SV5, Dodecanese: Roberto,SV5/I2RNJ, and Piero,SV5/IK2IHY, will be
QRV working holiday style from Rhodos (Loc KM46ci, GIOTA DKS-006,
MIA MGD-028, WLOTA 0045) from Aug 4-11. They plan to work mainly in SSB
with their IC-706 (100w) and multiband dipole. QSLs via homecalls.
See also: http://i2rnj.jimdo.com/english/activity/rhodes-greece

EU-014, TK, Corsica Island: Corsica is the third stop on the round trip of
Jack,IZ3DBA. Listen for TK/IZ3DBA in CW and SSB on HF from Aug 7-13.
QSL via IZ3DBA.

EU-023, 9H, Malta group: Malta (Bugibba, MIA MM-001, WLOTA 111, Loc JM75FW)
will be the holiday destination of Mario,IK0PEA, from Aug 5-17. He will
work as 9H3EA in SSB and digital modes on the HF bands and 6m.
QSL via IK0PEA.

EU-051, I*9, Ustica Island: Stefano,IV3LZQ, is going to spend his holidays
on Ustica Island (IIA PA-001, MIA MI-116, WLOTA 0848) from Aug 1-11.
He plans to work as IE9/IV3LZQ in CW on 80m-10m.
QSL only direct via homecall.

EU-057, DL, Mecklenburg-Vorpommern State group: Andreas,DL6AP/p, will be
QRV from Ruegen island on Aug 2/3. QSL via homecall.
See also: http://www.cqgma.eu

EU-096, OH1 Turku-Pori District Group: Jukka,OH3OJ/p, is working in CW/SSB/
PSK/RTTY on 80m-6m from Kaurissalo Island from Aug 1-6. QSL via bureau.

NA-108, J6, St. Lucia: Bill,K9HZ, will once again be active as J68HZ from
Labrelotte Bay/Castries on St. Lucia (WLOTA 1336, Loc FK94MB) from
Aug 4-19. He will hand out IOTA points in CW, SSB and RTTY on 40m-6m.
His equipment will be an Elecraft K3 and a 3 ele beam and wires.
QSL only direct via K9HZ.

NA-111, W2, New Jersey State group: Members of the Old Barney ARC will be
QRV as N2OB Barnegat lighthouse (Admiralty J1220, ARLHS USA-039, Loc

FM29WS) on Long Beach Island (USi NJ001S) on Aug 4 (maybe also Aug 5).
Emphasis will be put on 40m and 20m SSB. QSL via N2OB.
See also: http://www.obarc.org

NA-148, W1, Massachusetts State North (Barnstable to Essex County) group:
Members of the Cape Ann ARA will be active as W1T from Thacher Island
(USi MA001S, WLOTA 0924) from Aug 3-6. They will also activate both
lighthouses on the island: Cape Ann [Thacher Island South, ARLHS
USA-105, TWLHD WLH K-031, Admiralty J0276) and Thacher Island North
(ARLHS USA-1027, TWLHD WLH K-167, Admiralty J0277).
QSL only direct via W1GLO. Logs will be uploaded to the LoTW.
See also: http://caara.net/main

SA-012, YV7, Nueva Esparta State group & SA-035, YV5, Los Roques Island:
Alex,UA9YAB, and Alex,UA9YPS, will be active from two Venezuelan island
groups from Aug 2-9. They will sign YV7/homecall from Isla Margarita
(SA-012, DIV-062, WLOTA 1085) and YV5/homecall from Los Roques (SA-035,
DIV-037, WLOTA 1085). QSLs for all calls via homecalls.

non IOTA: William,WA2CG, will be QRV in SSB on 20m (14270 kHz) from
Sandy Hook lighthouse (ARLHS USA-731) from August 1-8. QSL via WA2CG.

ATTENTION: Illinois QRP'ers Deecatur Illinois Meeting

Posted: 30 Jul 2012 10:35 AM PDT
http://forums.qrz.com/showthread.php?355977-ATTENTION-Illinois-QRP-ers-Deecatur-Illinois-Meeting&goto=newpost

The Cenois Amateur Radio Club in Decatur, Illinois is holding a Tailgate
Party on September 8, 2012 in Mt. Zion, Illinois. Parking lot of the Four
Star Family Restaurant. 1100 N. State Highway 121 Mt. Zion, IL 62549
Noon to 4 p.m.

Free Admission and there is no charge for selling but you have to bring
your own tailgate.

QRP'ers - 1st Annual Central IL Branch of the 4 States QRP Club Meeting.
Any and all interested QRP'ers and kitbuilders should plant to attend.
We're planning on having at least one operating QRP station and there will
be kits for sale from the 4SQRP Club.

GB2RS NEWS

Sunday 29th July 2012

The news headlines:

Special Olympic Prefix update

Olympic Flagship 2 Oscar stations on the air

Voting taking place for new IARU members

A number of UK amateurs have asked for clarification on the applicability of the special letter O prefix. Despite being very busy with the Olympics, Ofcom has responded to the Society's request on this matter. It has been explained that the special prefix is a temporary one that is only available to individuals and clubs where the licensee's callsign has not been changed by a Notice of Variation, NoV. Thus, it is not applicable to Short Contest Calls or Special Event Station callsigns, as these require the use of a callsign different from that of the NoV holder. For licence variations such as the 5MHz and 500kHz NoVs it would be allowable to use the special O prefix, as the licensee's callsign has not been varied by the NoV. Amateurs should be aware that this clarification does not affect the other terms and conditions within the licence, or a related NoV. Note too that the use of the special prefix started at 00.00BST on 21 July and finishes at 23.59BST on 9 September. Radio amateurs in the UK may still apply for an NoV to use the letter O in place of their regional identifier. Details are on the RSGB website, www.RSGB.org. Anyone logging stations using this special prefix can apply for the Olympic QSO Party Award. Again, full details are on the RSGB website.

Both of the Two Oscar Olympic Flagship Special Event Stations are now up and running. You can follow the progress of Two Oscar Twelve L in London on Twitter, with tweets showing new countries worked and the number of stations in the log. Two Oscar Twelve W in Wales also has a Twitter feed. Details can be found on their websites, just search for the callsigns 2 Oscar 12L and 2 Oscar 12W. A number of other special event stations are celebrating the Olympics, some of which are described later in this news report.

The Federation of Radio Sport of Azerbaijan and the St Vincent & Grenadine Amateur Radio Club are being proposed for membership in the International Amateur Radio Union. The International Amateur Radio Union Calendar notes that the groups have declared that they can satisfy the requirements of the IARU Constitution and Bylaws. As such,

their proposed membership has been put up to the vote by all International Amateur Radio Union member societies, who have until 1 November to cast a ballot.

The 15th international EME conference is being held at Churchill College Cambridge between the 15th and 19th August. It is hosted by the UK Microwave Group. This is the first time that this conference has been held in the UK, and it provides an opportunity to learn about this most technically challenging aspect of our great science based hobby. Earth Moon Earth communications has much in common with radio astronomy and deep space communications and, in addition to EME specific lectures, there will be presentations on both these subjects. Two Nobel Physics Laureates from the world of Radio Astronomy will be present at the conference. Joe Taylor, K1JT is a keen EME enthusiast and will be presenting a paper on MAP65, while Professor Antony Hewish, FRS, is the speaker at the conference gala dinner on Saturday 18th. Day passes and a range of accommodation packages from one to four nights are available. With over 150 delegates and 60 partners from 5 continents already registered, this promises to be a great event. All those wishing to attend must pre register for this conference before 1st August. See www.eme2012.com for full details.

Michael, M1CCF had his Kenwood TS-50S and AT-50 tuner stolen last weekend at the W&P Show, at Beltring, in Kent, while operating the special event station GB4WP. The mounting bracket, power and connecting leads were not with the set when stolen. If you get an inquiry for these items, please contact Michael via m1ccf@talktalk.net.

Copyright © RSGB 2012. Not for public release before Monday 30 July 2012 except as a GB2RS broadcast. And now for the details of rallies and events for the coming week

Today, 29 July, the Horncastle Summer Rally takes place at the Horncastle Youth Centre, Willow Road, Horncastle, Lincolnshire LN9 6DZ. Doors open at 10.30am and admission is £1.50. Tables are £5 and anyone interested should contact Tony, G3ZPU on 01507 527 835.

Also today, 29 July, the Blind Veterans UK Radio & Computer Rally will take place at St Dunstan's, Ovingdean, Brighton, East Sussex BN27BS. Doors open at 10.30am and admission is £2. Tables are £10 and anyone interested should contact Eddie on 01273 300 772.

On 5 August the Chippenham & DARC Radio Boot Sale takes place at the Chippenham Sea Cadet HQ, off Long Close, Chippenham, approximate post code SN15 3JZ. Doors open at 9am for booters, £5 per boot, foot entry on gate is £1, with under 16s free. There is an on site car park and visitors are asked not to park in Long Close.

King's Lynn ARC Rally & Car Boot will be held on 5 August at Gaywood Community Centre, PE30 4DZ. Doors open at 10am and admission is 2. There will be trade stands and a car boot area. More details from Ray, G3RSV on 01553 849 700.

On 5 August the Lorn Radio Amateur Rally will be held in Crianlarich Village Hall, Crianlarich, near Oban FK20 8QN. Admission is £1 and there will be trade stands, a Bring & Buy and a car boot area.

Now for the news of special events

Today, South Tyneside Amateur radio club is operating from 11am to 4pm at Marine Walk, Roker, Sunderland for RNLI Harbour Day. Using GB1SLB, operation will be on 10 to 40 metres. Details from Gerard, M3XYP, whose details are on QRZ.COM.

Pontefract and District Amateur Radio Society will put GB0YD on the air for the eighth year running to celebrate Yorkshire Day on 1 August. They will be operating from Blakey Ridge, near the North Yorkshire town of Kirbymoorside. This is WAB Square SE69 and Locator IO94MJ. The all-weather station will be ready to greet walkers and other visitors, including patrons of the nearby Lion Inn public house. They will be on the air from dawn till dusk, operating on 80 to 10m plus 4m and 2m. All contacts will be confirmed by QSL via the bureau.

GB2VET will be on the air today for Veteran's Weekend, held at the East Park, Holderness Road, Hull. The event is run by the East Yorkshire branch of the Royal Air Force ARS. The station will be mainly active on 20, 40 and 80 meters as well as VHF, UHF and D-Star. At 3pm today, weather permitting, there will Parachute Regiment Freefall Team display. Other attractions include WW2 battle re-enactments and a 1940s show band.

In addition to the Flagship stations mentioned earlier, several other Olympic special event stations are one the air as a celebration of the London 2012 Olympic and Paralympic Games. In Manchester and Warrington there are three. GB2012MS is at the Metro-Vicks Rugby & Cricket Club house, off Glebelands Road, Manchester M33 6LR. GB2012MW is at West Manchester Radio Club, Meanley Road, Astley, M29 7DW. GB2012MV, based at Grappenhall Community Centre, Warrington WA4 2SG has a Twitter feed with details of the stations worked and their visitors, such as the RSGB President. GB2012OSP is on the air from Fancys Family Farm, Portland, DT5 1FR, and South Essex Amateur Radio Society is operating GB1HF close to the 5km Olympic mountain biking course at Hadleigh Farm in South Essex.

Copyright £ RSGB 2012. Not for public release before Monday 30 July 2012 except as a GB2RS broadcast. And now the DX news compiled from 425 DX News and other sources

This weekend, TC0KLH will be active from Kefken Island lighthouse during the IOTA contest.

HB9EOU and HB9CVC will be on the island of St Barthelemy until 4 August. They will use the callsign TO2D. The IOTA reference is NA-146.

A multi-national team will be on the air from St Paul Island off the coast of Canada until 1 August. St Paul Island is a separate entity for the DXCC Award and the callsign to be used is CY9M. They will be active

on all bands from 6m to 160m and the QSL Manager is M0URX.

Two Croatian amateurs are with the NATO-led troops in Afghanistan. They are Maj, 9A7TJ and Vlado, 9A3QM and they can be heard as T6TJ and T6VT respectively until the end of September. QSLs for both operators go via 9A6AA.

Zik, DK8ZZ will be active again as 9A/VE3ZIK from Croatia until 18 August. QSL via DK8ZZ, bureau and Logbook of The World.

John, 9M6XRO and Steve, 9M6DXX will be operating as 9M4SLL from Pulau Layang Layang, Spratly Islands, which is IOTA reference AS-051, from 7 to 13 August. Activity will be on 10 to 80m using CW, SSB and RTTY. There will be two stations with linear amplifiers to vertical antennas on the edge of the ocean. QSL via M0URX, please use his online QSL request service for both direct and bureau cards, located at http://m0urx.com/oqrs.

The final list of operators for the 8-20 August D64K expedition to the Comoro Islands, AF-007, has been announced. Operator details, QSLing policy and other information can be found at www.d64k.net.

Steven, DO6UL will be active as DO6UL/P from Usedom Island, EU-129 until 10 August. QSL via his home callsign, direct or via the bureau.

Now the contest news

The 24 hour IOTA Contest finishes as 1200UTC today, 29 July. The exchange is signal report, serial number and IOTA reference, which is EU-005 for mainland Great Britain and EU-115 for mainland Northern Ireland.

The times given for the 80m Sprint contests in the August RadCom were incorrect. They have all been shortened to 1900-2000UTC. The 2m Backpackers on 4 August should have read 1300-1700UTC. The exchange for this 4th contest in the series is signal report, serial number, locator and postcode.

Also on the 4th, the 144MHz low power contest takes place from 1400 to 2000UTC. Using all modes the exchange is also signal report, serial number, locator and postcode.

The following day, on the 5th, the 432MHz low power contest takes place from 0800 to 1200UTC, Using all modes, the exchange is signal report, serial number, locator and postcode.

Copyright © RSGB 2012. Not for public release before Monday 30 July 2012 except as a GB2RS broadcast. RoPoCo 2 is the first of this month's HF contests. It takes place for 90 minutes, 0700 to 0830UTC on Sunday 5th, using CW only on the 80m band. In your first QSO you send a signal report and your own full postcode. For subsequent QSOs you send the postcode of the station you worked in your previous QSO. This contest relies on accuracy of the exchange, so if you receive a postcode that

you know is wrong, eg impossible, or a corrupted version of your own,
you should pass it on as you receive it, not corrected or amended.

The UK Microwave Group's Microwave Field Day also takes place on 5 August from 0900 to 1700UTC. Using the 1.3 and 10GHz bands, the exchange is signal report, serial number and locator.

And now the solar factual data for the period from Friday the 20th to Thursday the 26th of July, compiled by Neil Clarke, G0CAS on Friday the 27th of July.

With no large complex sunspot regions visible, solar activity was very low to low. Several small groups produced the occasional C class solar flares which took place on the 21st, 23rd, 24th and 26th. The largest solar flare was a C4, which took place on the 24th. Solar flux levels increased from 90 units on the 21st to 115 by the 26th. The average was 99 units. The 90 day solar flux average on the 26th was 125 units, that's two units down on last week. X-ray flux levels increased from B1.7 units on the 21st to B3.5 units by the 26th. The average was B2.8 units. Geomagnetic activity was at quiet to unsettled levels throughout the period. A weak coronal hole disturbance and maybe a slight glancing blow from a coronal mass ejection contributed towards the sight increase in activity. The only quiet day was the 26th, with an Ap index of 3 units. The average was Ap 9 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 330 and 600 kilometres per second during the period. Particle densities increased briefly to 14 particles per cubic centimetre during the 14th, otherwise, densities were low. Bz varied between minus 7 and plus 8 nanoTeslas every day, except for the quietest day, the 26th, which varied between minus 3 and plus 4 nanoTeslas.

And finally the solar forecast. This week the slightly more activity side of the Sun is expected to be looking our way. Solar activity and solar flux levels will not reach as high as they did on the last rotation. Solar activity is expected to be low, with only a small chance of increasing to moderate levels. Solar flux levels should be in the 130's for most of the week. Geomagnetic activity is expected to be at `active' levels for the next few days due to a recurring coronal hole. However, the coronal hole on this rotation is smaller than on the last rotation. Quiet conditions should return by midweek but although an Earth directed coronal mass ejection is unlikely, it cannot be totally ruled out. Paths this week to South Africa should have a maximum usable frequency with a 50 per cent success rate of around 30MHz. The optimum working frequency with a 90 per cent success rate will be about 24MHz. The best time to try this path will be between 1200 and 1600 hours. Sporadic-E is expected to take place most days between 28 and 70MHz. Occasional openings on 144MHz are still possible but, in general, will be less intense and not as widespread as at the peak of the season.

And that's all for this week from the propagation team.

Copyright © RSGB 2012. Not for public release before Monday 30 July 2012 except as a GB2RS broadcast.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies can be found

on the RSGB website, including email addresses and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. Wythall Radio Club is holding club net on 145.225MHz today and next Sunday. On Tuesday there's a free 'n' easy evening at the club. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications is holding a club net on Monday from 7pm, on 144.165 USB, vertical polarisation. On Wednesday there is a M3+M6 club net on GB3FR from 7.30pm. Friday sees the regular club net on GB3FR from 8pm, plus the fourth leg of the 2E0ITV Commemorative Multi-Mode Competition, running between 1900 and 2230. For more information contact the FELCC Information Line on 07554 362 020.

South Birmingham Radio Society has an outdoor social event and possible barbecue on Monday. On Wednesday there's a talk in the main hall, plus a Morse class. Friday sees shack and aerial work. Contact Don, on 01214 581 603.

Coventry Amateur Radio Society is having a talk by M0URX on Friday on the Timor-Leste DXpedition. On Saturday they are operating GB4BLC at Weston Lawns, Bedworth Road, Bulkington. Contact John, G8SEQ, on 07958 777 363.

On Friday 3 August Wythall Radio Club is having a social evening in the shack on Friday. On Saturday they start their weekend Foundation course & exam. Details from Chris, G0EYO, on 07710 412 819.

Now we return to the traditional listing in date order. On Sunday 29 July Lincoln Short-Wave Club is taking part in the IOTA contest from the shack. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Monday 30 July Gloucester Amateur Radio & Electronics Society is closed. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Tuesday 31 July Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 31 July Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 1 August Kidderminster & District Amateur Radio Society is holding an open evening and recruitment drive. All local radio enthusiasts are invited to attend. Meetings are held at the Gilt Edge Club, Zortech Avenue, on the 1st Wednesday of every month. Contact G4CTU, on 01562 823 966.

On Wednesday 1 August Midland Amateur Radio Society is holding a general meeting and putting the shack on the air. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 1 August Telford & District Amateur Radio Society is putting GX3ZME on the air and holding a committee meeting. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 2 August Central Radio Amateur Circle is having a night on the air on 145.300MHz from 20:00. Details from Martin Hallard, G1TYV, by email to radio-circle@live.co.uk.

On Thursday 2 August Salop Amateur Radio Society is holding a table top sale. Details on the club website at www.salop-ars.org.uk.

Copyright © RSGB 2012. Not for public release before Monday 30 July 2012 except as a GB2RS broadcast.

NEWS FOR THE NORTH OF ENGLAND We start with clubs that have several events this week. South Manchester Radio and Computer Club holds its monthly technical forum on Monday. Thursday sees a night on the air. Details from Ron, G3SVW, on 01619 693 999.

On Wednesday Hornsea Amateur Radio Club is having a talk on EZNEC antenna modelling software by G3RMX. On Sunday 5 August they are taking part in the RoPoCo CW contest. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

Now we return to the traditional listing in date order. On Monday 30 July Angel of the North Amateur Radio Club is having a talk on a homebrew automatic ATU by Zoltan Derzsi. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Tuesday 31 July Morecambe Bay Amateur Radio Society is holding a barbecue and fun night. Contact Sheila, on 07867 516 836.

On Tuesday 31 July Otley Amateur Radio Society is on the air and holding a Morse class. Contact Paul, 2E0PAK, on 07768 996 370.

On Wednesday 1 August Denby Dale Radio Club is running special event station GB6YD for Yorkshire Day from Cartworth Moor, plus a club night. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 1 August Goole Radio and Electronics Society is on the air on QRP. Contact Ken, G6YYN, on 01757 638 539.

On Saturday 4 August Tynemouth Amateur Radio Club commences its Olympic Field Day weekend event using its Olympic special callsign. Contact Bob, M6KLO, by email to mail@g0nwm.com.

On Friday 3 August South Lancashire Amateur Radio Club commences its 3-day on the air event at the club field. For more information contact Allan, 2E0RAG, on 07533 970 841.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday 31 July Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Thursday 2 August Aberdeen Amateur Radio Society is holding a junk sale. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Friday 3 August Ayr Amateur Radio Group commences its weekend event, transmitting at Ayr Flower Show. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Friday 3 August Borders Amateur Radio Society Club is meeting in a change from its normal date. Details from Ian, GM8IIO, on 07510 242 615.

On Friday 3 August Cockenzie & Port Seton Amateur Radio Club is having a normal club night. More information from Bob, GM4UYZ, on 01875 811 723.

Copyright © RSGB 2012. Not for public release before Monday 30 July 2012 except as a GB2RS broadcast.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week. Chesham & District Amateur Radio Society is holding a general meeting on Wednesday, then on Saturday they commence their weekend of activity for the RSGB VHF/UHF Low Power Contest. More details from Terry, G0VFW, on 01442 831 491.

Worthing & District Amateur Radio Club is at the Blind Veterans UK Radio Rally at St Dunstans today. On Wednesday there's a talk by John, G3WZT, on vector network analysers and their uses. Sunday 5 August sees the monthly breakfast meeting at The Goring Caf© from 9am, followed by special event station GB4SLB at Selsey Lifeboat Station. Contact John, G8FMJ, on 01273 593 232.

Brede Steam Amateur Radio Society is at the shack on Tuesday and next Saturday. For more information contact Steve, on 01424 720 815.

Crystal Palace Radio and Electronics Club is holding its summer social on Friday. The Foundation course continues on Saturday. Contact Bob, G3OOU, on 01737 552 170.

Farnborough & District Radio Society is running an 80 metre CW net on 3.570MHz from 1 to 2pm on Friday, followed by a Top Band net on 1.995MHz from 8 to 9pm. Next Sunday sees a slow CW net on 3.570MHz from 1 to 2pm. Contact Neville, G3SPD, on 01252 404 816.

Wimbledon & District Amateur Radio Society is holding a barbecue at the Annual Camp on Friday, which is being dismantled on Sunday 5 August. Contact Andrew Maish, G4ADM, on 02083 353 434.

Now we return to the traditional listing in date order. On Sunday 29 July Waterlooville Amateur Radio Club is having a talk on World War 2 radar systems. Details from Rich, G4IBW, on 0772 225 002.

On Tuesday 31 July Chelmsford Amateur Radio Society is running a club net from 8.30pm. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 31 July Stevenage & District Amateur Radio Society is having a talk by G4BYE. Details from Martin Juhe, M0XJP, on 07973 793 770.

On Wednesday 1 August Norfolk Amateur Radio Club is having a talk by Rev George Dobbs, G3RJV, on the why and how of QRP. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday 1 August Southdown Amateur Radio Society is operating at the Hailsham shack. Details from John, G3DQY, on 01424 424 319.

On Thursday 2 August Bredhurst Receiving and Transmitting Society is holding a club night, with CW practice from 8.30 to 9pm. Contact Charles, G4VSZ, on 0798 224 4788.

On Thursday 2 August Burnham Beeches Radio Club is holding its 75th Anniversary barbecue. Contact Dave, G4XDU, on 01628 625 720.

On Thursday 2 August Cray Valley Radio Society is visiting 2012L, the station and exhibition of amateur radio to mark the London Olympics. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday 2 August Horndean & District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday 2 August Vange Amateur Radio Society is holding a junk sale. Contact Steve, G0KVZ, on 01268 552 606.

Copyright © RSGB 2012. Not for public release before Monday 30 July 2012 except as a GB2RS broadcast. On Friday 3 August Mid-Sussex Amateur Radio Society is having a radio night and table top sale. Details from Rob, 2E0RJA, on 01444 232 129.

On Friday 3 August Wey Valley Amateur Radio Group is having an introduction to data modes by Andrew Vine, M0GJH. Details are on the web at www.weyvalleyarg.org.uk.

On Saturday 4 August Loughton & Epping Forest Amateur Radio Society commences its second field weekend of 2012 at the Rainbow & Dove, where it is holding its 50th Anniversary barbecue. Contact Marc Litchman, G0TOC, on 02085 021 645.

On Saturday 4 August Hilderstone Radio and Electronics Club is running an all day WOK event at Westgate Community Hall. Contact Chrissie

Turner, by email to hilderstoneclub@gmail.com.

NEWS FOR THE SOUTH WEST On Monday 30 July Bristol RSGB Group is having a Bring and Buy and natter night. Details from Robin, G3TKF, on 01225 420 442.

On Monday 30 July Riviera Amateur Radio Club is holding a portable RV with MX0RIV on the air. Contact Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

On Wednesday 1 August Taunton & District Amateur Radio Club is holding a social evening. More information, including venue details, from Peter Robinson, G0EYR, on 07811 635 819.

One cannot help but wonder "Why is there the need for all these rules,
regulations and restrictions?"

Would it not have been far easier simply (and without any need for an
NoV) to allow all UK radio amateurs to use the special 'O' ™©® in
the their prefix?

I don't see that it matters two hoots in this day and age.....nobody gives a toss about rules.....

"Despite being very busy with the Olympics, Ofcom has responded to the
Society's request on this matter."

So they could have simply said "Use the O prefix for the duration of
the events"

Having been a loyal member since 1959, they've got my particulars
anyway. If they really wanted details of 'outsiders', they maybe could
have persuaded OFCOM to make it so that only non-members had apply for
an NoV. ;o)

Ham Radio Deluxe v5.24.28 Release Announcement

Posted: 30 Jul 2012 02:09 PM PDT
http://forums.qrz.com/showthread.php?356006-Ham-Radio-Deluxe-v5-24-28-Release-Announcement&goto=newpost

HRD Software, LLC announces the release of Ham Radio Deluxe 5.24.28 at http://www.ham-radio-deluxe.com.

Mike Carper, WA9PIE, said, ☐We☐ve doubled the number of testers and the results reflect the level of effort they☐ve put into it. The response we☐re gotten with the ☐soft launches☐ shows the long hours invested by our development team have made v5.24.28 the most solid release ever.☐

Respected DXer, contester and DX himself, Jim Kehler - KH2D, has a background in software development and said, ☐This version is light years ahead of anything I've seen so far. It has a vastly improved cluster interface and a DXCC picker that is so accurate it will make your record keeping a breeze. The Beta team has outdone themselves with this release. I can't wait to see what v6.0 looks like.☐

Rick Ruhl, W4PC, said, ☐We☐ve completed many v6.0 features and having a solid base to build them on was the most important thing. I☐m always willing to push the release date later to make sure the program is solid. None of the purchasers of the pre-order 6.0 have lost any support time; in fact, the ones that bought in February got an extra 3-4 months of support for 5.x, not a bad deal for $59.95.☐

HRD will also be sending out a newsletter in the next few weeks to keep the customers updated on the progress of v6.0.

This is the final release of the v5.x product that will continue to be available for free. The company has continued parallel development of v6.0 and intends to release it by the end of summer 2012.

Version 6.x will have many new features which include FSK support, a new QSL and awards tracking interface, improved worked status alerting, support for AR Cluster, label printing, and the Super Sweeper in Digital Master. Super Sweeper will allow multiple signals in multiple modes to be decoded in a single window. New radios and rotor controllers are already implemented in the 6.0 pre-beta the beta team has.

The discounted pre-buy price of $59.95 for v6.0 is being extended for 30 days from this press release. The price will then increase to $69.95 until the v6.0 product ships. This includes technical support for v5.2x. Those that have purchased or will purchase the v5.2x support will receive one year of support from the date of the v6.0 release. The retail price for v6.0 will be $79.95 when the v6.0 product ships.

You can purchase and download the product at
